The resumption of specie payments in 1838 was premature. The banks were unable to satisfactorily meet the demands of business, and were managed with care in order to prevent the issuing of more notes than they could meet. They were under disadvantage through the law which prevented the circulation of small notes of less than five dollars. They were compelled to pay checks and drafts upon them in which there were balances beyond five dollars in coin, and it was estimated towards the end of the year that in Philadelphia alone those institutions had paid out over one hundred thousand dollars in small balances. While they were contending against adverse circumstances the Bank of the United States, on the 9th of October, stopped specie payments, a movement which was immediately followed by other banks in the city and throughout the Union. The reasons given for this act were not the true ones. The Bank of the United States was actually insolvent at the time, but it was only stated that it was embarrassed in consequence of the large balance of mercantile exchange with Europe which existed against the United States, and which caused a heavy drain of specie, and which was also increased by large demands against the banks of the Western and Southern States. As there was likelihood of another issue of "shinplasters," or small notes, Governor Porter promptly interposed an obstacle by a proclamation warning all persons that any attempt to violate the law prohibiting such issues would be prosecuted and punished. The effect was to keep specie in circulation to a much greater extent than during any previous bank suspension.

In little more than a month a new cause of financial alarm arose. On the 18th of December, in consequence of legal proceedings commenced by the Bank of Kentucky against the Schuylkill Bank, the doors of the latter were closed by injunction. The cause of this proceeding was the filing of a bill by the Kentucky Bank, which charged that the Schuylkill Bank had fraudulently issued more than thirteen thousand shares of the stock of the former institution. The allegation was that the Schuylkill Bank was agent for the Bank of Kentucky in the management of its busi-

ness, and that by reason of this trust and confidence the fraud had been effected. The directors of the Schuylkill Bank insisted that their institution was not liable. Hosea J. Levis, for many years the cashier and latterly the president of the bank, was alleged to be the person who had committed these frauds, which were said to have been consummated without any knowledge of the bank. The grand jury sustained this position in a presentment which charged Levis with perjury, forgery, and conspiracy to defraud. It was also discovered that he had issued a large number of shares of Schuylkill Bank stock without authority, and appropriated the proceeds of the sale to his own use. He had also issued post-notes to a considerable amount and taken special deposits made in the bank to his own use, beside the Kentucky Bank shares, the value of which was computed to be \$393,183.57. Levis fled to Europe, but was brought back and never punished. The suit between the two banks continued, the principal question being whether Levis was not personally the agent of the Bank of Kentucky. The decision finally was against the Schuylkill Bank. The claim of the Bank of Kentucky and the demands of the note-holders were satisfied, but after that nothing was left for the stockholders.

A fire of more than usual destructiveness broke out on the 4th of October in the neighborhood of Chestnut Street wharf on the Delaware. The flames were first noticed in the provision-store of W. C. Stroup, on Delaware Avenue north of Chestnut Street, and extending through toward Water Street. The stock in Stroup's store was calculated to feed the flames, and some adjoining buildings used by oil merchants aided the combustion. A strong wind blew the flames across Chestnut Street, and enveloped two-story buildings between Water Street and Delaware Avenue, and extending to the southeast corner of Front and Chestnut Streets, proceeded down the latter, destroying three or four wholesale stores and their contents. They were stopped by the tall bulwark and thick walls of stores Nos. 57 and 59 South Front Street, the latter occupied by Miesegaes & Unkaert. On Chestnut Street the stores at the northeast corner of Front, extending upward, were damaged. The Napoleon Hotel, northeast corner of Water and Chestnut Streets, kept by John H. Myers, and the Union Line office adjoining were consumed. On the south side of Chestnut Street the Steamboat Hotel was burned. Altogether twenty-three houses were totally destroyed and fifteen or twenty badly damaged. Most of the buildings were old, and some of the warehouses had but small stocks of goods on hand, so that the loss was not estimated at more than three hundred and fifty thousand dollars. The firemen were in great danger by the falling walls. William P. Moreland, a member of the Good-Will Engine Company, aged twenty-eight years, and Thomas Barber were killed, and seven firemen were seriously injured.

On the 14th of October, Martin Van Buren, President of the United States, arrived in the city, and was received by a number of volunteer companies and many citizens, political friends, by whom he was escorted to Sanderson's Merchants' Hotel, on Fourth Street below Arch, to which place the City Councils afterward went to pay their respects. Mr. Van Buren left the city the next day.

A murder occurred on the 31st of September at the most fashionable confectionery establishment in the city at that time, situate in Chestnut Street, between Fifth and Sixth, and kept by James Wood. The victim was his daughter, a woman of more than ordinary personal attractions. Wood's place was popular, and this young girl being the cashier, was extensively known to frequenters of the saloon. Her offense was in marrying Edward Peak, a boot-maker, whose place of business was in the Shakespeare buildings, on Sixth Street above Chestnut. Wood, it is believed, was not aware of the intimacy between Peak and his daughter, and would have been opposed to a marriage between them under any circumstances. They were married privately two or three days before the father was made aware of the facts, to which his attention was called by his daughter's absence from his house for two days. After her return he became desperate. He drank a quantity of brandy to nerve himself to the deed, and, repairing to an upper room, where his daughter was, shot her dead with a pistol. Great excitement in the public mind attended these circumstances. When Wood was tried for the murder the facts were admitted. The defense, which was principally conducted by Peter A. Browne, was the plea of insanity. In support of this the French doctrine that a desire to commit murder was moral insanity was brought forward and urged with great pertinacity. Wood was acquitted.

James Williams, *alias* Lownes, *alias* Dave Seal, was executed in the jail-yard at Moyamensing for the murder of Francis Kearney, a watchman, on the 9th of August. Williams was a colored man, and the deed was committed under treacherous circumstances. Kearney was standing with his brother and sister. Williams approached in an apparently friendly manner, saluted them, and, suddenly drawing a knife, stabbed Kearney so severely that he lived but a short time.

In the summer of this year another watchman was killed in Southwark District. His name was Batt. One night, while on duty at Third and Shippen [Bainbridge] Streets, he was attacked by a negro, who assaulted him with a club and beat him about the head in a dreadful manner. Batt died almost immediately. Upon the arrest of the negro it was found that he had been an inmate of the Insane Department of the Blockley Almshouse, from which he had escaped. His insanity was so obvious that he was never tried. The burial of Batt took place upon a Sunday afternoon at St. Peter's Church, corner of Third and Pine

Streets. A great crowd gathered, and after the body was deposited there were symptoms of riotous intentions against the blacks. A mob assembled on Pas-yunk road and on Fifth Street below South. John G. Watmough, the sheriff, came upon the ground and attempted to persuade the persons present to disperse. They yelled at him and threatened violence, so that he was glad to get out of the way. The mob then came up Fifth Street, intending mischief. Mayor Swift, with a squad of officers, was stationed at Pine and Fifth Streets. Seeing the mob approach, he went toward them with nothing but his cane in hand. With daring courage he seized the ringleader, and despite the murmurs and threats of the others, held on to him and dragged him up the street to the officers. Finally the mob retreated into Southwark and dispersed; but in the evening there were scenes of rioting and attacks upon the houses inhabited by negroes.

Among the consequences of the bank suspension was the failure of Dr. Thomas W. Dyott. An apothecary and druggist, he had in previous years, by attention to business, made some money. Among his other enterprises he had become the owner of the glass-works in Kensington at the mouth of Gunner's Run. These had been considerably enlarged, and an extensive business was carried on, principally in the manufacture of bottles and vials. To these works Dr. Dyott gave the name Dyottville. He devised somewhat extensive plans of government of the establishment, which he said was to be conducted on the manual labor system. Encouraged by success, he set up business as a private banker, and established the Manual Labor Bank, so called, which was not a chartered institution, and was maintained entirely upon the credit and responsibility of Dr. Dyott himself. This establishment pushed out its notes as extensively as possible. A considerable amount were in circulation at the time of the bank suspension of 1837. Dyott was in no worse condition at that time than the banks of the city and county. They could not pay specie for their notes, neither could Dyott. But the difference was that the banks were sustained somewhat in character by their chartered privileges, while Dyott was acting on his individual responsibility and without any backing. He was also under the disability of personal unpopularity among certain classes. The banks were generally considered to occupy the position of suspension by misfortune, and it was agreed that if the people would sustain them with forbearance and sympathy, they could work through their difficulties. Dyott was not cheered by such manifestations in his favor. He was generally denounced as an intentional swindler. Suits were brought against him, to which he could not respond by payments in specie. The notes of the bank, which they boldly refused to pay in coin, went from hand to hand notwithstanding, with nearly the same credit as if they could have been redeemed at the bank-counters dollar for dollar. But Dyott could not hide behind a charter.

He was individually responsible, and finally charges of fraud were brought against him. Indicted for fraudulent insolvency, he was put upon trial on the 1st of February. The investigation consumed four months. On the 1st of June the jury brought in a verdict of guilty. On the 31st of August Dr. Dyott was sentenced to three years' imprisonment in the penitentiary.¹

Governor Porter represented Democratic doctrines while holding the executive chair. The party, by the course of Gen. Jackson in opposition to the United States Bank, was considered hostile to all institutions of that kind. On the assembling of the Legislature, at the session of 1840, the Governor called attention to the bank suspensions of the previous year, and urged some strict measures to compel those institutions to perform their promises. The banks of Philadelphia sent an address to the Legislature in February, in which they declared that they could not with safety resume before the 1st of February, 1841. The Board of Trade confirmed these statements. The Legislature was as much disposed to severity as the Governor, and a resolution was passed directing resumption of specie payments on the 15th of January, 1841, under penalty of forfeiture of the bank charter.

During the suspensions the city was compelled to adopt a somewhat liberal policy with its creditors. The course of the banks had practically driven bank-notes out of circulation. It was the desire of those institutions to get possession of as many of their own notes as possible, and to keep them from going into circulation again. The currency in use was made up of notes from small amounts up to five or ten dollars, issued by the city and district corporations, by various loan companies, some of which were frauds, and by notes of banks of other States. This sort of paper, under the compulsion of circumstances, was received for debts due to the city for taxes and on other claims. It was paid out again from the city treasury with but little difficulty. In January the beginning of a change in this matter was brought about in consequence of a communication addressed to City Councils by Horace Binney. That gentleman represented that he was owner of twenty thousand dollars of city loans, notice of the payment of which had been given. He stated that he did not require redemption, but if it was attempted he would receive nothing but specie or its equivalent. He was willing to allow the loan to stand, or to reloan the amount to the city, but he would not receive depreciated currency as full payment. The matter was sent to the

¹ He did not serve out the whole term, but was pardoned after a time. There was some sympathy for him afterward. It was not established that he had intended fraud. He was conducting his banking operations at a risk as the banks were doing. They, overtaken by the storm, managed to float, but Dyott was swamped. After he came out of prison he resumed his business as a druggist on Second Street, and attended to it faithfully and honorably until his death several years afterward.

finance committee, which reported that there was a large fund on hand composed of the sort of money which Mr. Binney rejected, which had been taken in the usual course of business, and ought to be accepted by the city creditors. It was finally recommended that persons who did not wish to receive payment of loans in that way should be given new certificates of loan for like amounts. Councils went further, and on the 25th of June passed a resolution that all interest should be paid in specie.

On the 26th of November the remains of Gen. Hugh Mercer, of the Revolutionary army, who was killed at the battle of Princeton in 1777, were removed from the place of sepulture, on the south side of Christ Church, adjoining Church Alley, and taken to Laurel Hill Cemetery, where they were deposited beneath a handsome monument, erected to the memory of Mercer by the St. Andrew's Society. The remains were accompanied by a large and imposing military procession to the First Presbyterian Church, at the corner of Locust and Seventh Streets, where, after appropriate religious exercises, an eloquent oration upon the life and services of Mercer was pronounced by William B. Reed.

By act of February 13th the township of Moyamensing was divided into four wards. The First Ward embraced the territory in the eastern part, north of the centre of Carpenter Street and east of the centre of Seventh Street. The Second Ward ran from Seventh to Eleventh Street, north of Carpenter. The Third Ward, west of Eleventh and north of Carpenter Street. The Fourth Ward was all the territory south of Carpenter Street. The township of Germantown was also divided into two wards, the Upper Ward being northwest of Washington Lane, and the Lower Ward southeast of that lane. The district of the Northern Liberties was also given power to elect a mayor for two years by citizens at general elections.

By act of February 27th some of the western wards of the city were divided into election precincts. Those which were subjected to this arrangement were Cedar, Locust, North, South Mulberry, and North Mulberry. The divisions were called South Cedar and North Cedar; East Locust and West Locust; East North and West North; East South Mulberry and West South Mulberry; East North Mulberry and West North Mulberry. A somewhat complex and puzzling nomenclature. The extra divisions had to be provided for at the general election at the windows in the back part of the State-House and county court-house. Middle and South Wards were the only western wards not divided. Upper Delaware, Lower Delaware, High Street, Chesnut, Walnut, and Dock Wards remained unchanged.

On the 23d of April was passed an act to incorporate the Grandom Institution. This society was formed in compliance with the will of Hart Grandom, a citizen who, by his will, made in 1833, authorized his executors

to convey to an incorporated benevolent society all the ground-rents which he owned, the clear annual value of which was about fifteen hundred dollars, for the purpose of a permanent fund "to alleviate the most prudent of the poor [who must not be intemperate] in procuring fuel, clothing, and other necessities which such persons want in winter." Mr. Grandom also appropriated real and personal property worth about twenty thousand dollars, to be granted to a society to be formed in Philadelphia, "composed of discreet members who feel an interest in the moral and religious welfare of young men who have arrived at manhood and want assistance to commence the various vocations they have learned, and whose parents are unable or unwilling to aid them." The Grandom Institution undertook to discharge both of these trusts. There were a large number of corporators, among whom were John Sergeant, Thomas P. Cope, William M. Meredith, Henry J. Williams, and others.

On the 15th of January, James Morris, a colored man, was hanged in the county prison for the murder of a boy in a schooner lying in the Delaware River in the preceding year.

A commemoration somewhat in the character of the Mercer obsequies of the previous year took place on the 2d of July. The remains of Col. John Haslett, of the Delaware line in the war of the Revolution, who was killed at the battle of Princeton, in 1777, had been interred in the burying-ground of the First Presbyterian Church, adjoining that building on Bank Street below Market Street. After the church building was removed to the southeast corner of Locust and Seventh Streets the site occupied by the church on Market Street had been built upon, but the old graveyard, with its dilapidated tombstones, yet remained. The church had concluded to sell the ground, which rendered removal of the bodies necessary. The Legislature of the State of Delaware resolved that the remains of Haslett should be buried at Dover, where a monument should be erected to his memory. They were disinterred by direction of the Hibernian Society and taken to the First Presbyterian Church at Seventh and Locust Streets. Thence they were escorted, on the day fixed, by the City Troop, Philadelphia Grays, and Washington Grays to Chestnut Street wharf, and delivered by John Binns, on behalf of the Hibernian Society, to a committee appointed by the Legislature of Delaware to receive the remains. An address was made by Mr. Binns, and by Mr. Huffington on behalf of the Delaware committee.

On the 4th of April, Gen. William Henry Harrison, President of the United States, died at Washington, after the brief enjoyment of the Presidential office during one month. This was the first occasion upon which a chief magistrate had died during his official term. The novelty of the bereavement, as well as the character of the man, who had been

elected by a large majority, created a sensation of regret of more than ordinary character. On the 7th of April a public meeting was held at Independence Hall, at which Mayor Swift presided. The resolutions of condolence prepared by John Sergeant were adopted. It was determined that citizens would unite with City Councils in rendering due honor to the memory of the deceased. The ceremonies, which were to take place on the 12th, were postponed in consequence of the tempestuous weather on the previous day until the 20th. The latter proved to be lowering, and before the procession got in motion snow began to fall. It was a larger procession than had been seen for some years, and included all the city and district corporations and officers, a large military force, firemen, Odd-Fellows, literary and benevolent societies, schools, and citizens. The participants displayed a profusion of banners draped in black, and wore mourning badges and other emblems. The funeral-car was drawn by eight horses, each decorated with white and black plumes, and led by a groom, and the hearse was heavily loaded with crape, and black cloth banded with gold fringe. In place of a coffin, on the dais of the funeral-car were displayed a sword, a laurel wreath, rolls of parchment, and many flowers. A riderless horse, led by a groom, followed the car. Fourteen pall-bearers walked by its side. The churches were open, and as it was impossible for the procession to be accommodated in any one of them, various societies were assigned to different buildings, so that there was a concert of memorial services about the same time in different parts of the city. By the time that the persons participating in the parade reached these places the snow, which had continued to fall, was of considerable depth. City Councils went to Christ Church, where an appropriate discourse was delivered by Right Rev. Bishop Underdonk. In the other churches addresses and orations were delivered.

A heavy freshet on the 9th of January did more than an ordinary degree of damage in the neighborhood of the Schuylkill and the Delaware. At the permanent bridge the water rose six feet above high-water mark. The cellars of stores, dwellings, and other buildings were filled with water, and in some the first story was nearly full. A large quantity of ice was brought down, and this article was deposited on the wharves and in the streets for the distance of one or two squares from the river. The track of the Philadelphia, Wilmington and Baltimore Railroad was carried away below Gray's Ferry. On the Delaware the water was eighteen inches above the top of the wharf at the draw-bridge. The cellars and stores were flooded, and much damage was done to valuable property.

In September the Prince de Joinville, son of Louis Philippe, king of France, who was traveling in the United States, arrived in the city. He was waited on at Independence Hall by the mayor and Councils,

and by French citizens and residents. The usual civilities in other ways were tendered to him. He remained in the city only two days.

There were several destructive fires during this year. At one, which occurred on the 23d of January, at Wright's umbrella store, Market Street above Third, the front wall fell, by which Oscar Douglas and Mark Rink, two firemen, were killed. On the 24th of June, at the fire at Mulford & Alter's grocery-store, Market Street above Sixth, a similar misfortune befell George L. Eisenbrey, also a fireman.

On the 15th of January the banks of the city and State, in compliance with the mandate of the Legislature, commenced specie payments. This act was not received with much confidence by the business people. There was a feeling of distrust, a doubt whether the banks could maintain themselves; a disposition to take advantage of the opportunity, and demand in ordinary transactions with them the payment of coin rather than the acceptance of their own notes. The resumption opened with a hostile disposition among many people, and large sums in coin were taken from the banks. The condition of the Bank of the United States attracted general attention. On the 4th of January, according to a statement made, that institution had \$2,171,722.97 in specie funds, and notes of State banks, \$1,148,101.93. Altogether the assets that could be used in redemption of notes were less than \$3,800,000. The bank-notes in circulation were \$9,386,000.90, and there were post-notes amounting to \$1,887,658.09, without taking into consideration the amounts due to depositors. The stock of the bank was selling at that time at sixty-three dollars per share, the par value of which was one hundred dollars. The price of shares began to go down, and sank on the 4th of February to forty-five dollars and seventy-five cents per share. When the doors of the bank were opened a brisk demand for specie was commenced. The condition of the institution had been considerably strengthened, so that in twenty days it had met the demands upon it to the amount of \$6,683,321, all of which had been paid in coin. The other banks of the city were also hardly pressed. The Philadelphia, Girard, and Pennsylvania Banks in the same period had each paid out more than \$1,000,000 in coin. The city banks, except the United States Bank, had redeemed of their own notes within the same period, \$5,122,732. The pressure was so great that on the 4th of February the United States Bank gave way before it, and an announcement was made that this bank had again suspended specie payment. The other banks made a show the next day of continuing business. The United States Bank paid coin on their five-dollar notes. The other banks redeemed all demands until late in the day of the 5th, when it was found that the run was so heavy that they could not stand it. Several of them also suspended payment of specie on notes above five dollars. The system of marking checks "good" instead of pay-

ing them came into vogue. On the 13th of February the Bank of the United States memorialized the Legislature for assistance. They declared that they had honestly attempted to carry out the law, but were prevented by "a combination of hostile interests," and "a pervading distrust stimulated into activity by a part of the public press in another State." The situation of the banks was undoubtedly precarious.

The Legislature undertook to furnish some relief. A bill to allow the bank to issue notes for six million dollars in sums less than five dollars to run for six years was vetoed by the Governor. An act "to provide revenue to meet the demands on the treasury" was also vetoed by him, but it was passed in both branches of the Legislature by a two-thirds majority over his veto on the 4th of May. This act, generally known afterward as "the relief law," authorized the State banks, except the United States Bank, to loan three million one hundred thousand dollars to the commonwealth in amounts in proportion to their capital, the same to be paid to the State in notes of their own issue of the denomination of five dollars and under. By a section of this act the United States Bank was authorized to make an assignment for the benefit of creditors.

A proceeding by George F. Alberti against the Bank of the United States, in February, for a forfeiture of the charter upon the ground that the bank had refused to pay specie for two notes, led to a decision by the Court of Common Pleas that under the charter of the bank the great bonus paid to the State made the transaction a special contract. Under the charter a refusal to pay a bank-note rendered the institution liable to a penalty of twelve per cent. No proceeding for forfeiture of charter could be commenced until three months from the time of refusal. Alberti's proceeding was under the act of 1840, ordering resumption of specie payments. By that law the time when proceedings for forfeiture of charter could be commenced was fixed at ten days after the refusal to pay a note. The court decided that under the special contract made with the bank the law of 1840 was unconstitutional so far as the right to a forfeiture of the charter after ten days' refusal to pay a note was concerned. While these things were taking place a committee of six stockholders of the Bank of the United States were examining into the condition of the institution. In April they made report of their discoveries, and stated that there were evidences of fraud, mismanagement, and misapplication of the funds of the institution. The estimate of the value of the assets was that there was a depreciation whereby securities represented to have been once worth \$69,351,742.46 were now worth no more than \$42,779,795.24. The liabilities were \$36,959,539.63. The capital was \$35,000,000. If this valuation was sustained, the stockholders could not expect to receive more than about \$15,000,000 for the \$35,000,000 paid in, a clear loss of about \$20,000,000. The manner in which the money had

gone was not so satisfactorily ascertained. Upon the suspended debt it was calculated that there would be a loss of over \$5,000,000. Estimated depreciation in stocks over \$7,000,000. On the amount due by State banks a loss of nearly \$3,400,000 was anticipated. A large loss was expected upon the true active debt. In February, 1836, it was reported that the surplus fund of the bank above the capital was nearly \$8,000,000. The report, however, was not correct. Before the State bank was chartered, the exchange committee of the Federal bank, finding an over surplus of funds from the collection of the debts of the bank, with a view of winding up the concern, under authority of the resolution of the directors loaned out immense sums of money upon the hypothecation of stocks of all kinds. In one year they had increased the loan on stocks considerably over \$15,000,000. When the old bank was to be wound up there were \$20,000,000 of bank-notes still liable to redemption, and the State of Pennsylvania bonus was \$5,000,000. Crippled by the course of the exchange committee, the bank was compelled to seek relief in loans, principally in England and France. These amounted in July, 1840, to more than \$23,000,000. Post-notes were issued promising payment, and when these became due there was no money to pay, so that the hypothecation of stocks in large amounts was necessary to raise money. Among other arrangements were the "cotton transactions," which commenced in July, 1837, with a purchase of cotton worth more than \$2,000,000, which was shipped through commercial houses at Philadelphia to a branch commercial house at Liverpool. In three years the cotton transactions were a little short of \$9,000,000. The cotton was paid for by drafts, which were met by funds advanced by the bank. There were some profits, but what became of them was never clearly understood. It was charged that most of these transactions were unknown to the directors generally, and that they were carried on by the exchange committee and others without knowledge on their part. These revelations created immense surprise in the community and great suffering among stockholders of the institution, many of whom supposed to be in affluence held large numbers of shares, and had depended upon the dividends for the means of living. They were suddenly reduced to want or poverty. The feeling was very strong against the principal officers of the bank.

In January, 1842, Nicholas Biddle, the former president, Joseph Cowperthwaite, John Andrews, Samuel Jaudon, and Thomas Dunlap were brought before Recorder Richard Vaux, charged with conspiracy to cheat and defraud the stockholders of the Bank of the United States. Jaudon and Dunlap obtained writs of *habeas corpus* from the Common Pleas. The result was the discharge of both of them. The accusations turned chiefly upon the loans made to officers of the bank by the exchange committee. The court held that the directors had given power to that committee,

that their transactions were entered regularly in the accounts under the proper heads, and that if the directors did not know of the transactions, they might have done so. Also that the directors had accepted stock and other means of payment for some of the loans made by the exchange committee, and that the cotton transactions, not being in power of the bank to carry on under its charter, might be managed by individual officers for their own profit without their being guilty of a conspiracy. The relators were discharged. Shortly afterwards Messrs. Biddle, Cowperthwaite, and Andrews applied for writs of *habeas corpus* to the same court. They were sent under a legal technicality to the Court of Criminal Sessions. Biddle and Cowperthwaite were charged with conspiracy in connection with the cotton transactions. Cowperthwaite was complained of in consequence of having made large loans without knowledge of the directors. The same charge was made against Andrews, with the addition of having fraudulently received moneys without authority, for the expenditure of which no voucher could be shown. The judges of the General Sessions, Barton, Conrad, and Doran, heard these cases and decided them as the Common Pleas had done. The payment of the foreign bonds, it was said, must be met. The directors devolved the duty of finding funds to the exchange committee; the committee put the labor and responsibility upon the officers of the bank; the officers, in the decline of private credit, not being able to obtain good bills of exchange, "adopted the obvious if not the only resource of shipping produce instead of purchasing bills of exchange. After that the logical conclusions were obvious." The bank had no right to deal in cotton by its charter, and the officers who had engaged in the transaction were the only persons who were entitled to the profits. A train of reasoning on the same line, which would have shown that the officers who made the profits instead of the bank should have borne the losses instead of the bank, was not attempted. In regard to the payments by the officers in depreciated and depreciating stocks at par, the fault was in the directors who took them. All the defendants were therefore discharged, and afterwards there was no attempt to make them criminally responsible. On the 1st of May the bank made a partial assignment to secure the payment of certain post-notes due to the banks of Philadelphia. On the 4th of September the directors made an assignment to five trustees of certain other property except some particular stocks specified in a schedule. The assets were ordered to be applied, in the first place, to the satisfaction of judgments against the bank; second, to the indemnification of certain sureties of the bank; and third, to the payment of all debts of the bank rateably and equally. Two days afterwards a supplementary assignment was made to the said trustees, conveying all rights in hypothecated stocks, loans, and other pledges, and in all other property held by the bank.

An intensely interesting and remarkably curious criminal case was tried before the United States Circuit Court, Judges Baldwin and Randall, in April, 1842. Alexander William Holmes was charged with the murder of seven persons whom he threw out of a long-boat at sea, after the ship "William Brown," Captain George L. Harris, foundered, on the 13th of March, 1841. The ship was bound from Liverpool for Philadelphia, and carried a crew of seventeen men. There were sixty-five passengers, mostly Scotch and Irish. The cargo consisted of salt, coal, crockery, hardware, and other merchandise. The voyage had been stormy for about twenty-three days. On the 20th of April the ship struck an iceberg and immediately commenced leaking. The bows had been stove, and the water came in fast. The boats were got out and launched. As many of the passengers as could be got into them were so placed, and the boats were veered astern of the ship. There was not room for all the passengers, and some were left on board the ship, and were carried down when the latter sunk, bow foremost. The accident took place in the night. The passengers were roused when the danger was apparent, and were thinly clad. There were only two boats. In the jolly-boat nine persons were placed, and in the long-boat there were forty-two, with water, provisions, etc. The next morning the boats parted company. Captain Harris, in the jolly-boat, steered toward Newfoundland, and ordered the long-boat to follow. He was picked up six days afterwards by a French fishing-boat one hundred and fifty miles from land. Holmes was in command of the long-boat. The sailors and passengers rowed and sailed all day after the ship sank. The boat was exceedingly crowded, and the dreadful determination was taken to lighten it by throwing over some of the passengers. Owen Reilly was the first to be sacrificed. Frank Askins and his sisters, Mary and Ellen, were next drowned. Charles Conlin followed. The next day John Nugent and another man were thrown over. In a few hours afterwards the ship "Crescent" picked up the boat. None of the crew were subjected to this misfortune. The trial of Holmes introduced the question whether it was lawful to take some lives in order to save others, or whether the persons who were in authority on board a ship were justified in throwing persons overboard in order to save their own lives. The trial occupied considerable time. Holmes was found guilty of manslaughter, and sentenced to six months' imprisonment.

The Girard Bank was chartered April 3, 1832, with a capital of one million five hundred thousand dollars, in shares of fifty dollars each. It was expected that this institution would be the means of preventing a reduction of bank capital if the funds of Stephen Girard's private bank should be withdrawn and the amount used in other ways. In 1836 the charter was extended for twenty years, and the capital increased to one hundred thousand shares at fifty dollars each.

The consequence was that the bank had more money than it could legitimately employ in its business. In order to realize anything toward profit, the risk of making loans upon doubtful security had to be encountered. Large numbers of Girard Bank notes were in circulation. The market value of the stock had declined to eight dollars and fifty cents per share for fifty dollars paid. The other banking institutions held the Girard Bank in suspicion. The notes of the latter were refused on deposit by the Bank of the Northern Liberties on the 26th of January. Other city banks followed this example. The Girard Bank was compelled to close its doors. Finally the institution made a general assignment of property for the benefit of creditors. The trustees managed with discretion, and in 1844 the Legislature passed an act commanding the stockholders to elect directors, so that the bank went on with its business, and in 1853 the charter was extended for twenty years. On the 29th of January the city banks in concert refused to receive the notes of the Bank of Pennsylvania. A run upon the institution commenced. This bank was a depository of the funds of the State of Pennsylvania. Eight hundred thousand dollars of the money of the commonwealth were on deposit there, and payable on the 1st of February, only two days after the run commenced. Governor Porter came to town immediately, and gave notice that he had directed the attorney-general to take measures to secure the public funds, and to apply for an injunction against the bank to prevent the payment out of the State money and for the appointment of a receiver. There was a little delay in the payment of the interest on the State debt, but on the 15th of March sufficient funds were secured and payments made to the public creditors at the Bank of Pennsylvania building. By resolution of March 29th permission was given to this institution to make an assignment for the benefit of creditors. This privilege was not accepted. By degrees the bank straightened out its affairs and resumed business without attracting much attention. Warned by the threatening state of affairs, the officers of the other banks of the city consulted in regard to the best methods to be followed in case of "a general run." The method proposed was by a league, and the formation of a fund by mutual pledge of capital and means for the redemption of the notes of the banks. It was agreed that seventy-five thousand dollars should be deposited for every five hundred thousand dollars of capital of the bank league. Ten city banks and the Bank of Camden, N. J., which had an office in the city, acceded to the plan. The Banks of Germantown and Kensington did not accede to the arrangement. The Pennsylvania Bank and Girard Bank were in difficulties. The Supreme Court granted the injunction prayed for by the Governor against the Bank of Pennsylvania, and that institution was closed. On the 31st of January, being Monday, a run was commenced on the Moyamensing Bank, which by the assistance of the league it met

and maintained all demands. The bank league refused to take country bank-notes. As large numbers of these were in circulation, great inconvenience followed. The Legislature was Democratic, and these proceedings of the banks were not viewed with admiration. Measures were immediately taken to compel resumption. An act was passed March 12th which directed that the banks of the commonwealth should forthwith redeem their notes and deposits and other liabilities in gold and silver coin. Refusal to do so, except in case of previous contract for the payment of deposits in some other way, "shall be deemed and taken to be an absolute forfeiture of their respective charters." The act directed that "hereafter only gold or silver, or the notes of specie-paying banks, or the legal issues under the act of May 4, 1841, shall be received in payment of tolls, taxes, or other revenues of the commonwealth." This act gave no time to the banks to prepare, and those which were in the city did not resume immediately. A consultation was held on the 15th without definite conclusion. On the 16th a heavy run was made on the Bank of Penn Township, which could not sustain the pressure, and was closed. On the 16th the Mechanics' Bank and the Manufacturers' and Mechanics' Bank met with the same fate. On the other hand, the Philadelphia, Commercial, North America, and Western Banks resumed payments on that day. On the next day the Farmers' and Mechanics', Southwark, Northern Liberties, Kensington, and Germantown Banks resumed. The Penn Township, Manufacturers' and Mechanics', Moyamensing, and Mechanics' Banks alleged that having accepted the relief law they were not bound to resume, and they refused to do so.

Riots, in which colored people were maltreated and their property injured, broke out on the 1st of August, and were caused in the first place by disturbance between colored persons who were in a procession of the "Moyamensing Temperance Society" and boys and other white persons who were in the streets. The police made arrests, which created excitement. A mob of white persons immediately afterwards commenced operations against dwellings inhabited by blacks in the vicinity of Lombard Street between Fifth and Eighth Streets, and in various small courts and alleys adjacent. Windows were broken, doors demolished, furniture thrown out of the houses, and negroes assaulted and beaten. The discharge of a gun by a black man in Bradford's Alley fanned into fierceness the flames of excitement, which were about subsiding. The person who used the gun retreated to a house, which was assaulted, broken open, and all the colored persons within were dragged out and beaten. The city police interfered to save these men, and while they were taking them to the mayor's office desperate efforts were made to rescue them from the officers. In the evening houses occupied by colored people between Seventh and Eighth were broken open and the

inmates assaulted and injured. On the north side of Lombard Street between Seventh and Eighth was a large building erected by Stephen Smith, a colored man, as a place for the meeting of literary and beneficial societies, and called "Smith's Beneficial Hall." Being used by colored men, it was an object of attack. A strong force of police was stationed in front of the building and the mob kept at a distance. But while they were guarding the front the enemy was successful at the rear. By some means entrance was obtained to the building, and at an unexpected time flames were suddenly seen to break out from the upper stories. The destruction was complete. The building was entirely burned out. Some injury was done to adjoining houses by falling walls. While this fire was in progress a church on the north side of St. Mary Street, running from Seventh to Eighth, and south of Lombard, was found to be on fire. Nothing was saved here but the walls. This church was the first church building of the Society of Covenanters, who had afterward removed to a better site on Eleventh Street above Chestnut. The property had passed into possession of a religious society of colored persons. It was never known whether this building was set on fire by an incendiary, or whether it caught from the sparks and brands flying from the great conflagration of Smith's Beneficial Hall.

The negro riots ceased at midnight, but on the next day there was a disturbance at the coal-yards on the Schuylkill River, caused by Irish laborers employed in those places attacking colored laborers at work in the neighborhood. The sheriff, Henry Morris, sent out a posse of sixty men. These were attacked by a mob and forced to fly, leaving the field to the rioters. The latter marched to Moyamensing and made attack upon colored people in Baker Street, Clymer Street, Little Oak Street, and Fitzwater Street from Thirteenth Street downward. Sheriff Morris perceiving the danger of greater destruction that night, applied to the County Commissioners for means to pay the volunteer soldiers whom he intended to call out. City Councils at a special meeting voted five thousand dollars for that service. The troops mustered in great strength, not only with loaded muskets but with some pieces of artillery. They were stationed in Washington Square, which took for the time the appearance of a military cantonment. A strong force of police was also stationed in the neighborhood. Persons of riotous disposition were warned by these occurrences of the danger of manifestations, and by being prepared to meet disorder with vigorous measures further trouble was prevented.

The weavers' riot in Kensington, at the beginning of 1843, was in effect a relief from the general course of outrages which sought its victims among the colored people. The disturbance arose in consequence of disputes among the working weavers in regard to the wages which they should receive for their services. A trade society which was embodied by some of

these persons had demanded higher wages and ordered a strike. Other weavers in considerable numbers held aloof from the association, and did not sustain the measures which had been adopted. They continued at their work. At that period the weavers generally did their work upon hand-loom in their own houses and not in mills. The parties standing out were therefore much incensed at the refusal of their companions to join them. The latter were assaulted on the streets. A mob of weavers at Front and Brown Streets, on the 11th of January, entered the houses of persons in the trade, cut warps, destroyed looms and stuff in the process of manufacture. Information being sent to the city, the sheriff, William A. Porter, proceeded to the scene with a small posse. The rioters had in the mean while retreated toward a market-house in Washington [American] Street, north of Master, which in the neighborhood was known as "The Nanny-Goat Market." From this fortress the sheriff's party, approaching, were assailed with stones and broken bricks. The posse attempted to make a charge upon them, but the rioters, being armed with clubs, stood their ground. The sheriff was severely beaten, and although some arrests were made, his force was compelled to retreat. The next day the streets of Kensington were paraded by crowds of men armed with clubs. They attacked and beat persons who came in their way who were obnoxious to them. Some of them took possession of the Nanny-Goat Market, which they boarded up at one end. They also supplied themselves with bricks from a neighboring pile, intended to be used for building purposes. The market committee of the district of Kensington ordered these bricks to be removed from the market, and sent a cartman for the purpose. He was seized, beaten, and compelled to fly. The sheriff finding, by the experience of the previous day, that he could not cope with the rioters, called out four companies of the volunteer battalion, which were marched to Kensington, and in the evening eight companies of Gen. Cadwalader's brigade were also assembled at their armories. Knowledge of these preparations was sufficient to prevent further disturbances.

Commodore Isaac Hull, of the United States Navy, a hero of the war of 1812, died on the 13th of February, and was buried from his residence in Portico Square, Spruce Street, between Ninth and Tenth, on the 17th. The hero of the sea-fight between the United States frigate "Constitution" and the British frigate "Guerrière" was held in high esteem by the people of the United States. The funeral procession was of considerable size. It was attended by a company of United States marines, twenty-five companies of volunteer militia, the City Councils, and many others. The coffin, covered with a pennant, indicating the rank of the deceased, was borne upon a bier, supported by United States sailors. The services took place at Christ Church, where the body was deposited in a vault preparatory to removal to Laurel Hill.

John Tyler, President of the United States, was formally received on a visit to the city on the 9th of June. A committee of citizens met him at Wilmington, Del., from which place he was brought by a steamboat and landed at the navy-yard, where there was a reception by officers of the navy attached to the station and by a committee of citizens, for which Alderman Peter Hay was spokesman. A route of parade had been previously arranged. The procession was principally composed of the military companies, called out for the occasion, and a few citizens. In a barouche drawn by four white horses the President was escorted to the United States Hotel in Chestnut Street. He was accompanied by James Madison Porter, Secretary of War, Abel P. Upshur, Secretary of State, John C. Spencer, Secretary of the Treasury, and Charles A. Wickliffe, Postmaster-General. There was strong political feeling at this time in opposition to Mr. Tyler upon account of the policy which he had developed after the death of President Harrison, which was entirely different from that of the Whig party, by whom he had been elected. His visit to the city was asserted to be a mere political journey undertaken in hope of making some popularity. The procession was coldly looked upon in many parts of the city, and when the President passed along Chestnut Street, near Sixth he was loudly hissed at by persons standing on the sidewalk. City Councils granted Mr. Tyler the use of Independence Hall, and he received his friends there the next day, and left in the afternoon for Baltimore.

Marshal Bertrand, one of the officers of Napoleon Bonaparte, who had afterward been employed in the service of the United States as an engineer officer, visited Philadelphia on the 14th of November. City Councils voted that he should be received as a guest of the city, and tendered him the use of Independence Hall for the reception of his friends.

The Kensington Gas Company was incorporated April 4th, with a capital of ten thousand dollars and right of extension to twenty thousand dollars. The shares were ten dollars each. The company had authority to manufacture carbonated hydrogen gas and lay pipes for distribution for public and private use in the district. Actually this was a huckster corporation, which was expected to buy the gas from the Northern Liberties Gas-Works and sell the same to the inhabitants of Kensington at a profit. The district of Kensington was authorized to buy the rights of the company after five years on payment of the money expended.

The first steps were taken toward the establishment of the district of Penn by act of April 19th, under which James Markoe, Andrew D. Cash, William Esher, Jacob Heyberger, and Edward T. Tyson were appointed commissioners, with authority to have surveyed and laid out that part of Penn township between the north line of Spring Garden District and a line parallel with and one hundred feet north of Sus-

quehanna Avenue, and between the middle of Delaware Sixth Street and the river Schuylkill. They were given authority to lay out streets and lanes, and pitch, pave, and curb them, and establish sewers, etc., in the same manner as the commissioners of the district of Spring Garden might do.

The incorporated districts of the county were restive under the necessity of complying with the demands of the city of Philadelphia, whatever they might be, for the supply of water to the inhabitants of the districts. The city compelled all persons in the adjoining districts to pay on an average a half-rate more than was paid by persons residing in the bounds of the city and using the water. The feeling was that the water-rents from properties in the districts were nearly all clear profit, that the Fairmount Works were large enough to pump and supply all the water needed by the districts by a very trifling additional expense beyond those incident to the ordinary operations of the works. If any attempt was made to induce a reduction it met with no favor. This policy brought about a movement on the part of the commissioners of Northern Liberties and Spring Garden which eventually produced a change in the method of obtaining the water supply, and broke up entirely the supposed monopoly or sole right of the city of Philadelphia to the use of the water of the Schuylkill River for domestic or other purposes. On the 18th of April an act was passed the preamble of which recited that a large portion of the district of Spring Garden could not be supplied with water from the works of the city at Fairmount, the ground in some parts of that district being higher than the level of the said works. The act then proceeded to authorize the incorporated districts of the county of Philadelphia to construct steam or other suitable works on or adjacent to the river Schuylkill, between the south line of Coates Street and the northern boundary of the district of Spring Garden, "for the purpose of pumping up and supplying the said districts and the inhabitants thereof with water from the said river, or such other stream of water in the vicinity of said districts as may be practicable." There was a provision that no more water should be taken than might be necessary for the use of the districts. Much more important was the following: "Provided, that this act shall not go into effect if the city of Philadelphia shall within three months reduce the water-rents in the incorporated districts to the same amount charged to citizens of the city." There was another proviso,—that compliance with the city should not prevent the incorporated districts from taking water from the Schuylkill below Fairmount or from any other stream. The districts were given authority to construct reservoirs, lay pipes, etc. Further provision established that if, after the expiration of four months, any of the incorporated districts should neglect or refuse to accept the provisions of the law, any of the remaining districts should have that privilege. If Northern Liberties, Kensington, Southwark, or Moya-

mensing should not accept the provisions of the act, Spring Garden might execute the work alone. The other districts might, however, have a right to apply to Spring Garden for water, which must then be furnished at Spring Garden rates. This measure came from the Spring Garden district commissioners almost entirely, with some encouragement in words, perhaps, from the officers of other districts. The conditions were not hard. The city could nullify the act by the concession of justice. During the three months which followed the Councils did not reach the opportunity or seem to appreciate the danger which menaced. The watering committee was opposed to the reduction of the water-rents to the inhabitants of the districts. It was argued that as the State had granted the use of the waters of the river Schuylkill to the Schuylkill Navigation Company, and as the city had bought from that company the full right to the use of the Schuylkill water, except what was required for the purposes of navigation, there had been a solemn contract, which was beyond the power of the Legislature to modify or break. Finally the City Councils refused to reduce the water-rents to residents of the districts. Upon this the commissioners of the district of Spring Garden undertook the work. Application was made to the Supreme Court by the city for an injunction to prevent this invasion of the rights of the city corporation. The case went against the city. It was admitted, in the learned and important opinion which was delivered, that the city had an apparent good right under the contract with the Schuylkill Navigation Company. But all this was swept away by the clear declaration that the Legislature had no constitutional right to grant the entire use of any stream in diminution of the privilege to the people of the commonwealth to the use of the rivers for culinary, drinking, or domestic purposes or for any other object. This declaration was equal to a new Magna Charta. Under that authority the districts of Spring Garden and the Northern Liberties united in the erection of a water-works. A piece of ground in a valley on the east side of the Schuylkill, adjoining Sedgely on the north, and now just above Girard Avenue, was purchased. Here was built an engine-house of brick, solid in appearance, with a high chimney-stack in the style of an Egyptian column. The pool from which the water was pumped (called at Fairmount the forebay) ran from the river, from which it was separated by guard-wall and sluice-gate, up to the works, which were some two or three hundred feet distant. Water was pumped from this storage-place to the reservoir, situated in what was then called "Morris City," north of Fairmount. The reservoir was built upon Thompson and Master Streets, west of the present Twenty-fifth Street and east of Twenty-seventh Street. At that time none of those streets were laid out; otherwise the blocking up of Twenty-sixth Street might have been avoided. The Spring Garden and Northern Liberties Water-Works were opened for use in December, 1844.

The spirit of riot and disorder which for some years had mostly vented itself upon negroes and mulattoes found an entirely new object in events which happened during the year 1844. In previous years a feeling against foreigners had arisen in several States, caused by the activity of certain classes of adopted citizens in politics, and their intention, as was suspected, of making the subject of political rewards dependent upon nationality rather than merit. This feeling on the part of native-born citizens was greatly increased by the action of the Roman Catholics in some of the States claiming privileges in regard to the education in the public schools of children of Catholic parents, which were calculated to arouse animosity of feeling among Protestants. The Catholic claims varied in different localities. In New York it was declared that the demand on behalf of the Roman Catholic clergy and laity, by whom they were supported, was that the reading of the Bible according to the King James version should be prohibited in the public schools. These circumstances brought sectarianism into the subject, and gave to the Native American party, which would have been of little importance if the object had only been to protest against naturalized foreigners voting or being voted for, a strength from the religious supporters of Protestantism which gave a force to the party at the beginning. Passion and prejudice also added greatly to the hostility which was manifested. If there had been no desire on the part of the Catholics to antagonize the Native American party, they were driven into it by the combination of opposing elements.

The first Native American meeting in Philadelphia was held at Germantown in 1837, and resulted in the adoption of a preamble and constitution for a society, in which the following language was used: "While at the same time we invite the stranger, worn down by oppression at home, to come and share with us the blessings of our native land, here find an asylum for his distress, and partake of the plenty a kind Providence has so bountifully given us, we deny his right (hereby meaning as foreigner any emigrant who may hereafter arrive in our country) to have a voice in our legislative hall, his eligibility to office under any circumstances, and we ask a repeal of that naturalization law, which it must be apparent to every reflecting mind, to every true son of America, has now become an evil." This movement at Germantown found a few supporters, but amounted to very little. In December, 1843, a meeting was held in a hall on the Ridge road in the district of Spring Garden, at which "The Subject" of the undue influence and misused privileges of the foreign population "was discussed." Those who were present formed the American Republican Association of Second Ward, Spring Garden. Shortly afterward an association was formed in Locust Ward, of the city, and in January, 1844, societies were established in

North Mulberry and Cedar Wards. From this time the movement went on so rapidly that, in the course of four or five months, there was a Native American association for almost every ward and township in the city and county. The first doctrine of the Germantown association was that foreigners should not be allowed to vote, no matter how long they remained in the country. This was generally modified by the associations of 1844. The principles of those associations, it was generally agreed to, were embodied in the following declarations:

"First. We maintain that the naturalization laws should be so altered as to require of all foreigners who may hereafter arrive in this country a residence of twenty-one years before granting them the privilege of the elective franchise; but at the same time we distinctly declare that it is not our intention to interfere with the vested rights of any citizen, or lay any obstruction in the way of foreigners obtaining a livelihood, or acquiring property in this country; but, on the contrary, we would grant them the right to purchase, hold, and transfer property, and to enjoy and participate in all the benefits of our country (except that of voting and holding office) as soon as they declare their intentions to become citizens.

"Second. We maintain that the Bible, without note or comment, is not sectarian; that it is the fountain-head of morality and all good government, and should be used in our public schools as a reading-book.

"Third. We are opposed to a union of church and state in any and every form.

"Fourth. We hold that Native Americans only should be appointed to office to legislate, administer, or execute the laws of the country."

For four months the Native Americans went on instituting new societies and obtaining new members, exciting some attention, but with little show of opposition. On the 3d of May an incident occurred which was premonitory of disaster. A Native American association was proposed to be established in the Third Ward, Kensington. The place chosen for the meeting was upon an open lot at the southwest corner of Master and Second Streets, adjoining a school-house. About three hundred persons were present. While a speaker was addressing the meeting an attack was made upon it by a number of persons who were armed with clubs, who suddenly fell upon the individuals who formed the meeting, and took them so unexpectedly that they were driven away. The stage or platform which was in use by the meeting was demolished. The breaking up of this meeting caused great excitement, particularly so as it was asserted that the persons of the attacking party were all foreigners by birth, and the majority of them were Irishmen. The persons connected with the meeting rallied and repaired to a place in the neighborhood, where they passed resolutions denouncing the outrage upon them, and determined that in the maintenance of their constitutional rights to peaceably assemble and discuss public measures they would adjourn to meet on the succeeding Monday afternoon, May 6th, at the place from which they were driven. The narrative of the circumstances connected with this affair, as published in the newspapers, attracted much attention and excited considerable feeling. On the day named the meeting assembled on the lot at Second

and Master Streets. The proceedings commenced quietly and went on favorably for about half an hour. About that time a cart, driven by John O'Neill, an Irishman, was forced on to the lot and into the throng which was assembled and nearly to the speakers' stand. A small quantity of dirt which was in the vehicle was shot upon the ground and the cart driven away. This incident excited some indignation, as it was believed O'Neill came purposely to disturb and break up the meeting. The business of the afternoon was resumed, however, and continued until a sudden shower of rain put the parties to flight. They took refuge in the market-house in Washington [American] Street above Master, called the Nanny-Goat Market, somewhat conspicuous in the weavers' riot of the year previous. Here an attempt was made to reorganize the meeting, and a speaker proceeded to address them. On the outskirts of this assemblage there were persons who evidently were opposed to the object of the meeting, and disposed to prevent its being continued. A quarrel between these and persons composing the meeting occurred, and a pistol was fired. On the west side of Washington Street, immediately opposite the market-house, was a vacant piece of ground about one hundred and fifty feet wide, which extended to Cadwalader Street, which ran northwardly parallel with Washington Street. Upon the west side of Cadwalader Street, and opposite the vacant piece of ground, was a house occupied by the Hibernia Hose Company. As soon as the sound of the pistol was heard a gun was pointed out of a raised window in the hose-house and fired in the direction of the meeting. It was followed by an irregular volley of shots from the same place, and in a few minutes guns were again fired. Some of these came from the hose-house and some from the upper stories of the houses in the neighborhood. Upon this the great majority of persons who were in the market-house scattered and ran. A few stood their ground, and threw stones and brickbats at or toward the houses. The disturbance soon became enlarged to a regular battle. Some of the persons driven away procured fire-arms. Others, who were not present but heard of the affair, also armed themselves and repaired to the scene. Generally the battle was waged prudently and with the tactics of Indian fighting, shooting from ambush, and from shelters behind trees, doors, or corners. By degrees the field was shifted from Washington to Cadwalader Street and Germantown road, and as far north as Jefferson Street, being much beyond the original spot where the first difficulty took place. During this skirmish George Shiffler, a lad between eighteen and nineteen years old, was mortally wounded, and died soon afterwards.¹ Eleven other

¹ It was represented that Shiffler was "defending the American flag" when he was shot, trying to prevent it being carried off by Irishmen. Whether true or false, Shiffler was honored as a martyr and a hero. The scene of his death was painted on the banners of some of the Native American associations. A hose company, established about this time in South-

persons were wounded, all of them Americans, but subsequently recovered. The persons in the houses are not known to have been injured at this time. When intelligence of these transactions flew through the city, great excitement was created. Thousands of persons paid a visit to the neighborhood of the riot. Generally they avoided the battle-field, as any one who was seen there was considered to be in danger of being shot from the houses. The bulk of the crowd was in Second Street, principally about Franklin Street [Girard Avenue]. Here, about ten o'clock in the evening, stones and bricks were thrown against a house said to be inhabited by Catholics. Not far from this place, at the southeast corner of Second and Phoenix [Thompson] Streets, was a school-house, used by Sisters of Charity of the Roman Catholic Church as a seminary. This building was popularly called "The Nunnery." An attempt was made to break into this building, probably to set it on fire. Upon the attack guns were fired from the upper stories, by which two spectators not engaged in any violence were shot. They were John W. Wright and Nathan D. Ramsay. The latter was mortally wounded, and died a few days afterwards. Wright was killed on the spot. These occurrences, being reported in the papers next day, intensified the excitement. Extras were published by the *Sun* and *Native American*, requesting citizens to assemble in the State-House yard at half-past three o'clock in the afternoon. Handbills were put up in various places to the same effect, having at the bottom the following significant words: "LET EVERY MAN COME PREPARED TO DEFEND HIMSELF."

The meeting was large and tumultuous. Officers were chosen and resolutions offered. Thomas R. Newbold was president. There were short speeches by James C. Vandyke, William Hollinshead, John H. Gihon, John Perry, and Col. C. J. Jack. The resolutions by Perry stigmatized the proceedings in Kensington as a gross and atrocious outrage. They averred,—

"Resolved, That the proceedings of a portion of the Irish inhabitants of the district of Kensington on Monday afternoon is the surest evidence that can be given that our views on the naturalization laws are correct, and that foreigners in the short space of five years are incapable of entering into the spirit of our institutions.

"Resolved, That we consider the Bible in the public schools as necessary for a faithful course of instruction therein, and we are determined to maintain it there in spite of the efforts of naturalized and unnaturalized foreigners to eject it therefrom.

"Resolved, That this meeting believes that the recently successful efforts of the friends of the Bible in Kensington was the inciting cause which resulted in the murderous scenes of the 6th instant."

There was also a resolution approving of the offering of a reward of one thousand dollars for the conviction and apprehension of the murderers, and that a collection should be taken up for the benefit of the

widows, mothers, and children of the murdered. If the matter had ended with the dispersion of the persons present at this meeting to their respective homes or business places the circumstances would have been proper enough, but somebody moved that the meeting should adjourn to meet in Kensington on the following Thursday, which was lost. Another motion to meet the next day was also lost. Then there was passed a resolution that the meeting adjourn to meet at the corner of Second and Master Streets. This meant forthwith, and forming themselves into an irregular sort of a procession a portion of the meeting swarmed out into Chestnut Street, passing through the centre hall and doors of the State-House, and thence marched up-town. When the head of the line reached Master Street it was about five o'clock in the afternoon. The place selected for the meeting was on Washington [American] Street, between the market and the houses on Cadwalader Street from which the firing had come on the previous day.

A movement was made to hoist an American flag about the spot where Shiffler fell. While this was being done a volley of musketry was poured into the meeting from the Hibernia Hose house. Although the persons who attended the State-House meeting were requested to come armed they had not done so, and there is reason to believe that not one out of one hundred persons in the meeting even carried a pistol. Some persons joined the crowd as it marched up carrying guns. There were probably a dozen of these when Master Street was reached. At a subsequent legal investigation there was a conflict of testimony as to the manner in which the disturbances now commenced. Some said that the meeting was called to order and a speaker began to address them. Others testified that the business of the meeting had not commenced before guns were fired from the Hibernia Hose house. At this the persons connected with the meeting made an attack upon the hose-house, broke it open and ran out the hose-carriage, which was destroyed. They did not venture in the upper stories, but the Hibernia house was set on fire, and the flames spread to other buildings. Guns were then fired from other houses in the upper part of Cadwalader Street as far as Jefferson, afterward above that street, and at times from the back part of houses on the Germantown road and upon Master Street. John Wesley Rinedollar, a young man, was shot in the back and killed on the spot, and five or six others were wounded. Louis Greble, Charles Stillwell, and Matthew Hammett were shot dead. Joseph Coxe and John Lescher were wounded mortally and afterward died, and several Americans were wounded. On the other side, Joseph Rice, an Irishman, was killed while looking over a fence on the west side of Cadwalader Street; John Taggart, an Irishman, who was accused of firing a gun, was arrested and ordered to be committed to prison by an alderman; the mob made an attack upon the officers who had him in custody. He was severely beaten,

wark, was named after him, and continued until the Volunteer Fire Department was superseded by the "Paid Fire Department," established by the city of Philadelphia in 1871.

and an attempt was made to hang him to a lamp-post. This ferocity being prevented, his body was dragged over the stones of the streets for some distance, beaten, and finally left for dead on one of the stalls of the market-house in Second Street below Poplar. His body was taken to the police-office of the Northern Liberties, his wounds treated, and finally he recovered. While these transactions were in progress the fire which had commenced at the Hibernia Hose house extended along Cadwalader Street on both sides, on the west side of Washington Street and south side of Jefferson Street. Altogether about thirty houses were destroyed, and the "Nanny-Goat Market" also took fire and was consumed. The military was called for by the sheriff on Monday evening, but the officers refused to respond. On Tuesday efforts were again made for the same purpose, and after a meeting of the officers of the First Brigade and a discussion of the matter, it was resolved to muster. The troops came upon the ground about dark, and the firemen, who had been ready to play upon the burning buildings, but were prevented by the danger of being shot, proceeded to check the flames under the protection of the military. The mob had dispersed, and during the night there was no further disturbance. The next day was the 9th of May. Great crowds of persons visited the scene of the riots out of curiosity. The military had been withdrawn, all except two companies, the Monroe Guards and the Philadelphia Cadets, Capt. White. Many of the Irish were removing their goods and fleeing from the dangerous neighborhood. Their dwellings were entered. There were rumors of guns and ammunition being found in them. A row of houses in a court running from Cadwalader Street, above Jefferson, were set on fire, as also two brick houses at the southeast corner of Jefferson and Cadwalader Streets, and a court of frame houses running from Cadwalader to Germantown road, above Master Street. The whole neighborhood was menaced, and American flags were displayed from the windows of various houses to indicate that the tenants were not Irish.

At this time the Roman Catholic Church of St. Michael, a large brick building at the corner of Second and Jefferson Streets, was set on fire. The pastor's residence adjoining and some frame buildings on the south caught from the flames and all were destroyed. About the same time the Female Seminary at Second and Phoenix Streets, which had resisted the attacks of the previous day, was set on fire and consumed, as was also a grocery-store occupied by Joseph Corr, a Catholic, at the northeast corner of Second and Phoenix Streets. The two military companies on the ground were weak in numbers and could not prevent these outrages. Indeed, they were taunted by the rioters and insulted in the most outrageous manner. About five o'clock the First Brigade, under Brig.-Gen. George Cadwalader, Sheriff Morton

McMichael and Maj.-Gen. Robert Patterson being with them, arrived upon the ground by way of Fourth Street. They were divided into two bodies, one of which marched down Franklin Street [Girard Avenue] to Second Street and to Jefferson. The other, under command of Col. James Page, marched up Fourth to Jefferson and thence to Second Street. The rioters, who had been insulting to the military, ere this became less demonstrative. Many of them left the ground, and proceeding to some distance from the soldiers, made an attack upon the office of Alderman Hugh Clark, at Fourth and Master Streets, battering the doors and windows. He was an Irishman and a Catholic, free-spoken and unpleasant in his manner, and was highly unpopular. His house stood the attack, but that of Patrick Clark, adjoining, was entered and the furniture thrown into the street. A detachment of military arrived in time to prevent the place from being set on fire. Some other houses on Master and Jefferson Streets were burned. Harmony Court, running west from Cadwalader Street above Master, which contained six or eight houses, was subject to the incendiary and totally destroyed. While these outrages were carried on in Kensington other parts of the city and county were unguarded, and there was a better chance of wanton destruction to exert itself elsewhere. Unfortunately, rumor in the course of the day had circulated through the city that there was probability that the Roman Catholic Church of St. Augustine, on Fourth Street below Vine, and opposite New Street, would be attacked. There was no particular reason why this church should have been selected for destruction while others belonging to the same sect were not even thought of. But there were stories looking to an attack upon St. Augustine's, and they had the effect to attract a considerable crowd to the neighborhood. The seat of previous disturbances having been in Kensington, the city authorities were not prepared for this danger. The mayor, John M. Scott, was on the ground with a body of police, who were stationed on the pavement in front of the church. The First City Troop of Cavalry was stationed in the neighborhood. The throngs of people coming to the scene increased the crowd. Thousands stood or looked at the church or were engaged in low conversation. There was no demonstration of violence to attract attention. But whilst the police and the crowd were on the outside, somebody had entered the church and kindled a fire, the light of which was soon seen. No efforts were made to quench the flames. They increased in brightness as pew led the fire to pew, the galleries caught, and at length the flames broke forth from the roof and the windows in front, and finally the steeple was on fire, and as the cross which crowned the height yielded to the flames and fell in, plaudits arose with savage exultation from many in the streets. The firemen who were upon the ground did not attempt to play upon the church, but devoted themselves to saving the adjoining

ing property. The flames were resistless and they left nothing unconsumed,—nothing but the blackened walls, and there in the morning, through the broken windows over what had been the high altar, were seen as plainly as they had existed on the previous day, the remarkable words, "THE LORD SEETH." Beside the church building, other adjoining property was destroyed. The large building on Crown Street, used as a school-house, in which, during the cholera visitation of 1832, the sick had been nursed and the sufferings of the dying alleviated as far as could be by Sisters of Charity, was totally destroyed. It had contained the large and costly theological library of the Hermits of St. Augustine, including rare books not to be found elsewhere in America. Some of these during the fire were thrown out into Crown Street, and torn up or trodden upon so as to be worthless. Some were picked up and returned eventually to the fathers, but the greater portion of this fine collection of books were destroyed. During all this wanton vandalism the troops had been stationed in Kensington. When news of the occurrences were sent to the military they were marched to the city, and during the rest of the night disposed in detachments for the protection of Catholic churches. Some of these were guarded by citizens. City Councils had an informal session on the evening of the 8th, and it was agreed by those present that twenty thousand dollars should be appropriated to the police committee toward payment of endeavoring to maintain the peace. It was now seen that the temporizing policy of the previous three or four days, the want of preparation to meet emergencies, the seeming helplessness which had allowed rapine, arson, and murder to hold saturnalia, was a great mistake of policy, and had given impunity to the worst elements.

On the morning of the 9th the mayor called a meeting of the citizens in the State-House yard to deliberate upon the present state of the public peace. As many as ten thousand persons were present. John M. Read was chairman, Frederick Fraley secretary. Horace Binney and John K. Kane made short speeches. Resolutions were adopted recommending citizens to "forthwith enroll and hold themselves in readiness to maintain the laws and protect the public peace under the direction of the constituted authorities of the city, county, and State." Other resolutions pledging support to the authorities were adopted, among which was one requesting citizens to meet in their several wards at the places of holding ward elections, "there to organize under the constituted authorities and support of peace and order."

The aldermen of the wards organized these companies. Each man was furnished with a white muslin badge, intended to be worn round the hat, upon which were printed the words "peace police." They were divided into patrols for the blocks and divisions of each ward, and were on duty all that night. On the same day Maj.-Gen. Patterson, who had hitherto not appeared in a military capacity except as attendant with the brigade of Gen. Cadwalader, called out the whole division and established his headquarters at the Girard Bank. Governor David R. Porter arrived in the city on the 9th, and issued a proclamation in relation to the late events. He ordered Maj.-Gen. Patterson to call into service the volunteers of the division to act in conjunction with the sheriff, and

ST. AUGUSTINE'S CATHOLIC CHURCH, DESTROYED BY MOB IN 1844.

made other suggestions in the interests of peace. The soldiers remained on duty for several days, during which there were no disturbances of any kind. On the Sunday, the 12th of May, succeeding the burning of St. Augustine's, the Catholic Churches were closed by direction of Bishop Kenrick. On the same day the military, fearing that persons might collect in places where mischief might be done, paraded through the streets in force. There was also sent up from the United States steamship "Princeton" a large detachment of the crew armed with boarding-pikes, cutlasses, and helmets. There was no disturbance, and in a few days the military were withdrawn from service.

Shortly after Governor Porter arrived he was ad-

dressed in a written communication by fifty-four citizens, whose signatures followed those of Horace Binney and John Sergeant. The communication was voluntary. The signers approved of all the Governor had done for suppression of the riots and prevention of future disturbances. Thanks were due to the military for their conduct during the whole of the trying emergencies; it was asserted that in cases where the military operations had resulted in wounds and death of citizens opposing them, such wounds and death were, in law and in conscience, wounds and death occasioned by the insurgents, and them only. This manifesto was subject in several particulars to severe criticism, which it received at the hands of the Native American party. The grand jury was in session at this time, and immediately afterwards made a presentment which was favorable to the Native Americans. They said that the commencement of the disturbances was caused by "the efforts of a portion of the community to exclude the Bible from the public schools. Those efforts in some measure gave rise to the formation of a new party, which called and held public meetings in the district of Kensington, in the peaceful exercise of the sacred rights and privileges guaranteed to every citizen by the Constitution and laws of our State and country. These meetings were rudely disturbed and fired upon by a band of lawless, irresponsible men, some of whom had resided in the country only for a short period. This outrage, causing the death of a number of our unoffending citizens, led to immediate retaliation, and was followed up by subsequent acts of aggression, and in violation and open defiance of all law."

The Catholics were greatly dissatisfied with this, and protested against the conclusions of the grand inquest. A meeting of Catholic citizens was called shortly afterwards, the Hon. Archibald Randall, judge of the United States District Court, being chairman, and William A. Stokes secretary. They adopted an "address of the Catholic laity of Philadelphia." In this document the presentment of the grand jury was boldly attacked and declared to be unjust. It was denied on behalf of the Catholic community that they had made efforts to take the Bible from the public schools. They said that they only sought to procure the Catholic version of the Scriptures for the use of children of Catholic parents. Referring to the letter of the Catholic bishop of Philadelphia to the controllers of the public schools in 1842, they relied upon the fact that the Board of Controllers had by resolution exempted children from the necessity of reading the Bible in public schools whose parents were conscientiously opposed thereto.¹ In political matters

the address declared that Catholics were free from religious control. They recognized no authority in their spiritual teachers to control them in relation to such subjects, and they averred that their obedience to their bishops regards not the things that pertain to this world. In regard to the disturbances of the few days previous, it was asserted that Catholics did not commence them, and that in reference to all matters connected therewith they would await a legal investigation.

Before this time the Native American party had been feeble, and had scarcely attracted serious attention among politicians. The movement was looked upon with contempt by members of the old parties. It is doubtful whether the entire strength of the persons who had shown any sympathy with Native American doctrines before the riots of May were, in Philadelphia, as many as five hundred legal voters. But the riots gave to the party an immense popularity in the city and county, and the reason was because in the public opinion the rights of American citizens had been grossly attacked and abused, and that too by foreigners by birth, many of whom were unnaturalized, while others, who had become American citizens by favor of the naturalization laws, were more bitter even than the aliens. The Native American party from a few hundred swelled up immediately to an aggregate counted by thousands. Native American associations were established in every ward. Two classes of citizens became members. Young men, native-born, enthusiastic, and not politicians by interest, were naturally attracted by the sentiment "Americans should rule America." There was another class, which included some young people, but mostly of persons some years beyond manhood, or approaching or beyond the middle age, who were led by religious prejudices against the Catholics. These conflicting influences were at first accommodated by the immediate pressure and excitement. But the time came when the two sections disagreed, and the party gradually fell to pieces.²

The accessions to the ranks of the organization were so many, the enthusiasm was so high, and the belief in the success of the effort was so strong, that it was resolved to celebrate the Fourth of July by a Native American procession. The associations and clubs

by the controller or directors of the schools. They only desire to enjoy the benefit of the Constitution of the State of Pennsylvania, which guarantees the rights of conscience and precludes any sectarian modes of worship.

"They ask that the school laws be faithfully executed, and that the religious predilections of the parents be respected. They ask that the regulations of the controllers of the public schools adopted in December, 1834, be followed up, and that the resolutions of the same body adopted in January, 1843, be adhered to. They desire that the public schools be preserved from all sectarian influence, and that education be conducted in a way that may enable all citizens equally to share all the benefits without any violence being offered to their religious convictions."

² In the latter days of the party the "pure" Native Americans, who separated from the sectarian Native Americans, were called in the slang of the party "Mountain Sweets."

¹ The following extract from the communication of Bishop Kenrick, published in March, 1844, shows the Catholic statement of their position in this controversy:

"Catholics have not asked that the Bible be excluded from the public schools. They have merely desired for their children the liberty of using the Catholic version in case the reading of the Bible be prescribed

entered into the project with immense spirit. Fifty ward and township associations participated. They were all provided with banners, and some of them carried several. The greater portion of these were elegant and large, of silk, satin, and velvet, decorated with bright and handsome paintings from the pencils of skilled artists. There was a profusion of gilding, gold and silver bullion fringes, artificial flowers, ribbons, with never-ending recurrence of American flags and repeated presentation of the group colors,—red, white, and blue. There were about four thousand five hundred persons in this procession. The members of the ward associations turned out on foot. There were representatives of twenty-five States, on horseback, each gentleman bearing a banner. A temple of liberty, sixteen feet square at the base and twenty-two feet high, and supported by thirteen columns, rose from a pediment of four steps, and was placed upon a truck drawn by fourteen horses; a full-rigged ship, twenty-six feet long, drawn by four horses, followed by a pilot-boat fifteen feet long, was in the display made by the Fourth Ward, Southwark. The Third Ward, Kensington, the ship-carpenters' home, displayed an elegant model of a sloop-of-war, twenty-eight feet long, which was manned by seamen. There were other vessels with flags and insignia, the whole procession being accompanied by numerous bands of music. The participants turned out with the appearance of health, strength, and intelligence, and the parade, which marched over a long route, was the finest political procession that had ever been seen in the city, and nothing equal to it in the shape of party demonstration has been seen since. The persons participating marched to an inclosure of hill and valley on the east side of the Schuylkill, above Fairmount.¹

Here there were appropriate exercises suitable to the day, and in the evening there was a handsome display of fire-works, which was viewed, according to estimate, by fifty thousand persons. There were some apprehensions of disturbance from this procession. As far as the Native Americans were concerned, they took pains to prevent anything of the kind. They marched quietly, and those who witnessed the pageant made no hostile demonstration. It would have been well if all danger of disturbance had passed away with the smoke of the fire-works. A new occasion of bitterness, violence, destruction, and loss of life was connected with this procession by subsequent events.

¹ The valley was just above Sedgely. The Schuylkill Spring Garden Water-Works are built at the lower end of it; crossing the Reading Railroad, it extended up toward the northeast. A gentle brook purled along the bottom, and the banks were pleasant with wild vines, shrubbery, and in the spring here was the spot nearest the city where the dogwood-tree bloomed most abundant. Years ago this charming little valley was obliterated. Those who would seek for it will wander in vain amid the ponderous and immense buildings of Brewertown in search of the wild beauties of the spot. Scarcely any portion of Philadelphia has been more strangely changed from its original appearance than this.

Some Catholics, excited by memories of the occurrences of May, anticipated that the "Church-Burners," which epithet was used to designate the Native Americans, would make the day a new occasion for arson and riot. On the afternoon of the 5th of July, some persons who were in the neighborhood of the Catholic Church of St. Philip de Neri, on the south side of Queen Street between Second and Third, saw several muskets carried into that edifice. Southwark at this time was strongly Native American in its population. Immediate excitement followed the spreading of the news. Rumor said that the church was "a fort filled with guns and ammunition." In the evening small groups of persons gathered near the church to talk over the affair, and in time there were some hundreds of them. The small police force of the district was unable to do anything with so large a crowd if there should be any attempt at disturbance. Application was therefore made to the sheriff, McMichael. He had no posse embodied, but applied for troops to Gen. Patterson, and himself proceeded to Queen Street. Here the people outside being somewhat angry, and demanding that the church should be searched for arms, the sheriff, with Aldermen Hartz and Palmer, entered the building and brought out twelve unloaded muskets with bayonets, which were in fact the same that had been taken in at an earlier hour of the day. The crowd was dissatisfied and another search demanded. A party was made up from persons in the crowd. These persons searched closely. Seventy-five additional muskets were discovered heavily loaded, and axes, pistols, bludgeons, knives, and a keg of powder, cartridges, etc., also some bayonets fastened on poles to be used as pikes.

Subsequent investigation ascertained how these carnal weapons were placed there. It was the result of a great piece of folly, principally on the part of William H. Dunn, a brother of the pastor of the church. He was a lawyer by profession, a fiery young Irishman, possessed of much more zeal than prudence and common sense. After the destruction of St. Michael's and St. Augustine's, he persuaded some forty or fifty men to enroll themselves as a company for the defense of the church. They were without arms, and applied to Governor David R. Porter for muskets. The latter gave an order for twenty-five of those weapons to be furnished from the arsenal. Dunn also applied to Brig.-Gen. Horatio Hubbell, of the Third Brigade, for a commission as captain of a volunteer company, which was granted. He held this rank at the time, and the commission was not revoked until afterward, upon the allegation that Dunn was an alien. The company met in the church previous to the 4th of July and were drilled there. There were one hundred and fifty armed men in the building on the night of the 4th of July, when an attack was feared. The guns which were taken into the church on the 5th of July were defective, and had been sent to a gunsmith for repair. The open manner in

which they were returned led to the subsequent disturbances.

While the committee of search were in the church the City Guards, Capt. Hill, arrived on the ground. Sentinels were thrown out, and the persons in the crowd were ordered to disperse, which they did. The guards spent a quiet night in watch and sentry duty, but when next day the result of the examination of the second searching committee was reported, the excitement blazed up afresh. The guards remained on duty all the succeeding day (Saturday, July 6th), and, as the throngs increased, the difficulty of restraining them became greater. Brig.-Gen. George Cadwalader was upon the ground in the afternoon, and addressed the crowd, and requested the persons composing it to disperse. His eloquence produced no effect. The crowd increased towards night, and about dark groups of people filled up nearly the entire space on Queen Street, between Second and Third. About dusk a military force, consisting of the Mechanic Rifles, Washington Blues, Cadwalader Grays, Montgomery Hibernia Greens, Markle Rifles, and Junior Artillerists, the latter having three field-pieces, came upon the ground, and reinforced the City Guards. The streets in the neighborhood of Queen, Second, and Third Streets were filled with people. The military filled up the square upon Queen Street, and the crowd was pushed out from there. This movement added to the throngs on Second and Third Streets. On Second Street, by vigorous measures the square between Queen and Christian Streets was cleared, and sentinels were placed. Upon Third Street the movement was not so successful. The people retired slowly. Some of them taunted the soldiers, and dared them to fire. Some persons, it is said, threw stones at the men. Sheriff McMichael, with his posse, was in front of the military endeavoring to clear the streets. The taunts of the crowd were irritating, and Gen. Cadwalader, who was with this part of the force, gave orders to fire. One of the field-pieces was leveled at the crowd. At this moment a man stepped out in front of the cannon and said, "No, don't fire! don't fire!" It was Charles Naylor, a lawyer, formerly member of Congress from the Third District, and at that time acting as a member of the sheriff's posse. His impulse was humane, and in order to save the lives of men, women, and children in the crowd, who were innocent of insult to the soldiers, and were there as spectators. Gen. Cadwalader ordered the immediate arrest of Naylor, and under a guard he was sent at once to the church, where he was held as a military prisoner. The circumstance was sufficient to effect the clearing of Third Street, and guards were placed.

But the people who were forced away from the immediate vicinity were given by the occurrences cause, as they believed, for fresh animosity against the soldiers. Naylor became at once a hero, and the story of his bold interposition in behalf of the people

flew from mouth to mouth. Toward midnight the crowds gradually dispersed. The military companies were dismissed, with the exception of the Markle Rifles, the Mechanic Rifles, and the Montgomery Hibernia Greens. It was one of the blunders of the unhappy occasion that the latter should have been retained for any duty. The organization was Irish, and the members probably without exception Catholics. They might be trusted on this account more faithfully to defend the church. But as the whole trouble arose from the fact that the church had on, and previously to, the 4th of July been garrisoned by a company of armed Catholics, it was bad judgment to have sent that company to the place. And the determination of the general only added to the irritation and excitement. With daylight of Sunday morning, the 7th of July, crowds of people began to assemble in the neighborhood of the church. The story was told that Naylor, the friend and defender of the people, was held prisoner in the church by Irish soldiers. As the day advanced the excitement increased. About eleven o'clock some rough characters made their appearance in front of the church upon Queen Street, dragging with them an old four-pounder cannon, lashed upon wheels, which was reported to be loaded with slugs and various missiles. A formal demand was then made for the release of Naylor. During the delay Alderman Charles Hartz, of Southwark (a Native American in politics), who was present, suddenly stooped to the gutter in the street near the curb-stone, and with his hands scooped up water, which he threw upon the priming of the gun. This bold and thoughtful act no doubt saved the church at the time. While this was going on another gang of desperadoes, with an eighteen-pounder lashed on wheels, came up Christian Street, and entering a court between Second and Third Streets, proceeded toward the rear of the church, against which they commenced a bombardment of little effect for the want of cannon-ball of sufficient size. Two or three rounds were fired at a circular window, the ammunition being slugs and nails, and the damage being but small. This piece was withdrawn about one o'clock, and brought back afterwards with another. They were fired without any serious damage being done. Thomas D. Grover and Lewis C. Levin, two prominent Native Americans, went among these persons and requested them to desist. Finally, they consented to withdraw if Mr. Grover would agree to ride upon one of the pieces. He did so, mounted the cannon, and was drawn down Christian Street to Delaware Avenue. There the guns were abandoned by the persons who had them.

All this time Mr. Naylor was under guard in the church. It was determined that he should be released. The crowd in front of the church, whose cannon had been disabled by the strategy of Hartz, now had recourse to a much more ancient weapon. They got a large piece of timber and, using it as a battering ram,

with frequent blows broke in the front door of the church. The soldiers were within. Fortunately, they did not fire upon the crowd, although it was said that they were commanded to do so by their officers. The release of Naylor became a necessity. He was discharged by some of the aldermen of the district upon his recognizance to appear and answer whenever wanted. His release was the signal of wild enthusiasm. He was received by the mob with cheers, made a short address from the steps of the church, entreated the people to keep the peace and retire to their homes, and was escorted by a multitude of persons to his residence in Fifth Street, above Walnut, where he again made a speech, and requested the people present to act like worthy and respected citizens.

With the release of Naylor might have closed the unpleasant story, if it had not been for another reminder of the excitement of the previous day. The military company of Montgomery (Hibernia Greens) was still in the church. Their remaining there was a constant irritation. The mob demanded that the soldiers should be removed from the church. Lewis C. Levin, Thomas D. Grover, and other leading Native Americans, were present. Each of the former addressed the crowd in the interests of peace. Finally it was agreed by a sort of a treaty made with the ring-leaders that they would cease their attacks if the "Greens" were withdrawn. The church was evacuated entirely and the troops marched out, the Mechanic Rifles and the Markle Rifles escorting and endeavoring to protect the "Greens." The Rifles were received with cheers, but the "Greens" with hootings and yells. The march was attempted to be made by way of Queen and Second Streets. A great crowd followed the soldiers, occasionally cheering the Rifles, but pelting the "Greens" with stones and brickbats whenever there was a chance to reach them. At German Street one of the Greens fired at the crowd; with that the company broke, leaving their escorts, and ran. They were hotly pursued. Some of them were overtaken and beaten. One who was alleged to be the man who had fired was left for dead. Capt. Colahan succeeded in rallying a platoon or two of his men somewhere in Fifth Street, and with them marched up to the State-House. This ought to have been the last outrage of that unhappy day. It was unfortunately the prelude of something yet more serious. The disturbances in Southwark, growing more and more turbulent, were reported all over the city, and great crowds of people repaired in the afternoon to the neighborhood of the church, most of them from curiosity. The troops being withdrawn, there was great danger of further violence. Here the leading men of the Native American party intervened to prevent, if possible, further disturbance. They arranged themselves on the steps, in front of the church, as defenders of the building. They wanted the persons in the mob to understand that the church was under the

protection of the members of the Native American party. Messrs. Thomas D. Grover, Lewis C. Levin, Charles J. Jack, John Perry, and others made short speeches, and whenever new symptoms of violence occurred their voices were heard in expostulation and remonstrance. They could not prevent a demonstration which was made toward the middle of the afternoon, by means of the battering-ram which had been used against the door in the morning. This missile was employed with great effect upon the brick wall of the side yard of the church west of it. A breach was effected, and through this the besiegers entered. Breaking through the windows and doors on the side of the church, they gained access to the building and swarmed over it. The Native American leaders, who had been on the outside, entered with them and endeavored to prevent destruction. They were quite successful. Very little damage was done, with the exception of breaking doors and windows on entering. The satisfaction of curiosity was the prevailing disposition. In the course of the afternoon hundreds of persons entered the building almost with the regularity of a procession. They went through the church and, having satisfied their curiosity, retired by the door of exit in good order. After the pressure of sight-seers was over, and the parties who had desired access to the church had been satisfied, the prominent Native Americans who were present organized a committee of one hundred to defend the church. From their own numbers they stationed guards at the various doors. Persons were allowed to depart, but none to enter, and before dark the building was entirely within their charge. The excitement was now subdued. The riotously inclined were satisfied. Naylor was free, and the church was in charge of the Native Americans. Nothing more could have been desired, and as the spectators dispersed to their homes it was generally supposed that the trouble was over. It might have been so if the citizens' committee had been left in charge of the church.

In the afternoon, while the turmoil was fierce in front of the church, the bell in the steeple of Independence Hall rang out the signal for the assembling of the military staffs. At half-past six o'clock the troops left the State-House yard with music playing, and proceeded in that way, attracting much attention (martial music on Sunday being very unusual, except in case of funerals), down Fifth Street toward Queen. Many persons attracted by the show accompanied them, and when they got to Third and Queen Streets a large crowd was following or marching with them on the sidewalks. The head of the column reached the front of the church about seven o'clock. It was a long summer afternoon, and not yet dark. The Cadwalader Grays, Capt. Robert K. Scott, were ordered to clear Queen Street down to Second. The crowd retired slowly, and some who were in it sullenly. The Grays found difficulty in forcing the people back, and the City Guards, Capt.

Joseph Hill, were ordered to support them. The latter pointed their bayonets in the manner of a charge toward the crowd, and pressed forward. However those nearest might have desired, they could not get out of the way; there was a great pressure behind them, and those farthest away did not understand the necessity of quick movement. There was no extraordinary show of animosity by the people; the majority of them were peaceably inclined, but a few rough-tongued fellows among them endangered the safety of all. At this moment, while persons in front of the bayonets were in some cases taking hold of them and endeavoring to deflect them, so that they should not be wounded, the citizens' committee of one hundred was marching toward Second Street on the south sidewalk in procession two and two. They had surrendered the charge of the building to Gen. Cadwalader.

While some persons in the street were engaged in altercation with the soldiers or taunting them some bricks and stones were thrown from the crowd, and soldiers in Scott's and Hill's companies were struck and some of them knocked down. Capt. Hill, in front of his company with sword drawn, was seized by a person, who took him by the arm and endeavored to wrest the sword from him. In the scuffle Hill was partly down on one knee. More stones were being thrown. Then Capt. Hill gave the order to fire. The companies at the time were near Second Street. They fired across and down Queen Street and down Second Street. By this discharge Isaac Freed, William Crozier, Ellis Lewis, and James Linsenberger, a boy, and perhaps others, were killed outright, and several persons were severely wounded. Among the latter were women, some of whom were standing at their own door-steps as the soldiers came down, and one was shot while leaving a private house at which she was a visitor. The bodies of the dead were removed to the Southwark Commissioners' Hall near by. A savage excitement sprang up among the people. Some of them repairing to the hall took possession of the muskets and the guns which had been taken from the church on the 5th of July. They proceeded to use them against the military. A regular battle commenced. The soldiers were fired at from neighboring streets and alleys. On the other hand every precaution was taken to save the lives of the volunteers. To prevent their being seen by the lamp-lights and good aim taken at them, the lights were put out and the soldiers placed as well as could be under shelter of houses and steps. The mob made the Wharton market, at Second and Wharton Streets, their rendezvous. There were soon brought four cannon, two of them having been in service in the morning attacks upon the church. One of the latter had been spiked.

About ten o'clock a cannon, brought up quietly by the rioters and posted at Front and Queen Streets, was fired up the street at the military. It was loaded

with chains, bolts, spikes, and other missiles. The aim was too high and the load flew over the heads of the soldiers. The latter immediately returned the fire from two guns in battery at Second and Queen Streets. The rioters replied from their gun, and there was a sharp cannonade for some time, as also musketry firing. There had been a general alarm to call out the military from the State-House, and before ten o'clock two regiments of the Second Brigade had arrived with three pieces of artillery. They were posted in the neighborhood of Third and Queen Streets. The rioters becoming aware of this, shifted the point of attack. They muffled the wheels of the wagons upon which their pieces were placed by various devices. Among other things it was said that jackets and portions of the clothing of the ruffians had been tied around the wheels. One gun was brought up Christian to Third Street and pointed up the latter. By its discharges Sergt. John Geyer, of the Germantown Blues, was instantly killed. Corp. H. Troutman, of the same company, was mortally wounded and afterwards died, and several soldiers were wounded. The fire was immediately returned by the soldiers posted on Third Street without doing any damage. The attack was so unexpected that they were not quite ready, and before their piece was discharged the cannon at Third and Christian Streets had been pulled away by a long rope which was managed by the persons who had it in charge, who were skulking behind the house at the corner of Christian Street, and were safe from the soldiers. Afterward a cannon, which had quietly been brought to Fourth and Queen Streets by the rioters, was fired down the street. Some of the soldiers were wounded. The military were under difficulty for the want of cavalry when the fight commenced. A charge upon any gun after it was fired would have insured the capture of the piece. The Washington Cavalry, Capt. Snyder, and the first State Troop, came upon the ground about eleven o'clock. Gen. Patterson had sent them from his headquarters, established at the Girard Bank. The insurgents, who seemed to be well apprised of the military movements, soon knew this. They prepared for it by stretching ropes across the street from tree to tree, or by other means of fastening. Fortunately, the obstructions were not necessary to be passed, otherwise many horses would have been thrown down and the men injured. Later in the night there was firing almost at the same time by the rioters with the cannon from Front and Queen, from Fourth and Queen, and from Third and Christian Streets. In the course of the night the cavalry by successive charges had succeeded in capturing three pieces, and the war was over.¹

¹ It was impossible to ascertain the names and number of the wounded. The following were killed:

Military.

John Geyer, of the Germantown Blues.
Corp. H. Troutman, of the Germantown Blues.

Before morning the fight was over, but the condition of the soldiers was really alarming. Some of them had been marched upon the ground early in the afternoon. They had been without supper or food, or even water, except such as might be obtained from the public pumps during the night. They were exceedingly fatigued and hungry. They were surrounded by a hostile population, and there was no commissariat. They received nothing to eat and no supply of ammunition until near noon on the 8th, when citizens' volunteer police guards, of Locust, Pine, and Cedar Wards, all armed, brought to them ammunition and provisions. This was the first refreshment furnished many of them for twenty-two hours. There were ominous rumors of what was to happen in the evening and night succeeding if the troops were kept at the church. Dreadful scenes of slaughter were predicted. The commissioners of the district of Southwark, recognizing the imminent probability that there would be bloodshed and arson, perhaps, if the troops were kept in the district, interested themselves to obtain an order for the withdrawal of the force. There was consultation with the sheriff, the judges of the Court of Quarter Session, and the members of the County Board. The commissioners were confident that, if possession of the church were given over to them and the aldermen and police of the district, the church-building could be preserved from harm, excitement would cease, and public peace be restored. It was therefore thought prudent to withdraw the military. Maj.-Gen. Patterson gave the proper order. The force marched off from the ground in the afternoon, and there was no disturbance afterward.

Governor David R. Porter, apprised of the disturbances, arrived in the city on the afternoon of Monday. He issued general orders sustaining the course of the military, and directing measures for the maintenance of the peace thereafter. He also called out a considerable number of troops from other counties of the State near Philadelphia. The headquarters of the force was at the Girard Bank. Detachments of soldiers were there, and sentries were placed. The other troops were quartered in detachments at various places. Altogether it is estimated that five thou-

sand soldiers were under arms in the city at this time. They were gradually dismissed during the next two or three weeks, and there was no public disturbance.

The difficulty of the previous season had been the doubt as to whether the military force could be properly called upon by the sheriff, as well as the indisposition of the volunteer soldiers to be used as policemen, and put upon a service unpleasant, thankless, and dangerous. It was under the argument that the city ought to be supplied with an armed force, subject to be called out when necessary for the preservation of the peace, that an ordinance was introduced into Select Council "to provide for the preservation of the peace of the city." It authorized the enlistment of a battalion of artillery, a regiment of infantry, and one or more full troop of horse. The companies might be any of the present volunteer corps, or such as might thereafter be enrolled and equipped. They were to be under command of the brigadier-general of the city brigade in case of necessity. Ten thousand dollars were to be set aside at once to meet the requirements of the ordinance, and six thousand dollars were appropriated shortly afterward. The ordinance was passed on the 11th of July, and on the 26th of September, Gen. Cadwalader reported that the full complement was made up and consisted of one thousand three hundred and fifty men. Seven thousand dollars were appropriated by the city at once to pay for uniforms and equipments. Gen. Cadwalader insisted that these troops should be clothed in the United States uniform. Several of the volunteer companies, which had distinctive uniforms, refused to adopt the suggestion. The city troops were therefore made up from some of the volunteer companies which had been languishing, and were glad, for the sake of filling up their ranks and their treasuries, to accept the bounty. Several of the companies were entirely new in men and in officers.

When the Legislature assembled at the ensuing session, the necessity of strengthening the hands of the civil authorities for the preservation of the peace became of paramount consideration. All through the riots and disturbances of the preceding ten years, and an incentive and assistance even, though not intended, was the anomalous condition of the city and county in consequence of the municipal divisions of government which had been created from time to time. A boundary street running between one district and another was as effectual a barrier to the passage of a policeman or constable across it to an adjoining district as if there had been a strong wall there fifty feet high. When there were riots in Moyamensing the city police might be massed in a body on the north side of Cedar or South Street, and be witnesses of riot, murder, or arson within fifty feet of their station without having the right to interfere. If there was a riot in the city the disturbance was no affair of the police of the districts. The latter, indeed, were of small account, few in number, and expecting in emergency

Citizens.

 Ellis Lewis, aged twenty-five years.
 James Dougherty, aged fifteen years.
 Edward Lyon, aged twenty-five years.
 David Cathcart, aged twenty-seven years.
 Thomas C. Saunders, aged eighteen years.
 Elijah P. Jester, residing on Second above Spruce Street, aged thirty-eight years.
 Gerhart Ellis, residing on Queen Street, aged twenty-eight years.
 John Cook, an oysterman, one of the rioters, aged thirty-three years.
 James Linsenberger, Parrish Street, aged nineteen years.
 A German, name unknown, who looked out of a garret-window on the south side of Queen Street, between Front and Second, had his head taken off by a cannon-ball.

valuable reinforcement from the district constables. The latter were conservators of the peace from time immemorial by the common law. But in the city and county at this time they had practically ceased to exercise their privileges, and made scarcely any attempt to discharge other duties than those connected with civil proceedings, the serving of writs of summons and subpoena, the process of execution and distress in suits for debt and under landlords' warrants. The functions of constable were with such men only a business to be conducted for the benefit and profit of the officer, to be discreetly managed so as to need as little work as possible, and to bring in as many fees as the law allowed, and frequently much more. The sheriff, under the common-law doctrine, was considered the conservator of peace of the county. He had large powers; he might summon the *posse comitatus*. The whole power of the county was subject to his command. But if the power should refuse to come, it was a great legal puzzle to the sheriff and his advisers how he could compel it to come. A few friends or citizens might rally round his standard, but even they considered themselves volunteers, with no compulsion to serve or to remain in service longer than they chose. Hence it became apparent that the only hope of the sheriff in great turbulence was in calling out the armed militia. But whether he had any power to do so was a debatable question. The volunteers themselves did not fancy the sort of work which turned them into constables. Coming from among the citizens, some of them were likely to be influenced by the same passions and prejudices that were carried to extremities by the mob. Many of them did not desire to be placed in positions of antagonism to their fellow-citizens, and the duty of enforcing the civil laws in times of excitement was not pleasant. Added to all this was the idea that they were troops of the State, organized under the laws of the commonwealth, subject only to the orders of the Governor as commander-in-chief of their superior officers. There were several occasions during which the sheriffs or mayors sought the assistance of the volunteers in time of danger, and when their services were either refused or given with reluctance.

There were some citizens bolder and more far-seeing than others, the latter being among the most influential, who saw that the remedy for such a state of things was only to be found in the breaking up of the separate and independent municipalities, and uniting them under one government. Some of these persons met in the county court-house in December, Samuel Webb being the chairman, and Joseph Reese Fry the secretary. This meeting boldly attacked the difficulty by adopting an address and presenting the draft of a law consolidating the city and districts in one corporation. The proposition was a great shock to conservatism. Certain persons in the city, whose opinions were looked to as the sum total of human wisdom, were surprised by the au-

dacity of the movement. They could not agree to anything of the kind. Therefore, immediately afterward, a meeting was called at Evans' Washington Hotel, in George [Sansom] Street, at which ex-Mayor John M. Scott was president, and Richard Vaux secretary. Horace Binney, Sr., offered the resolutions which deprecated the proposed remedy of consolidation of the city and districts. A committee was appointed to prepare memorials to Councils and the Legislature in opposition to the plan.¹ City Councils, influenced, it may be supposed, by a desire to prevent the uncertain political changes that would follow consolidation, among which was the danger that the old, respectable, and conservative methods of city legislation would be overborne by the less formal methods of proceedings in the districts, passed resolutions declaring their opposition to the consolidation plan, but recommending, instead, the establishment by act of Assembly of a police system for the city and districts which would not interfere "with the integrity of the (city) corporation." Under this influence the Legislature passed the desired law. The act was passed April 12, 1845. Under its provisions the city of Philadelphia and the incorporated districts of Spring Garden, Northern Liberties, and Penn, and the township of Moyamensing were required to establish and maintain police forces of "not less than one able-bodied man for one hundred and fifty taxable inhabitants," for the prevention of riots and the preservation of the public peace. A superintendent of police was required to be elected for the city and for each district. If there was failure in any section to comply with the law, the city, township, or district so failing was to be held responsible for all damage and loss of property occasioned by riot or tumult within its territorial limits. In case of any riot occurring which the police force of the district was unable to suppress, the sheriff had authority to call on the several superintendents of police for the whole or any part of their forces. In case twelve or more persons were unlawfully, riotously, and tumultuously assembled, the sheriff or his deputies or the police superintendents were authorized "to go among them, or as near to them as he can safely go, and there with a loud voice make proclamation, in the name of the commonwealth, requiring and commanding all persons there so unlawfully, riotously, and tumultuously assembled, and all other persons not being there on duty as police, immediately to disperse themselves, and peaceably to depart to their habitations or to their lawful business." To continue there after such proclamation was of itself a misdemeanor to be punished by imprisonment, and every one who remained on the ground might be arrested.

¹ It was composed of Josiah Randall, Horn E. Kneass, Horace Binney, Jr., St. George Tucker Campbell, Sidney G. Fisher, Robert H. Hare, William A. Stokes, John H. Markland, and James W. Paul. It is worthy of note that all these gentlemen, as well as the officers of the meeting and the mover of the resolutions, were lawyers.

This statute also clearly established the right of the sheriff to call upon the major-general commanding the military division of the city or county or his assistants, upon certifying to him that there was an existing riot or tumult which the police force under his command was, in his opinion, not competent to suppress without further aid. The troops were authorized to "proceed in military array and subordination, and by military force in any part of the city and county to restore the public peace. . . . And it shall be lawful for the said military to proceed in suppression of such riot, tumult, and unlawful assembly as aforesaid by such military force, and in like manner as in the case of war or public insurrection."¹

In the summer and autumn of this year the followers of the Rev. William Miller, the false prophet, who by pretended interpretations of the Scriptures, and particularly of the book of Revelation in the New Testament, formed theories by which he thought was established the certainty that the end of the world was at hand, were active in the city. They held frequent meetings, and rented a church building in Juliana Street above Vine, at which many of their conferences were held. The Millerites were pious, and generally estimable people, strong in their religious views, but carried astray by the plausibility of the arguments of Miller, strengthened by quotations from Scripture, which they undertook to construe for themselves according to their own belief. Two or three times during 1843-44 the "last day" had been named and waited for by them in apprehension. Each failure instead of discouraging them seemed to strengthen their faith, and every postponement only appeared to them a confirmation of their belief that the great day was at hand. The last dread prophecy told that on the 24th of October the last trumpet would blow. The world would come to an end. Those who were living upon the earth would be translated to heaven. The dead would rise and the awful judgment be pronounced. Fully believing in the expected event, they prepared for it with great solemnity. Ascension dresses were made and ready. With these the persons repaired to various places, some in New Jersey, and some in Pennsylvania. Showing their sincerity, many of them abandoned their houses and property, leaving their dwellings and places of business with doors unlocked, and everything exposed to thieves. Property was of no value to them, and would soon be destroyed. In many places the neighbors of these deluded people, in kindness and pity, watched their property for them, or took

measures to fasten up their houses from predatory visitors. The most of the Philadelphia Millerites repaired to a field near Darby, where they pitched a tent about noon of the 22d, and passed the time with hymns and prayers waiting the dread moment. Before night this canvas shelter was too small for those who sought it. Some of them were compelled to stay in the fields. Some had divested themselves of their earthly garments, and were thinly clad in their ascension dresses. Rain began to fall. The night was dark and stormy. There was no fire nor any means of comfort, not even food. It was folly to cater to the appetite, or to seek warmth or comfort at such a moment. A second tent was put up on the 23d. That was the last day beyond all question. At midnight it was expected that the Son of Man would come. All were prepared, and they awaited the dreadful change with tears and prayers, and yet the tide of time ran on. Midnight came and passed. There was no signal. Some awaited the consummation all day of the 24th. Others began to go off after daylight, and straggled on to the city toward their earthly homes, disappointed, tired, cold, sick, and hungry. If, after they had recovered, they held on to belief in the doctrines of William Miller, they gradually fell away and died without the sign.

This year may be considered the foundation date of the establishment of the great public inclosure, Fairmount Park. Among the assets of the Bank of the United States at the time of its failure was the estate immediately north of Fairmount Water-Works known as Lemon Hill, which had formerly been the seat of Henry Pratt. The disposition of this valuable property, for as large an amount as possible to be obtained for it, was the object of the assignees. The period was unpropitious. The failure of the bank had paralyzed trade, crippled capitalists, and rendered money scarce. "Hard times" prevailed, and the prospect of selling this fine estate, which had been purchased for two hundred and twenty-five thousand dollars, to any one purchaser or even to a company for anything like the amount was small indeed. Some shrewd person seems to have suggested that the city of Philadelphia ought to be compelled to buy it. It was a good idea, and only needed the presentation of certain arguments to make it seem as if such purchase was an absolute necessity. The Schuylkill water! How necessary to preserve its purity for the health and convenience of the people! What a source of poisonous drainage and danger might a piece of property so near the water-works become if it should be built upon and occupied by dwellings, stores, or factories! The newspapers were brought to the assistance of the plan by judicious publications, the text to which was that the possession by the city of the Lemon Hill estate "may prove the means of more effectually protecting the basin at Fairmount from the introduction of substances more or less prejudicial to the community." "The College of Physicians rallied in favor of the scheme

¹ This act was the foundation upon which was afterwards built the act to establish the marshal's police, passed May 3, 1850, which was one step nearer consolidation. Under the act of 1844 there was a police superintendent in each district, and he was independent of the superintendents, Councils, or commissioners of other districts. The act of 1850, while not interfering with the regular police forces of the city and districts, put the extra police under the control of a single officer elected by the people of the districts to serve for three years, and called the marshal of police for the Philadelphia police district.

and sent to Councils a memorial setting forth the sanitary and salutary benefits that would follow the acquisition. Twenty-seven petitions, signed by two thousand four hundred and forty-three citizens, were sent to Councils, and those bodies yielded to the arguments. They got a great bargain. Two hundred and fifty thousand dollars was the amount which the bank expected to realize from the property at the time. The purchase was made for twenty-five thousand dollars less. The assignees knew that they could not obtain any such sum. They modestly offered to take one hundred and thirty thousand dollars; but the city finally bought the tract, fifty-two acres, for seventy-five thousand dollars, a great bargain, indeed." The deed was dated July 24, 1844. Nothing was done with the property for some years. Lemon Hill Park was dedicated for public use, separated from Fairmount by Coates Street and Landing Avenue, Sept. 18, 1855. Sedgely, north of Lemon Hill, was acquired in 1856. The Lansdowne property, on the west side of the Schuylkill, was obtained in 1866. And in 1867 the possible boundaries of the park were extended, under authority given to the Park Commissioners, on the east side of the Schuylkill from Callowhill Street, Fairmount, up to the mouth of the Wissahickon, and on both sides of that stream to Chestnut Hill, whilst upon the west side the territory extended from the Callowhill Street bridge up to a point nearly opposite to the Falls of Schuylkill.

The borough of West Philadelphia, in the township of Blockley, was incorporated by act of February 17th. The boundaries commenced at the intersection-line of Hamilton village and the Darby road; thence along the northwest curb-line of that road to the north side of Chestnut Street; along the curb, on the north side of that street, to the Schuylkill; along the Schuylkill to the north line of property of the city of Philadelphia on Washington, or Market Street; thence on the north line of the said property west to the western termination of that property; thence south by the west line of that property to the north side of Hugh McIlvaine's property; thence west along the said north line to McIlvaine's western boundary; thence south along the west line of his property to the south side of the Lancaster turnpike road; thence along the south side of the said road to the eastwardly line of the late Creans estate; south by the same to the south side of Green Street; along the south line of that street to the west side of Cedar lane; along the latter to the east line of Rose's estate; thence south along the same to the westerly line of Hamilton village, and along the same to the intersection of Darby road, the place of beginning. It would puzzle a surveyor to lay out these lines at the present day. The usual method of laying out districts by recognized street or ward boundaries was laid aside for the benefit of special private estates mentioned in the act. This legislation had been rendered necessary by a former illegal proceeding. The borough of West

Philadelphia had been created by order of the Court of Quarter Sessions in 1840. The authority to do this was contested by certain citizens, and the proceeding was finally decided by the Supreme Court to be illegal. The act of Assembly chartering the borough was intended to do away with the mischief caused by the former error, and to provide for the debts of the late borough. The first commissioners of the borough appointed under the act were Henry Leech, H. G. Freeman, Jacob Brown, Richard McIlvaine, James Hanna, and James Twaddell.

By act of February 26th the inhabitants of the district of Penn, as the same was bounded by the act of April 19, 1843, were constituted a corporation under the title of "The Commissioners and Inhabitants of the District of Penn." There were nine commissioners, the full term of each being three years.

The borough of Frankford was authorized to elect councilmen for three years, full term, by act of March 14th.

The Northern Liberties Gas Company, which had been established before this time, was incorporated April 13th, with a capital of \$200,000, with authority "to construct and maintain suitable works for the manufacture of high carburetted hydrogen gas from bituminous coal and other substances, for the purpose of public and private illumination in the district of the Northern Liberties, or in streets dividing that district from those opposite."

The Spring Garden Gas Company was incorporated April 27th, "for the distribution of hydrogen carburetted gas, for the purpose of public and private illumination." The capital was \$20,000, with right to increase to \$40,000. The public lamps in the district, it was stipulated, should be lighted at one-half the rates to private consumers. This corporation was given authority to purchase the works of the Spring Garden Gas Company then in existence.

A horse-race at the Camden (N. J.) race-course between "Fashion" and "Peytona," on the 28th of May, was attended by many thousands of citizens of Philadelphia. The horses were favorites. During the morning the stand upon which many people were crowded fell. Several persons were thrown down. The wildest excitement was caused by the accident. The news spread to the city, and the horrors of the case immensely magnified. Hundreds were killed, so rumor said. Their friends and relatives swarmed the ferries, crowded the steamboats, and crossed to New Jersey. Terror and alarm followed in many families. Finally, it was discovered that nobody had been killed. Twelve persons were injured rather seriously, and several more slightly, but eventually all recovered.

A fire took place in the Academy of Fine Arts, in Chestnut Street, between Tenth and Eleventh, by incendiary means, on the evening of the 11th of June. The valuable collection of statues, casts, models, paintings, and engravings belonging to the society

were in great danger, and many of them were destroyed. Benjamin West's painting, "Death on the Pale Horse," was cut from the frame and saved in a damaged state. Stuart's original full-length portrait of Washington was rescued, but was considerably injured, and several other paintings of great merit were lost. Among them were the "Roman Daughter," by Murillo, which once belonged to Godoy; "Prince of Peace," "St. Jerome," by Murillo; a shipwreck, by Salvator Rosa; "St. Francis," by Guido; a portrait of Columbus, and portraits of Dugald Stewart, John Quincy Adams, Judge Shippen, and Judge Hopkinson. The antique gallery, containing fifty or sixty statues, was totally destroyed. The library of the academy was materially injured. In many particulars the loss was irreparable. A public meeting was held shortly afterwards, and subscriptions were authorized to be taken up for the benefit of the academy. Many paintings and engravings were damaged by water, but were afterwards restored with considerable skill.

In the early part of September a fire at Broad and Cherry Streets destroyed two forwarding depots and warehouses, extensive in size and well stored with goods ready to be transported. The fire commenced in a stable near Arch Street, on the west side. The flames were communicated to the large storehouse of Siter, James & Co., and thence communicated to the warehouse of James Steel & Co., at the southwest corner of Cherry Street. Crossing over that street to the north side, the warehouse of Craig, Bellas & Co. was also totally destroyed. In front these establishments took up nearly three-quarters of a square between Arch and Race Streets, and they extended back two hundred or two hundred and fifty feet. They were filled with grain, flour, provisions, and other staples brought from the West, and with groceries, dry goods, clothing, etc., ready to be taken West. The loss was very heavy.

The first movement toward the construction of the Pennsylvania Railroad took place during this year. It was thought that the transportation facilities between Philadelphia and the West were not sufficient for the business. Transportation was slow by railroad to Columbia. By canal along the Susquehanna and Juniata to Blairsville, by inclined plane over the mountains to the Conemaugh, and thence by canal at Pittsburgh, was considered slow in comparison to what might be done and what ought to be done. A meeting was held December 9th at Musical Fund Hall, Thomas P. Cope, president. Speeches were made by William M. Meredith, Henry D. Gilpin, Isaac Hazlehurst, John J. McCahen, James M. Sanderson, and George Darsie, of Pittsburgh. The burden of all these addresses was that better means of communication were necessary, and that they could be secured by building a railroad between Harrisburg and Pittsburgh. Committees were appointed to prepare an address on the subject to the people of

Pennsylvania, and to petition the Legislature for an act of incorporation for a railroad company between the points named. This proceeding led to important results in after-years.

The intelligence of the death of ex-President Andrew Jackson was received with regret. City Councils ordered that the Independence Hall should be hung with black; that the State-House bell should be muffled and tolled upon such day as should be appointed for a general mourning solemnity. This occurred on the 26th of June. There was a great procession; Samuel J. Henderson was chief marshal. The volunteers of the city and county brigades, firemen, Odd-Fellows, Sons of Temperance, and the officers of municipal corporations and members of various societies swelled the concourse. The procession marched to Washington Square, where, upon a platform deeply draped with sable hangings, the Rev. George W. Bethune delivered a prayer, and the Hon. George M. Dallas, Vice-President of the United States, an oration.

Commodore Jesse Duncan Elliott, of the United States navy, died in December, and was buried on the 13th from his residence, South Fourth Street near Spruce. The volunteers of the First Brigade, United States seamen, City Councils, and other public bodies attended. The burial took place in the modest little graveyard belonging to the United States Naval Asylum.

The project to connect the Columbia Railroad and the Philadelphia, Wilmington and Baltimore Railroad on the east side of the river Schuylkill led to the passage of the act of April 15, 1845, by which the Schuylkill Railroad Company was incorporated. Power was given to construct a suitable railroad, with a single and double track, commencing at and connecting with the Philadelphia and Columbia Railroad at a point between the east side of Schuylkill Front Street (Twenty-second), and the west side of Fairmount Street (Twenty-fifth); thence southwardly by the most convenient and practicable route, approaching as near the Schuylkill River as the nature of the ground, the accommodation of trade and business, and other circumstances will reasonably admit, until it reaches South Street, with liberty of extension, if stockholders approve, from South Street to the intersection of the Philadelphia, Wilmington and Baltimore Railroad at a point above Gray's Ferry, subject to the same rights and restrictions as the Northern Liberties and Penn Township (Willow Street) Railroad Company by act of April 23, 1829. One track of this railroad was built. It was near the Schuylkill, and crossed Market Street about Twenty-third, ran west on the south side of the abutments of the permanent bridge and southward by Beach Street and other streets as far as South. It is doubtful whether it extended farther. It was really of no benefit, and if used at all might have been for the benefit of some of the coal-yards near the Schuyl-

kill. The Philadelphia, Wilmington and Baltimore Railroad Company did not need to use it, as it had a clear and agreeable connection with the Columbia Railroad in its most busy quarter of the city by the means of Broad Street.

Some of the streets and lanes in the upper part of Spring Garden and Penn township, built and opened originally for private rather than public use, running irregular courses, were found to be in the way of improvement. An act of Assembly ordered the vacation of old Master Street, or Masters' Lane, between the east side of Tenth Street and the east line of Broad Street. This had been laid out by William Masters long before the Revolution, and by usage was presumed to have been a public highway. The ground went one-half to the owner on each side. It was made a condition of the vacation that the ground to be occupied by Jefferson Street from Tenth to Broad, Eleventh Street from Jefferson to Camac, and Tenth Street from old Master Street to Jefferson, should first be laid out by the owners of property thereon without cost to the county.

Before this time the property of the public schools had been held by the county of Philadelphia and the commissioners of the county, and in some cases by private persons, in trust, for the use of the controllers of the schools. The latter, by previous acts, were given authority to use the schools and the school property, but they were not the owners. The fact led to the passage of the act of April 16th, by which the controllers of the public schools of the First School District of Pennsylvania, then in office, and their successors, were constituted a corporation to take and hold real and personal estate for public-school purposes, and to sell and convey the same when necessary free from all trusts.

On the 11th of May, 1846, the Congress of the United States declared that war existed by the act of the republic of Mexico. Ten millions of dollars were appropriated for the expenses of the war, and the President was authorized to call out fifty thousand volunteers. On the 13th of May a public meeting of the citizens of the city and county was held in Independence Square. It was large and highly enthusiastic, and free from party manifestations. In order to insure a representative set of officers the sheriff of the county, Morton McMichael, called the meeting to order, and on his motion John Swift, mayor of the city, was made president. The vice-presidents were Richard Vaux, recorder of the city; William M. Meredith and Samuel Norris, presidents of the Select and Common Councils of the city; John F. Belsterling, mayor of the Northern Liberties; Jacob Fry, president of the Commissioners of Spring Garden; Thomas D. Grover, president of the Commissioners of Southwark; Samuel F. Reed, president of the Commissioners of Moyamensing; Samuel T. Bodine, president of the Commissioners of Kensington; Ignatius Ford, president of the Commissioners of

North Penn; James Landy, president of the Commissioners of the Northern Liberties; and Thomas Allibone, Burgess of West Philadelphia. There were eleven secretaries, selected fairly from the political parties, Democrat, Whig, and Native American. Speeches were made by Josiah Randall, Col. Robert M. Lee, Col. James Page, Benjamin H. Brewster, Peter Sken Smith, and Robert T. Conrad. The resolutions were offered by Peter A. Browne. The preamble recited the facts in the President's message to Congress, that hostilities had been commenced by Mexican troops on the Rio Grande against troops of the United States, and that war actually existed. It was said "the power of a government to resist aggression or chastise the aggressor, and its means of maintaining its honor and defending its territory, depend upon the hearty concurrence of the people in the measures adopted by their representatives and a steady co-operation in carrying out those measures. It was therefore

"Resolved, That while this meeting deeply regrets that negotiations of a friendly character have failed to effect a pacific settlement with our sister republic and that she has resorted to hostilities, we deem it a duty to make known to the nation at large, and particularly to the government, that our full and entire sympathies are with our country, and that should the emergencies of the nation require it, our services, our fortunes, and our lives are now voluntarily pledged for the preservation of the integrity of the national domain, the security of the liberties and the conservation of the rights of our fellow-citizens, and the honor of our country."

On the 13th of May, President James K. Polk issued a proclamation of war against Mexico. It was not published in the city until the morning of the 15th. Before that time there was a stir among persons willing to volunteer.

On the morning of the 13th, in anticipation of the call, the state of affairs between the United States and Mexico being such that war seemed inevitable, Charles J. Jack, of No. 12 North Seventh Street, who had been an officer of the militia in former years, issued proposals for recruiting "the First Regiment of Native Guards." In support of this scheme he said, "The foreigners have heretofore raised companies and battalions, let us raise a regiment. The undersigned, long known to you as connected with the volunteers of this city and county, will assume the command and take upon himself the discipline of the corps, nor will he ever be found absent from the post of duty." Announcing that the colors of the regiment would be red, white, and blue, the obliging self-commissioned Col. Jack announced that he would select officers to fill up all the "commissioned posts."

On the same day the journeymen printers met at the Keystone Building and resolved that they would take up their shooting-sticks in their country's cause.¹

¹ The company afterward organized was called the Press Guard, Capt. William C. Toby (a writer for the *Spirit of the Times* and other papers, and afterward a correspondent of newspapers from Mexico, under the signature of "John of York"); First Lieut. Franklin D. May (afterwards a railroad agent and officer, familiarly known as "The Subscriber"); Second Lieut. John T. Doyle (years afterward captain of the Hibernia Target Company); First Sergt. James H. Roberts.

They had heard "with pride and pleasure" that their brother craftsmen in New Orleans had done this. For themselves, they declared "as long as we have life and limb we shall be found battling in the cause of American freedom and against the wily schemes of crowned heads, so palpably shown in the recent movement by the Mexican soldiers." The printers resolved that they would give their own services when wanted, and called upon their fellow-citizens to "at once rally round the standard of our country's glory." Young men of Spring Garden to the number of several hundred, meeting at Buddy's Hotel, corner of Ninth and Green Streets, on the 16th, resolved to form a military corps. Governor Francis R. Shunk on the 16th made proclamation stating that the President had called for volunteers, and ordering the officers and soldiers of the commonwealth to hold themselves in readiness. Pennsylvania, according to requisition through the Secretary of War, Hon. William L. Marshall, was called upon for six regiments of ten companies each for the United States service; each company to consist of one captain, two lieutenants, four sergeants, four corporals, two musicians, and sixty-four privates. On the 21st recruiting-parties with drummers and fifers marched through the streets. Governor Shunk did not call for the six regiments until May 26th. The orders were issued through Adjt.-Gen. George W. Bowman.

The reputation gained by Gen. Zachary Taylor in the military operations on the Rio Grande made him the hero of the hour. His "availability" as a candidate for the Presidency at once struck the fancies of the politicians. A meeting of Whig citizens, by call signed by James Vinyard, Dr. J. Knox Morton, William F. Parry, Samuel Allen, and others, took place in the hall over Keim's plumber-shop, North Fourth Street, "opposite the Indian pole." The object was to make preparations to celebrate the Fourth of July, and "to rejoice over the victories of the WHIG HERO, Gen. Taylor, on the Rio Grande."

The spirit was so strong and the number of adventurous persons so many, that Gen. Bowman found, before the end of July, that he had a much greater force of volunteers than could be employed. His offers were from one hundred and two companies. Those who belonged to Philadelphia were as follows:

Patterson Guards, Capt. William A. Stokes, seventy-seven men.
 Steuben Fusileers, Capt. Arnold Syberg, seventy-eight men.
 Independent Guards, Capt. Edwin Chandler, seventy-seven men.
 National Guards, Capt. Stephen B. Kingston, seventy-seven men.
 State Fencibles, 1st Company, Capt. James Page, seventy-eight men.
 State Fencibles, 2d Company, Capt. Jos. Murray, seventy-seven men.
 Washington Blues, Capt. William C. Patterson, seventy-seven men.
 City Guards, Capt. Joseph Hill, seventy-seven men.
 Lafayette Light Infantry, Capt. William G. Smith, eighty-eight men.
 National Artillery, Capt. John K. Murphy, eighty-two men.
 Philadelphia Bepealed Volunteers, Capt. William Dickson, seventy-seven men.
 Monroe Guards, Capt. William F. Small, seventy-seven men.
 Frankford Artillery, Capt. John F. Pechel, eighty-one men.
 National Grays, Capt. Peter Fritz, eighty-five men.
 Cadwalader Grays, Capt. Robert K. Scott, eighty-four men.

Union Fencibles, Capt. Robert M. Lee, eighty-five men.
 Philadelphia Light Guard, Capt. John Bennett, eighty-four men.
 Philadelphia Grays, Capt. George Cadwalader, eighty-two men.
 Harrison Blues, Capt. N. Hicks Graham, eighty-three men.
 Washington Light Infantry, Capt. F. W. Binder, eighty men.
 Irish Volunteers, Capt. Amable J. Brazier, seventy-eight men.
 Montgomery Guards, Capt. Rush Van Dyke, eighty-two men.
 Washington National Guards, Capt. John Reiss, ninety men.
 Jefferson Guards, Capt. Turner G. Morehead, seventy-nine men.
 Tyler Guards, Capt. Robert Tyler, eighty-four men.
 Junior Artillerists, Capt. Frederick Fritz, seventy-eight men.
 Germantown Blues, Capt. John D. Miles, seventy-eight men.
 Jackson Artillerists, Capt. Jacob Hubeli, seventy-nine men.
 Mechanic Rifles, Capt. ———, seventy-seven men.
 Montgomery Guards (Irish), Capt. Michael McCoy, eighty-six men.

This was a total of thirty companies,—enough to fill three regiments. In other parts of Pennsylvania volunteering was quite as active, and on the 15th of July information was sent to the War Department that ninety companies—enough for nine regiments—had volunteered in the State. The responses from other portions of the Union came thick and fast, and the War Department was embarrassed. Finally it was resolved not to call upon Pennsylvania at that time. The majority of the companies above named belonged to the regular volunteer militia of the city and county. Their members were disappointed, and their offers not having been accepted, the enthusiasm in some degree fell away, and the membership dropped off. On the 18th of November the Governor received a requisition from Washington for one regiment of infantry to rendezvous at Pittsburgh on the 15th of December. The call found not one of the thirty companies which had volunteered in May and June ready to go. It was manifest that many of them could not recruit in time to the required number. Some of them, however, immediately beat up for recruits. The Washington Light Infantry, Capt. Frederick W. Binder, was the first company ready for the field. The City Guards, Capt. Joseph Hill, Monroe Guards, Capt. William F. Small, Philadelphia Light Guards, Capt. John Bennett, Cadwalader Grays, Capt. Robert K. Scott, Jefferson Guards, Capt. Turner G. Morehead, and Philadelphia Rangers, Capt. Charles Naylor, were got ready in time for acceptance.¹ Of the six companies accepted for the First Regiment, three, those of Binder, Bennett, and Morehead, had never made parade. The same may be said of the Rangers of the Second Regiment. Two regiments only went from Pennsylvania. The colonel of the First was Frederick M. Wynkoop; the colonel of the Second, E. T. Roberts. Subsequently there was recruited in the city for the regular United States service a company of voltigeurs, Capt. Charles J. Biddle, infantry originally raised for volunteers, Capt. Arnold Syberg, and a company of dragoons, Capt. John Butler. A public meeting to obtain funds to assist the volunteers with means to equip themselves, with a few private comforts for the soldiers, the government

¹ The Rangers were ready in time, but missed the inspection. They were subsequently accepted, and attached to the Second Pennsylvania Regiment.

bounty of twenty-one dollars being thought insufficient, was held, and two thousand dollars raised for the purpose. Drilling went on without cessation at the company quarters until they left the city. The friends of officers and soldiers presented them publicly with swords, revolving pistols, munitions of war, and uniforms. On the 7th of December the four companies the first to depart were ready to go. The uniform was sky-blue pantaloons and roundabout jackets, Monroe shoes, and blue caps of the pancake fashion. Plainer uniforms had never been seen in connection with military costume, and though the volunteers proved themselves effective in the Mexican campaign, there was as little of the "pomp and circumstance of glorious war" about them as could be imagined. The companies were escorted to the Columbia Railroad depot by the Washington Volunteers, Capt. Metz, and the Native Rifles. There were the usual scenes of tender leave-taking by the mothers, wives, children, and sisters of the volunteers, and wild huzzas and displays of excitement by throngs of spectators, who only thought of the glory and patriotism of the occasion. The companies of Small, Scott, and Morehead were escorted with like circumstances to the depot by the Washington Rifles, Capt. Baumgard, two days afterward. Naylor's Rangers went on the 14th, and so ended the volunteer contributions of the city of Philadelphia to the Mexican campaign. The soldiers were almost immediately given some taste of the fatigues of war. The winter was well on. The State canals were closed. The troops were carried by railroad to Chambersburg. From that place, in the cold month of December, they marched to Pittsburgh, a distance of one hundred and fifty miles.

The construction of the Pennsylvania Railroad occupied attention during the greater part of the year. The amount of money required was so great that even with the valuable assistance of general public interest and favor, and of liberal subscriptions according to the means of citizens, it was evident that there was little hope of success in obtaining the necessary capital. Unless help could be secured from large and powerful corporations it was feared that the project would fail. A meeting upon this subject was held at the Chinese Museum on the 27th of April. Care was taken to make it strongly impressive by the weight of character of the participants. Thomas P. Cope was president. The vice-presidents were John K. Kane, Robert Toland, George N. Baker, Isaac W. Norris, George W. Carpenter, David S. Brown, and Thomas Sparks. The secretaries were Henry Welsh, John S. Littell, and Thomas Tustin. Robert Toland, on behalf of the committee of twenty-six appointed at the meeting of Dec. 10, 1845, made report of their proceedings, and submitted the charter of the Pennsylvania Railroad Company passed April 13, 1846. It authorized the incorporation of the company by the Governor as soon as fifty thousand shares at fifty dollars each had been sub-

scribed for, and five dollar installments had been paid upon each. The route was to be "from the western terminus of the Harrisburg, Portsmouth, Mount Joy, and Lancaster Railroad at Harrisburg, or of the Columbia Railroad at Columbia, and to be carried by such direct practicable routes with moderate gradients as will . . . most conduce to the public interests and the interests of the company, . . . and to terminate at such point or points at or near the city of Pittsburgh, or other place in the county of Alleghany . . . as to said president and directors may seem most advantageous or expedient." The first subscription might be extended to one hundred and fifty thousand shares, and be increased at times until the capital should reach ten millions of dollars. At the same time that this bill was passed another was enacted for the benefit of the Baltimore and Ohio Railroad Company, which contained a clause that if, before the 30th of July, 1847, three millions nine hundred thousand dollars should not be subscribed to the stock of the Pennsylvania Railroad Company, one million dollars paid in, and thirty miles of the road put under contract for construction, all those advantages should be transferred to the Baltimore and Ohio Railroad Company. This concession was the key-note of the report, which set forth the positive necessity of immediate action. The resolutions offered by David S. Brown and seconded by Frederick Fraley set forth the facts, and the danger of the trade which might come to Philadelphia being carried to a rival city. The resolutions declared that it was the duty of the Councils of the city and the commissioners of the districts to subscribe to the stock. The proportion of the city should be at least two million five hundred thousand dollars, and of the districts not less than one million two hundred and fifty thousand dollars, thus making the municipal corporation subscriptions equal to one-half of the capital stock, leaving the other half open for private subscription. Speeches were made by Frederick Fraley, Col. William Bigler, of Clearfield, afterward Governor of the State, William A. Crabbe, Hill, of Montgomery, and Piolet, of Bradford County. Petitions immediately afterward began to pour into the City Council in favor of the two-million-and-a-half subscription, and remonstrances followed in great numbers. The members were somewhat in doubt as to the best policy to be pursued. The joint special committee to which the subject was referred reported in May that before proceeding it would be judicious to obtain the views of citizens at an election to be held in June. Select Council refused to receive those suggestions. The matter was recommitted, with instructions to obtain legal opinions as to the authority of the committee to subscribe. On the 3d of July, the committee reported that in the opinion of John Sergeant, Thomas M. Pettit, and Thomas I. Wharton the city had a right to subscribe to the stock, and the opinion of engineers as to the feasibility of the route was also submitted, with opinions of transporters

as to the value of the road if it should be built. The committee recommended a subscription of ten thousand shares by the city whenever fifty thousand shares should be subscribed by other parties, and ten thousand shares additional when one hundred miles of railroad were finished and in use, ten thousand shares more when one hundred and twenty-five miles were finished and in use, ten thousand more when one hundred and seventy-five miles were completed, and ten thousand more when two hundred miles were finished, making the total of fifty thousand shares. The majority of the committee which made this report was composed of Henry C. Corbit, chairman, Isaac Elliott, Robert Toland, A. J. Lewis, Edmund A. Souder, James J. Boswell, Benjamin Orne, Algernon S. Roberts, and John Rodman Paul. The minority of the committee were John Price Wetherill and Horace Binney, Jr. The latter said "of the four thousand and odd persons who are so ready to place upon the city the burden of the debt which they have memorialized Councils to assume, only some three or four hundred have been found willing to prove their own faith in the success of the road by subscribing to the stock. About eight hundred thousand dollars is all that is subscribed up to this time. The corporation cannot be called into existence unless the city subscribes, two million five hundred thousand dollars being necessary before letters patent can be issued." The minority estimated that the cost of the construction of the road, with double track, with locomotives, cars, machinery, depots, etc., would be one hundred and twelve million five hundred thousand dollars, and if the Councils should subscribe two million five hundred thousand dollars the city would eventually, to save her money, be obliged to subscribe seven or eight millions.

The minority argued that the city had no right to involve tax-payers in that way. The resolution for a subscription finally came before Councils, and being taken up in Common Council was lost on second reading by a vote of nine to nine. The question entered into the political contest for election of members in the fall, and the friends of the railroad seem to have succeeded. Within a week after the organization of the new Councils, in October, a new resolution in favor of a subscription for thirty thousand shares was introduced. It was to be conditioned upon thirty thousand shares having been subscribed by others. Ten thousand shares were to be taken when ten thousand shares above the former amount had been subscribed by others and seventy-five miles of the road finished and in use, and ten thousand more shares when ten thousand more were subscribed by others and one hundred miles of the road finished. The opposition tried to hamper this bill by amendments, but they were all voted down, and it went through finally by twelve yeas to eight nays. In Select Council the bill was amended so that it should be necessary that one hundred miles of the railroad

should be finished before the second installment was subscribed for, and one hundred and twenty-five miles before the third block of shares were taken. Various amendments were proposed, with the intention of clogging or killing the bill in Select Council, but they were voted down and the ordinance was finally passed by eight yeas to four nays. One of these amendments was quite important. It was to the effect that the sanction of the Legislature to the subscription should be obtained.¹ The majority refused to act with the caution which such an amendment would have caused. Subsequently other districts of Philadelphia also subscribed to the railroad stock. At the time of consolidation, with the shares subscribed by the city and those by the districts, the full holding was one hundred thousand shares, worth five million dollars. Of these the city had subscribed for eighty thousand shares, value at par, four million dollars; the district of Spring Garden, ten thousand shares, value, five hundred thousand dollars; Northern Liberties, ten thousand, value, five hundred thousand dollars.

On the 22d of December a public dinner was given to Daniel Webster at the museum. About four hundred gentlemen participated and sat down to table. Quite an unusual thing on such occasions, there were ladies present. Fifteen hundred of them sat in the galleries, and saw how their husbands, sons, and brothers ate. The occasion of their being present was the expectation that Mr. Webster would make a great speech. There was no disappointment about this. After Samuel Breck, the president, read the complimentary toast, Mr. Webster rose in reply, and spoke for nearly five hours, during which time he went over the whole range of political discussion on topics domestic and foreign.

The remains of Commodore Stephen Decatur, who fell at Bladensburg, in the District of Columbia, March 22, 1820, in the duel with Commodore Barron, were brought from Kalorama, where they were originally entombed, and reinterred in the graveyard of St. Peter's Protestant Episcopal Church at Third and Pine Streets. A handsome monument had been erected here by subscription. The remains were reinterred on the 29th of October. They were received

¹ Horace Binney, Sr., had delivered an opinion that the city had no right to subscribe without act of Assembly. In the end his opinion was demonstrated to be the correct one, and the opinions of Sergeant, Pettit, and Wharton were wrong. The Supreme Court, some years afterward, decided in another case that a municipal corporation had no right, under the ordinary provisions of a charter, to subscribe to the stock of a railroad company. The fear of such judgment led to an application to the Legislature, which passed, March 7, 1848, an act authorizing the county of Alleghany, the cities of Pittsburgh and Philadelphia, and the municipal corporation in the county of Philadelphia to subscribe to stock of the Pennsylvania Railroad Company, and to borrow money to pay therefor. The aggregate of subscriptions was not to exceed five per cent. of the taxable value of property for State or county purposes. As a matter of precaution and safety it was declared that the previous subscription of the city of Philadelphia and the loans contracted therefor should be validated. Any county, city, or municipal corporation having ten thousand shares or more in the said company might elect one director for each ten thousand shares.

and escorted to the ground by three brigades of volunteers, comprising thirty-six companies, marines and seamen of the United States navy, City Councils, and citizens.

In this year Charles Mosler, convicted of the murder of his wife under circumstances of peculiar atrocity, was hanged in the yard of the county prison. Mrs. Eve Mosler was nearly seventy years old at this time. Her husband cut her throat with a razor. Bridget Harman, convicted of the murder of her infant child, which she drowned by holding its head in a pool of water, was convicted at the same time with Mosler. She was sentenced to be executed, but the death-warrant was never signed by the Governor, and she remained in prison many years.

The people watched with anxiety the events of the Mexican war. For a time the progress of the arms of the United States seemed slow. Yet, while not advancing as rapidly as some had expected, there was a sure management which led to victory and progress. The intelligence of the result of the battle of Buena Vista, and the defeat by Gen. Zachary Taylor of the Mexican Gen. Santa Anna, was received in April. On the 8th, Charles Gilpin introduced into Select Council a resolution which declared that the successes at Palo Alto, Resaca de la Palma, Monterey, and Buena Vista had shed imperishable lustre on the American arms, and that it was expedient to illuminate the public buildings in honor of Maj.-Gen. Zachary Taylor, his officers and soldiers, for brilliant victories won with disparity of numbers by their skill and labor. The resolution was adopted. Mayor Swift by proclamation recommended that citizens should join in the testimonials. The 19th of April was chosen for the celebration, and it proved to be clear and pleasant. Great preparations were made all over the city and districts. Nothing equal to the display had been seen before that time. The old State-House, City Hall, court-house, and public offices were illuminated in the old way with candles in every pane. The State-House steeple was festooned with displays of colored lights. Large stars of burning gas blazed between the columns of the custom-house, behind which, and invisible from the streets, were pillars of lights which gave to the colonnade a soft yet brilliant appearance. The newspaper offices were lighted from roof to pavement, some with Drummond lights and other bright displays, which lighted up the entire square in which they were situate. Theatres and places of amusement were brilliant. The windows of the museum were illuminated with three thousand candles. Baldwin's locomotive-factory on Broad Street was lighted at every pane. Engine- and hose-houses, hotels, factories, and stores vied with each other in display. In private dwellings all the chandeliers were lighted in every story, and blinds and curtains drawn up, and in many the burning candle was at every pane. Flags, flowers, festoons of national colors, and other devices abounded. The num-

ber of transparencies was large, some of them finely painted. The subjects represented were generally connected with the war, and many of them were identical in the idea of the representation, differing only in the delineation. Gen. Taylor on horseback upon all sorts of horses, white, black, roan, sorrel, and bay, surrounded by his staff, were favorites. Maj.-Gen. Winfield Scott and the heroes of the bombardment of San Juan de Ulloa and the capture of Vera Cruz, news of which had been received in the city two or three days before, were not forgotten. The battle of Buena Vista, hard fought, furnished various incidents for the painter, favorite among which were the charge of Capt. Bragg upon the Mexican field batteries, and the flight of the Mexican, with such mottoes as, "A little more grape, Capt. Bragg," "Gen. Taylor never surrenders." The battles of Palo Alto, the charge of Capt. May, the death of Maj. Ringgold, the capture of the Bishop's palace, and the bombardment of Vera Cruz, with many other appropriate designs were exhibited. The streets were filled with a large concourse of spectators moving from building to building until long after midnight.

Shortly afterward Commodore David Connor, who was in command at Vera Cruz, arrived in this city, of which he was a resident. A complimentary dinner was tendered to him by citizens, which took place on the 7th of May, at the Columbia House, north side of Chestnut Street, east of Seventh. The Hon. Joseph R. Ingersoll presided. Commodore Connor responded to the compliments paid to him, and appropriate speeches were made by George M. Dallas, Vice-President of the United States, John M. Read, Col. James Page, Capt. Reynolds, and Surgeon King, of the army, and Commodore Engle, of the navy.

President James K. Polk, on a visit to the Northern States, came to the city on the 23d of June. Traveling by railroad as far as Wilmington, Del., he was received there by a committee of citizens of Philadelphia and brought up the river Delaware by the steamboat "George Washington." A formal act of delivery of the custody of the charge of the guest was made about the Delaware State line by the Wilmington committee, which transferred the visitor to the Philadelphia committee, with accompanying speeches. At the navy-yard the United States steamer "Princeton" and the revenue-cutter "Forward" were decorated with flags. After proceeding up the Delaware along the city front as far as Kensington, receiving *en route* the customary salutes by artillery, ringing of bells, huzzas, etc., the steamboat returned to the navy-yard, where a salute of twenty-one guns was fired from the "Forward." The President, on disembarking, was received by Commodore Charles Stewart, of the United States navy, and Gen. Robert Patterson, then of the United States army. A military procession of three brigades, under Brig.-Gen. A. L. Roumfort, Col. James Goodman, and Brig.-Gen. Horatio Hubbell, consisting of thirty-four companies,

was the principal escort. The President was taken to the residence of Vice-President George M. Dallas, on the north side of Walnut Street, east of Ninth. At night there was a serenade by the Mannerchor Vocal Society, and the Liedertafel and Breitters Band, which organizations turned out in great strength, and were assisted in executing the music by torches in abundance. The principal performances were "Hail Columbia" and "Star-Spangled Banner," sung in German by the vocal societies, and some fine instrumental music by the band. On the succeeding day the President visited Laurel Hill Cemetery, Fairmount, Girard College, the Mint, and the Public Model School, in Chester Street. At noon he was formally welcomed by the mayor and Councils in Independence Hall, and received his friends there. In the evening he visited Commissioners' Hall, Northern Liberties, and attended a ball and banquet given at the house of Maj.-Gen. Patterson. On the succeeding day he went to New York.

A severe fire, which broke out in the evening of August 21st, in Bread Street, near the corner of Quarry, at the large sugar-house refinery of George L. Broome & Co., occasioned loss of life. The building was eight stories high. The flames came from the engine-room, and mounted successively to the top of the house in one roaring, fierce conflagration. The flames were carried to the large brewery of Robert Newlin and a range of stables on the north belonging to Joseph Rubican. The grain, liquor in vats and hogsheads, hops, and other merchandise, added to the fury of the fire. Bread Street being very narrow, the firemen worked in much peril. By the falling of the north wall of the refinery into Quarry Street the Reliance Engine was crushed, and some of the firemen severely injured. Shortly afterwards the gable end of the refinery fell upon the brewery, and forced the walls of the latter into Bread Street. Twenty-seven men were struck down by the falling walls. They were connected with the working of the Fairmount Engine and the Perseverance Hose-Carriage. Andrew Butler and Charles H. Hines, members of the Perseverance Hose Company, were so badly crushed and hurt that they died soon after. Mr. Butler had been for several years secretary of the Fire Association, and was widely known. Hines was about twenty years of age, and an apprentice to Mr. Dunlap, a coachmaker. The two victims were buried at the same time, and the funeral was attended by fifty-one fire companies, numbering over three thousand members. The line of the procession was estimated to be three miles long.

By act of February 27th was incorporated "the district of Richmond, in the county of Philadelphia." It was immediately north of Kensington. The bounds commenced at the river Delaware and the northern boundary of the Kensington District. The eastern boundary was the Delaware River. The northern boundary commenced at the river, on the west side

of Westmoreland Street, and ran along the same to the westward side of Emerald Street, along the same to the southerly side of Hart Lane, and along the latter to the northern boundary of Kensington District, and by the same to the Delaware River and place of beginning. The official title of the corporation was "The Commissioners and Inhabitants of Richmond, in the County of Philadelphia." The act named as the first commissioners Philip Duffy, Michael Barron, Isaac Tustin, Richard R. Spain, Joseph Ashton, John W. Kester, Henry Mather, George Funk, and Enoch Blackman. The first election was to be held on the first Tuesday of October, 1847, at the Railroad Hotel, occupied by Elisha McCarty. Three commissioners were to be elected for one year, three for two years, three for three years, and afterwards three annually, to serve for three years. The charter of this district contained two provisions not to be found in any other act of municipal incorporation, namely, that no new street should be thereafter opened by the public, or individuals for public use, less than twenty feet in width. All streets heretofore opened to be public highways. The following streets were vacated by the same act: Indiana Street, from Frankford road to Richmond Street; Ann Street, from Tulip Street to Richmond Street. Richmond Lane and Frankford road, as originally laid down and now opened, were to remain.

A supplement to the act of incorporation of the borough of Manayunk increased the number of the Town Council to ten, five to be elected for one year, five to be elected for two years, and afterwards five annually.

A supplement to the act for the incorporation of Germantown recited that the duties of the burgess and Town Council were growing onerous by increase of population. The burgess was directed thereafter to be elected to serve one year, and four persons for Town Council were to be chosen annually to serve for two years.

Some changes were made in the western wards of the city for voting purposes. They had grown largely in population within a few years. It was not thought judicious to create new wards, which would have affected the representation in Councils, but the plan was taken of dividing the wards into precincts bounded as follows:

LOCUST WARD.—*East Locust Precinct*, between the west side of Delaware Seventh and east side of Twelfth Street, north side of Spruce Street and south side of Walnut. *West Locust Precinct*, Between Spruce and Walnut, and from Tenth Street to the Schuylkill.

SOUTH WARD.—*East South Precinct*, from west side of Delaware Seventh to east side of Twelfth Street, and from north side of Walnut to south side of Chestnut. *West South Precinct*, from west side of Twelfth Street to the Schuylkill, and from North side of Walnut to south side of Chestnut.

MIDDLE WARD.—*East Middle Precinct*, from the west side of Seventh to the east side of Broad, and from the north side of Chestnut to the south side of Market Street. *West Middle Precinct*, from the west side of Broad Street to the river Schuylkill, north side of Chestnut to the south side of Market.

NORTH WARD.—*East North Precinct*, from west side of Seventh to the

east side of Twelfth, and from the north side of Market to the south side of Arch, or Mulberry. *West North Precinct*, from the west side of Twelfth to the river Schuylkill, and from the north side of Market to the south side of Mulberry.

SOUTH MULBERRY WARD.—*East South Mulberry Precinct*, from the west side of Seventh to the east side of Twelfth, and from the north side of Mulberry to the south side of Sassafras Street. *West South Mulberry Precinct*, from the west side of Twelfth Street to the river Schuylkill, from the north side of Mulberry to the south side of Sassafras.

NORTH MULBERRY WARD.—*East North Mulberry*, from the west side of Seventh to the east side of Twelfth, north side of Sassafras Street and south side of Vine. *West North Mulberry*, from the west side of Twelfth to the river Schuylkill, from the north side of Sassafras to the south side of Vine Street.

UPPER DELAWARE WARD.—*East Upper Delaware Precinct*, from the River Delaware to the east side of Third Street, and from the north side of Sassafras to the south side of Vine. *West Upper Delaware Precinct*, from the west side of Third to the east side of Seventh Street, and from the north side of Sassafras to the south side of Vine Street.

LOWER DELAWARE WARD.—*East Lower Delaware Precinct*, from the river Delaware to the east side of Fourth Street, from the north side of Mulberry to the south side of Sassafras Street. *West Lower Delaware Precinct*, from west side of Fourth Street to east side of Seventh Street, and from north side of Mulberry to south side of Sassafras Street.

The creation of these sixteen new voting divisions made it necessary that new voting places should be obtained at the State-House or in its neighborhood. The electors of East and West North Mulberry, East and West Lower Delaware, East and West Upper Delaware were directed to vote at windows on the north side of the State-House. Chestnut and Walnut Wards, and East and West South Mulberry, and East and West North Wards on the east and south sides of the south room of the County Court. East and West South, with High Street Ward, to vote on the north and east side of the north and east rooms of the county court-house.

A scheme of improvement, upon the success of which high hope was built, originated among property owners in Richmond and Kensington Districts. Gunner's Run, entering the Delaware at the Dyottville Glass-Works, ran north by west, and touched the Richmond branch of the Philadelphia and Reading Railroad. It was believed that by widening and deepening the stream a grand depot for trade could be established near the railroad with docks and basins, and that the ground on the side of the creek could be made available for wharves, warehouses, etc. This scheme culminated on the 15th of March by the passage of an act to incorporate the Gunner's Run Improvement Company, with power to construct a canal not exceeding one hundred feet in width from the north side of Queen Street (not far from the Delaware), on Gunner's Run, Kensington, and to terminate at a point at or near the Philadelphia and Reading Railroad crossing. There was to be a tide-lock and gate not less than twenty-four feet wide, and at least one hundred and fifty feet long, at or near Queen Street, and from Second Street to the river Delaware; the canal was to be not more than sixty feet in width. The building of a bridge by the company of the full width of Franklin Street (now Girard Avenue) over the canal was provided for. Authority to take tolls was granted, and the commissioners of Kensington

might change the grades of streets or water-courses so as not to interfere with the navigation of the canal. The shares were to be one hundred dollars. In 1848 authority was given to carry the canal to the river Delaware at or near Wood Street. Subscriptions were made, and some work was done. By act of April 6, 1850, it was declared that the canal should thereafter be known as the Aramingo Canal. The work turned out to be useless. A great deal of money was spent upon it. The amount of business done was found insufficient to pay expenses, and for many years afterwards the so-called canal was considered a nuisance.

By act of March 25, 1848, the boundaries of the district of Richmond were extended by taking off from the township of the Northern Liberties the tract of ground beginning at the river Delaware, on the west side of Westmoreland Street, and extending along the river to the north side of Tioga Street; thence along Tioga to the east side of the Point road; along the Point road to Westmoreland Street, and along the same to the place of beginning. By this addition the importance of the district of Richmond was increased.

A new division was made between the townships of Moyamensing and Passyunk by a change of boundaries. The dimensions of Passyunk were changed by the addition of new land taken from Moyamensing. The territory next began on the west side of the Delaware River, two hundred feet south of the line of McKean Street, then west on line parallel with McKean Street to a point two hundred feet west of the west side of Broad Street; thence north to a point two hundred feet south of the south line of Franklin [Tasker] Street; then west on line parallel with Franklin Street to lower water-mark on the river Schuylkill; all that portion of the township of Passyunk north and west of the said line to become part of the township of Moyamensing. The act was really an increase of the Moyamensing territory; that township now became a district, and was called "The Commissioners and Inhabitants of the District of Moyamensing." A new ward was added, the Fifth. The Fourth Ward was extended south to the new boundary, and the Fifth Ward was all that part of the township west of Broad Street. Ward elections for the Fourth Ward were ordered to be held at the public-house of Mahlon Gilbert, at the intersection of Tenth and Passyunk road. The Fifth Ward elections were at Daniel Young's, corner of Buck road and Long Lane. An addition was also made to Kensington District by act of April 6th. The annexation was of "that portion of the township of unincorporated Northern Liberties, beginning at the middle of Norris Street and the west side of Frankford turnpike road; then north along the said turnpike road to a point one hundred and thirty feet north of Lehigh Avenue; then crossing the said turnpike road, continuing parallel with Lehigh Avenue

west, to the west side of Germantown turnpike road; then south and southeast along that road to the then north boundary of Kensington; thence crossing Germantown road along the boundary between Kensington and the Fairhill estate to the place of beginning." Actually this was an annexation of the Fairhill and Sepviva estate, belonging to the Norris family. The new territory was made the Eighth Ward of Kensington, and elections were ordered to be held at the house of Michael Price, Frankford road above Wood Street. By a special section the trustees of the Fairhill estate, under the will of J. P. Norris, were authorized to sell to the commissioners of Kensington, for such consideration as they might think proper, two lots of ground, to be held "for public use as a public green and walk forever." One of these was Fairhill Square, bounded north by Lehigh Avenue, south by Huntingdon Street, east by Fourth, and west by Apple Street. The other was Norris Square, bounded north by Susquehanna Avenue, south by Diamond Street, east by Howard Street, and west by Hancock Street. An intermediate street called Clinton Street, which would have run through the middle of the square from Diamond Street to Susquehanna Avenue, was vacated. The two squares were a gift from the Norris family. The sale was for a nominal consideration. The district commissioners were ordered by the act to have the squares "properly inclosed and planted with trees for public squares and walks, for light, air, and recreation forever. . . . Such square shall never be used for any other purpose whatever, and no building shall ever be erected upon them." By the same act the commissioners of Kensington were authorized to construct steam or other suitable works on or near to the river Delaware, at the foot of any public street landing, or other suitable location, "for the purpose of pumping up and supplying said district, and any other district in the said county and the inhabitants thereof, with water from the river Delaware;" also with authority to buy ground and establish a reservoir, lay pipes, etc. The authority thus given was embraced willingly by the commissioners of the district, but with very little discussion on their part as to the location of the pumping works. They selected a lot on the south side of Gunner's Run, at its junction with the Delaware River. There were erected an engine-house, with pumps and apparatus, which took the water from the Delaware, adjacent to the mouth of the creek, which became a foul drain, into which flowed filth and impurities from establishments on the stream, or Gunner's Run Canal, or Aramingo Canal, far beyond the Reading Railroad crossing, above Lehigh Avenue. The water might have been comparatively pure in 1850, when the Kensington Water-Works were finished. It has been complained of ever since. Sometimes widespread sickness through the district has resulted from its use. The Water Department has been frequently called upon to devise means to avoid the pumping

up of the foul discharges from Gunner's Run, and of obtaining the purer waters of the Delaware. The reservoir of the Kensington Water-Works was built between Lehigh Avenue and Somerset Street, and Sixth and Seventh Streets.

The district of Penn was divided into two election precincts. The East to be that portion of the district east of the middle of Broad Street, and the West Precinct west of Broad Street. Elections for the East Precinct were to be held at the Commissioners' Hall, northeast corner of Tenth and Thompson Streets, and for the West Precinct at the house of Jacob Peters, southwest corner of Ridge road and Girard Avenue.

A horrible murder committed March 23d created a strong sensation among citizens. C. L. Rademacher, keeper of a German bookstore at No. 39 North Fourth Street above Arch, occupied the back part of the house and the upper stories for a residence for himself and his wife, a young woman of twenty-four years of age. In the early portion of the morning one or more persons entered the house. By some means Mr. and Mrs. Rademacher were awakened and may have interposed. The burglar or burglars made a desperate attack upon them with a knife. Mrs. Rademacher was killed. Upon her person after her death were found six incised wounds on her left arm, one upon her right arm, one upon her face, and one upon the breast which penetrated the region of the heart. Mr. Rademacher was found covered with blood, with a large wound on his right arm which deprived him of the use of that limb, a gash on his head through to the skull and bruises about his face and head, where he had been beaten by some blunt instrument. The wife was dead, the husband senseless, and unable to give any explanation of the circumstance. Among the bedclothes was found the blade of a peculiar looking knife resembling the instrument of that kind generally in use among shoemakers. It was broken off near the handle. Upon examination of the wounds, it was determined that they could not have all been produced by that sort of a knife, and that although that instrument had been employed, there must have been some sharper cutting instrument in use. Everything about the premises showed that there had been a terrible fight against the burglars. It was conjectured that the assassin had obtained access to the house by climbing up a shed in the rear, above which a window opened directly into the bedroom. Within two days, by the efforts of the police, a German named Charles Langfeldt was arrested. He was a shoemaker, and boarded somewhere on Front Street, in the Northern Liberties. He had been convicted in 1844 of larceny of a velvet pulpit-cloth belonging to the Zion Lutheran Church, at the southeast corner of Fourth and Cherry, near by. Convicted of this crime, he had been in prison for about four years. His time had but lately expired. In the morning of the same day

Langfeldt was in the shop with other workmen, and news having been received of the affair at Rademacher's, it was discussed in his presence. He said nothing, but arose, took a basin of water up-stairs to his lodging-room, but came down shortly afterward with a bundle, and said that he was going to take his clothes to a washerwoman. Upon subsequent inspection blood was found on the bed in which he had lain, upon his outer clothing, in his pockets, and on his boots. The broken blade of the knife found at Rademacher's was identified by his comrades as that of his knife. It had some peculiar marks, and on the morning after the murder was missing from the work-bench of Langfeldt. A crooked sharp knife was missing from another shop which Langfeldt had visited a day or two before, and its loss had been noticed immediately after he left the premises. As it appeared that the wounds had been produced by two knives of different character, and the one which Langfeldt had used at his own shop was identified, it was conjectured that the stolen crooked knife was the other one which he had used. It was a case of circumstantial evidence, sufficiently strong in the opinion of the jury to justify conviction. Langfeldt was found guilty of murder in the first degree, and hanged in the yard of the county prison (Moyamensing) October 20th.

In this year the government of France was overthrown by revolution. Louis Philippe I. fled to England. An attempt to permanently establish a republican government was made. In Italy the government of Naples was attacked by revolutionists, and the Bourbon king of Naples, commonly called Bomba, was forced to fly. Risings took place in Germany, causing bloodshed, but not being successful. In sympathy with these movements a grand meeting was held in the State-House yard to express the feelings of the natives of foreign countries in the revolutionary movements in Europe, which not only promised republicanism to France, but gave hope for the success of popular rights in Germany and Italy. Three stands were erected for the convenience of the participants in this polyglot assemblage. One of them was decorated with a French tri-color, red, white, and blue, and the Italian liberty flag, red, white, and green. The speakers here were French and Italian, and very enthusiastic. Another stand was decorated with the colors of the German nation, black, red, and gold. The speakers addressed those within hearing in the German language. The main stand was reserved for the English-speaking people. Mayor Swift presided. Speeches were made by Henry D. Gilpin, Morton McMichael, Benjamin Champneys, Joseph R. Chandler, William D. Kelley, Peter Sken Smith, William E. Lehman, and Francis J. Grund. An incident entirely unexpected and unprepared for was furnished by the assemblage of men of color, Americans by birth. No invitation had been given to them, but as this was a celebration on behalf of universal lib-

erty, they ventured to attend in sufficient numbers to get up a meeting of their own. They were addressed in good style by several speakers of their own race. There was more noise than oratory, more music than speeches. The Frenchmen in small groups sang the "Marseillaise" and "Mourir pour la Patrie." The Germans sang many national songs and choruses. "Hail Columbia" and the "Star-Spangled Banner" were attempted by the Americans, and in the noise of so many lyrics, all sung at the same time, there was some discord but no confusion.

The war with Mexico was over in this year. Its successful result was reason for exultation. Brig.-Gen. George Cadwalader, who had been appointed to a command in Mexico and served in the Mexican Valley campaign, came home in May, and was accorded a public reception. He was received at Gray's Ferry by five companies of cavalry, on the 20th of May, and escorted to Broad and Prime Streets. Here the First Division, artillery and infantry, were drawn up, under command of Brig.-Gen. A. L. Roumfort. Amid salutes of artillery, Gen. Cadwalader reviewed the line, and was then escorted to Independence Hall, where he was received by the City Councils of Philadelphia. The speech of reception was made by William M. Meredith, president of Select Council. In the course of his remarks he alluded to the gallantry of Cadwalader in the engagements at the National Bridge, La Hoya, Contreras, Churubusco, Molino del Rey, Chapultepec, and the Garita San Cosme.

About the same time the trustees of the Philadelphia Gas-Works determined to make an exhibition in honor of victory and peace of the availability of gas for the purpose of ornamental illumination. John C. Cresson, superintendent of the gas-works, made the arrangements, and the display took place in front of the State-House, by permission of Councils. By the shaping of gas-pipes and the multiplication of jets from them figures in fire were made. The Goddess of Peace, seated on a chair holding in her right hand the olive-branch, was the principal figure, and nearly thirty feet high. At her feet and by her side were the emblems of commerce, manufactures, and agriculture,—the anchor, boxes, barrels, chests, wheels, the plow, with a ship in the distance. Above all hovered the eagle with wings of fire, surrounded with a halo of stars, and bearing a scroll with the national motto, while below was the simple inscription, "Peace." There were four thousand burners which lighted up this piece.

The Pennsylvania volunteers did not return from Mexico until late in the year. It was determined that they should be honored with a grand complimentary reception and a banquet. A town-meeting was held to make arrangements. Councils made liberal appropriations. The cars, by the Columbia Railroad, arrived at Coates Street and Pennsylvania Avenue about eight o'clock in the morning of July 24th, and formed in the street to meet the escort

which was being prepared in their honor. There were not as many of them as there were when they started. The bullet and disease had reduced them to about one-half of the original strength, as the following will show:

First Pennsylvania Regiment.	Went away with	Returned with
Co. C, Monroe Guards, Capt. Wm. F. Small,	95 men.	45 men.
Co. D, City Guards, Capt. Joseph Hill,	90 "	20 "
Co. E, Washington Light Inf., Capt. F. W. Binder,	92 "	49 "
Co. F, Philadelphia Light Guards, Capt. John Bennett,	96 "	58 "
Co. G, Jefferson Guards, Capt. Turner G. Morehead,	90 "	37 "
Co. H, Cadwalader Grays, Lieut. S. D. Breece,	96 "	45 "
Totals	559	254

With the Philadelphia companies were the Pottsville Artillerists, Capt. Nagle, who had lost fifty men. The Philadelphia Rangers, Capt. Naylor, of the Second Regiment, did not return at this time. The reception at Coates Street when the escort came up was quite interesting. The women—wives, mothers, daughters, and relatives—were present in great numbers, and there were some interesting scenes, yet everything was quiet and even solemn. The committee of reception greeted them through David Webster, who made the address of welcome. The ceremonies were entirely civic. The usual accompaniments of most parades, in the presence and participation of military, were absent; the Mexican soldiers were to be welcomed again to the pursuits of peace. There was a respectable civic procession,—six hundred butchers on horseback, in white frocks, blue sashes, and rosettes; thirty-four fire and hose companies, in costume, and with their apparatus; clubs and societies, and public officers in coaches. Col. S. W. Wynkoop commanded the detachment. Maj.-Gen. Robert Patterson, in whose division the Pennsylvania regiments had been in Mexico, marched at their head, with Maj.-Gen. Pillow, the latter in citizen's dress. The Mexican soldiers marched quietly. There was little enthusiasm in their demeanor. They seemed to be worn and weary. Flags were hung out upon the route of march. There were hurrahs, ringing of bells, and salutes of artillery. The soldiers were marched to the museum building, where a banquet had been prepared for them. The tables extended the whole length of the upper saloon. The decorations were appropriate. A large banner, stretching from side to side of the hall, near the ceiling, bore the inscription, "Pennsylvania volunteers, welcome home!" The tables were elegantly decorated with statues, vases, flags, and other ornaments, and the colors of the United States and Mexico, so lately carried in hostile directions, were twined together in the bond of peace. About one thousand persons were present; James Ross Snowden, president. A welcome song, written by James Bellak, was sung by a choir of ladies and gentlemen. John M. Scott delivered a classic and elegant oration of welcome. Regular toasts succeeded. Gen. Patterson and Col. Wynkoop made speeches, and this part of the ceremony closed in the

afternoon. In the evening the State-House, public buildings, hotels, theatres, and custom-house were illuminated. There was no general illumination by citizens. This was by recommendation of the committee, in consequence of the heat of the weather and the absence of many persons from town.

Henry Clay visited Philadelphia on the 24th of February. He was the idol of the Whig party, and nowhere stronger in the affections of men of Whig politics. As this was the year of the national convention, which was also to be held in the city, it was determined among the leading men to make the reception more than usually enthusiastic. A committee of the Young Men's Democratic Whig Association and a committee appointed at a town meeting of the friends of Henry Clay, met him at Elkton in Maryland and escorted him to Broad and Prime Streets, where the Philadelphia, Wilmington and Baltimore Railroad intersected the Southwark Railroad. A large concourse of persons were present to await his coming. The procession included twelve hundred citizens on horseback and a large number in carriages. Mr. Clay was placed in a barouche which was drawn by six splendid horses. While the accompanying procession was not large, its reception in every street was most enthusiastic. The huzzas which began in Broad Street rolled on with the idol of the hour in one incessant pean, being taken up from house to house; as the guest came onward, ladies waved their handkerchiefs from the windows of houses, and the whole community was wild with excitement. No such reception had been given to any man in Philadelphia since Lafayette had come in 1824. On the same evening Mr. Clay was serenaded by several fine bands; he was received the next day at Independence Hall by City Councils, and was visited by about eight thousand persons, after which he remained for some days, visited several institutions, and was entertained by his friends. On the 1st of March he held a *levée* for the reception of ladies only at the museum. On that occasion it is estimated that five thousand women were present. He made some remarks to the ladies upon the respective duties and privileges of the sexes which were in excellent taste and marked by good sense.

On the 7th of June the national convention of the Whig party to nominate candidates for President and Vice-President of the United States met at the museum building, northeast corner Ninth and George [Sansom] Streets. Great hope had been placed upon this assemblage by the friends of Henry Clay. His services as a statesman, his ability as an orator, and his long career as a friend of protection of American industry were all elements in his favor. The Whigs of Philadelphia admired Clay; they were willing to acknowledge his claims. The large majority of them were staunch, while others, not hostile to Mr. Clay, argued that in the selection of a candidate "availability" was the most important consideration. They

perceived in the military services of Maj.-Gen. Zachary Taylor the opportunity which was needed. The contest in the convention was bitter, but availability triumphed, and Zachary Taylor, of Louisiana, was nominated for President, and Millard Fillmore, of New York, for Vice-President.¹

In honor of the conclusion a grand Whig ratification meeting was held on the evening of the third day in Independence Square. It was not as enthusiastic as had been hoped, although there was no disorder. The friends of Clay were disheartened at the "treachery" of those who had been his friends, and they took no great interest in the demonstration. As far as regarded the proceedings and the number of speakers, this occasion was quite exceptional. William F. Johnston, of Pennsylvania, Speaker of the Senate, and by the resignation of Francis R. Shunk, a month afterward, Governor of the commonwealth, was president of the meeting. There was a vice-president for every State, and fourteen secretaries. The city being crowded with delegates of the national convention from all parts of the Union, there was no difficulty in obtaining the services of speakers, many of whom were men of distinction in their own States. At the main stand speeches were made by Governor Morehead, North Carolina; Gen. Barrow, Tennessee; George R. Richardson, Maryland; Col. Haskell, of Tennessee; John Sherman, of Ohio; and Maxwell, of New York. At the southeast stand, in the square, Gen. James Irwin presided, and among other speakers were Walker, of Indiana; Rivers, of Rhode Island; Whitney, of New York; Sweet, of Illinois; Col. Duncan, of Louisiana; Cogdill, of Indiana; Ray, of Ohio; Parker, of Massachusetts; Barringer, of North Carolina; and Beddinger, of Kentucky. At the southwest stand Col. Fowlers, of New York, presided. The speakers were Batchelder, of Massachusetts; Z. Collins Lee, Maryland; ex-Governor Stratton, New Jersey; Cocke, Tennessee; Lyman, Vermont; Stanton, of Ohio; Brown, Pennsylvania; Foster, Georgia; Platt, Delaware; Mix, of New York; Dr. Cowdell, Indiana; Ricardo, Louisiana; Chandler, Massachusetts.

The remains of Maj. Levi Twiggs, of the United States marine corps, who was killed at the battle of Chapultepec, Sept. 13, 1847, were reinterred with appropriate ceremonies on the 25th of February. They were taken from the United States navy-yard to St. Stephen's Protestant Episcopal Church, on Tenth

Street, under charge of four companies of volunteers and one company United States marines. The funeral service at the church was read by the Rev. Henry W. Ducachet. The body was interred in the little graveyard adjoining the church. The Washington Grays, Capt. McAdam, fired a volley over the grave. The body was subsequently removed to Laurel Hill Cemetery.

A much more solemn display took place on the 7th of March. The remains of John Quincy Adams, who had died at Washington, D. C., February 23d, were received while on their way to Quincy, his former residence in Massachusetts, under charge of a committee of thirty appointed by Congress. The committee with the body was received at Broad and South Streets by the First and Second City Troop. A funeral-car heavily draped had been provided, and the coffin being placed therein, was considered to be in charge of the pall-bearers, who were Chief Justice John B. Gibson, Richard Willing, Samuel Breck, United States District Judge John K. Kane, John M. Scott, Dr. R. M. Patterson, Horace Binney, Dr. Nathaniel Chapman, William J. Duane, Benjamin W. Richards, Isaac Roach, and James Page. The hearse was drawn by six white horses, carrying black plumes. The cavalry acted as a guard of honor. The City Councils, with numerous societies and citizens, several hundred men being in the procession, accompanied the remains to Independence Hall. It was dark before the procession started, and the novelty of a funeral by torchlight was added to the ceremonies. The cortege was in consequence of more than usual solemnity. There was no music; the participants marched quietly. The absence of noise and the strange appearance of the men under the fitful light made the occasion quite impressive. The body remained in Independence Hall during the night, and was removed for further progress the next day. That building had been prepared for the occasion, and was heavily draped with black. The Washington Grays acted as a guard of honor during the night, and escorted the body to the Kensington Railroad depot the next morning.

The remains of Commodore James Biddle were interred on the 5th of October, in the burial-ground of Christ Church, in charge of a military escort commanded by Gen. Cadwalader.

The remains of Capt. George Ayres, who fell in Mexico, were carried from Southwark Hall, March 20th, and reinterred in Monument Cemetery by a funeral procession consisting of sixteen military companies. The body of Lieut. Montgomery P. Young, of Capt. Morehead's company, Jefferson Guards, who was killed in Mexico, was brought to the city and deposited in Monument Cemetery in December. The military escort was under the command of Col. James Page. On this occasion the returned Mexican volunteers who were in the city participated. It was the first time that they had met together since they were

¹ Henry White, of Pennsylvania, called the convention to order. John H. Collyer, of New York, was temporary chairman, and James Harlan, of Kentucky, and John Sherman, of Ohio, temporary secretaries. The permanent president was Governor John M. Morehead, of North Carolina. A vice-president represented each State, and the twelve secretaries were headed by John Sherman. The balloting occupied two days. Taylor was nominated at the fourth ballot. On the first ballot the vote stood,—Zachary Taylor, Louisiana, 111; Daniel Webster, Massachusetts, 22; Henry Clay, Kentucky, 97; Winfield Scott, New Jersey, 43; John M. Clayton, Delaware, 4; Lewis McLane, of Maryland, 2. Clay's vote in three ballots fell steadily,—first, 97; second, 86; third, 74; fourth, 32.

mustered out of service, and from that period may be dated the foundation of the association of soldiers of the Mexican war known as the Scott Legion.

A vexatious accident on the 12th of November deprived the districts of Spring Garden and Northern Liberties of a water supply. About four o'clock in the morning the large reservoir belonging to the water-works of those districts north of Girard College (now at Twenty-fifth and Thompson Streets) gave way, and the whole body of water rushed in a torrent out of the southwest corner of the basin. A ravine—the dry bed of a stream—extended from near that part toward the Schuylkill, through the grounds of Girard College. The water found this to be a convenient course. A culvert had been laid down in the upper part of the ravine. The water swept away this construction so completely that not a brick was left, and the chasm was thirty feet wide and twenty feet deep. An obstruction to the rush was encountered at the wall of Girard College, three feet thick and twelve feet high. For a short time the progress of the flood was stayed; but the obstruction could not withstand the pressure, and gave way to a width of about one hundred feet; then, rolling across the college grounds, the flood carried the stones of the north wall even to the distance of the south wall. The latter also gave way in turn. There was no obstruction after this. The Dark Woods Pond was near, lying between high hills, with an area greater than any water-works reservoir could fill. The flood was received there, and found a way to the Schuylkill without further destruction. The break did little damage comparatively. No lives were lost, no houses were in the way, and as the outburst took place in the night-time, nobody saw the flood. The consequences might have been very serious to the inhabitants in daylight. Here were two important districts, comprising several thousand houses and inhabited by many thousand persons, literally without a drop of water. The quarrel of these districts with the city of Philadelphia a few years before had been so bitter upon the question of the water supply that as soon as the Spring Garden Water-Works were finished the stop-cocks of the pipes connecting the city distribution with that of the districts were turned off, so that there should be no claim for water furnished. The authorities of the city acted with great kindness. The watering committee of Councils took the responsibility of ordering that the pipes of Northern Liberties and Spring Garden, which had formerly been connected with those of the city and supplied from Fairmount, should be reconnected with them. The work was prompt. By ten o'clock in the morning of the day of the break at the Spring Garden reservoir the water of the city works was turned on in Spring Garden and Northern Liberties, and intense suffering and distress was thereby avoided.

The bitterness of feeling and insubordination to the authorities exhibited on the part of the fire department, and the frequent scenes of riot and disorder, to

the scandal of the community, led to the passage of an act "for the better regulation of the fire department of the city and incorporated districts of the county of Philadelphia," passed March 7th. This law declared that if members or adherents of fire companies were guilty of fighting or rioting in the streets while going to a fire, or upon an alarm of fire, the company which they represented might be put out of service for six months by the Court of Quarter Sessions and their doors closed. If, after return to service, the members of the company should be again guilty of rioting, the company might be disbanded. New fire companies could only be created by the authority of the Quarter Sessions; no company thereafter to use a stationary alarm-bell.¹ The city and districts were ordered to keep at least one alarm-bell, to be rung in time of fire. Defacing, injuring, or destroying fire apparatus was declared to be a felony, punishable with fine or imprisonment of not less than six months nor more than one year, either or both.

The boundaries of Richmond District were now extended so as to take in the ground on the Delaware north of Westmoreland Street and extending to Tioga, and westward from the Delaware to the Point road. The boundaries of Passyunk township and Moyamensing District were also changed. Passyunk was to begin on the Delaware River, two hundred feet south of the line of McKean Street, and to run of that width westward to a point two hundred feet west of Broad Street, thence north to a point two hundred feet south of the south line of Franklin [Tasker] Street, thence west to low-water mark on the river Schuylkill. All that part of the township of Passyunk lying west and north of the line mentioned was to be added to and become part of the township of Moyamensing. The Kensington District was also extended by act of April 6th. The added territory was bounded south by the middle of Norris Street, and eastwardly by the Frankford turnpike road. Extending northwardly along that road to a point one hundred and twenty feet north of Lehigh Avenue, it extended west to the west side of Germantown turnpike road, and down the latter to the north boundary of Kensington. This extension was made the Eighth Ward of Kensington.

By act of March 27th the cities of Pittsburgh and Allegheny and the city of Philadelphia and the municipal corporations of the county were authorized to subscribe for shares of stock of the Pennsylvania Railroad Company, and to borrow money to pay therefor, the aggregate of subscriptions not to exceed five per cent. of the taxable value of property for State or county purposes. The previous subscription to the railroad stock by the city of Philadelphia and the loans issued therefor were validated. It was provided that any city, county, or municipal corpora-

¹ This act was soon modified in favor of several companies, which were by special act of Assembly given authority to use stationary alarm-bells, notwithstanding the restrictions of the act of 1848.

tion owning ten thousand shares or more of the stock of the company might elect one director for each ten thousand shares.

By act of April 1st the village of Bridesburg was created a borough. The boundaries were: Beginning at a junction of the Frankford Creek and the river Delaware, along the creek southwest to a corner of land of Mr. Reynolds, thence by his line southeast to the river Delaware, and along the latter to the place of beginning. The official title of the corporation was, "The Commissioners and Inhabitants of Bridesburg, in the County of Philadelphia."¹

The Asiatic cholera made its appearance in Europe in the year 1847, and had progressed in its western march as far as England in 1848. In November of the latter year the attention of the Board of Health was attracted to the subject. It was deemed a certainty that the disease would be brought to the United States in the year 1849. The board passed a set of resolutions declaring that it was the duty of the various municipalities to place the city in a favorable condition to avert as much as possible the consequences of the expected visitation. Attention to cleansing, sewerage, and the removal of nuisances was particularly recommended. The districts appointed agents, and by the beginning of December they were at work carrying out the objects intended. A ship from Havre brought the disease to Staten Island, N. Y. Just about the same time its ravages were noted at New Orleans. A committee of the Board of Health sent to New York reported that the disease manifested at New York, at the Quarantine station, was the Asiatic cholera in its malignant form. In the early part of January the board notified the authorities of the city and district of the necessity of paying special attention to the condition of the market-houses. On the 6th of January a resolution was passed that vessels coming from New Orleans, or other ports of the United States where the cholera prevailed, should be subject to detention and quarantine. Dispensaries and hospitals were arranged for by a general plan adopted on the 7th of March. The row of houses on the east side of Front Street above Vine, which had been pest-places during the yellow fever of 1820, were again made objects of particular inquiry and attention. They were in a filthy condition. Some of them were cleansed and closed, and the tenants compelled to find accommodation elsewhere.

The first three cases of cholera in Philadelphia occurred on the 30th of May, the victims being two persons employed upon a canal-boat which had arrived shortly before at Port Richmond.

The third case was that of an Irish emigrant in

Fourth Street, above Shippen. He had recently come from New York, at which port he had arrived from Europe a few days before. All these died. A case on Barclay Street, above Sixth, on the 31st of May, was that of a laborer who usually worked at Market Street wharf. Two more cases were reported the same day. Under charge of the board general supervision was used over the streets; the gutters were cleansed constantly by the copious use of pure water; the sprinkling of streets by the watering machine was discouraged. The controllers of the public schools were recommended to give a vacation to the children during the epidemic, and were asked to give the use of some of the school buildings for hospitals. They refused both these requests. The city hospitals were opened in Cherry, Pine, and South Streets; in the county, at Bush Hill, Moyamensing, Southwark, Northern Liberties, Kensington, Richmond, and West Philadelphia. The following physicians were in attendance at these hospitals: Drs. T. W. Sargeant, W. B. Wilson, J. Neill, R. B. Cole, S. L. Hollingsworth, E. Shippen, J. P. Bethell, H. Ladd, J. L. Adkin, H. Y. Smith, D. F. Condie, M. W. Dickeson, J. L. Zorns, H. W. Rohl, J. McAvoy, M. E. Senderling, W. C. Makin, T. C. Smith, and S. C. Hustin. The whole number of persons admitted into the hospitals during the summer of 1849 was four hundred and sixty-three, of whom three hundred and forty-four were cholera patients, the others having various diseases. The number of deaths in the hospitals was one hundred and eleven. The Moyamensing hospital was most actively employed, the number of admissions being one hundred and twenty, of which one hundred and sixteen were cholera cases; the number of deaths there was twenty-nine. In June the disease manifested but little influence. On some days there were no cases reported, and on others but one or two. From the 30th of May to the 20th of June there were but thirty-six cases reported and seventeen deaths; after this time they increased. On the 24th the cases were twenty; on the 25th, twenty-one; on the 26th, forty-three; and on the 1st of July, sixty-five, with twenty-five deaths. The height of the epidemic was on the 13th of July, when there were eighty-four cases and thirty-two deaths. The returns from that time decreased steadily. On the 18th of August, the report for the day being but four cases and one death, the board discontinued its daily bulletins. The disease lingered on in a mild form until September 8th, when the last death was reported. The whole number of deaths in the city and county between May 30th and September 8th was one thousand and twelve. The number of cases is not as well ascertained. According to the daily bulletins of the Board of Health there were up to August 18th two thousand two hundred and forty-one cases and seven hundred and forty-seven deaths; there were fifty deaths between August 18th and September 8th, which would make the aggregate but seven hundred and ninety-seven deaths. The

¹ In 1850 additional ground was annexed to the borough south of the limits above named, and extending to the north line of Mortimer Lewis' land; along the latter it ran to the Point road, then not by the road, but by a direct line through other properties west of the road until it struck the middle of Frankford Creek, then down the same until it reached the former boundary of the borough.

weekly reports were prepared with more care, and show that some physicians did not report cases for the daily reports, which were afterwards included in the weekly bulletins. The average of deaths to cases was reported to be 1 in 2.86. The number of cases not being reported after the 18th of August, it may be estimated that, according to that ratio during the entire season, the cases were two thousand eight hundred and eighty-four, and the deaths one thousand and twelve. The greatest mortality at any one place was at the almshouse, the inmates of which were generally broken down in constitution or weak and feeble. The number of cases there between the 1st of July and the 14th of August was three hundred and fifteen, and the deaths two hundred and twenty-nine. The cost of preparation for the visitation by the Board of Health and of attendance and relief during its continuance was \$22,635.37, a contrast with the expenditure upon account of the cholera in 1832, when the population was much smaller,—\$105,285.91 were appropriated at that time. The difference may be ascribed to better knowledge of the nature of the disease by the city authorities, and partially to the experience which had been gained as to the character of the epidemic at the former visit.

The triennial parade of the firemen in this year took place amid the severity of a driving snow-storm, which continued until night. The fine banners and paraphernalia could not be displayed without receiving such injuries from the snow that they would be useless. The most costly of these standards, together with the tinsel and artificial flowers usually displayed on fine parade days, were left at home. The few banners which were brought out to brave the storm were old. The greater portion of them were dismantled before the day was over, and at the close of the procession but one, which belonged to the Shiffler Hose Company, was to be seen in the whole line. Only forty-eight companies, about one-half the usual number, paraded, and these with ranks constantly reduced by desertion. The whole number of firemen out at the beginning of the parade was about two thousand. They fell away gradually, so that at the end of the route there were only a few hundred. The noted curiosity of the procession was an old fire-engine which once belonged to the city of Philadelphia, and which is supposed to have been the same bought by the corporation from Alderman Abraham Bickley in 1718. A plate upon it showed that it was built by Loud, of London, in 1698. On this day the Diligent Hose Company paraded by itself. The trouble which led to that course was produced by the band which had been hired to attend the company in the parade. It was that of Dodsworth, of New York. The members of this high-strung organization were shocked at the employment of Frank Johnson's band of colored men and of other bands of colored musicians, which was quite an ordinary thing for many years in Philadelphia. The Dodsworth bandmen, a consider-

able portion of which were foreigners by birth, declared that they would not parade in a procession in which bands composed of colored musicians were allowed to play. The fire companies which had hired colored bands for the procession refused to submit to this impudent dictation, and would not discharge their bands or withdraw from the procession. The result was that the Diligent was compelled to make a solitary march. The firemen were very much dissatisfied with the misfortunes of the day, and they resolved to try it again. They were quite successful. The day, May 1st, was bright and balmy. All the fine banners, decorations, and insignia, which could not be brought out on the stormy 27th of March, were now in full display. There were sixty companies and over four thousand men. Among the novelties of the parade was the stuffed skin of the dog Cash, who for many years ran to fires with the Good Intent Hose Company. The Northern Liberty Hose presented a Roman triumphal car, drawn by horses, in which was a living representative of the Goddess of Liberty. The William Penn Hose Company presented its usual masque of William Penn and the Indians, at this time in unusual strength, the members in it numbering fifty.

Three companies paraded on this occasion apart from the main procession. They were victims to their musicians, who would not play in the same procession with colored bands.

The spirit of misrule and disorder which had been growing annually for fifteen or sixteen years was now at the height. The miserable system of a city with adjacent districts each independent of each other was a protection to the disorderly and encouragement to them to unite together for the purpose of showing their disregard of law. Organized gangs of ruffians and thieves were associated under such names as Killers, Blood-Tubs, Rats, Bouncers, Schuylkill Rangers, and other vulgar appellations. The walls and fences in the neighborhood of the resorts of these gangs were decorated with their titles in chalk and paint. It was a noticeable thing that all of these associations were "No. 1." The Killers, No. 1, fought with the Buffers, No. 1, or the Rats, No. 1, as the case might be, but nobody ever heard of the Killers, Buffers, or Rats, No. 2. These associations were so strong that they committed depredations with impunity, to the terror of citizens, and in contempt of the authorities. The district of Moyamensing was particularly afflicted with these gangs. The district police arrangements were ineffective. The firemen of the district were also in deadly enmity. A fire was as likely to be an incendiary attempt to lure a hostile company into a district where it could be taken in ambush as to have been accidental. An outrageous fight which took place in that district in June, on a Sunday, lasted nearly all day, and was fought with bricks, stones, and fire-arms in the public streets, ranging from Eighth to Eleventh, and from Christian to

Fitzwater Streets. Two weeks afterward a shed on Shippen Street, between Ninth and Tenth, was fired purposely. The carriage of the Franklin Hose proceeding toward the place was seized by a gang of ruffians who were lying in wait, and run down to Washington Street wharf on the Delaware, where it was pushed into the river. A retaliatory operation on the same night was brought about by setting fire to a shed on another part of Shippen Street. The Moyamensing Hose was attacked by adherents of the Franklin. A serious fight took place with fire-arms, in the course of which Alexander Gillies was killed and nine or ten wounded.

The work upon the Pennsylvania Railroad and the progress made in laying the tracks upon the sections between Harrisburg and Pittsburgh was guarantee that in a few months the entire line would be in full operation. As a great increase of trade was expected, the means of proper accommodation were important. It was obvious to persons acquainted with the subject that the old route by way of the inclined plane at Belmont would be quite insufficient, and that some better means of communication with the city was necessary. It was a mistake of the engineers when the Columbia Railroad was built which brought it to Belmont, with necessity of adoption of the slow, expensive, and dangerous inclined-plane system. The surveys which had been made previously showed the availability of routes to the Market Street bridge by which that structure might be crossed nearly at the level of the street grade. The Canal Commissioners notified City Councils that they were willing to so alter the Columbia Railroad as to avoid the inclined plane at Peters Island. The City Councils offered, if the tracks were brought to Market Street, to pay the expense of altering the permanent bridge and of laying a track along Market Street to connect the road with Broad Street. This proposal was accepted and the changes were soon commenced, in the course of which the bridge was so strengthened, modified, and changed as to be in the wood-work an entirely new structure. The builder was John Rice.

Zachary Taylor, President of the United States, passed through Philadelphia, on his way from New York to Washington, in September, and received courtesies somewhat novel in character. The steamboat "Trenton," coming down the river with the President on board, was met in the stream near Port Richmond by the steamboat "State Rights," in which were Mayor Swift and a committee of Councils. The President, together with William M. Meredith, Secretary of the Treasury, Reverdy Johnson, Attorney-General, and others, were transferred to the "State Rights." Gen. Taylor did not intend to stop in Philadelphia. The design was to give to the crowds assembled on the wharves and in the shipping a sight of his features and person. The "State Rights" steamed down the river very near to the

wharves, and the old soldier was recognized by applauding thousands. Near the navy-yard the "State Rights" approached the steamboat "Robert Morris," of the Baltimore line. The President and suite were placed on board the latter and proceeded on their journey.

A serious riot on the night of the general election, October 9th, ended with murder and arson. In the evening an old wagon on which combustibles were placed and set on fire was dragged by a party of men from the lower part of Moyamensing up Seventh Street as far as St. Mary Street, and along the latter toward Sixth. The neighborhood was inhabited by colored people, and they were greatly alarmed because it had been reported in the course of the day that an attack would be made at night upon a large four-story brick building at the northwest corner of Sixth and St. Mary Streets, called the California House. It was a tavern frequented by blacks. The proprietor was a mulatto and his wife a white woman. This case of miscegenation was well known, and had been the subject of hints of violence before that time. Nothing might have come from the running of the burning wagon down St. Mary Street if it had not been for the rumors of the day. Many of the negroes anticipated an attack, and had prepared for it. They manifested their intentions in St. Mary Street by throwing bricks and stones at the party drawing the blazing wagon. This assault led to retaliation. An attack was made upon the California House, and missiles thrown at the doors and windows. The building was defended. In consequence of the rumors of the day several colored persons were in the house. They employed bricks, stones, and fire-arms against the assailants. Finally the latter triumphed. They obtained an entrance to the house, went to work in the bar-room, broke the fixtures and furniture, piled them in the middle of the apartment and set them on fire. The city police, unarmed, now came upon the scene. They encountered ruffians armed with revolving pistols, knives, clubs, and stones. The officers were boldly attacked and driven back as far as Lombard Street, where they endeavored to hold in check a body of excited blacks who seemed to be anxious to participate in the fight. The latter were restrained a short time, but tearing up bricks and paving-stones they went toward St. Mary Street and took part in the fight. The fire at the California House had been slow in its progress, too slow for the impatience of the rioters. To assist the destruction they tore out the gas-fixtures and set the gas free. Soon the building was in a fierce blaze. The alarm of fire was now sounded. The firemen with their apparatus repaired to the scene and encountered strong opposition. The members of the Hope Fire Company preparing to go into service were beaten off, the engine taken from them, run up St. Mary Street and abandoned. The Good-Will Fire Company, on arriving near St. Mary Street, was received with a volley of fire-arms.

Charles Himmelwright, a member, was shot, and died in three minutes, and John Hollick, a member of the same company, was seriously wounded, and afterward died from the effects. The California House was now in a full blaze. Two frame houses adjoining on Sixth Street, two brick houses and a carpenter-shop were burned. This riot raged during the evening and night without attempt to check it by the police until about midnight, when the State-House bell was rung to call out the military. The rioters had in the mean while retired for a time. The soldiers reached the scene about half-past two o'clock on the morning of the 10th. They found everything quiet. The mistake was committed by the commanding officers of withdrawing them. They marched down Sixth Street as far as Shippen Street, along the latter to Fifth, and up the latter to the mayor's office, where they were dismissed. This unusual proceeding, not proper to be adopted while the passions of the rioters were yet heated, gave them notice of their opportunity. In the morning they set fire to a frame house in St. Mary Street, and commenced attacks upon the colored people. The Phoenix Hose Company on the way to the fire was stopped, the members assaulted with stones and compelled to fly. The Robert Morris hose-carriage was seized, taken from the members, and run into Moyamensing. The Diligent Hose Company, attempting to get into service, had its hose cut and injured. The firemen at length rallied and succeeded in saving the burning house. The blacks were emboldened by this assistance. They gathered before daylight, and until about eight o'clock maintained a furious battle with the rioters in Fifth Street. About ten o'clock the military, which had been again summoned, marched to the scene, stationed their guards, and placed two cannon of Col. Bohlens' artillery in front of the California House. Companies and sentries were stationed on Sixth Street at Pine, Lombard, South, and Shippen Streets, and on the cross-streets at Fifth and Seventh Streets. The military were on the ground for two days, when, quiet being restored, they were withdrawn. Beside Himmelwright and Thomas G. Westerhood, a fireman, who died in the same month, Jeremiah McShane, an Irishman, was shot and killed while looking out of a window, and John Griffith, a colored boy, lost his life. The wounded taken to the hospital were nine whites and sixteen blacks. The number injured was doubtless greater.

The Philadelphia and Atlantic Steam Navigation Company, chartered in 1848, commenced business with the new steamship "Osprey," Capt. R. H. Leese. The route was between Philadelphia and Charleston. Passage by cabin, twenty dollars; steerage, ten dollars. This ship had not been built by the company. It was specially chartered for the purpose, and the steamship "Albatross" was associated with it in the same line. The latter made her trial trip in March, 1851. This line, after a trial of three or four years,

failed. The "Osprey" was sold at the close of 1853, and broken up.

Cemetery companies were organized in this year, as follows: The Odd-Fellows' Cemetery Company of Philadelphia, by act of March 14th. The persons associated had before that time purchased a lot on Islington Lane, Penn township, northeast of the Ridge road, the dimensions of which were about thirty-two acres. The Olive Cemetery Company, incorporated February 5th, had purchased a lot of ten acres in Blockley township, on the north side of Lancaster turnpike, and west of the present Belmont Avenue. This ground was taken up by colored persons, and intended to be for the use of that race. The Lebanon Cemetery Company of Philadelphia, another graveyard for the use of colored persons, was chartered January 24th. They selected a lot on the northerly side of Passyunk road, about one-fourth of a mile west of Broad Street, which contained about eleven acres.

In this year, also, the ground of the Philadelphia Cemetery Company, on the northwest side of the Passyunk road, immediately below the Girard school-house, came into use as a burial-place. The grounds contained about twenty-two acres. The company had been incorporated March 24, 1848.

By act of April 9th, White Hall, in the county of Philadelphia, was erected into a borough, to be called "the Borough of White Hall." The boundary began at Frankford Creek and the easternmost line of Dr. Dunkin's farm, from which it extended to the centre of the Tacony road, and by that road to the centre of Church Street; north by the centre of that street to Little Tacony Creek; up that stream the boundary was carried to James D. Pratt's land; thence by that tract and other farms over to the Delaware and the mouth of Frankford Creek, and along the middle of that creek to the place of beginning. The government was to be by a burgess and a Town Council of six members.

The feeling in favor of consolidation of the city and districts was extending, although greatly resisted. A town-meeting, held Nov. 16, 1849, brought business methods to the assistance of the project. An executive committee was appointed, consisting of John Cadwalader, Eli K. Price, Gideon G. Westcott, Charles M. Ingram, John M. Read, John M. Coleman, Henry L. Benner, John M. Ogden, Francis Tiernan, William White, George W. Tryon, Job R. Tyson, John G. Brenner, Josiah Randall, William L. Hirst, Henry M. Watts, John H. Dohnert, John M. Kennedy, Edward F. Hoeckley, Thomas S. Smith, Peter Williamson, Alexander Cummings, Jacob Esher, Christopher Fallon, and Michael Pray.¹

¹ The following citizens signed this call for the meeting:

John Swift, Josiah Randall, Clement C. Biddle, A. M. Prevost, William Rawle, Garrick Mallory, John Cadwalader, William S. Charnley, G. G. Westcott, David Paul Brown, Benjamin Mifflin, Francis Wharton, Samuel H. Perkins, Jacob Carrigan, Jr., John M. Kennedy, James Dur-

Nothing resulted from their efforts except the passage of a new police bill, which proved to be one step further toward consolidation. Efforts made in 1849 to insure the nomination of candidates for election to the Legislature who would be favorable to the passage of a consolidation act were but moderately successful. There was a strong influence in all the districts against the measure, and more of it, perhaps, in the districts than in the city. Yet the measure was warmly urged, and could not be safely opposed in a regular fight. To turn aside the feeling a substitute was proposed, which it was hoped would appease the popular demand. The act passed in May, 1850, for the establishment of a consolidated police had been tested to some extent, and was not satisfactory. The various special policemen of the city and districts restrained their vigilance within their own boundaries. Practically this was nothing more than a system of a separate police force for each district without any superior directing authority. The sheriff might call out the consolidated police, but as his principal duties were to get as large amount of fees and commissions out of the civil business of his office as was possible, he had no desire to meddle with the police except upon some important emergency. The riot at the California House in the previous year was sufficient to prove the defect of the system. An improvement of the former method was therefore determined upon.

On the 3d of May the Legislature passed an act directing that the citizens of the city of Philadelphia, Northern Liberties, Southwark, Spring Garden, Moyamensing, Richmond, and Penn districts should at the next fall election choose one person to serve for three years as marshal of the Philadelphia police district. The territory was sub-divided thus,—the city formed four police divisions, and each of the incorporated districts of the county was a division. There was to be a lieutenant of police for each division. The policemen were not to exceed one for every one hundred and fifty taxables, nor to be less than one for every six hundred taxables. The old system of nomination to the police marshal by Councils and commissioners of the names of three times the number of policemen required from which he was

to make his selections was re-enacted. A police board, consisting of the presidents of the two Councils of the city and of the presidents of the various boards of commissioners of the districts, was provided for. They were to have direction of the ways and means of raising a force and of paying them. The force was to act in conjunction with the regular police of the city and districts, or independent of them if necessary. It was charged specially with maintenance of the peace of the police district, or might go beyond it into any part of the county if necessary. The marshal was granted the full power of the sheriff in suppressing riots and disorders, and of arresting offenders against the laws. When in his opinion the existing police force was not sufficient to suppress disturbance, he had authority to call on the major-general commanding the military division to call out a military force to assist in maintaining the law. After proclamation to the evil-doers to disperse, and neglect or failure on their part to do so, the marshal and the military force were authorized to suppress the disorder "in like manner as in case of war or public insurrection." At the election in October, John S. Keyser, of Spring Garden, was elected police marshal. He had been lieutenant of the consolidated police of that district, and had shown himself to be vigilant and bold, so that his merits were well understood by the people.

The police board, which was shortly after organized, agreed that the number of policemen should consist of one for every four hundred taxable inhabitants of the police district, and that the salaries should be four hundred dollars per annum, payable monthly. The force was small, but being in charge of a man of activity and courage the effect was wonderful. The lawless clubs and associations which had for years committed disorder and crime were subdued and broken up. In a few months scarcely any of them pretended to exist, and the small force which Marshal Keyser had under his command was managed admirably. The office of the police marshal was established upon the organization in the Adelphi building, Fifth Street below Walnut.¹ The ruffians who were particularly active in the districts were but little interfered with before the marshal's police got to work. On the 25th of May, about one o'clock in the morning, a large bonfire was kindled in an open lot in Eighth Street, near Fitzwater, and opposite the Moyamensing Hose House. Neil Mooney, a watchman of the district, in accordance with his duty, attempted to extinguish the fire. He was warned to desist by some persons lying in ambush near, but persisted in the discharge of his duty, and while taking an empty barrel from the flames was shot with a musket, and afterward died from his wounds.

nell, Jacob Freas, Edwin R. Cope, John W. Kester, David Boyd, George W. Tryon, John M. Ogden, P. P. Morris, M. Myers, Thomas McGrath, Thomas Bradford, F. Stoeber, John Leadbeater, George C. Naphees, John G. Brenner, William G. Cochran, John H. Dohnert, C. L. Ingram, Henry M. Watts, William Elder, Henry D. Gilpin, A. Boyd Hamilton, Henry S. Patterson, Henry Horn, George H. Earle, James Laws, Chapman Biddle, Henry A. Beck, William West, L. Johnson, Mahlon Gillingham, Thomas Finley, George W. Biddle, Jacob Snider, Jr., Theodore Cuyler, B. Arthur Mitchell, St. George T. Campbell, William L. Hirst, Benjamin Stiles, Eli K. Price, John Naglee, Andrew Miller, William H. Smith, William White, Jacob Esher, James Magee, John H. Campbell, George W. Farr, E. S. Jones, T. M. Pettit, J. B. Sutherland, Samuel Barton, Daniel Smith, Sr., William McGlensey, W. O. Parker, B. H. Brewster, Peter Armbruster, William R. Dickerson, John M. Coleman, Peter Fritz, James Harper, E. P. Middleton, Thomas Sparks, George K. Childs, Harry Connelly, Passmore Williamson.

¹ In 1853, John K. Murphy (Democrat) was elected police marshal. By special provision in the consolidation act of 1854, this office and police force were retained until the expiration of Marshal Murphy's official term, in 1856.

The perpetrator of this murder was never discovered.

The attempted revolution against the Austrian domination in Hungary, under lead of Louis Kossuth and others, which had been carried on in 1848-49 with spirit, was subdued in the latter year. Much interest in the contest had been excited in the United States, and the patriotism of the Hungarians was greatly admired. A band of exiles arrived in Philadelphia in January. In this party were Gen. Ujhazy, governor of the fortress of Comorn, his wife, daughter, and two servants; Mademoiselle Jagella, whom it was asserted had fought in soldier's uniform in the Hungarian ranks; Edward Remenyi, Antoine Count Vass, and Col. Prejal. They were lodged at the Washington House, Chestnut Street above Seventh, and serenaded on the evening of their arrival by the members of five German vocal societies who came upon the ground with one hundred torches, by the assistance of which they could see the score of the music which they were singing.

By act of February 19th the Glenwood Cemetery Company, an association established before that time, was incorporated. They had bought a piece of ground on Ridge road, at the northeast corner of Islington Lane, in Penn township. The incorporators were Joseph D. Stewart, John W. Trumpp, Joseph S. Langer, Horn R. Kneass, Thomas Sandland, William D. Baker, Charles R. Bicking, Francis Knox Morton, William A. Witte, Henry A. Stevens, Aaron Waters, Henry T. Grout, Henry S. Patterson, Alexander Whiteside, John G. Michener, George W. Gordon, Peter Weikel, James D. Whetham, William L. Ward, and Henry Simonds, Jr.¹

The Philadelphia and New York Steam Transportation Company was chartered March 8th, with authority to carry merchandise and passengers between Philadelphia and New York, connecting with intermediate points. Robert T. Loper, William M. Baird, William H. Loper, William Thomson, and Nathaniel Briggs were the incorporators. The capital was to be one million two hundred and fifty thousand dollars, with right to increase to one million seven hundred and fifty thousand dollars. The company was restricted from receiving or landing freight or passengers from any point on the river or bay of Delaware or Schuylkill River, above or below the city or incorporated districts. This corporation, originally a private partnership, managed a large business of transportation by steam-propellers, which ran to and from New York and Providence, R. I., by way of the Delaware and Raritan Canal.

A fire of great extent in the ground burned over, in the number of buildings destroyed, and in the value of the property destroyed, broke out on the 9th

of July, 1850, in a store at No. 39 North Water Street below Vine, on the east side, in the upper part of the building, which, with one adjoining, was occupied by Gordon & Berger, whose stock consisted principally of pressed hay. The fire is believed to have originated from the friction produced by the wheel of a hoisting-machine in active use. The firm of John Brock & Co. occupied the lower part of the store, and the wheel was in use all day in lowering hogsheads of molasses into the cellar. The firemen were summoned, and were soon in full service, principally in Water Street and on the wharf adjoining. During the operations of the firemen some noises, as of explosions, were heard. A witness afterward, before the coroner's jury, testified that he had counted sixteen of them before the last and most terrible in its force. The noise made by the latter was exceedingly loud. In a moment the walls of the Brock, and Gordon, and Berger warehouses were blown out, and the material (bricks, stones, and blazing timbers) were sent flying about the neighborhood. Upon the west side the fragments were with great violence blown into a house immediately opposite, which was occupied by several families. Of the inmates, Marcus Marcus, aged eighteen years, Caroline Marcus, his younger sister, and Isaac Marcus, a younger brother, were killed, and the father of the Marcus family very much injured by the explosion. Persons in the street were also injured and killed. A large number who were standing on a wharf near by were blown overboard, and several jumped into the river.² By the explosion a fire which might have been local was rendered of general character. The falling walls crushed in the roofs of adjacent buildings, and communicated the fire to their contents. Adjoining the Brock store were the warehouses of Ridgway & Budd on one side, and of the Lehigh Transportation Company on the other. Immediately opposite a burning bale of hay and fire-brands had been blown into houses on Water Street extending to Front. They were soon all of a blaze. In a short time the flames crossed Front Street, and attacked dwellings on the west side. Extending south to New Street, the flames swept along the latter to Second Street. About the same time the houses on Vine Street, between Front

² The number of persons killed was twenty-eight, as follows: Marcus Marcus, aged eighteen years; Caroline Marcus; Isaac Marcus; Miss Ann Connell, burned to death; David Mulford, member of the Northern Liberty Hose Company; Mortimer Morris, United States Engine Company; Thomas Stees, Fairmount Engine Company; Caroline E. Drake, thirteen years; Ellen Theresa McKee, thirteen years; Dorothy Hand, twenty-five years; Thomas Donahoe, forty years; Ellen Gilligan, two years; Adolph Solstman, a boy. Two men and three boys, names unknown, were found, and inquests held upon them. William L. Bachman and Benjamin Davis May afterward died from their injuries. There were missing and never found, Cornelius Griscoe; George Smith, nine years old; Isaac Brown, of the Weccacoe Hose Company; Samuel Reeves, thirty-eight years; H. Leichtenhahm, Assistance Engine Company; Richard Owens, Assistance Engine Company; Samuel McKee; Mary McKee. None of the missing were ever heard of again. Probably others were killed or drowned. The number of wounded was fifty-eight, as far as known. No doubt there were a greater number.

¹ Nearly all, perhaps all, of these persons were members of the order of Odd-Fellows. The ground was immediately adjoining the Odd-Fellows' Cemetery on Islington Lane.

and Second, were on fire. Laborious efforts to prevent the flames from crossing to the west side of Second Street were successful. Above Vine Street they were carried along Second northward on the east side, and were only stopped about six houses below Callowhill Street by the parapet walls of the White Horse Tavern. One house above that was consumed. There was considerable destruction on Front Street above Vine, in New Market Street, and upon Callowhill Street. The following will give some idea of the extent of the destruction :

Houses burned on east side of Water Street and Delaware Avenue south of Vine.....	17
Houses burned on east side of Front Street through to Water Street.....	18
Houses burned on west side of Front Street south of Vine.....	12
Houses burned on south side of Vine Street, between Front and Second Streets.....	26
Houses burned on New Street, between Front and Second.....	28
Houses burned on east side of Second Street south of Vine.....	10
Houses burned between Vine and Callowhill, Delaware Avenue and Second Street.....	211
Houses burned north and east of Callowhill and Water Streets.....	15
Total.....	367

These were totally destroyed. Many other houses were injured by sparks and pieces of burning boards, which were carried by the explosion and the wind far and wide. Pieces of brimstone from Brock's store were picked up in Broad Street, and zinc from the roof of that building fell in Ridge Avenue. About three hundred of the buildings destroyed were dwelling-houses; the remainder were stores. The loss could scarcely be estimated accurately. It was supposed that it could not be less than a million of dollars, and it might have been much more. The insurance amounted to three hundred and sixty-eight thousand dollars. During the continuance of this fire the greatest consternation prevailed in the neighborhood for squares distant, and anxiety all over the city. The volumes of flame and smoke were immense, and were visible from every direction. Many persons who resided or were in business at the distance of one-quarter or one-half mile from the place where the fire was burning packed up their goods, and prepared for a sudden removal. The flames were got under control by the firemen about two o'clock the next morning, and were confined to the district already injured. The news being sent by telegraph throughout the United States brought firemen from other cities. One hundred of them came from New York the same night; some from Newark and some from Baltimore. The City Councils appropriated ten thousand dollars for the relief of the sufferers by the calamity. The Commissioners of the Northern Liberties gave an equal amount. A meeting of citizens was held at which measures were taken to collect contributions for the assistance of the injured. They received about thirty-one thousand dollars, which was properly appropriated. The cause of the explosion was for a long time a subject of controversy, and was never satisfactorily settled. The most general belief was that it was caused by the large quantities of saltpetre and brimstone in the store of the Messrs. Brock. Here were

two of the ingredients of gunpowder. The other, it was suggested, could have been furnished by the brands and coal from the fire dropping from above into the saltpetre and nitre. There was great discussion on the subject in the newspapers, with ingenious attempts to solve the question, "Will saltpetre explode?"¹

On the same day, when the fire was making its ravages, Zachary Taylor, President of the United States, died at Washington, D. C. The news was in the same paper which contained the accounts of the great fire. The Councils of the city resolved that the death of the President should be commemorated by appropriate ceremonies, which took place on the 30th of July. The shops and public buildings were generally closed, and the fronts of many of them draped and hung with black. At the custom-house the marble columns of the portico were shrouded in crape wound round them from bases to capitals. The doorways were festooned. Upon the cornice, in silver letters upon a black ground, was the sentence, "I have endeavored faithfully to discharge my duty." The city buildings on Chestnut Street between Fifth and Sixth were heavily draped. Crape and black hangings were generally displayed upon the large hotels, stores, and some private residences. There was a military parade of the three city brigades, under Maj.-Gen. Robert Patterson, with United States marines from the navy-yard, a company of United States artillery from Fort Mifflin, and returned Mexican volunteers. A catafalque fifteen feet high was elaborate in its sombre decorations, which were of white satin for the canopy, white satin for the pillars with capitals of silver flames, which supported an elliptical arched canopy with a dome covered with black cloth surmounted by an eagle. Black and white with silver fringes, stars, and trimmings decorated the car, which was drawn by eight white horses covered with black cloth, and led by white grooms dressed in black, except that the bands upon their hats were white. A white horse with military saddle and caparison followed. In the civic part of the procession were Governor William

¹ There was stored in the store of John Brock, Sons, & Co., at the time of the fire two hundred and fifty bags of saltpetre, averaging two hundred pounds each; eighty barrels of brimstone, about three hundred and thirty pounds each; fifty hogsheds, twelve tierces, seventy barrels of molasses, and ninety-one hogsheds of sugar. The saltpetre and brimstone were on the first floor on Water Street; the molasses and sugar on the lower or cellar floor. A hatchway was between each floor and open. As the saltpetre and brimstone fused it ran down through the hatch and spread among the sugar and molasses. This was seen by a number of firemen in or about the building. The burning of so large a quantity of saccharine matter rapidly formed carbon, and thus were brought into contact in a high state of heat all the elements of gunpowder.

To prevent such dangers in future the Legislature passed a law, April 8, 1851, "to regulate the storage of saltpetre in the city and districts of Philadelphia," and not more than three kegs, or three hundred pounds, were allowed to be placed in any storehouse at one time, under penalty of one hundred dollars. Forwarding houses in Philadelphia might receive and store any quantity of saltpetre intended to be carried over the public works of Pennsylvania for forty-eight hours.

F. Johnston and other State officers, with officers of the city and districts, societies, firemen in citizens' clothes. There were forty-one companies of the latter. The Vigilant Fire Company had in their line a marble monument, drawn by horses, which had upon it the inscription, "This is the end of life. I am prepared." The Hope Hose Company had a funeral car. The line of the procession extended over twenty-six squares. The day was intensely hot; the thermometer at 11 o'clock A.M. stood at ninety-four degrees, and at 3 P.M. at ninety-seven degrees. There was considerable suffering among the soldiers and persons in line from the heat. The cortege halted at Christ Church, where a memorial sermon was preached by the Rev. William Bacon Stevens, from the text Jeremiah xlviii. 5-17.

The boundaries of West Philadelphia were changed in this year by additions of territory of such intricate character as to boundaries that an attempt to describe them, except with the particularity of the technical language of a surveyor, would be impossible. The extension began at the mouth of Sweet Brier Creek, which emptied into the Schuylkill near Sweet Brier mansion, now in Fairmount Park. The boundary was by the centre of the creek until the centre of the Falls of Schuylkill road was reached. Westward the boundary extended outward toward the Cathedral Cemetery and down the creek to the Haverford road, crossing by the Pennsylvania Hospital wall to Mill Creek, by the latter to the Philadelphia and Baltimore turnpike road, and along the latter to Hamilton village and the Darby road to John Hare Powell's ground, the Philadelphia Almshouse, and then to the Schuylkill River. In this tract was included the village of Mantua and a great deal of adjacent ground. West Philadelphia was divided into three wards. The first ward had no name. The second was called the Hamilton Ward, and took in the greater part of Hamilton village. The third, or Mantua Ward, was north-east of the Lancaster turnpike.

The western boundaries of Kensington were changed so as to include ground between Lehigh Avenue and Somerset Street, and out to Sixth Street, with some other modifications.

The village of Doverville and its neighborhood, in the unincorporated township of the Northern Liberties, was, by act of April 11th, made a corporation, under the title of "the Commissioners and Inhabitants of the Borough of Aramingo." The situation was west of Salmon Street and the Bridesburg borough line, and was bounded by Frankford Creek and private properties, the location of which would now be difficult to fix. The dimensions of Bridesburg were also extended by act of April 30th.

In the city the elections for ward officers, which had been held in the spring, were carried over to the second Tuesday in October. A change was also made in the manner of electing councilmen. These had previously been chosen in both chambers

by wards, there being one representative from each ward in Select Council at all times, and in Common Council one or more from each ward, according to population. Under the new law, for the Select Council the city was divided into four districts, which were not a single ward. The Select Council districts extended from the Delaware to the Schuylkill. The First District was from the south side of Vine to the north side of Mulberry, and included Upper and Lower Delaware, North Mulberry, and South Mulberry Wards. The Second District extended from Mulberry to Chestnut Street, and included High Street, Chestnut, North, and Middle Wards. The Third District extended from Chestnut to Spruce Street, and took in Walnut, Dock, South, Locust, and Spruce Wards. The Fourth District, from Spruce to Cedar, took in Pine, New Market, Lombard, and Cedar Wards. A member for each district could be elected from any portion of the districts. One member of Select Council was to be elected annually in each district, to serve for three years. The Common Council was divided into seventeen districts, as follows:

1st, Upper Delaware Ward; 2d, Lower Delaware Ward; 3d, High Street; 4th, Chestnut; 5th, Walnut; 6th, Dock; 7th, Pine; 8th, New Market; 9th, Spruce; 10th, Lombard; 11th, Cedar; 12th, Locust; 13th, South; 14th, Middle; 15th, North; 16th, South Mulberry; 17th, North Mulberry.

Each district was to elect one member of Common Council annually, except in the 12th, 15th, 16th, and 17th districts, which might each elect two members.

The act of May 15, 1850, changed the boundary lines between Moyamensing and Southwark. Beginning on the river Delaware, on the south side of Mifflin Street (laid out but not then opened), the line extended on the south side of that street west to the west side of Fifth Street; then crossing to the north side of Mifflin, and then along the same to the east side of Seventh, and along Seventh to the north side of Reed Street, and along the same west to the western boundary of the district of [Southwark] on the west side of Passyunk road. This was the district of Southwark, and embraced the land up to the city line. Moyamensing was somewhat reduced in size by the change.

Commodore Jacob Jones, of the United States navy, who had, in the United States sloop-of-war "Wasp," captured the British sloop-of-war "Frolic," Oct. 18, 1812, died in August, and was buried on the 7th, with military honors, City Councils participating.

Gen. Antonio Paez, ex-President of Venezuela, arriving in the city in July, was received as a public guest by the mayor and Councils. At the hall of Independence he was addressed in English by the mayor, and responded in Spanish. During his stay in Philadelphia he received many hospitalities and civilities.

A violent freshet on the 3d of September did considerable damage on the Schuylkill. The bridge at Flat Rock was destroyed. A new bridge at the Falls,

with the exception of one arch, was swept away. At Fairmount dam the water was ten feet ten and a half inches above the ordinary level. At Harding's Tavern, on the west side of the Schuylkill, near the Suspension bridge, the water was twenty inches above the first floor. William Street [Twenty-fourth] from Callowhill to Vine Street was flooded, and the water extended nearly to Schuylkill Front Street [Twenty-second]. Beach Street [Twenty-third], below Chestnut, Bank Street, and Sutherland Avenue were submerged. The city gas-works at Market Street and the Schuylkill were flooded. The fires were put out. The manufacture of gas was stopped. In the evening the city was in darkness. The Arch and Walnut Street Theatres were closed. At Barnum's Museum a large number of camphene lamps were put into requisition. Candles, for which there were no candle-sticks, were the only means of illumination in many private houses. The public lamps were in gloom until about nine o'clock, when tallow candles were placed in some of them. The damage on the Schuylkill front of the city and county was great throughout its extent. Coal, wood, and lumber in large quantities were swept from the wharves. On the west side of the Schuylkill the cars of the Philadelphia, Wilmington and Baltimore Railroad found that it was not safe to cross the river at Gray's Ferry. The passengers were taken back to Chester, and brought to the city in the steamboat "Robert Morris." The amount of the damage was never satisfactorily estimated.

The City Councils, in 1845, had made a pledge of a subscription of five thousand dollars to the stock of the Schuylkill Railroad Company whenever twenty thousand dollars should be subscribed by citizens. This sum had been obtained and the money was appropriated. The railroad was built, but never succeeded in attracting business to a profitable degree. Pecuniarily it turned out a complete failure.

The city on the 17th of January made a subscription for ten thousand additional shares of the Pennsylvania Railroad Company.

The convention to consult upon the subject of building a great railroad to the Pacific, which had met at St. Louis, Mo., at an earlier period in the year, adjourned to meet at Philadelphia in April. The session commenced at the museum building in April, and lasted two or three days. This matter had been discussed for some time previous, and efforts were made to enlist a public sentiment in favor of the work. The Legislature of Pennsylvania, by resolution of March 3, 1848, declared in favor of the plan of Asa Whitney, of New York, of constructing a railroad from Lake Michigan to the Pacific Ocean, by an appropriation and sale of the public lands upon its line, connecting the sale and settlements of the lands with the building of the road, and making it an individual enterprise, yet under the control of Congress. Resolutions of a similar character were passed by the Legislature in the succeeding year.

In August, a range of government store-houses, erected in Granite Street, between Dock and Front Streets, suddenly fell in by the breaking of the timbers and supports. The floors were heavily loaded with goods, spirits, wines, brandies, and large quantities of heavy merchandise, the weight of which was beyond the capacity of the structure. Several persons in the warehouse were injured, but it is believed none of them died. The building was a perfect wreck. The walls were forced out, and the interior presented a confused mass of barrels, boxes, and crates. Casks of wine and brandy were stove in, boxes of tea were broken, casks of hardware were burst open, and their contents thrown out. The *débris* presented a remarkable scene of confusion, and the work of clearing out the ruin was difficult and slow. The stores were afterward rebuilt in stronger fashion.

The steamship "Benjamin Franklin," of Loper's Philadelphia and Boston line, was launched in the early part of the year. In December, a fine war-steamer, built for the republic of Venezuela, and named "The Libertador," was built at Kensington, and made her trial trip December 28th. The boilers of the steamboat "Telegraph," on the Wilmington line, exploded on November 9th; eight or nine persons were killed and thirty wounded. This had been a popular and fast boat, built in 1836, and for a long time favorably known upon the Cape May line. The machinery of the Kensington Water-Works was first put in operation December 21st of this year.

Charters for medical colleges were granted this year by the Legislature. One of these, the Medico-Chirurgical College of Philadelphia, was given power for the furtherance of the dissemination of medical knowledge, the defense of the rights and the preservation of the repute and dignity of the medical profession. It was not a school, but rather a trade society. The college might grant diplomas of fellowship, honorary, senior, and junior membership, but not the degrees of doctor or bachelor of medicine. The Eclectic Medical College of Pennsylvania was incorporated February 25th, with power to grant the degree of doctor of eclectic medicine to any such person as shall have attended two courses of medical lectures and completed a course of study, and possesses the qualifications necessary for the same. An important innovation upon the restrictive and close guilds which had authority in matters of medical instruction was effected by the incorporation of the Female Medical College of Philadelphia, for the purpose of instructing females in the science and art of medicine. The incorporators were Frederick A. Fickard, M.D., William J. Mullen, Henry Gibbons, M.D., Joseph S. Longshore, M.D., Ferdinand J. Dreer, William J. Birkey, M.D., Robert P. Kane, John Longstreth.¹

¹ The Medico-Chirurgical College was probably organized and continued in existence for a period. The Eclectic Medical College was first established in Haines Street, west of Sixth, adjoining the Odd-Fellows'

The Philadelphia and Savannah Steamship Company was incorporated by act of March 18, 1851. Shares, five hundred dollars. The company was to receive a charter whenever twenty-five dollars were paid upon forty shares. The object was to own, employ, and dispose of ships, vessels, steam-engines, etc., for the navigation of oceans, bays, and rivers by steam power, and the transportation of merchandise, goods, passengers, etc., the act to be void if the company did not instruct and employ at least one steam vessel suitable for ocean navigation between Philadelphia and Savannah within three years. No corporators were named in the act. By act of February 10th was incorporated the Pennsylvania Steamship Company. The corporators were Charles S. Boker, Thomas Richardson, S. Morris Waln, Thomas S. Newlin, James C. Hand, Daniel L. Miller, Jr., John Ashhurst, Christopher Fallon, Matthew Newkirk, Jesse Godley, Richard Price, John B. Myers, George H. Martin, Gideon G. Westcott, John G. Brenner, Robert Ewing, Robert Patterson, Thomas Allibone, Stephen Flanagan, William C. Ludwig, and William V. Baker. Stock, one million dollars. The power given was to equip, own, purchase, and sell vessels to be "propelled solely or partially by the power of steam or other expansive fluid, and to be run and propelled in navigating the Atlantic or other oceans."

The opening of the new year was signified by public rejoicings upon the occasion of the establishment of a line of steamships between Philadelphia and Europe. The screw steamship "City of Glasgow," Capt. Mathews, the pioneer of the line, entered the Delaware on the 2d of January. When the ship was in the bay the fact was telegraphed to the city. In a short time afterward the steamboat "Trenton" went down the river with four hundred merchants and business men on board. Near Chester the "City of Glasgow" was seen, and greeted with "Hail Columbia" by the band on the "Trenton," with a salute of thirteen guns and hearty cheers. Capt. Mathews and some of the passengers were brought on board the "Trenton," and received with speeches by John Price Wetherill and Morton McMichael. The captain, who was a stout little Englishman, and no ora-

tor, was surprised and embarrassed by these unexpected attentions, but managed to make a suitable reply. On the passage up the river salutes were fired from the steamship "Osprey" and the Venezuelan war-ship "Libertador." One hundred guns were fired from artillery stationed at Washington Street, Southwark, and a salvo from Kaighn's Point, N. J. The shipping in port was decorated with flags, and cheers and demonstrations of welcome were heard all along the city front. On the 11th of January a grand banquet in honor of the arrival of the "City of Glasgow" was given by City Councils in the upper room of the museum building, at Ninth and George [Sansom] Streets. There were eight hundred guests present, including the members of the Legislature of Pennsylvania, the executive officers of the commonwealth, the leading officers of the city and districts, and merchants and business men. Charles Gilpin, mayor of the city, presided. A prayer was offered by the Right Rev. Alonzo Potter, D.D., bishop of the Protestant Episcopal Church of Pennsylvania. An address of compliment was made to Capt. Mathews, to which he responded appropriately. Speeches were made by Hon. James Buchanan, afterward President of the United States; William M. Meredith, who had been Secretary of the Treasury; William C. Patterson, president of the Pennsylvania Railroad Company; Daniel L. Miller, Jr.; Robert Morris, editor of the *Pennsylvania Inquirer*; John L. Dawson, Judge William D. Kelley, and others.¹

The Girard College now being completed, it was resolved that the remains of the donor, Stephen Girard, should be transferred to the sarcophagus beneath the statue of the merchant and mariner by Gevelot, in the vestibule of the main building of the college. It was intended that the funeral should be entirely under the control of members of the Masonic order. Some of the heirs of Stephen Girard objected to this transfer, alleging that the body of their rela-

¹ The "City of Glasgow" was under the British flag, and belonged to an English corporation, which had determined to try its fortune in establishing a line to Philadelphia. The steamships were all named after cities. The "City of Glasgow" was followed by the "City of Manchester," which came into the river in the month of August. The "City of Pittsburgh" arrived in January, 1852. The "City of Philadelphia" was built some months afterward, but never entered the Delaware. The fate of these vessels was unfortunate. The "City of Glasgow" left Liverpool for Philadelphia March 1, 1854, and was never heard of afterward. There were more than five hundred passengers, and the value of the vessel and cargo was eight hundred and fifty thousand dollars. The "City of Pittsburgh" was burned in the harbor of Valparaiso Oct. 24, 1852. No lives were lost. The "City of Philadelphia," while on a voyage from Liverpool to Philadelphia, struck on Cape Race Sept. 17, 1854. The passengers were saved and the ship lost. The value of the ship and cargo was six hundred thousand dollars. The "City of Manchester" alone remained, and ran between Philadelphia and Liverpool monthly until the breaking out of the Crimean war between Great Britain, France, and Russia, when her services were demanded by the British government for the transportation of troops. After the war the title of the line was changed to the Philadelphia, New York, and Liverpool Steamship Company. The first name in the title was surplusage. The office of the company was transferred to the city of New York, from which the "City of Manchester" and other vessels ran for some years. No vessel of this line afterward entered the port of Philadelphia.

Hall, and was afterward removed to the northeast corner of Sixth and Calowhill Streets, upper story. It was reputedly managed for ten years by a quiet, earnest faculty, strictly in the interests of science. The graduates were but few in comparison with those of other institutions. About 1859 or 1860 a quarrel between the professors led to the establishment of a rival institution, also eclectic, and the running off of a large number of the students to the new concern. The institution declined from that time, and finally got into bad hands. Ostensibly open for medical instruction, on the south side of Pine Street above Fifth, the Eclectic Medical College became a great factory of bogus diplomas of doctors of medicine, which were sold to any applicant who was willing to pay for them at home or abroad, without distinction of birth, race, color, or previous condition of servitude. The Female Medical College became in the course of years an honorable and highly successful institution, during which time was erected a fine hospital in connection with the college building on North College Avenue, Twenty-first and Twenty-second Streets. The title of this school was afterward changed to the Woman's Medical College.

tive had been deposited in the vault of the Holy Trinity Roman Catholic Church, Sixth and Spruce Streets, in accordance with his own wishes, and that there was no authority, either in the Masonic order or the city of Philadelphia, to remove them. It was an important fact that they had been removed before application was made for an injunction. The point was strongly debated on both sides. Judge Edward King, of the Common Pleas, before whom the motion for an injunction was discussed, took the sensible view that the body having been removed, an injunction against removing it could not be consistently granted. The public ceremonies had also been arranged for, and, finally, he continued the case without making any decision, stating that if an injunction could be legally ordered after the remains had actually been removed from the churchyard, it could be as well disposed of afterward upon full argument on bill and answer and final decree. Nothing was ever done afterward in relation to the matter. The object of the heirs was vexatious and without justification. They asserted that the will of Girard and the trusts created in the city of Philadelphia by that instrument were void, but possession of the mortal remains of their relative could have no influence upon a decision of the legal questions involved in the controversy. Under the particular state of the case, the old adage that possession is nine points of the law became available. The funeral ceremonies were entirely Masonic, under direction of the Grand Lodge of Pennsylvania, which upon this occasion permitted the first parade of the brotherhood for many years. Care was taken to present the members of the order under the most favorable circumstances. They were uniformly attired in full-dress suits of black, and wore white kid gloves, the white sheepskin apron of the Master Mason trimmed with broad edging of blue ribbon, and blue sashes, ornamented with silver fringe. Fifteen hundred and nineteen members of the order paraded, and the procession, in the fine appearance of the members, the personal respectability of all of them, and the decorum exhibited, had never been equaled in impressive character. The procession marched from the Masonic Hall, Third Street above Spruce, by the most direct route, *via* Ridge Avenue, to Girard College. Here the orphans under tuition in the institution, three hundred in number, were placed upon the steps of the college building. The remains of the founder were brought forth and borne by twelve Past Masters to a platform erected on the east side of the main building for the purpose. The Grand Lodge was placed upon this elevation, the brethren being arranged in close columns before it. A dirge, composed for the occasion, was played by a band of musicians under the direction of Brother William P. Cunningham. Past Grand Master Joseph R. Chandler then delivered an appropriate and eloquent oration, and the Most Worthy Grand Master, William Whitney, made a

short address. The dirge was again performed. The remains of Girard were then removed to the vestibule of the college and deposited in the sarcophagus. The line of Masons filed along in front of the latter, and each brother deposited his palm-branch upon the coffin as he passed. After this the march was resumed to Masonic Hall, where the members were dismissed.

On the 12th of November a terrible disaster occurred at Bruner's cotton-mill, at the southwest corner of Nixon [Twenty-third] and Hamilton Streets. The mill at that time was a stone building, four stories in height, immediately at the corner of the two streets. A fire broke out in a lower story, and the flames rapidly ran up the only stairway in the building, which was at the southeast corner, on Nixon Street. There were about thirty men and women in the third and fourth stories. A few of them, upon the alarm, managed to get down the stairway, but the majority of them were cut off from escape in that way by the flames. The contents of the factory were very inflammable. Some of the persons in the upper stories endeavored to get down by the hoisting-rope, which was upon the outside of the building. A few managed to escape in this way, but the others, the greater portion of whom were girls and women, could not escape in that manner. They were driven to the dreadful alternative of jumping from the third- and fourth-story windows into the street beneath. All of them were severely bruised, and several of them broke their limbs. Edward Crossley and Mary Ann Browning were burned to death in the factory. Agnes Morrow, who jumped from a window, was killed. In a short time the factory was totally destroyed. Such a melancholy circumstance had never happened in Philadelphia, and the owners of other mills and factories, admonished by the disaster, generally adopted measures for the better escape of their employes in case of fire, but with little success, judging from the number of similar catastrophes that afterward happened. The apparatus of the fire department at this time consisted only of fire-engines and hose-carriages. There was no ladder service. A hook-and-ladder company, the Empire, No. 1, was shortly after established, and it was followed by the institution of the Keystone Hook-and-Ladder Company, No. 2.

On the 18th of March the Assembly Building, four stories in height, situated at the southwest corner of Tenth and Chestnut Streets, and extending to George [Sansom] Street, was totally destroyed by fire. The lower stories were fitted up with stores and shops. The upper stories were occupied by two large saloons, which were used for balls, concerts, lectures, etc., and it had been a place of great resort. It had been opened for such purposes on the 10th of November, 1839, and for over eleven years had been in good service and constant employment upon festive occasions.¹

¹ It was rebuilt immediately after the fire, opened in 1852, and has been employed for public purposes in the upper stories ever since.

The fire was first discovered in a grocery-store at the corner of Tenth and George Streets, and mounting rapidly to the upper stories, the whole building was totally destroyed. The loss was estimated, to the owner of the building and the tenants, at one hundred and fifty thousand dollars. The night was cold and stormy. Much snow was falling, and the firemen were embarrassed by the freezing of fire-plugs and hose. Their labors were arduous, and they only succeeded in saving the buildings in the rear on George Street and Chestnut Street, and prevented the flames from doing damage to the houses on the east side of Tenth Street immediately opposite the hall. The snow was heavy, and the weight upon roofs of buildings was very great. Early in the morning of the 19th, about five o'clock, the roof of the Spring Garden Presbyterian Church, at the northeast corner of Eleventh and Wistar Streets, fell in from the weight of the snow. It was a new building, but was weak in the upper portions. The weight of snow upon the roof pressed out the side and end walls, and the entire interior was demolished. Nothing was left standing except the pillars of the front colonnade.

Millard Fillmore, President of the United States, passed through the city on the 12th of May. The steamer "Roger Williams" took down a large escort of gentlemen to Wilmington, from which place the President was brought by the boat to the city. He was accompanied by Daniel Webster, Secretary of State; John J. Crittenden, Attorney-General; Nathan K. Hall, Postmaster-General; and William A. Graham, Secretary of the Navy. At the navy-yard the party was received with an official salute, and thence escorted by eight companies of volunteers to the United States Hotel, Chestnut Street. At that place short speeches were made by the President and Daniel Webster to the citizens assembled in front of the house. In the evening the party was complimented by a serenade. They left the city in the morning train for New York.

On the 20th of May the steamboat "Ohio," coming up the Delaware with passengers from Baltimore, came in collision with the steamboat "Commodore Stockton" a short distance below Greenwich Point. The "Ohio," struck nearly amidships, was in danger of sinking. The captain steered the boat at once to the Jersey shore, and it was run upon the flats below Kaighn's Point. The bell was tolled as a signal of distress, in hope of bringing to relief the ferry-boat at Kaighn's Point, which came to assist. Forty or fifty passengers were rescued by that means. But before all who were on board the "Ohio" were taken off the boat filled with water and slipped off the shoal into the deep channel, where it sank. Some of the passengers were rescued by wherry-boats and by means of the long-boat belonging to the "Ohio." Three horses upon the forward deck swam ashore, one of them carrying the owner on his back. Two

passengers, E. A. Taylor, of Washington, D. C., and — Shute, of Baltimore, were drowned. The hull of the boat was submerged, the tops of the chimneys alone being visible. The "Ohio" was afterwards raised, repaired, and put in service upon the line.

The anniversary of American independence was celebrated this year more generally than for a long period previous. The Councils appropriated a liberal sum for an exhibition of fire-works in honor of the day, which was to take place in Broad Street, between the Southeast and Southwest Squares. In the morning the entire First Division of volunteers paraded under the command of Brig.-Gens. George Cadwalader, John Bennett, and John Sydney Jones. The Declaration of Independence was read at one o'clock in Independence Square by William M. Bull. Political meetings and dinners also took place in various parts of the city. In the evening about fifty thousand persons assembled in Broad Street at Market, and in Broad Street above Chestnut and neighboring streets to witness the display. Unfortunately, it was not brilliant. The day was very warm, and some of the principal pieces set up in the afternoon exploded from the heat of the sun. There was a meagre show in consequence, and the persons present were much dissatisfied.

The Fugitive Slave Law, passed by Congress on the 18th of September, 1850, led to many displays of feeling. The sentiment of a large portion of the people of Philadelphia was in opposition to the statute, and great interest was manifested in fugitive slave cases. Under the act commissioners appointed by the United States District Courts were vested with the powers of magistrates, and authorized to remand to captivity all fugitive slaves who were brought before them. In Philadelphia, Edward D. Ingraham, a member of the bar, was appointed commissioner under this act. He was a man of strong feeling, prejudice, and determination, and decided in his views not only as to the expediency, but as to the legality of slavery. Other commissioners were appointed, but Ingraham was the first to be appealed to on behalf of slave-owners. The examples of the law commenced unfortunately. The first case brought before Ingraham was that of a colored man claimed to be a slave of a person residing in Delaware. The owner was not present, but was represented by his agents. The alleged fugitive offered testimony to show his identity and prove his right to freedom. All efforts in this way were overruled, and the man was sent to Delaware. Upon his reception there the claimant declared that he was not his slave. He was not the man whom he had intended to be arrested, and the negro was set free. This terrible blunder on the part of the commissioner was the point of many personal attacks afterwards made upon Commissioner Ingraham by the Abolitionists and sympathizers with them. The result did not change his determination, but rendered

him more careful, so that in after-time his judgments were scarcely ever attacked.¹

Louis Kossuth, Governor of Hungary during the attempted revolution of 1848-49, was compelled to fly after the failure of that desperate effort, and took refuge in Turkey. There he was confined with his companion in Widin, Shumla, and in Kutaieh, in Asia Minor. His extradition was demanded of Turkey by Austria and Russia. The measure was opposed by England and France, and at the intervention of the United States and England he was permitted to leave Turkey with his wife and family. The United States government, in accordance with the resolution of the Senate, sent the steam frigate "Mississippi," Capt. Long, to receive him and bring him to the United States. He arrived at New York on the 5th of December, 1851, accompanied by his wife and Mr. and Mrs. Pulzsky. The visit of Kossuth created great interest and enthusiasm throughout the United States. In Philadelphia special preparations were made to receive him with honor. On the 24th of December the Hungarian patriot arrived at the Kensington depot of the Philadelphia and Trenton Railroad. The Councils of the city and the commissioners of the districts had resolved to receive him with every possible honor. The party arrived on the 24th, at three o'clock in the morning, and were taken to lodgings at the United States Hotel. At ten o'clock Kossuth was escorted to Independence Hall, the front of which, in reference to the season, was decorated with evergreens, and with flags of Hungary, Turkey, and the United States. Here in the chamber of Independence the guest was appropriately received by the mayor and City Councils. Placed in a barouche drawn by six horses, and escorted by the City Troop, at Sixth and Arch Streets a body of soldiers was met. The military procession was unusually large, and as an evidence of the great interest which the people throughout the State took in the fortunes of the man, there were more volunteer companies from the interior of the State present than had marched in the streets of the city on a festival occasion since the reception of Gen. Lafayette, more than a quarter-century previously. There were twenty companies from Berks, Schuylkill, and other counties, under command of Gen. William H. Keim and Col. John P. Hobart. Twenty-six companies of the First Division were in line under command of Maj.-Gen. Patterson.

Kossuth reviewed the troops from his carriage. His figure was not conspicuous in size, for he was a man somewhat under the average stature. But his dress, a black velvet coat with a fur collar, fur edges and

sleeves, and low hat with black feather, attracted general attention. His pale countenance, the regularity of his features, the brilliancy of his black eye, and the general expression of melancholy which was settled over all, was a subject of interesting study. In the civic procession were members of Councils and Commissioners of Southwark, Northern Liberties, Kensington, and Spring Garden, in carriages. The Scott Legion of soldiers of the Mexican war marched in their old uniforms. The survivors of the "Dartmoor" prisoners of the war of 1812 turned out the remnant of their rapidly-decreasing number. Several German societies, natives of Switzerland, the Independent Order of Red Men, and the Junior Sons of Temperance swelled the procession. At Independence Hall Charles Gilpin, mayor of the city, greeted the guest in a complimentary speech, to which a suitable reply was made. Afterward Kossuth made a short address to citizens assembled from a platform in Independence Square. The reception was a city gala day. At the corner of Eighth and Chestnut Streets an arch with four spandrels springing from the corners of the streets was decorated with evergreens, the flags of Turkey, Hungary, and the United States flying from the top. This structure had been erected by the volunteer company of State Fencibles, Capt. James Page, the armory of which was in the Union building adjoining. In the evening the Fencibles marched to the United States Hotel, where an elegant gold medal, the gift of private Martin Leans, a member of the Fencibles, was presented to Kossuth by Capt. James Page on behalf of the donor, and received by Kossuth in an interesting speech. On the same evening the corporation of the city of Philadelphia gave a banquet in honor of Kossuth at the United States Hotel. Kossuth made a few remarks in reply to the compliment tendered to him. Speeches of a spirited character were made by Commodore George C. Read, of the United States navy, Maj.-Gen. Robert Patterson, Morton McMichael, Judge John K. Kane, of the United States District Court, Judge William D. Kelley, of the Common Pleas, and John C. Montgomery. The next day, being Christmas, Kossuth was waited upon by a deputation from Harrisburg, and a delegation of the clergy of the city, of which the Rev. John Chambers, of the Independent Presbyterian Church, was spokesman. In the evening, at the upper saloon of the museum, there was a reception by the children of the public schools. Master John S. Painter delivered an address on the part of the boys, and Master A. McNeill on behalf of the girls. A book containing a copy of the Constitution of the United States was presented to the great Hungarian. The citizens of German birth took warm interest in the visit of Kossuth. They arranged a grand torchlight procession and serenade for the evening. The vocal societies and other participants met in Broad Street, near Chestnut, and marched down the latter street to the hotel. Their way was lighted

¹ Among the fugitive slave cases subsequently decided, nearly all by Ingraham, were the following: 1850, December 22d, Adam Gibson; 1851, January 26th, Stephen Bennett; 1851, February 9th, Tamer or Uphemia Williams; 1851, March 9th, case of a colored woman and boy; 1852, George Bordley; 1853, January 23d, Charles Wesley; 1853, July 24th, William Fisher; 1853, July 24th, William Cummins, before Commissioner Heazlitt.

with fourteen hundred torches and many large fire-baskets filled with blazing faggots. There were illuminated paintings, transparencies, banners, and flags. The coopers had with them a large painting representing the assault which had been made a short time before upon the Austrian Gen. Haynau by the brewers in the city of London. A transparency representing the Goddess of Liberty, holding a laurel wreath in her right hand and a broken wreath and shackles in her left, was also displayed. At the custom-house, opposite the United States Hotel, the vocal societies were arranged upon the steps with their flags, banners, and insignia, in picturesque groups. The effect was heightened by the fact that snow was falling fast, covering every building and tree, which, with the lights, gave to the scene a wild and fantastic character. The chorus clubs simply sang the national anthem of the Star-Spangled Banner, the words in German. Kossuth had retired, and was in bed. He was addressed at his bedside in behalf of the members of the procession by Herr Wesendonck, after which Hanjik, one of the Hungarian exiles, addressed the people from an upper window of the hotel. The procession then withdrew in good order and with cheers. On the evening of the 26th of December a banquet was given by subscription by citizens of Philadelphia to Louis Kossuth at the Musical Fund Hall. One table, upon a raised platform, extended across the hall at the south end. There were seated the guest of the evening and other invited guests. Three tables, extending northward in the centre and at the sides of the room, were occupied by the subscribers to the banquet. After the feast was over the Hon. George M. Dallas, as president of the subscribers, addressed the guest and the people present in a classic and well-considered speech. Kossuth responded in a speech which occupied nearly four hours in delivery. It was in the English language, a knowledge of which he had acquired by unassisted study during his captivity in Turkey. In the manner of delivery, fervency of expression, and elegance of language, this was an oration extraordinary by reason of the previous life-studies and exercises of the man. It was historic in character, an able and philosophic examination of European politics, and colored by a surprising and correct familiarity with the leading events of American history, and the sentiments and policy of the American people. What was more remarkable was the correct pronunciation of the English language by the orator, which only occasionally was marked by a peculiarity of accent that did not prevent the words from being understood. The general opinion of all who listened to this address was that Louis Kossuth, mentally, was one of the most extraordinary men of the age. On the same night, in response to the regular toasts, speeches were delivered by Capt. Bayse N. Westcott, of the United States navy, Judge John K. Kane, James Cooper, United States senator for Pennsylvania, Simon Cameron, of Dauphin County, Judge Joseph Allison, of the Common Pleas, Judge

William D. Kelley, Robert Morris, John Cadwalader, and Dr. William Elder. Kossuth and his suite left the city for Washington the next day.

The night of the 26th was cold and stormy. The guests who tarried long at the Kossuth banquet had scarcely left the building before they heard an alarm of fire, the light of which showed that the place was very near the State-House. At the northeast corner of Sixth and Chestnut Streets, extending northward, was a large four-story brick building occupied by stores in the lower portion and by bookbinders, engravers, and other tradesmen in the upper parts. This property belonged to Abram Hart, long a successful bookseller and publisher, and was familiarly known as Hart's building. The flames were first discovered in a drying-room attached to the engraving-office and copper-plate printing establishment of John M. Butler. They broke out about half-past twelve o'clock on the morning of the 27th. The firemen came at the alarm. The thermometer stood at four degrees above zero. Most of the fire-plugs were frozen. To thaw them the firemen, in many instances, set fire to the straw which surrounded the pipes to which the hose was to be attached. In some cases the woodwork of the plugs was destroyed. The delays and difficulties were so serious that Hart's building was soon enveloped in flames. It was totally destroyed. On the west side of Sixth Street the Shakespeare building, an old landmark, was also attacked by the fire and entirely consumed. It extended from Chestnut Street to Carpenter Street. Not a wall was left standing. Immediately adjoining the Shakespeare building was the Chestnut Street Theatre, filled with combustible scenery and in great danger. Luckily the west wall of the Shakespeare building was thick and rose like a battlement above the roof of the theatre. It was a barricade which kept off the fire, and no more injury was done in that direction. Adjoining Hart's building, on Chestnut Street, was the store of Messrs. Johnston, law booksellers and publishers, and next to that Holahan's Eagle Tavern, an old and well-known place of resort for many years. J. W. Moore, bookseller, joined Holahan's. These buildings and their contents were seriously injured, but not entirely destroyed. The roof of the county court-house, immediately opposite, on the south side of Chestnut Street, was on fire. Fortunately the flames were checked, and the public offices in State-House Row and the venerable old State-House building were preserved. A melancholy incident of the Hart's building fire was the death of William W. Haly, a lawyer and member of the City Councils, and police-officer Baker. They were engaged with others in removing goods from a store on the ground floor of a building, and while in that service were overwhelmed by the falling in of the upper walls and the precipitation of bricks, timbers, and machinery into the store. They could not escape, and were burned to death. Several other persons were caught in the wreck, but managed to ex-

tricate themselves. Shortly after the fall of the walls of the Hart building, the east walls of the Shakespeare building fell into Sixth Street. Two colored men, who were active in removing goods that were in danger, were crushed in this disaster. Their names were never ascertained. The pecuniary loss by these fires at Hart's and the Shakespeare building was estimated to be two hundred thousand dollars.

Two days after this great destruction, and while the ruins were yet smoking, people in the neighborhood of Sixth and Chestnut Streets were startled by another alarm. About five o'clock in the afternoon of the 30th of December, a large brown-stone building five stories in height, and situate at the southeast corner of Seventh and Chestnut Streets, commonly known as Barnum's Museum, was discovered to be on fire.¹ Barnum had made the establishment a branch of his museum in New York, and supplemented the display of figures and curiosities with performances in the lecture-room, sometimes plays, songs, music, exhibitions of sleight of hand, ventriloquism, etc. There had been an exhibition in the lecture-room in the afternoon. Fortunately, the audience was not subjected to the danger of an attempt to escape by the only stairway which was connected with the upper stories. The flames were first discovered among the scenery. They spread rapidly through the wings and flies, and were gradually carried downward until the whole building was enveloped and the walls fell in, and the whole structure was involved in ruins. The Clymer mansion, occupied by George Harrison, on the east, was slightly injured. The fronts of the buildings on the opposite side of Chestnut Street were severely scorched. The value of the building was estimated at sixty thousand dollars, and the museum collection and fixtures at fifty thousand dollars. The occupants of the stores beneath had sufficient time to remove the bulk of their valuable property, and, excepting in counters, shelves, and fixtures, they lost but little. A fire at the office of the *Public Ledger*, at the southwest corner of Third and Chestnut Streets, on the 5th of January, originated, it is believed, in a spontaneous combustion of some rags in the press-room. The flames were carried to the upper stories. The fourth and fifth stories were

burned out and the lower portions of the building flooded with water. The proprietors, with indomitable energy, determined that this occurrence should "not stop the press," and the next morning the *Ledger* came out as usual. There was a serious fire at James S. Earle's picture-gallery, on Chestnut Street, in February, which destroyed many valuable paintings and other works of art.

During this year the steamship "Albatross" was finished and run, in connection with the "Osprey," on a line to Charleston, S. C. The steamship "S. S. Lewis" was built by R. F. Loper, and purchased as a pioneer ship to run between Boston and Liverpool. The steamship "Lafayette" was brought from New York in April, and intended to be the first vessel of the new Philadelphia steamship line to Liverpool. She left the city in the next month on her first trip, but it was found that the "City of Glasgow" line was so well established that there was no opportunity for an opposition.²

The Odd-Fellows' Hall, at the southwest corner of Tenth and South Streets, was dedicated, after a parade of the brethren of the order, on the 22d of September. The lower portion was used for business purposes; the upper rooms for the lodges, of which there were several in Southwark and Moyamensing. The corner-stone of the Roman Catholic Orphans' Asylum of St. John was laid April 6th, upon ground adjoining the cemetery afterwards known as the Cathedral Cemetery, which was greatly in use.

In the early part of the year the committee appointed at the town-meeting of 1850 addressed the Legislature, asking for the consolidation of the city and districts in one municipal corporation. They said, "Uninfluenced by either personal or political bias, and prompted by a sense of the public welfare only, this committee, composed of men of all parties, earnestly commend this measure to the favorable action of the Legislature."

John Cadwalader and Eli K. Price repaired to Harrisburg to represent the evils under which the community suffered, and to advocate the passage of a consolidation bill. They were heard with attention and treated with respect, but no legislation on the subject ensued.

Granville John Penn, a great-grandson of the founder of the province of Pennsylvania, arrived in the city in the early part of the year 1852. Many courtesies were paid to him by societies and citizens. The City Councils, January 15th, passed resolutions of congratulation, and appointed a joint special committee to invite him to meet the corporation of the city in the Hall of Independence, "to receive the expression of their gratification and satisfaction on his sojourning in a city whose foundations were projected by William Penn, and amid the successors of

¹ This building had been constructed by the estate of the late William Swaim, proprietor of "Swaim's Panacea," a celebrated patent medicine in its day, upon the site of the fine mansion and grounds originally built by a member of the Wain family, but which had been occupied by Mr. Swaim until the time of his death. The lower stories were arranged for stores. The upper stories were constructed in large apartments for a museum on the second story and a theatre on the third, extending to the height of the fourth story and the roof, which was commonly called the lecture-room. The entrance was by the western store space on Chestnut Street, with hall, ticket-office, and stairways. The place was opened on the 25th of December, 1848, with some curiosities, wax figures, etc., and a regular dramatic company for the lecture-room, by Taber and Silsbee, under the title of the Athenæum. They failed in the establishment, and the lease and property was afterwards bought by P. T. Barnum, of New York, and at the time of the fire was managed by Lysander Spooner.

² The fate of these ships was also unfortunate. The "S. S. Lewis" was wrecked near San Francisco, April 15, 1853, and the "Albatross" in the Gulf of Mexico, two days afterward.

a people whose rights and freedom of conscience the founder in early times upheld, and labored to secure even to the latest posterity.¹

The subject of the ownership of Smith's Island (or Windmill Island) created some attention this year. John Harding, who build the windmill there, secured a lease for ninety-nine years from the proprietaries. The time was about to expire. The property was extremely valuable. Various persons had acquired titles of some sort, and they proposed that the Legislature should validate and confirm them. The city of Philadelphia protested against the passage of that law. It was urged that the interests of the community might be prejudiced by such ownership. Its situation was such, and its importance to the interests of the port was so great, that the public good required that the title to this island should be granted only to the city of Philadelphia and the adjoining districts. The erection of wharves upon it might prove injurious to navigation; besides, it was not improbable that at some future day the interests of the port might require removal of the island altogether. These views were set forth by Councils in resolutions. The Legislature was asked not to pass the law, and the measure was not then perfected.

The death of Henry Clay at Washington on the 29th of June created great sensation throughout the country. No American statesman was better known. He had that magnetic disposition and frank manner which attached thousands of persons to his fortunes with a strong affection. The remains arrived in the city on the 2d of July. They were received at the southwestern depot of the Philadelphia, Wilmington and Baltimore Railroad Company, Broad and Prime Streets, by a large concourse of citizens. The pall-bearers, men of position and social distinction, accompanied the coffin to Independence Hall. The City Troop was the guard of honor. The remains arrived in the evening. The members of the Philadelphia Hose Company surrounded the hearse carrying lighted torches. Forty-six companies of the fire department and a large number of citizens followed. The number of torches used was over three thousand. The coffin was deposited in Independence Hall, under charge of the Light Artillery Corps Washington Grays. In the morning the hall was thrown open, and many persons passed through the apartment, which was heavily draped in black, and viewed the catafalque and arrangements.

¹ During his stay Mr. Penn received many social civilities from the citizens. In return he gave a *fête champêtre* at his own property in Philadelphia,—the mansion and grounds of "Solitude,"—on the west side of the Schuylkill, below Girard Avenue. It was attended by many prominent citizens, and was a successful affair. "Solitude" still stands, and, with the grounds adjoining, is occupied by the Zoological Society in West Fairmount Park. During his stay an amusing incident occurred. The "William Penn Hose Company" opened a correspondence with him and entreated him to undertake the personation of his great ancestor in the usual pageant of that company in the firemen's triennial procession which was about to come off, representing the treaty between William Penn and the Indians. Mr. Penn respectfully declined.

The Washington Grays yielded up their charge to a committee of the City Councils. In the hearse, upon the coffin, was a wreath of japonicas and many flowers. The cortege, of a civic character, accompanied the body to Walnut Street wharf, where Bloodgood's Hotel was hung with mourning and the passage-way to the steamboat heavily draped. In the procession was a committee of senators appointed by the Senate of the United States, delegations from Kentucky, New Jersey, and New York, city authorities, and others. The steamboat "Trenton," prepared for the occasion, was festooned with black from stem to stern, and on the deck a sombre canopy near the stern was the place of reception of the coffin. The flags of the shipping and port were at half-mast. The proceedings were solemn, and reminded many of the great difference between the circumstances attending the final transhipment of the remains and the warm enthusiasm which rendered the reception of the living Henry Clay in 1848 a wild, swelling, and continuous hurrah.

Daniel Webster died at Marshfield, Mass., October 24th. Next to Henry Clay he was admired by large numbers of citizens. The Councils of Philadelphia passed resolutions expressing to the authorities of the city of Boston their sympathy and regret upon the event which had deprived that city of an illustrious son. It was also determined that on the day of the funeral, at Marshfield, October 26th, the bells of the State-House, Christ Church, and St. Peter's Church should be tolled. Citizens were requested to close their stores and places of business. The exterior of Independence Hall and the City Hall were shrouded in mourning. The Independence Chamber was also draped, and the Council Chambers for six months. John Sergeant, a respected citizen who had been prominent in city affairs for many years, and had held important public offices, died November 23d. The Councils of the city, recognizing his activity and energy for the promotion of objects for the public good, passed resolutions of respect for his memory and resolved to attend his funeral. William M. Meredith was requested to prepare a eulogy upon the deceased, which he did. It was pronounced in the presence of a large number of citizens, at Musical Fund Hall, in July, 1853.

In the latter part of this year the western public squares were greatly improved in appearance. The wooden picket-fences which inclosed Penn, Logan, and Rittenhouse Squares were removed and handsome iron railings substituted.

A destructive fire, which broke out March 28th, proved the great value of stocks in mercantile establishments. It commenced Sunday morning, March 28th, in the basement and first story of the store of Lewis & Co., upon Strawberry Street, below Market. It extended through to Bank Street, and was supposed to be a fire-proof building. The doors and shutters were of iron, and resisted attempts by the firemen to

break them open in order to throw in water. The flames ascended to the third and fourth stories of the same building, occupied by Wyeth, Rogers & Co., and extended to an adjoining building, occupied by Stuart & Bros., also "fire-proof," and injured adjoining property, occupied by Gihon & Co., and others. The total loss was calculated at \$755,000: Lewis & Co., \$300,000; Stuart & Bros., \$280,000; Wyeth, Rogers & Co., \$75,000; Gihon & Co., \$100,000. Much of this destruction was caused by water, the articles injured being silks and fine lace goods.

The firemen's triennial parade this year was of unsurpassed splendor. The firemen were rough fellows, but they took great interest in making their hose-carriages and engines beautiful, and there was much rivalry between the companies as to which should present the most handsome appearance. The whole line of the procession glistened with the shine of metals, the glare of bright paintings on the apparatus, and the elegance of the banners of silk and velvet, with richly painted emblems and scenes upon them, with ribbons, flowers, and tinsel of silver and gold. There were two hundred marshals to conduct the parade with discipline and decorum. Five thousand and eighty-nine firemen were in line. The bands were numerous, and embraced together about six hundred musicians. The city could not furnish such a force of harmony, and many bands were brought from the interior of Pennsylvania and from other States. The procession occupied two hours in marching by any one point. The route of the parade was extremely long, extending from the extremity of Kensington to Southwark and Moyamensing, passing through the Northern Liberties, Kensington, and Spring Garden. Eighty-four companies participated. On the Fourth of July an effort was made to celebrate the day more successfully than in the previous year. The first division of volunteers paraded in the morning, and was reviewed by Governor Bigler. In the evening the unlucky ground designated for a display of fireworks in 1851 was again in use, and this time very successfully. There was no accident, the pieces were splendid, and at least one hundred thousand persons (it was estimated by the newspapers) were gratified by the exhibition.

In 1851 Councils had adopted resolutions in favor of the erection of a monument in Independence Square to commemorate the Declaration of Independence. In such a work it was thought the "old thirteen" Continental States only should participate. Delegates from those States were invited to assemble in Philadelphia, and Councils by resolution ceded sufficient ground in the square for the erection of the memorial. On the Fourth of July delegates from all the States designated, except Maryland, North Carolina, and South Carolina, met in Independence Hall. Governor William Bigler, of Pennsylvania, was elected president; Charles F. Adams, of Massachusetts, and A. Hull, of Georgia, vice-presidents;

and L. S. Foster, of Connecticut, and Albert G. Waterman, of Philadelphia, a member of Councils, secretaries. Mr. Waterman was the author of the original resolutions adopted by Councils, and was a warm advocate of the scheme. The convention resolved that the erection of some memorial of the patriotism of the fathers of the republic was necessary and proper, and that a monument ought to be erected. When nine of the original States acceded to the plan and made necessary appropriations, it was resolved that the work should be commenced. Committees were appointed to receive and solicit plans for the monument, and to make all necessary arrangements. They adjourned, hoping soon to be called together in furtherance of the objects of their appointment. Their patriotism was beyond that of the respective States. Some of the States formally indorsed the plan, and made the proper appropriations. Others delayed action. When the war of the Rebellion broke out, in 1861, there had not been an accession to the plan by a sufficient number of States to authorize the commencement of the work. The result of that great struggle was sufficient to prevent the Southern States, which had not taken action, from manifesting any interest in the subject thereafter.

In the beginning of January, Jacob Lehman, a boy, who had been employed in peddling small articles of jewelry, disappeared. Twenty-two days afterward some children, who were sliding upon the ice of the Delaware, below Port Richmond, had their attention attracted by something beneath the ice, which aroused their curiosity. An axe in the hands of a neighboring wood-cutter developed the mystery. The object seen was a bag, which being opened was found to contain a portion of a human body. Two other sacks, one containing a head and trunk, and the other portions of limbs, were afterward discovered in the same neighborhood. These were determined to be the remains of young Lehman, who had undoubtedly been murdered. Facts and theories were at fault, at first, as to the perpetrator. Finally suspicion came down to a belief that three Poles—Matthias Skupinski, Blaise Skupinski, and John Kaiser—might have committed the murder. They lived in Richmond, not far from the place where the remains were found. Upon investigation it was discovered that the boy Lehman, with his jewelry, had been seen going into the house of these foreigners, and could not be traced afterward. The men, about a week after the disappearance of Lehman, gave up the tenancy of the house, sold their furniture to a second-hand dealer, and went away. The empty house was searched, and marks of blood were found upon the cellar-steps, upon stairs leading to upper stories, and in closets. It was supposed that the deed had been committed in the house. A strong circumstantial fact was found in comparing the cord, with which the mouth of the sacks in which the remains were discovered were tied, with some which these

men had sold to the second-hand dealer. Descriptions of the appearance of the three men were published, and general attention was directed to the case by citizens and the police. After a few days, Matthias and Blaise Skupinski were found; they had removed to a distance from Port Richmond, and were residing in Front Street, below Federal, in Southwark. Upon their arrest they were identified by residents of Port Richmond, near their former habitation, as living in the house in which the murder was supposed to have been committed. Upon searching the house in Federal Street some jewelry was found buried in the cellar, and it was discovered that the men had given other articles of jewelry to women residing in the neighborhood for washing and other services. These trinkets were identified by the father of the boy Lehman as having been in his possession on the day he left the house for the last time. Kaiser had escaped, but the Skupinskies were tried and convicted. Matthias, the elder of the brothers, was executed August 6th. Blaise, the younger, was respited, partly in hope that Kaiser might be arrested and partly because of his age, it was supposed that he was forced into the position of an accessory. Both the Skupinskies, after their conviction, made statements or confessions, which contradicted each other. Their object seemed to be to throw the responsibility for the actual deed of murder upon Kaiser. In their account of themselves they admitted having been engaged in murders in other parts of the country. Nothing was shown to establish a belief that Blaise was less guilty than the others, and he was executed on the 3d of September.

In February the steamship "Benjamin Franklin" left Philadelphia as the pioneer of a line to California. The enterprise was not successful.

In the early part of this year meetings were held in the upper part of the city and in the Northern Liberties in favor of the building of a railroad from Philadelphia to Easton, and beyond. It was argued that much of the rich trade of Bucks and Northampton in produce and other articles, and of the trade in Lehigh coal, was for want of railroad connection with Philadelphia diverted to the city of New York. Under this stimulus application was made to the Legislature, which, on the 8th of April, passed an act to incorporate the Philadelphia, Easton and Water-Gap Railroad Company. The road was to begin at a point north of Vine Street in the county of Philadelphia, and thence by the most expedient and practicable route to or near the borough of Easton, or some other point in Northampton County, with right to extend to any point or place in Monroe or Pike Counties, and to connect with the Delaware, Lehigh, Schuylkill and Susquehanna Railroad, and with the Delaware and Cobb's Gap Railroad, and with any connection or part of the Erie Railroad of New York, or any railroad connected with it in Pennsylvania. The capital stock was thirty thousand shares, with

power to increase it to \$2,000,000. Measures were at once taken to obtain subscriptions. The corporations of the city and districts were warmly entreated to subscribe to the stock. They were willing, and the work was commenced with promise of success.¹ In the succeeding year the title of this corporation was changed to the North Pennsylvania Railroad Company.

A new district was added to the many already in existence in Philadelphia County by act of April 14, 1853. It embraced ground north of West Philadelphia, and began on the northern boundary of the latter at Sweet Brier Creek, on the west side of the Schuylkill. Running by the courses of the creek to the point where it crossed the centre of Westminster Avenue, the line was continued along the centre of the latter to the middle of the Haverford plank-road; along the same, northwest, to Fountain road; along the latter, by ground of John Miller and Jacob P. Jones, to a dividing-line between the latter and George Prentice; west to Merion road; north along the road to lands of Lewis Jones and William P. Walters; then to the Virginia road and by other lines not of private property to the Schuylkill River. The title was to be "the commissioners and inhabitants of the District of Belmont." There were to be nine commissioners, to be divided at the first election into classes for one, two, and three years. This district had scarcely got into working order before the consolidation law was passed, which put an end to its powers.

The township of Delaware was created by the Court of Quarter Sessions, about 1851, out of parts of Lower Dublin township. The Legislature validated that proceeding by act of May 3, 1852, which established the township as an election district, and ordered that special elections should be held at the Athenæum in the village of Holmesburg.

A company was incorporated April 20th, under the title of the Manayunk Gas Company, the object of which was to manufacture and sell gas, to be made from bituminous coal or other materials, in the village of Manayunk. Capital, one thousand shares at twenty-five dollars each. The Germantown Gas Company was authorized by special act to lay down gas-pipes throughout the township of Germantown and in and through School-house Lane, in the borough of Roxborough.

By act of April 9th, authority was given to incorporate a company to construct a bridge over the Schuylkill at Penrose Ferry, under title of the Penrose Ferry Bridge Company. The authority was to build a floating bridge, with a draw therein, for passage of vessels at or near where the public road crosses that river. Capital stock, four hundred shares at twenty-five dollars each. The draw was to be at least

¹ The city of Philadelphia subsequently subscribed \$500,000; the district of the Northern Liberties, \$500,000; the district of Spring Garden, \$150,000; and the district of Richmond, \$250,000: total, \$1,400,000.

fifty feet in width. This was the first attempt to build a bridge at the point. It had always been a ferry, crossed by scows and guided or pulled by ropes, whence the old name "The Rope Ferry." The bridge was finished in 1855.

On the 18th of April the Legislature declared "that the square of ground in the rear of the Philadelphia County prison, known as the parade-ground, should be kept open as a public square. The County Commissioners were directed to open streets bounding on the square fifty feet wide, according to the plan of the streets of Moyamensing. There was power also in the County Commissioners to sell some part of the ground and to purchase others adjoining, so as to place the public square within the boundaries of Eleventh and Thirteenth Streets, east and west, and Wharton and Reed Streets, north and south. The purpose of employing the inclosure for a parade-ground was not given up, and it was declared that it should be always available as a public square and a parade-ground.¹

A notable movement toward a change in the character of the public markets took place. The markets in city and district belonging to the respective municipal corporations were all in public streets; for instance, the middle of Market Street, Callowhill Street, Second Street, etc. Objections to their continuance began to be made. It was asserted that the market-houses or sheds were obstructions to the highways; that the interests of business required their removal, and that it would be better for venders of marketing, whether farmers or butchers, that they should be gathered in large and well-ventilated buildings specially constructed for their accommodation. These representations were urged in the name principally of business people. The time seemed ripe for some change in this matter. The first movement was made by authority of act of 2d of May, which incorporated "The Broad Street Market-House Company." The incorporators were John Rice, John H. Diehl, John White, Joseph M. Feltwell, and Thomas Birch, Jr. The capital was one hundred and fifty thousand dollars in shares of five hundred dollars each. The company was given authority "to erect a suitable building or buildings and stalls in the city, to be used as a public market-house," for the sale and vending of meats, vegetables, and all other kinds of victuals and provisions whatever. The company purchased the buildings and lot of ground on the east side of Broad Street, below Race. The structure was known as the West Chester Railroad Depot. The market-house was used in after-years as an armory, and was occupied by the Gray Reserve Regiment; it was solid, and of

appropriate and handsomestyle of architecture. It was one great high room. The stalls were built upon the ground-floor. There was an open space to the arched ceiling above, forty or fifty feet. High windows east and west insured plenty of ventilation, and the place was sweet and clean. The building was opened June 4th with some expectation of success. The difficulty was that the fashion of going for marketing to Market Street was so deeply rooted in popular practice that a new place could not draw away the custom. There had been no diminution in the accommodations in High Street. As long as the market-houses remained there was no hope of making business elsewhere. The property afterward went into the possession of the city, and was known as the City Armory. In 1884 it is to be given up to the battalion of State Fencibles. Besides the Broad Street Market-House the same parties erected the Race Street Market-House, on the south side of Race Street, between Juniper Street and an alley, by which it was separated from the rear end of the Broad Street Market. The Race Street Market was expected to be in use by venders of vegetables and other matters. It also proved to be a failure, and was bought by the city of Philadelphia subsequently, and used during the war of the Rebellion as an arsenal for the storage of cannon and arms belonging to the city.

Franklin Pierce, President of the United States, passing through the city to New York upon the occasion of the opening of the Crystal Palace Exhibition in that city in July, was received with the usual courtesies. Attended by his Secretary of War, Jefferson Davis, his Attorney-General, Gen. Caleb Cushing, and others, he was taken on board the steamboat "John Stevens" at Wilmington, and brought to the city with the customary ceremonies of firing salutes, display of flags, etc. There was a military procession of three brigades, a reception at Independence Hall by the mayor of the city, a dinner given by Councils at the Merchants' Hotel, and other civilities.

New railroad enterprises which sought the means of success in the public treasury came forward in this year. The building of a railroad between the town of Sunbury and the city of Erie, in Pennsylvania, had been frequently advocated as a measure of importance, which would bring to the city the trade of the great lakes. A company for the building of such a railroad was incorporated April 3, 1837. It had been frequently assisted by the passage of other favorable laws between that time and 1853. The arguments in favor of building the road, which could be connected with the State road to Columbia, or with the Pennsylvania Railroad when built, were quite convincing, but the subscriptions were slow. The success of the subscriptions to the Pennsylvania Railroad stock by the city and districts of Philadelphia stimulated a movement to obtain a similar favor for the Sunbury and Erie. The amount of private subscriptions to the latter in 1853, when the city was applied to for assistance, was

¹ A portion of the northwestern wall of the county prison extended into or to a portion of Eleventh Street, and blocked the highway. It would have been inconvenient to have deflected its course. When the public square now called Passyunk Square was laid out, the boundaries extended only between Twelfth and Thirteenth and Wharton and Reed Streets.

one million seven hundred and forty-five thousand dollars. An ordinance directing a subscription on behalf of the corporation was passed in this year, which directed that when an additional subscription of one million dollars was secured by the company the city would subscribe to the amount of one million dollars in addition, with the like subscription when another million dollars had been obtained. Only two weeks afterward Councils passed an ordinance suspending the subscription, and directing the mayor not to make it. The reason given was that the board of directors of the company had broken its pledges to the city. The officers of the railroad company, disappointed by this unexpected circumstance, boldly applied to the County Commissioners for subscriptions to the amount of two million dollars. Those officers assuming that they had power to comply, undertook to do so. City Councils passed resolutions of remonstrance, and appointed a committee to proceed to Harrisburg and present the protest to the members of the Legislature from Philadelphia, composing the county board. The latter had authority to sit in Harrisburg when the Legislature was in session. They refused to sanction the subscription. Months afterward the object was accomplished by the passage of an ordinance by the city authorizing a subscription to the Sunbury and Erie Railroad Company of nine hundred and fifty thousand dollars. The district of Richmond subscribed five hundred thousand dollars.

The Hempfield Railroad Company was more fortunate. That company was chartered for the purpose of building a railroad from Greensburg in Pennsylvania to Wheeling in Virginia. Greensburg was on the route of the Pennsylvania Railroad to Pittsburgh, and it was argued that by this communication the trade of the Ohio would be reached, and railroad connection established with the city of Cincinnati. The city made a subscription of five hundred thousand dollars, and Spring Garden one hundred thousand dollars. The investment was unlucky. The enterprise turned out disastrous, and the whole amount of money paid was lost.

The Northwestern Railroad Company, which was incorporated Feb. 9, 1853, was also an applicant for city and district subscriptions. The city of Philadelphia was induced to subscribe one hundred and fifty thousand dollars. This was an abortive speculation also, and the amount paid was lost. The road was intended to commence at some point on the Alleghany Portage Railroad, at or west of Johnstown, by way of Butler to the Pennsylvania and Ohio State line, at some point on the western boundary of Lawrence County.

On December 8th of this year a measure of reform long needed was resolved upon. In popular language High Street was always called Market Street, Mulberry was known as Arch Street, Sassafras as Race Street, and Cedar as South Street. In deeds and in ordinances they were invariably designated by the

ancient name. After one hundred and seventy years of attempt to bring the legal titles into common use, Councils abandoned the contest and gave to those streets their popular names. West of Broad Street a reform was also effected. The streets running north and south were numbered from the Schuylkill, a method which had always been confusing to strangers. It was resolved to give them new names. Schuylkill Eighth became Fifteenth Street, and the others proceeded in regular order to the river Schuylkill. Schuylkill Seventh was changed to Sixteenth, Schuylkill Sixth to Seventeenth, Schuylkill Fifth to Eighteenth, Schuylkill Fourth to Nineteenth, Schuylkill Third to Twentieth, Schuylkill Second to Twenty-first, Schuylkill Front to Twenty-second, and Ashton Street to Twenty-third Street.

On the 12th of January a startling assassination took place in the most crowded part of the city and almost in the sight of persons on the sidewalk. Joseph Rink, who kept a small toy and variety shop on Chestnut Street below Ninth, was stabbed behind his counter and almost immediately killed. The perpetrator fled. He was pursued by some person who saw his hasty departure, but escaped. A dirk-knife covered with blood was found on the counter, and there was also found an old patched umbrella somewhat broken. The goods in the store were partially disarranged, as if there had been a struggle, but nothing was found which at that time could reveal the mystery.

In less than three months, March 10th, Mrs. Honora Shaw and Mrs. Ellen Lynch, two sisters, were found dead in the house in which they resided, 260 Federal Street, above Seventh. They had been alone in the house that night, the other occupants being absent. The bodies of the women were pierced with many wounds, most of which had evidently been done with a knife. But there were contused wounds, which must have been produced by blows from some blunt weapon. There was no difficulty in believing that this missile was a piece of leaden pipe battered and bent (having blood and hair upon it), which was found in the room. The police authorities took up the theory that the murder was perpetrated by some person who was acquainted with the house, and had probably been a visitor there. Arthur Spring, an Irishman, was said to have been a visitor to one of the women, Mrs. Lynch, and a few days before had learned of her reception of a quantity of money, about one hundred dollars, from her husband, who was a sergeant of the United States marines, and absent from the city. That robbery was the motive was also shown by the fact that a trunk in another room, which had held the money, was broken open apparently by the use of a dirk-knife, a portion of which was found on the floor. The lodgings of Spring, on Market Street near the permanent bridge, was searched. Some of his underclothing was covered with blood, and there was blood on his coat and

pantaloon. The principal witness against Spring was his son, Arthur Spring, Jr., whose testimony showed that the father had come home between ten and eleven o'clock on the night of the murder, and procured water, with which he attempted to wash out stains of blood which were upon his shirt. He was much excited and agitated. He gave to his son seventy dollars in gold. The youth was surprised, and asked whence it was obtained. The father told him the circumstances of the robbery and murder, and that he had set fire to the house in the hope that when the bodies were found it would be supposed that the women were suffocated. The next day he sent the boy down to Federal Street, the scene of the murder, to ascertain what was said among the persons likely to be gathered around in the neighborhood in reference to the deed. Spring was tried March 21st, and his effort was to throw the guilt upon his son. The latter was fortified with testimony to show that he had been in or about the tavern where himself and father boarded all the evening of the murder. This was proved so clearly that there could be no doubt upon the point. The jury rendered a verdict against Arthur Spring, the elder, of murder in the first degree. Scarcely had the finding been recorded before it was discovered that a person had served upon the jury who was not on the regular panel, and this under an assumed name. Charles McQuillen, who had been regularly summoned as a juror, did not care to attend. He handed the summons to Bernard Corr, a neighbor. Corr came to court, answered to the name of McQuillen, and had been impaneled and served on various juries for sixty days previous. The court took the case in hand. McQuillen was sent to prison for sixty days for contempt of court, and Corr was fined thirty dollars, which, under the law, was the greatest punishment that could be inflicted upon him. This trial had been upon a bill charging Spring with the murder of Honora Shaw. Another bill had been found charging him with the murder of Ellen Lynch, and on the 4th of April he was again tried and convicted of that crime. Up to this time and afterward he had insisted that his son was the murderer, but gradually his determination gave way, and he revealed the place in which some of the stolen money was hidden. A strange incident was connected with an investigation before the grand jury, in which it was proved that the old umbrella which was found in the shop of Joseph Rink on the day he was murdered had been the property of Arthur Spring. The fact was proved by a person who had mended the umbrella for Spring, with a curious arrangement of wire, which he identified; it was also shown that Spring had carried the umbrella with him on the day of the Rink murder, and he was identified as the man who had fled from Rink's store just before the murder was discovered by persons who saw him in his flight. The grand jury made a presentment to be

placed on record that Arthur Spring, a convicted felon, under sentence of death for the murder of Ellen Lynch and indicted for the murder of Honora Shaw, was the murderer of Joseph Rink. Subsequently Spring confessed that he had been in Rink's shop and that he was the owner of the umbrella, but he denied that he had anything to do with that murder. He was executed at Moyamensing prison on the 10th of June, 1853.

On Saturday, June 29th, Christopher Soohan, thirty-five years of age, was stabbed and killed at Swanson Street and Swanson Court, near his residence. John Capie and Carson Emmos were convicted of this murder. They had attacked Soohan, who was partially intoxicated, robbed him of a small sum of money, and wounded him so that he died. The trial took place on the 18th of February. The men were sentenced to be hanged, but on account of some doubt in the mind of the Governor they were never executed, and were subsequently pardoned. In 1859 Capie was killed by a man named Robert Thompson, with whom he had got into a quarrel. The latter was tried, convicted in the first degree in 1860, and sentenced to be hanged, but for some reason he never was sent to the gallows.

A meeting was held on the 9th of January in favor of the institution of a paid fire department. The numerous riots and disturbances, the murders and arsons which resulted from the rivalry of firemen, were declared to be sufficient reasons for the abolition of the volunteer system. It had been very useful and respectable in its day, but a large number of the companies were dominated by rough fellows, who were much more ready to fight than to extinguish fires. Good reasons were presented for the measure, but it was too soon. Eighteen years more were necessary to roll by, carrying with them annual record of misdemeanors, before the community was ready to take a step so far in advance of old customs.¹

The firemen generally protested against the measure, and their influence was very powerful.

On the 12th of February Concert Hall, a new building erected partially as a music hall and for balls, lectures, and other entertainments, was opened on Chestnut Street, between Twelfth and Thirteenth, on the north side, on the site of the former Gothic mansion and St. John's Catholic Orphans' Asylum. The lower portions of the building and the third story were occupied by the owner, George W. Watson, a carriage-builder, for purposes of his business. The opening entertainment was a grand concert, in which Madame Sontag and others participated. The exhibition-room was in the second story, and extended nearly from Chestnut Street to Clover

¹ The volunteer fire department was abolished by ordinance passed in 1870. The Board of Commissioners of the fire department met and organized Jan. 3, 1871. They were over two months in arranging the details of the new system, and on March 15th the paid fire department went into operation.

Street, in the rear. There was a stage at the north end, used by musicians, lecturers, and performers, and a small gallery at each end. The seats for the audience were mainly upon the floor. On the sides of the room, near the wall, they were placed on platforms.¹

In the month of November, Councils having passed an ordinance directing the demolition of the market-houses on Market Street, that work was performed between Front Street and Eighth, and in West Market Street, between Schuylkill Eighth and Schuylkill Sixth Streets.

The yellow fever made its appearance in 1853 under peculiar conditions, and its progress was marked by different circumstances than were usual upon the introduction of malignant epidemics. The bark "Mandarin," which had sailed from Cienfuegos, in Cuba, lost two of the crew on the voyage by yellow fever. At the Lazaretto the crew were found to be in good health. The ship was put through the usual processes of ventilation, cleansing, fumigation, and the destruction of the clothing of the deceased sailors. After three days the vessel came up the river and took a berth at South Street wharf. Three days afterward, July 16th, the position was changed to the first pier below Lombard Street, where the cargo was discharged. On the 20th the vessel dropped down to the first pier above Almond Street, and remained there until the 26th, when she was removed for purification by order of the Board of Health. While the bark was above South Street and Lombard Street wharf, no disease seemed to have been developed among the crew or the laborers on board the vessel engaged in removing the cargo. The first case of fever, traceable to the vessel, was that of Joseph Sharp, driver of a furniture-car which generally had its stand at South Street wharf. He was taken with the fever on the 19th of July, and died on the 26th. Capt. Robinson, of the British brig "Effort," which lay in a dock adjoining the "Mandarin" at Walnut Street wharf, died next. His death was followed by others who resided near the dock where the vessel lay or had been in that neighborhood. The great majority of cases which afterward occurred were confined to the district extending from a little north of Mead Alley, Southwark, as far north as Union Street, in the city, and west to Second Street. A few persons died at a distance from the infected section, but careful investigation showed that every one of them before being taken sick had been in the neighborhood of the wharf at which the "Mandarin" lay. One death took place in Lombard Street above Third, another on Tenth Street above South, and another on Christian Street above Eleventh. The epidemic prevailed from July 19th to October 12th, when the last death took place. There were one hundred and seventy cases and one hundred and twenty-eight deaths. The ratio of cases

to population was estimated at one in two thousand seven hundred and seventy-eight, and of deaths one in every three thousand seven hundred and sixty-eight in population. The most curious circumstance connected with this visitation was that the fever was not contagious through any infection that was communicated from any person that was sick.²

Dr. Wilson Jewell made a laborious investigation of the particulars of every case of yellow fever which had occurred, and traced the comings and goings, as far as possible, of all who were stricken with the illness. There was no instance of the fever being communicated to the families or nurses of the sick. Yet every one of the sufferers had been overtaken by a contagious disease.

The Belvidere Delaware Railroad, which, by connection with the Philadelphia and Trenton Railroad, insured a recommunication with Eastern Pennsylvania, was formally opened on the 3d of February, 1854. It extended from Trenton to Phillipsburg, opposite Easton, a distance of fifty-four miles. There was a celebration of the event by the Philadelphia and Trenton Railroad Company. Citizens of Pennsylvania and of New Jersey were carried to Easton in twelve passenger-cars. At that place there were artillery salutes, ringing of bells, and speeches, winding up with a very good dinner, which was followed by more speeches by Rodman M. Price, Governor of New Jersey; Charles Gilpin, mayor of Philadelphia; Judge James M. Porter, of Easton; Judge McCartney, Col. R. P. Thompson, of Salem, N. J.; H. D. Maxwell, of Easton; and John M. Kennedy, of Philadelphia. A fine ball in the evening terminated the rejoicings. The railroad was subsequently extended to the Delaware Water Gap.

On the 5th of May the boilers of the steam tow-boat "Pennsylvania," Capt. Joseph Scull, exploded, when the boat was in the Delaware River, nearly opposite Florence, N. J. There were sixteen empty canal-boats and barges in tow. The forward deck of the boat was occupied by horses of the canal-boat teams and some of the drivers. All persons who were on the boat were either badly scalded or blown overboard. Eight persons were killed and several more badly injured. The "Pennsylvania" was the first city ice-boat, and had become the property of the Philadelphia Steam Tow-Boat and Navigation Company, and was used for towing purposes.

The steamship "Quaker City," intended for the Philadelphia and Charleston line, was launched in May. After a short experience in that service the vessel was withdrawn.

The gallery of portraits of distinguished persons by Charles Wilson Peale and others, which had been for many years a valuable portion of the articles exhibited in connection with his museum, was sold at

¹ This room, after several years' service, was abandoned for that purpose June 10, 1879, and the space which had been occupied by the hall was used for business purposes.

² "Yellow or Malignant Billious Fever in the Vicinity of South Street Wharf, Philadelphia, in 1853," by Wilson Jewell, M.D., president of the Board of Health.

auction, and brought \$11,672.06. The city of Philadelphia purchased the rarest of these pictures to be placed in Independence Hall.

An enterprise, which was almost entirely of Philadelphia origin, and which was controlled by Philadelphia capital, became sufficiently perfected for a useful purpose on the 1st of July. This was the Camden and Atlantic Railroad, a work authorized by charter received from the State of New Jersey. It was intended to open a new communication with the sea-coast, not so much for purposes of navigation and commerce as for the establishment of a watering-place, with hope of employment for freight purposes in the transportation of oysters, fish, and game from the bays and sounds on the east coast of New Jersey. From Camden the route of the railroad was southwest to the town of Absecon, in New Jersey, and thence to a narrow island, separated from the meadows and mainland by sounds and estuaries, which was called Absecon Beach. There were two houses upon it at the time when the bold project was resolved upon of establishing there upon the drifting sand a city. One of these buildings was a small inn or hotel, and the other the habitation of fishermen. The Camden and Atlantic Railroad was opened on the 1st of July by an excursion, in which six hundred persons participated. The United States Hotel at Atlantic City was partly finished, and the celebration took place there.¹ The experiment seemed hopeless. It was like building a railroad to nowhere. Yet the projectors persevered. They had connected their stock railroad interests with real estate purchases of the lands on the beach. These became valuable. The city, which was commenced in faith, was built by works, and in the course of a quarter of a century it became one of the most popular seashore towns in New Jersey.

By act of April 28th, it was ordered that a house of correction and employment for the city of Philadelphia should be established, with twelve managers, to be appointed in equal numbers by the judges of the Quarter Sessions, the judges of the District Court, and the mayor and aldermen of the city. The title of the corporation was "The Philadelphia House of Correction and Employment." The managers had authority to prepare plans and estimates for the proper buildings, to be erected on the farm-lands of the almshouse at Blockley or in any other situation that they might select, the ground not to exceed fifty acres in extent, and the expense not to be more than one hundred thousand dollars. All this was to be subject in

some degree to the control of Councils, which was to furnish the money. The project was not carried out. The managers and Councils disagreed in regard to the manner, and finally the plan was by neglect quietly allowed to die without effort in its behalf.

The Farmers', Drovers', and Butchers' Drove-yard Company was incorporated by act of April 7th. Corporators were Henry Imhoff, Jacob Frantz, Peter Brough, William T. Feilis, Charles P. Bower, Frederick Feithner, Henry K. Harnish, Peter Fisher, Edward Wartman, Ferdinand Geissler, Jacob Lentz, Henry Root, and Michael D. Wartman. They had authority to "provide a place for the sale and safe-keeping of cattle, sheep, swine, and other live stock." Capital, fifty thousand dollars; shares, fifty dollars each. This company purchased the grounds, afterward called the Western Drove-yards, on Belmont Avenue, extending nearly from the Lancaster road to the Pennsylvania Railroad. It was in use for such purposes for many years.

The Sixpenny Saving Fund of Philadelphia was incorporated by act of May 5th, with a large number of corporators. The object was to receive and take care of deposits by mariners, tradesmen, clerks, mechanics, laborers, minors, servants, and others. There was no restriction as to the amount that might be received. The title was presumed to convey an intimation that much smaller deposits would be accepted than were taken by the other saving funds. This society was established for some years at the southwest corner of Fifth and Walnut Streets, but finally wound up its affairs, paid its depositors, and went out of business.

The Mount Moriah Cemetery Company was organized in this year as a private association. The parties who established it bought ground about three miles from Market Street bridge, on the bounds of Delaware County, upon the Darby plank-road. They laid out the inclosure in a proper manner, and had the stock in market in the month of June. Shares, price fifty dollars, payable in installments of five dollars per month, entitled the holder to four hundred square feet of ground. The officers were: President, Robert P. King; Managers, Hon. William D. Kelley, Dr. William Calvert, Edward Wiler, George H. Hart, Francis Blackburne, James F. Johnston, John McCarthy, and Thomas Hope Palmer; Treasurer, William Harbeson; Secretary, George Connell. The office was at No. 108 Walnut Street. The company was incorporated in a succeeding year.

There was trouble in this year in regard to propositions to put the police-force in uniform. The marshal's police was strongly opposed to this innovation. The silver star was not for them. They "did not want to be put in a livery." In the latter part of the year Mayor Conrad made a cautious movement for the establishment of a uniform for the police by commencing at the head, hoping to work down. His decree was that every policeman should wear upon

¹ The officers of the meeting of excursionists, at which speeches were made, were: President, Hon. Robert C. Grier, associate justice of the Supreme Court of the United States; Vice-Presidents, Thomas Fleming, Abraham Browning, Henry C. Carey, Thomas P. Carpenter, Robert Morris, A. H. Simmons, J. P. Ten Eyck, John C. Montgomery, Edward Haines, John M. Odenheimer; Secretaries, James S. Wallace, William H. Crump, Col. Wynkoop, Thompson Westcott, John Davis Watson, Caspar Souder, Jr., J. England.

his round hat a cover for the top, extending below it a distance of about two inches. It was to be composed of patent leather, and, having a shining surface, the policeman could be readily recognized.

A new place of amusement was opened on the north side of Callowhill Street, between Fourth and Fifth. The building and ground of the Second Universalist Church were purchased for the purpose. The interior was torn out, the arrangements entirely changed, and on September 11th the place was opened as the City Museum, under the management of Ashton & Co. The first floor was appropriated for the display of curiosities in natural history and natural science, pictures, portraits, and other representations. The second floor was fitted up for dramatic performances. The stage was fifty-six feet deep and thirty-three feet wide at the north end of the building. The audience were accommodated in a parquet and one tier of boxes. The former was large, seventy feet in depth and fifty-seven feet wide. Altogether this was quite a handsome establishment; the theatre was neat and attractive.¹

On the 4th of December a new place of entertainment was opened at the southeast corner of Eleventh and Marble Streets, below Market. A building which had been for years occupied by the First Reformed Presbyterian Church at the corner of Eleventh and Marble Streets was sold, and altered for the purposes of a music hall, and opened December 4th as the Lyceum, by H. S. Cartee. It has been employed for such purposes ever since, and has been a popular and successful establishment.²

On the 15th of December the upper portion of the armory of the military company of National Guards, Chestnut Street, between Fifth and Sixth, was burned. The loss was three thousand dollars.

The movement in favor of the consolidation of the city and districts had increased during the intervening years from the time it was first agitated. One meeting at least in favor of consolidation took place every year. The question worked itself into local politics in a manner quite unpleasant to the feelings of partisans, whose great object was to be put in power, with authority to do as they pleased and dominate the measures which they advocated for their

own purposes, under the pretense that they were expressions of the popular will. The friends of consolidation having discovered in the early part of their campaign that many, if not all, the members of the Philadelphia delegation in the General Assembly were secretly, if not openly, opposed to the measure, resolved to take the best means of convincing them what the popular opinion was by edicts registered at the polls. A system of interrogation of candidates for the Legislature was resorted to. The persons nominated by the old parties generally made favorable responses, but when they got into their seats at Harrisburg they paid no attention to the matter. This had been a subject of observation at the session of 1853, and of indignation also. Measures were taken to make neglect on the manifestation of treachery to be more difficult thereafter. At the election in 1853 a better system in regard to nominations was established. Thorough and known friends of consolidation were nominated to the Legislature and some of them elected, so that there could be less fraud exercised than in former years.

Before the meeting of the General Assembly the committee on consolidation appointed by the town-meeting drafted a bill to be laid before the Legislature, fixing the details of the measure. The bill provided that the city of Philadelphia, as limited by the charter of 1789, should be enlarged by taking in all the territory comprised within the county of Philadelphia. The incorporated districts were abolished. Southwark, Northern Liberties, Kensington, Spring Garden, Moyamensing, Penn, Richmond, West Philadelphia, and Belmont ceased to have corporate existence. The boroughs of Frankford, Germantown, Manayunk, White Hall, Bridesburg, and Aramingo were deprived of their franchises. The townships of Passyunk, Blockley, Kingessing, Roxborough, Germantown, Bristol, Oxford, Lower Dublin, Moreland, Northern Liberties (unincorporated), Byberry, Delaware, and Penn were abolished, and all the franchises and property of those governments transferred to the city of Philadelphia. In order that this extraordinary change should be complete, it was directed that the board of police, the mayor and Councils of the city then in existence, the commissioners and officers of the districts, and the burgesses of the boroughs should be superseded when the act went into effect. Some of the executive officers were continued for their terms and some of them for longer periods. The treasurer of the city was continued beyond his term some time, in order to give opportunity for arranging financial affairs. The marshal of police was continued in separate and independent jurisdiction.³ Other provisions were adopted for temporary purposes, which,

¹ The City Museum Theatre was opened with an inaugural address by James Rees and Shakespeare's comedy "As You Like It," and the farce, "Sketches in India." John E. McDonough was manager of the theatrical department; John Robinson acting and general manager. The drop-curtain, representing a view of Fairmount, was inclosed within a frame, on which were painted portraits of American actors and actresses by Peter Grain. The professor of natural sciences having charge of the museum was Dr. Montroville W. Dickeson. This enterprise was moderately successful during the first season, but did not obtain a profitable popularity. The house was burned Nov. 25, 1868, having, in the mean while, gone through many changes of fortune. It was reconstructed afterward, and opened afterward for German performances under the title of the Concordia Theatre.

² This house was afterward known as Sanford's Opera House (manager, S. S. Sanford), and as the Eleventh Street Opera House, Carnocross and Dixey managers, and for some years has been managed under the sole control of J. L. Carnocross.

³ The term of Marshal John K. Murphy expired in 1857. Before that time it was agreed by many that, as the mayor was to be at the head of police, another head, in the person of the marshal, was unnecessary. It was therefore enacted that the office of marshal of police should be abolished after the expiration of the term of the present incumbent.

when their action had ceased, did not interfere with the perfect system. The new government was directed to be composed of a mayor, a marshal of police, city treasurer, a city controller (a new office), a receiver of taxes (another new office), and three city commissioners, who took the place of county commissioners, to be elected for specified terms, the Select and Common Council.

The enlarged territory thrown into the city, much of which had never been under any government other than township officers and county commissioners, was divided into twenty-four wards, twenty-three of which lay east of the Schuylkill. Beginning at League Island, the enumeration of the wards ran northward in tiers. The First Ward extended from the Delaware to the Schuylkill south of Wharton Street, Passyunk road, Little Washington Street, and below South Street, west of Broad. The Second, Third, Fourth, Fifth, and Sixth Wards lay adjoining the First Ward on the Delaware front as far north as Vine Street. The Seventh, Eighth, Ninth, and Tenth Wards were on the east side of the Schuylkill. The Eleventh and Twelfth Wards (old Northern Liberties) extended as far north as Poplar Street. The Thirteenth, Fourteenth, and Fifteenth took in nearly the whole of Spring Garden. The Sixteenth, Seventeenth, Eighteenth, and Nineteenth Wards were originally portions of Kensington and Richmond. The Twentieth Ward took up the district of North Penn and ground belonging to the unincorporated Northern Liberties. The Twenty-first Ward was above the Twentieth, on the east side of the Schuylkill, and included the township of Roxborough and the borough of Manayunk. The Twenty-second Ward included the borough and township of Germantown and the township of Bristol. All the rest of the county east of the Schuylkill was the Twenty-third Ward, including Frankford, Holmesburg, Bridesburg, Aramingo, Byberry, Moreland, and Lower Dublin townships. The Twenty-fourth Ward was composed of Blockley and Kingsessing.

Each ward was to elect to Common Council three members, except the Seventeenth and Twenty-third, each of which might elect four. The Select Council was to be composed of one member for each ward. After the year 1855 it was directed that elections to Common Council should be in the ratio of one member for every twelve hundred taxable inhabitants, and one for any fraction over six hundred. The Select councilmen were to serve for two years, and the Common councilmen for one year. The provisions of laws in force in reference to the offices of sheriff, coroner, recorder of deeds, register of wills, clerks and prothonotaries of the courts, remained unchanged. The duty of electing officers of various departments in much larger number than had ever been done before was also authorized. The citizens of each ward were to elect for the ward one member of the Board of Health, increasing the numbers of those officers to twenty-

four for the whole city. Twelve directors of the public schools to serve for one, two, and three years were ordered to be chosen by all the wards except the Twenty-first, Twenty-second, and Twenty-third, for which some special provisions were made. Each ward also selected two aldermen, two constables, and two assessors. The mayor was to be elected for two years, and to have the full power in the suppression of riots or disturbances that the sheriff had under any law or statute. The mayor had authority to sign or to veto ordinances passed by Councils. If objected to, an ordinance might be passed notwithstanding his veto by a vote of two-thirds. This important law was introduced at Harrisburg early in the session, and pressed with so much vigor that it was passed on the 2d of February, 1854.

The probability, which amounted almost to a certainty, that the bill would be got through the Legislature had a tendency in the districts to encourage a wild saturnalia of running in debt. It was probable that in a short time each district would cease to have existence. There were many schemes which were selfishly urged with the object of "making improvements" and pushing properties on the various districts which the consolidated city would have to pay for. The district of Southwark led off in the dance in January by purchasing on credit the Miller lot in Southwark, extending from Third to Fourth and from Washington to Federal Street, which was afterward called Jefferson Square. The Councils of the city held a special meeting on the 30th of January, the consolidation law being very nearly certain, at which money was voted for the purchase of six lots of ground for building market-houses thereon.¹

¹ They were situate as follows: Broad below Race Street, and Race east of Broad Street; northwest corner Race and Crown Streets; between Spruce and Pine and Twentieth and Twenty-first Streets; east side Sixteenth between Filbert and Jones Streets (afterwards the arsenal lot); northwest corner of Locust and Juniper Streets; west side of Sixth between Barclay Street and Middle Alley. Only two of these properties (at Broad and Race Streets) was ever put to the proposed use. They remained for many years idle, most of them producing no revenue. The following is a summary of the extra expenditures authorized by the districts with the full expectation that the new city would have to pay the piper. Within thirty days between the assembling of the Legislature and the passage of the consolidation act nearly four millions and a half of dollars were added to the city debt for objects which were not of pressing necessity, and which would not have been considered or favored if the public affairs had been expected to stand on the old foundation. The following comprises a list of some, but not all of them:

CITY.	Sunbury and Erie Railroad subscription.....	\$2,000,000
	Six lots for market-houses.....	650,000
	Estimated expense for building the same.....	250,000
SOUTHWARK.	The Miller lot, Fourth and Washington Streets, for a public square.....	85,000
	Grading and preparing the same, estimated.....	15,000
	Culvert in Reed Street.....	60,000
NORTHERN LIBERTIES.	Subscription to the North Penn. Railroad Company.....	500,000
KENSINGTON.	For paving and culverts, estimated.....	150,000
RICHMOND.	Subscription to the Sunbury and Erie Railroad Company.....	500,000
	For building seven bridges, estimated.....	63,500
GERMANTOWN.	For a lot and town hall.....	100,000
	Paving.....	7,000
FRANKFORD.	Paving.....	7,000
	Purchase of the Shallcross property.....	7,000
WEST PHILADELPHIA.	Paving.....	13,000
	Loan for improvements.....	40,000
Total.....		\$4,447,000

The passage of the bill was the cause of great rejoicing. The committee which had prepared it was of opinion that some celebration of the important event would be proper. Very complete arrangements were made. The Governor and Legislature and the chief officers of State were invited to visit the city of Philadelphia, to participate in the ceremonies. The Board of Trade had made arrangements for a steamboat excursion on the river Delaware, to show the officers and representatives of the commonwealth the extent of the city front on that stream. The steamboat "Robert F. Stockton," on the 11th of March, carried them down the river to Bow Creek, and returning, passed up the stream to Poquessing Creek, the northern boundary of the city. There were salutes, a banquet in the cabin, and speeches by Samuel V. Merrick, of the Board of Trade, Morton McMichael, Col. William C. Patterson, Thomas B. Florence, Governor William Bigler, Cook, of Westmoreland, E. B. Chase, Speaker of the House of Representatives, Roberts, of Fayette, Monaghan, of Chester, and Judge James Burnside, of the Supreme Court. The party landed at the navy-yard, inspected the new dry-dock and other works, and was finally landed at Walnut Street wharf. In the evening the Consolidation Ball took place at the Museum building, occupying both saloons. They were elegantly decorated with flags, evergreens, flowers, an extra profusion of gas-fixtures, and other effects. The supper took place in the lower saloon. The decorations of the table were more profuse than had ever been seen on a like occasion in the city. The number of persons who participated was estimated to be from three thousand to four thousand. On the next day, March 12th, the city of Philadelphia gave a banquet to the guests at Sansom Street Hall. Morton McMichael was president, and the Governor, United States and State senators, members of Congress, members of the State Legislature, judges of the Supreme Court, and others were guests.

Under the directions of the act of Assembly the first election for mayor, members of Councils, and other officers was to take place on the first Tuesday of June, 1854. Politics at this time were in a mixed condition. The Whig party was essentially dead, but shrewd people were operating with the skeleton of the defunct. Apparently there were only two nominees for the office of mayor,—Robert T. Conrad, Whig, and Richard Vaux, Democrat. Before the election there were rumors that a new force unknown in politics was about to come in action. A

Beside these appropriations efforts were made to obtain others. In Penn District there was an attempt to get an appropriation of three hundred and twenty-six thousand dollars for the purchase of the Gratz estate, in the neighborhood of Master, Jefferson, and Oxford Streets, west of Broad, for the purposes of a public park. In West Philadelphia it was proposed to buy the Powelton estate, between Market Street and Bridge [Spring Garden] Street, for seventy-five thousand dollars, the ground to be appropriated for a public park. But the popular indignation had been so aroused by the other appropriations that these plans were not successful.

mysterious association secret in character, which bore among its members some high-sounding title, was nicknamed by persons who did not belong to it "the Know-Nothing organization," or "the Know-Nothing party."¹ Conrad had the support of the "Know-Nothings," and when the ballots came to be counted it was found that he had 29,507 votes, and Richard Vaux 21,011. Conrad was sworn into office on the first Monday of July, and the city of Philadelphia with enlarged boundaries had fairly entered upon the experiment of a new government. City Councils organized on the same day. There were twenty-four members of Select Council, and they elected John P. Verree, of the Eighteenth Ward, president, Edmund Wilcox clerk, and Joseph Wood, Jr., assistant clerk. The Common Council was composed of seventy-four members. John H. Diehl was elected president, and John M. Riley clerk, and C. W. Steele and John Q. Adams assistants. One of the first duties of Councils was to ascertain how the city stood financially.²

Something was received from the various districts. The departments of the city and districts handed over

¹ The name Know-Nothing was applied to this organization because the members were ordered to reply to any question in regard to the party or its purposes, "I don't know." In the same way Sam was a nickname for the same party, which was applied frequently to persons suspected of being members, of whom it was said they had "seen Sam."

² The full amount of the city debt was found to be by report of a committee in the latter part of the year to be \$17,108,343.79, as follows:

	Funded Debt of the City and Districts.	Railroad Subscrip- tions.	Total.
Late City of Philadelphia....	\$2,441,300.00	\$8,100,000.00	\$8,541,000.00
County of Philadelphia.....	1,815,177.93		1,815,177.93
Southwark.....	492,200.00		492,200.00
Moyamensing.....	113,862.15		113,862.15
Northern Liberties.....	341,000.00	1,000,000.00	1,341,000.00
Kensington.....	726,563.22		726,563.22
Richmond.....	304,839.40	500,000.00	804,839.40
Penn District.....	271,902.92		271,902.92
Frankford.....	61,612.33		61,612.33
Belmont.....	26,000.00		26,000.00
West Philadelphia.....	376,110.80		376,110.80
Bridesburg.....	2,500.00		2,500.00
Spring Garden.....	1,097,371.00	750,000.00	1,847,371.00
Germantown.....	43,000.00		43,000.00
Blockley.....	2,000.00		2,000.00
Guardians of the Poor..	642,904.04		642,904.04
Total.....	\$8,758,343.79	\$8,350,000.00	\$17,108,343.79

A heavy portion of this was for railroad subscriptions, as follows: Pennsylvania Railroad, \$5,000,000; North Pennsylvania Railroad, \$1,400,000; Hempfield Railroad, \$600,000; Sunbury and Erie Railroad, \$1,200,000; Northwestern Railroad, \$150,000; Schuylkill River Railroad, \$5000. Of these the Hempfield Railroad and Northwestern Railroad proved to be utter failures, and the whole subscription was lost. The Sunbury and Erie Railroad, although in better condition, and put into operation, has not, up to 1884, paid a dividend. The city also came into possession of the following stocks: West Philadelphia Canal stock and loan, amount \$10,000; Philadelphia Tow-Boat Company, \$7500; Schuylkill Permanent Bridge Company, balance, \$1536; Blockley and Merion Plank-road Company stock, amount \$10,000; Belmont Avenue Plank-road Company, \$10,000; Branchtown and Germantown Road, \$100; Moyamensing Gas Company, 500 shares, worthless; Arbon Land Company, 240 shares, worthless; Haverford Plank-road Company, 80 shares; Philadelphia and West Chester Turnpike Company, 80 shares; Delaware County Turnpike-road Company, 80 shares.

in the course of 1855, \$666,819.19.¹ The treasurers of the city and districts and county officers turned in \$422,399.49.² The city also came into possession of a large amount of real estate. Beside the State-House, court-houses, and public offices, and the tobacco warehouse, dwellings and stores, there were nine commissioners' halls and town halls, lock-ups, station-houses, almshouse and township poor-houses, county prison, several farms and properties used for township and district school-houses, the Lazaretto station and grounds, the city hospital, forty-nine sections of market-houses, the two market-houses at

	\$422,399.49

Broad and Race Streets, purchased in the early part of 1854, twelve public landings in the city, five in Northern Liberties, six in Kensington, eight in Southwark, three in Richmond, and fifteen public landings belonging to the city on the Schuylkill, Girard College, city gas-works, water-works of the city, Spring Garden, and Kensington, bridges over the Schuylkill River, the high school at the corner of Broad and Green Streets, the normal school in Sergeant Street below Tenth, and one hundred and fifty-seven school-houses and lots, ten public squares, a church building on Crown Street above Race, purchased for a market but never used, and a considerable number of lots of ground, stores, dwelling-houses, etc., the value of which could not conveniently be estimated.

The debts due to the city and districts other than taxes, etc., at the time of consolidation were one hundred and fifty-six thousand five hundred and sixty dollars.³

Beside the mayor the following officers were chosen at the spring election of 1854: City Solicitor, Isaac Hazlehurst; City Controller, John N. Henderson; Receiver of Taxes, John M. Coleman; City Treasurer, John Lindsay, remained in office by act of Assembly. The new departments were organized as follows: Water Department, Chief Engineer, Frederick Graff; Department of Highways, Chief Commissioner, Thomas Birch; City Property, Commissioner, John Diehl; Girard Trust, Treasurer, Charles S. Smith; City Surveyors and Regulators, Principal, Spencer Bonsall; Inspectors of the Philadelphia County Prison, President, E. Y. Farquhar; Board of Health, President, Wilson Jewell, M.D.; Guardians of the Poor, President, Frederick M. Adams; Directors of Girard College, President, Samuel H. Perkins; Girard Trust, Treasurer, Charles S. Smith; Master Warden of the Port, Jared Ketcham; Harbor Master, William Rice; Controllers of the Public Schools, President, Thomas G. Hollingsworth. At this time the county officers were: Sheriff, Samuel Allen; Coroner, Joseph Delavau.

CHAPTER XXV.

FROM THE YEAR OF CONSOLIDATION, 1854, TO THE BEGINNING OF THE CIVIL WAR.

THE winter of 1854-55 was one of more than ordinary severity. In addition to the rigor of the season the scarcity of employment among the poor tended

³ They were as follows:

Moyamensing.....	\$14,950	Kensington.....	\$11,583
Southwark.....	3,530	Penn District.....	6,303
Old City.....	100	Board of Health.....	778
West Philadelphia.....	62,200	City of Philadelphia.....	33,285
Spring Garden.....	6,780		
Richmond.....	16,780	Total.....	\$156,560

These were put in suit by the city solicitor. He estimated in 1855 that fifty per cent. would be recovered.

very much to the spread of suffering and destitution. Early in the year 1855 Mayor Conrad presided at a general meeting called for the purpose of relieving the distresses of the poorer classes. A proposition was also made in Councils to set aside an appropriation for them. The soup-houses and the various charitable organizations contributed not a little toward tiding over the misery of the winter. It was at this time that the thought occurred to many of the friends of public benevolence that their object would be much better promoted if all the societies which were devoted to charity could be consolidated into one general organization. In the spring Matthew Newkirk presided over a convention which was intended to further this design of a union, but the delegates could not agree upon a plan. There were too many interests to be overcome. Even charity may be selfish, and prefer to direct its own benevolence.

The lively interest with which the movements of the famous singers in Italian opera—Mario and Grisi—were regarded throughout the United States at this time was felt in Philadelphia at the beginning of the year among the fashionable circles of society. They appeared in several popular operas at the Walnut Street Theatre, the best seats in the house being sold for three dollars apiece. The fact that the city did not at this time possess a regular operatic stage on which it could welcome these world-renowned artists, went a long way toward suggesting the idea of an Academy of Music, which was afterward realized during this period, to be regarded with favor.

With the opening of the year preparations were made by the North Pennsylvania Railway Company to establish a line of passenger cars drawn by horses. On the 3d of January the company put them in operation on a route about a mile and a half in length, extending from Willow Street along Front to Germantown road, thence to Second Street, to Cadwalader, to Washington Avenue, to Cherry Street, and connecting at what was known as the "Cohocksink depot." The experiment seems to have given great satisfaction to those who were anxious to see the lumbering omnibus superseded by a new mode of local traveling, and the North Pennsylvania Company is credited, in a contemporary account of the innovation, with the honor of "being the first to introduce the light, convenient, and useful city passenger cars." These vehicles were fourteen feet long, seven feet wide, and six feet four inches in height, and were built to seat twenty-four persons.

The good-natured patriotism with which the project of a Washington monument at the national capital has always been regarded by the people of this city, was exemplified toward the close of January, when several marble blocks, prepared under the direction of Maj. Peter Fritz, were forwarded to Washington. Two of these stones were presented by the firemen of Philadelphia. On one of them was a representation of the Fairmount Water-Works, together

with figures of a horse-carriage, an engine, and a hook and a ladder; on another were the names of the companies that had contributed thirty dollars apiece to the monument fund. Another block, for which the actors and actresses had raised a subscription, was presented in the name of the "ladies and gentlemen of the dramatic profession in America."

The war which England and France were waging against Russia in the Crimea was watched with the deepest interest in Philadelphia. During the winter the suspicion became noised about that the agents of the English government were busy in shipping off from our ports recruits who had been enlisted in this country for the queen's armies. Citizens of Irish extraction were particularly anxious to ascertain whether there was any truth in these reports. Finally, however, sufficient information was collected to justify United States Marshal Wynkoop in boarding the steamer "Sanford" as it was proceeding down the Delaware on its way to New York. Thirteen men were captured on the 28th of March, and the alleged recruiting-officers were detained in custody. It was asserted that they had already forwarded sixty enlisted men, but their business seems to have been pretty effectually broken up by this movement of the Federal authorities.

On the last night of January what came near being a very serious calamity happened in Moyamensing prison. A great flow of coal-gas escaped from a defective heating apparatus, and found its way into many of the cells. When the officers of the institution became apprised of the trouble they discovered thirty of the prisoners in a state of unconsciousness. With the exception of one inmate, who was too much overcome to be restored, they were all resuscitated.

The spring political campaign this year was, as the conservative *Ledger* described it, a "queer affair." The Whig party was rapidly falling to pieces. Know-Nothingism had not yet spent its force. There was a general restlessness among both the politicians and the people. Thus, in some parts of the city, five or six different tickets were in the field. These were variously known under such cognomens as "Know-Nothing," "Anti-Know-Nothing," "Regular Whig," "Clay Whig," "Whigs and Americans," "People's Reformers," and "Citizens' Reformers." The subject of Know-Nothingism seems to have chiefly occupied the thoughts of the political leaders, the Whigs suffering from serious divisions in consequence of the attempt made to ally them with the fortunes of the Native Americans. At the election which was held on the 1st of May only two officers were voted for,—city treasurer and city commissioner,—both of which offices were captured by the Native Americans by small majorities.

The Mexican war was still fresh in the memory of the people, and the anniversary of the battle of Cerro Gordo, on the 18th of April, was not allowed to pass unnoticed. The Scott Legion had caused a hand-

some marble monument to be erected in Glenwood Cemetery, and its dedication was the occasion of a military parade, the gathering of an immense crowd, and an inspiring oration by Dr. Joel B. Sutherland.

During the month of May Governor Bigler met with a hearty reception in a tour which he made among the city's public institutions. At the Boys' Central High School, on Broad Street, the exercises were of a particularly interesting character. It was at this time that a department of phonographic instruction was maintained in that institution, and two of the pupils were detailed to report the Governor's speech. The next day it appeared at length in the daily journals. These young tyros in the reporter's art were James J. Murphy and Joseph N. Wilson, one since distinguished as the official reporter of the United States Senate, and the other afterwards popular among younger Philadelphians as a professor in the high school.

Mayor Conrad, on the 18th of May, sent to Councils his first message under the consolidation act. Written in the excellent style which he impressed upon official documents as well as upon ventures of a more decided literary cast, it was largely devoted to a discussion of the duties and responsibilities of his organization of the new police-force. He was inclined to be well satisfied with his work, although he complains that the nine hundred men who made up his force were insufficient for Philadelphia, with its sixty thousand houses, and especially when compared with New York's force of twelve hundred men with but thirty-seven thousand five hundred houses, occupying half as much area as Philadelphia. It was his habit, unlike some of his successors, to visit the station-houses in person and to call the rolls, in order that he might become familiar with the men by direct personal contact. He took great pride in the standard of qualifications which he required of a man who wished to become a policeman. These were that the officer must be between the ages of twenty-three and fifty; that he must be of "American birth,"—a rule which certainly was not long enforced, and which was doubtless the extreme of Know-Nothing doctrines,—that he must be able to read and write; that his character and habits must be pure; that he must be invariably temperate, steadfastly courageous, and always courteous. Although there was abundant need of the services of a large body of policemen,—for the city at this period was more turbulent than it now is in proportion to the population,—there were not a few complaints that it was too extravagant for the municipality to maintain, and that it could, without doing any harm, be reduced at least one-third in number. The volunteer firemen, who had more or less of an instinctive dislike to a policeman, were generally disposed to adopt this opinion.

Up to this time the old hand-engine was still the principal apparatus in the fire department. It was soon, however, to be replaced by the steam fire-engine.

The contemplated improvement, with which one or two other cities were already familiar, was not introduced without considerable opposition. The firemen themselves were not all disposed to welcome an invention which, in lessening the labor required for the extinguishment of a fire would, perhaps, lead to a reduction of the number of volunteers. Citizens who did not share this semi-professional interest in the introduction of the new engine were ready to recognize its superior merits. Accordingly, on the 12th of February, there was a great crowd assembled at Dock Street wharf to witness the trial of the "Miles Greenwood," an engine which had been built in Cincinnati for the city of Boston, and which had been permitted to remain here a few days for the purposes of experiment. It was claimed for it that it would throw a stream two hundred and forty feet horizontal, and one hundred and thirty feet perpendicular through a one-and-three-quarter-inch nozzle, and although the result of the test did not come fully up to this promise, the apparatus was looked upon generally with admiration and surprise. Another Cincinnati engine, the "Young America," was exhibited on the 1st of June, in front of the Presbyterian Church, on Arch Street above Tenth, and so successful were its operations that Council's Committee on Trusts and Fire Department recommended the introduction of such engines into Philadelphia. Nevertheless, it was nearly three years later, or on the 20th of January, 1858, that the first of these engines was permanently established in the city by a volunteer organization, the Philadelphia Hose Company. Within a year subsequent they had become numerous enough to cease being spoken of as wonders.

The Wagner Free Institute of Science, corner Seventeenth Street and Montgomery Avenue, was opened by Governor Pollock on the 21st of May. On an humbler scale than that of the great institution which Peter Cooper founded in New York, it has done a similarly useful work in this community under the benevolent direction and patronage of William Wagner.

The celebrated campaign which Henry A. Wise, of Virginia, had successfully waged against the Native American party in that State, was the occasion of a great Democratic rejoicing in Independence Square on the 31st of May, at which telegraphic congratulations were exchanged with the Tammany Hall brethren in New York, and at which Col. Thomas B. Florence, William H. Witte, John Robbins, and John Cadwalader were the principal orators. During the following week the Native American party held a national council in this city, the deliberations of which were conducted in secret, and which finally broke up in a vain effort to reconcile differences of opinion between the Northern and the Southern delegates on the subject of slavery. While the council was in session the local leaders of the party invited the delegates and guests to the number of five hundred to a banquet in Sansom Street Hall. Among

the decorations the most conspicuous was a representation of "The Death of Shiffler." Mayor Conrad presided at this festive gathering, and was assisted by Benjamin H. Brewster. The presence of this gentleman at the banquet called out, a few days later, a public correspondence between him on the one side and Lewis C. Cassidy and some other friends of Mr. Brewster on the other. His course was somewhat sharply referred to by them as "a surprise." On the 18th of the same month the Americans held another great rally in Independence Square, and listened to a speech by ex-Governor Neil S. Brown, of Tennessee.

On the 17th of July the steamboat "John Stevens" caught fire at night, near White Hill, and was totally destroyed. Five colored cooks perished in the flames. On the night of the 4th of August the steamer "General McDonald" collided, near Fort Mifflin, with the schooner "Peace," and eight persons were drowned. These disasters were soon afterward supplemented by a calamity which was productive of intense excitement. On the morning of the 29th of August a train, bound for New York on the Camden and Amboy Railroad, had proceeded about a mile above Burlington, when the engineer, catching sight of a train approaching him on the same track, reversed the movement of his engine. The rear car backed into a wagon driven by Dr. Henikin, which was crossing the track, and the train was hurled off the rails by the collision. Twenty-three passengers were killed, and twice as many more were wounded. The victims comprised many merchants and other men of local prominence, among them being the Baron de St. Andre, the French consul at this port, and the Rev. John McConnell, of Delaware. The bitter feeling which this catastrophe awakened against the railroad company did not subside for several weeks. It was largely instrumental in showing the necessity of double tracks on railroads. The directors of the road expressed themselves in favor of having it fenced in, and issued an order that no train should henceforth exceed a speed of thirty miles an hour.

The first section of the North Pennsylvania Railroad, from Philadelphia to Gwynedd, a distance of nineteen miles, was formally opened by an excursion in which business men and councilmen participated on the 2d of July.

Such had been the rapid progress of the railroad system that, on the 16th of July, the announcement was printed in one of the daily papers that "the last mail-stage running from Philadelphia has made its final trip."

Toward the close of the summer of 1855 the newly-formed Republican party began to take root in Philadelphia. There was a meeting on the 21st of August of what was known as the "Democratic League," together with those "in favor of organizing a Republican party." William B. Thomas, who was the principal leader of the movement, offered the resolutions, which denounced slavery in warm terms, and

which called for a meeting on the 30th of the same month to form a Republican association.

The dedication of the Masonic Hall, on Chestnut above Seventh, was an event which was attended with imposing ceremonies on the 27th of September. More than four thousand members of the Masonic order paraded in honor of the occasion, and for several days the new hall was a subject of general talk. Many thousands of people availed themselves of the opportunity, which was accorded them for a few days before the dedication, of visiting the edifice.

At the election on the 9th of October the Democratic party was treated to a genuine surprise in the election of pretty much its entire ticket in Philadelphia. The Native American, the Temperance, and the Abolitionist elements were arrayed against it. The combination was thought to be a strong one, and the Democrats expected defeat. But the alliance which the Americans had made with the temperance men turned out to be more a source of weakness than of strength. The Democratic local ticket, composed of George Magee for sheriff, Charles W. Carrigan for register of wills, and John Sherry for prothonotary of the Orphans' Court, was elected by an average majority of 1500. One of the first effects of this Democratic triumph was seen a short time afterward in a meeting at the Falstaff Hotel, which was called to promote the interests of a Philadelphia Democrat, George M. Dallas, as a candidate for President of the United States.

Connected to some extent with the issues presented at this election was the question of the enforcement of the new Sunday liquor law, which had gone into effect on the 1st of April, much to the dissatisfaction of proprietors of taverns, oyster-houses, and other places of refreshment and entertainment. The result of Mayor Conrad's attempt to enforce this law was an agitation which lasted for some time, and which was accompanied by much bitterness of feeling. Indeed, the feature by which Mayor Conrad's administration is chiefly distinguished is the pertinacity with which he insisted on the observance to the letter of all laws that had for their object the suspension of labor and of entertainment on Sunday. The Sunday newspapers in particular were subjected to not a little opposition at his hands. The liquor interest during the summer of 1855 tried to create an opinion in favor of the repeal of the new law, and in September a prohibitory liquor law convention was held for the opposite purpose of sustaining it. All the candidates whom the friends of this movement favored were beaten at the polls. In November, however, the mayor created much excitement by committing for trial a number of saloon-keepers for violating the Sunday laws, he having directed his officers to enter the saloons and drink liquor in order that they might not lack evidence. These proceedings were upheld at public meetings of clergymen and religious citizens, while, on the other hand, they caused the mayor

to be subjected to much caricature, ridicule, and denunciation.

The French actress, Rachel, who had come over to this country at the height of her fame, played in Corneille's "Les Horaces" at the Walnut Street Theatre, on the 19th of November, to an audience which failed to fill the house at three dollars a head. Exposed to a draught, she is represented to have contracted the sickness here which resulted in her death. At any rate, this was her only appearance in Philadelphia, her three sisters being the attractions on the other nights of the engagement.

At the meeting of the Pennsylvania Anti-Slavery Society, on the 11th of December, in Sansom Street Hall, William Lloyd Garrison, who, with C. C. Burleigh, E. M. Davis, and Lucretia Mott, was among the speakers, denounced Philadelphia for its lukewarmness in the Passmore Williamson case, and said that the result would have been different had the affair taken place in Boston. "A young man," William S. Pierce (afterwards Judge Pierce), replied to Garrison, and defended the Republican party from the agitator's attack upon it. The resolutions of the society were especially emphatic in their denunciation of Judge John K. Kane for his course in the Williamson trouble.

The remembrance of the terrible winter of 1856 is still vivid in the minds of Philadelphians who witnessed its severities. They have a most lively recollection of the experiences which were brought about by the freezing of the Delaware River. Before the middle of January that stream was frozen solid from bank to bank, as far down, at least, as the "Horseshoe Channel." Great multitudes of people by day and night amused themselves in sleighing, skating, promenading, flirting, or trafficking on its icy surface. Numerous booths, bars, and tents were erected by enterprising vendors, and gamblers with their cards and dice, cleared away a space in the snow for their seductive tables. On the 26th of January not less than twenty thousand people were estimated to be participating in the diversions of winter sport. Suddenly, opposite the upper wharves of the city, a horse and sleigh with its occupants were seen to disappear partially in an air-hole. The drowned bodies were recovered, those of the widow of Col. Peter Albright, of the Northern Liberties, and her daughter. This melancholy occurrence did much to check the popularity of the fun on the ice-bound river.

Such was the loss, not to speak of the embarrassment, to which commerce was subjected by this embargo, that on the 7th of February a meeting of business men was held at the Board of Trade rooms, in order to devise means of keeping the river open. Professor Hare was in favor of blowing up the ice with gunpowder. William S. Pierce was inclined to think that the permanent remedy for the evil would be to utilize League Island for the heavy shipping operations of the port, inasmuch as it was situated at a

point where the river was comparatively free from ice, and that by means of railroads it could be brought within fifteen minutes' ride of Broad and Market Streets. Finally, it was agreed to try the gunpowder experiment on the 20th of February. It was tested opposite the Point House Hotel, under the direction of Professors Rogers and Frazer, and was a failure. In the mean time the city ice-boat struggled in vain to keep open a channel for navigation, and it was not until the beginning of March that the ice broke up sufficiently to enable the ships that had been unable to reach the city to make some movement up the stream.

But this blockade was not without a most calamitous sequel. On Saturday night, the 15th of March, the ferry-boat "New Jersey," belonging to the Philadelphia and Camden Steamboat Company, left its slip at Walnut Street wharf for Camden. Capt. Corson headed the boat for the canal directly opposite, but found that he could not enter it on account of the vast masses of ice. He then turned the boat to the north, with the intention of crossing the bar at the upper end of Smith's Island. When the "New Jersey" had reached this point, fire was discovered near her smokestack. The one hundred passengers became frantic with fear as they saw the flames spread with inconceivable rapidity. The captain, again changing his course, did his best to reach Arch Street wharf. When within hardly more than thirty feet of the shore the pilot-house fell in, and the boat became utterly unmanageable in the ice. The flames drove the passengers overboard, and the firemen and citizens who lined the wharves were serviceable in rescuing many of the unfortunates. Thirty dead bodies were found, and there were, perhaps, many more who perished, but who were never afterward seen. It was some time before the public mind recovered from the shock of this disaster. On investigation, it was discovered that the boat was scantily equipped with the appliances which the law required, and that her boilers, the fireplace, and the brick-work surrounding them had been in a defective condition.

Hardly had the sensation which the burning of the "New Jersey" caused subsided than it was partially revived, on the 29th of May, by the explosion of the boiler of the steamer "Union" of the Ericsson Line, near New Castle, and the killing of four men.

The victory at the October election of 1855 had greatly elated the Democrats. The approach of a Presidential election, together with the prospect of wresting the mayoralty from the hands of the Native Americans in the spring election of 1856, imparted to them a strong degree of confidence. The first signs of the waning of Know-Nothing influence were clearly perceptible, while the downcast Whigs were almost in the last stage of disintegration. The Republicans were still a little band of hopeful enthusiasts, who derived a large share of their inspiration from William B. Thomas.

The Americans, however, had the benefit of what stimulus could be gained from a Presidential convention and the presence among them of their national leaders. The opening session of this body, which had been preceded for several days by the meeting of the American National Council, was held on the 22d of February. It was characterized by not a little discord and confusion as to matters of policy. Millard Fillmore, of New York; "Sam" Houston, of Texas; Garret Davis, of Kentucky; Kenneth Raynor, of North Carolina; John Bell, of Tennessee; R. F. Stockton, of New Jersey; Erastus Brooks, of New York; and John M. Clayton, of Delaware, had been named for the Presidential nomination; but Fillmore's friends carried the convention with little difficulty, and to his name joined that of Andrew Jackson Donelson, of Tennessee, for Vice-President. The local members of the American party received the nominations with approval, and on the 12th of March ratified them at Concert Hall, in a meeting which was presided over by John M. Scott, and which was addressed by William D. Baker, Charles Gibbons, Henry M. Fuller, and Henry D. Moore.

The Fillmore and Donelson men had a large variety of candidates for mayor to select from, among them being named E. Joy Morris, John P. Verree, O. P. Cornman, W. B. Mann, John Welsh, William Welsh, Isaac Hazlehurst, Charles D. Freeman, George F. Gordon, James C. Hand, Henry D. Moore, and Peter Fritz. Mr. Hand, who was first nominated, declined, and made way for Henry D. Moore. With him were associated on the ticket F. Carroll Brewster, for city solicitor, and S. Snyder Leidy, for city controller. The Whig convention named John Thompson for mayor, William S. Price for city solicitor, and Benjamin Huckel for controller, but not without the opposition of those old-line Whigs who were drifting over to the Democratic party. It was on this occasion that Josiah Randall declared that "if the contest shall be between the Know-Nothings and the Democrats, I will vote with the Democrats," and William B. Reed, the coolest and ablest of the Whig leaders, also gave out intimations to the same effect. Not long afterward, however, the Whig ticket was entirely withdrawn through the influence of Reed, accompanied by the declaration, which was in the nature of a final dissolution, that "every individual member was left free to pursue his own course" in the coming election.

The Democrats unanimously nominated Richard Vaux for mayor, and placed on the ticket William A. Porter for city solicitor, and Stephen Taylor for controller. They were all followers of the rising star of James Buchanan. That statesman, then in the zenith of his popularity, was on his way home from the court of St. James, with the avowed purpose of prosecuting his Presidential fortunes. The Philadelphia Democrats had sent an instructed Buchanan delegation to the State convention after having com-

plimented their townsman, Mr. Dallas, and the State convention, in its turn, had named a solid Buchanan delegation to the national convention. As soon as it was known that Mr. Buchanan had arrived in the United States, preparations were made to give him a reception in Philadelphia. A few weeks before Edward Everett, whose lecture on Washington had been delivered at Musical Fund Hall, had been permitted to hold a public reception in Independence Hall. Mr. Buchanan's friends were anxious that he should have the same privilege and honor, but the political opposition was dominant in Common Council, and it tartly refused the request. The reception was therefore held at the Exchange, the address of welcome being delivered by William Welsh. On the same evening there was a banquet at the Merchants' Hotel, and among those who replied to toasts were William B. Reed, John W. Forney, Morton McMichael, and George M. Wharton, the head of the table being occupied by Josiah Randall.

The campaign for mayor between Mr. Vaux and Mr. Moore was hotly contested. The Democratic canvass in particular was managed with great vigor. One of the flaming pronouncements of Mr. Vaux's followers bore this inscription: "No increase of taxes! No excursions of Councils! No Free Dinners! No Free Rum at expense of Councils! No Free Cigars! No Free Hack Hire! But a frugal and economical administration of municipal affairs!" The Democratic leaders who were most conspicuous¹ in the campaign were Lewis C. Cassidy, James R. Ludlow, Brinton Coxe, Daniel Dougherty, S. S. Remak, John C. Bickel, and G. W. Biddle. They succeeded, at the election on the 6th of May, in carrying through their ticket by an average majority of 4000.²

Before the close of the winter of 1855-56 the police and fire-alarm telegraph system, which was constructed by Messrs. Phillips & Robinson, was completed. The politicians who assembled at Fifth and Chestnut Streets while the Vaux convention was in session in an up-town hall, a mile and a half away, were surprised and delighted at being informed so promptly, through its agency, of what was going on. On the 19th of April the new system went into formal operation. The first important use of it was made early on the morning of the 1st of May, when a fire broke out in the rag and paper warehouse of Jessup & Moore, on North Street, between Fifth and Sixth and Market and Arch Streets, and which destroyed forty-four buildings in that locality, and caused a loss of upwards of half a million dollars.³ A fireman

¹ Much antipathy was expressed against William McMullen and the "Moyamensing Killers."

² There was also a Republican ticket which had a scattered vote. It was composed of W. B. Thomas for mayor, W. S. Pierce for city solicitor (now Judge Pierce), and Lewis S. Heins for controller.

³ "The only really fire-proof building we have seen erected in Philadelphia," said the *Ledger*, a day or two subsequent, "is one at Eighth and Cherry, built for Cornelius & Baker, which has nothing combustible about it."

was crushed to death by falling walls, and another was stabbed and killed in a fight. On the 11th of April the Artisan's Building, on Ranstead Place, near Fourth and Chestnut Streets, together with much other property, aggregating three hundred thousand dollars in value, had been burned down, and these two large fires, coming so closely together, suggested very forcibly the need of the new steam fire-engine in Philadelphia.

On the 11th of April a terrific hurricane, which did not last more than ten or fifteen minutes, passed over the city, unroofed one hundred and fifty buildings, and in other ways created considerable havoc.

Peter Mattocks, a mulatto, who had been convicted of the murder of Elizabeth Gilbert, was hanged on the 23d of May at Moyamensing prison by Sheriff George Magee in the presence of a crowd which numbered at least a thousand men, all of whom had been admitted nominally as deputies to the sheriff.

The assault which Preston S. Brooks, of South Carolina, committed on Charles Sumner in the United States Senate chamber, excited much indignation, which first vented itself in this city on the 6th of June at large and exceedingly enthusiastic meetings in the District Court room, where John B. Myers, Judge Wm. D. Kelley, Charles Gilpin, Morton McMichael, and Rev. W. H. Furness, denounced the slave-power. On the same night there were illuminations in honor of the nomination of James Buchanan for President. The Keystone Club had gone to Cincinnati to help accomplish this event. Marshaled by W. B. Rankin and with George A. Coffey and Dr. George Nebinger as their spokesmen, they called on the "Sage of Wheatland" on their way home from the convention and exchanged congratulations.

The Democratic enthusiasm¹ over the success of Pennsylvania's "favorite son" in the national convention, at Cincinnati, vented itself at a great ratification meeting in Independence Square, at which Mayor Vaux presided, and to which additional interest was lent by the presence of Buchanan's most conspicuous rivals, General Lewis Cass and Stephen A. Douglas.

But the leaders of the young Republican party were not inactive in their preparations for the Presidential struggle. On the 16th of June their State convention met in Philadelphia with Henry C. Carey as temporary chairman. John Allison, of Beaver County, was made permanent president, and Allen McKeen and Russell Errett, secretaries. An attempt, made by David Taggart, to have the delegates at large instructed for Fremont and McLean, was, after much debate, relinquished. On the following day the national convention to nominate a President assembled in Musical Fund Hall. Edward D. Morgan, of New York, called the delegates to order, and on his motion

Robert Emmet, of the same State, was chosen temporary chairman. A permanent organization was effected by the choice of Henry S. Lane, of Indiana, for chairman. On the following day John C. Fremont was nominated for President of the United States, receiving three hundred and fifty-nine votes to one hundred and ninety-six for Judge John McLean, two for Charles Sumner, and one for William H. Seward. There was a strong opposition to Fremont among the Pennsylvania men, and twenty-three of them held out against him to the last.² William L. Dayton, of New Jersey, was nominated for Vice-President, his principal opponent being Abraham Lincoln, who, although hardly known outside of his own State, obtained one hundred and ten votes.³

At the end of Reed Street was a long wharf, extending into the Delaware, which had been built by Merrick & Sons. It was frequently used by the residents in that part of the city as a promenade. On the evening of the 1st of July it was full of men and women, who were refreshing themselves after the heat of the day. Without any warning, the yielding alluvial deposit on which it was built gave way, and a mass of people were precipitated into the water, and ten of them drowned.

One of the most appalling railroad disasters that up to this time had ever happened in the United States took place on the North Pennsylvania Railroad on the 17th of July. Early on the morning of that day an excursion train containing six hundred of the children and young people of the St. Michael's Roman Catholic Church, of Kensington, left the Cohocksink depot. On reaching Camp Hill, near Fort Washington, about thirteen miles from the city, the engineer descried the down train from Gwynedd approaching, and before he could do anything to lessen the speed of thirty miles an hour, at which his train was moving, the two collided. Five of the excursion cars were instantly broken to pieces. The fire from the locomotive communicated to the wreck, and many of the passengers perished in the flames. Among the victims who were burned to death was the Rev. Father Sheridan. Upwards of fifty dead bodies were drawn out of the *débris*, and at least one hundred of the excursionists were wounded. A coroner's jury ascertained that the accident was due to the "gross negligence" of the conductor of the excursion train.

Politics, which were quiet and apathetic after the Presidential conventions, began to revive toward the

¹ At this time so great was the mob of office-seekers on the new mayor (Vaux) that on one day the south side of Chestnut, in the vicinity of his office, was "almost impassable" for them.

² The delegates from Philadelphia to this first national convention of the Republican party were B. D. Pettingill, C. D. Cleveland, John F. Gilpin, William S. Pierce, Henry C. Carey, Joseph J. Gillingham, Thomas S. Cavender, Mahlon H. Dickinson, George H. Earle, W. B. Thomas, and Passmore Williamson.

³ Judge Spaulding, when Lincoln was named, asked, "Can he fight?" To which Mr. Archer, of Illinois, replied, "Yes, sir; he is a son of Kentucky, and a tall man whatever way you put it." The delegate who nominated Lincoln said, "He is a good fellow, a firm friend to freedom, and an old-line Whig."

end of August, and for the next ten weeks seemed to absorb everybody's energies. Probably never before had so many meetings and parades taken place in a political campaign in Philadelphia. The Fillmore and Donelson men were bent on making a vigorous canvass, but the Democrats, under the bold, dashing, and aggressive leadership of John W. Forney, who was chairman of their State committee, used all the resources at their command with skillful effect. He, as well as his paper (*The Pennsylvania*), was tireless in advancing the interests of Buchanan, not only in the city but throughout the State. In the city the leader who played the most conspicuous part in looking after the local fortunes of the party was Lewis C. Cassidy, then described by his admirers as "the young giant of Democracy." He was nominated for district attorney, defeating in the convention William Badger and James R. Ludlow. His opponent was William B. Mann, who was put up for the office by the Fillmore and Donelson party, and who was characterized by the opposition as the "Republican-Fusion-Abolitionist-Know-Nothing" candidate. A tendency to a coalition between the followers of Fillmore and those of Fremont early manifested itself in Pennsylvania, and finally resulted in a fusion electoral ticket. They were also united in Philadelphia in all the Congressional tickets, except the Fourth, where William D. Kelley, as a regular Republican, made a gallant but unsuccessful fight for the seat which he was afterward destined to occupy for nearly a quarter of a century. There was a small group of Democrats, under the leadership of John M. Read, who detached themselves from their party because of their opposition to the pro-slavery features of the Buchanan platform, and who maintained an organization called "The Democratic Fremont Club." All through the campaign the greatest bitterness was manifested on the slavery question, and the exchange of epithets between the Democrats and the Fremont party was particularly vindictive. The Republican canvass was conducted with much vigor, notwithstanding the fact that its leaders had neither the facilities nor the resources possessed by the older organizations.¹ Practically, however, the conflict was waged between the Democrats on the one side and the Fusionists (Americans and Republicans and some Whigs) on the other.

An imposing political display was made by the Democrats on the 17th of September, in celebration of the sixty-ninth anniversary of the adoption of the Federal Constitution. Independence Square was packed with a multitude, which gathered around two

stands presided over by George M. Wharton. John W. Forney offered the resolutions, and the principal orators were Howell Cobb and Herschel V. Johnson, of Georgia, and John Floyd, of Virginia. In the torchlight parade there were ten thousand men in line, conspicuous among whom were the visiting guests of the Keystone Club, the "Blue Hen's Chickens" of Delaware and the Union Club of New York. Mr. Buchanan, who was in town, was called upon by these clubs under the charge of the Keystone's president, Lewis C. Cassidy.

There were many other notable meetings during this heated period of political strife. Chief among the Republican orators were N. P. Banks, of Massachusetts; Jacob Collamer, of Vermont; Lyman Trumbull, of Illinois; and Anson Burlingame. A speaker whom the Democrats used with much effect at National Hall was James B. Clay, son of the great Kentuckian.

The election in October was exceedingly close, and in the State was for several days undetermined. The Democratic majority in Philadelphia was about 3000, and finally settled down to that figure for the State. Lewis C. Cassidy, for district attorney, was returned elected by a majority of little more than five hundred. The Congressional delegation was solidly Democratic, consisting of Thomas B. Florence, John A. Marshall, James Landy, Henry M. Phillips, and Owen Jones. The result of this election made it clear to observing politicians that the drift for Buchanan was too strong to be successfully resisted in November. When the Presidential vote for the city was counted it was found that the Buchanan electors had 38,222, and that the total Fusion vote for both Fillmore and Fremont was 31,976.

During the autumn of this year the corner-stone of the Pennsylvania Hospital for the Insane was laid by Mayor Vaux (October 1st). The corner-stone of National Guards Hall on Race Street (September 17th) was laid by Peter McCall in the presence of a fine body of the military, and Handel and Haydn Hall, at Eighth and Spring Garden Streets, then known as Harrison Hall (Joseph Harrison, Jr., was the owner), was opened (November 18th) by Morton McMichael as orator, followed by a concert, in which the eminent pianist, Gottschalk, was the chief participant. On the 20th of October a number of citizens who had purchased the forty-five acres of the old Hunting Park course on the York road, originally known as Allen's Race-course, formally presented the property to the city as a public park.

The United States Agricultural Exhibition, on Powelton Avenue, West Philadelphia, was opened on the 7th of October, and on one day it was estimated that between eighty thousand and one hundred thousand persons visited it. Two days after the opening there was a picturesque parade of butchers, which was the finest display of its kind since the celebrated procession of 1821.

¹ The first Republican City Committee was composed as follows: George W. Martin, John Ashton, Jr., Joseph R. Lyndall, R. P. Gillingham, Edward B. McDowell, W. J. H. Verdette, Thomas Balch, J. L. Gossler, John M. Pomeroy, Randall Parsons, John H. Bullock, Joseph W. Gaskell, Nathaniel Randolph, George Gillingham, Charles Wright, William F. Edson, N. F. Campion, O. N. Thatcher, J. L. Littlefield, Theo. S. Williams, James Verree, and C. C. Pierson.

On the 19th of December the ice, which had become thick in the Delaware River, damaged the receiving-ship "Union," lying in front of the navy-yard, so badly that she sunk, but not before the ninety apprentices, seamen, and marines on board of her were safely transferred to the "Preble."

Toward the close of the year 1856 experiments were made with a new form of street-sweeping machinery, consisting of rapidly-revolving brooms. The apparatus was the invention of the firm of Smith, Sickel¹ & Co., who were in business as contractors for the city. These machines could keep fifteen carts busy, and the success of the experiment started the hope, which then was as fervent as it has ever since been, and still is, that the intolerably filthy highways, which vexed sorely the souls of the citizens, would at last be kept clean.

The Democracy of the city were thrown into intense excitement and indignation on the 18th of January, 1857, by dispatches from Harrisburg announcing that Messrs. Maneer and Lebo, of York County, and Wagenseller, of Schuylkill, Democratic members of the Legislature, had not only refused to support the caucus nominee of their party for United States senator, John W. Forney, but had given their votes to the opposition candidate, Simon Cameron. Forney was one of the favorites of the Philadelphia Democracy at this time, and they were moved to the warmest feelings of resentment by the base treachery which had removed from his grasp the cherished object of his ambition. Meetings were held by various clubs and associations, denouncing the traitors in unmeasured terms. The Keystone Club in particular, under the influence of scathing speeches by Stephen S. Remak and Capt. E. W. Power, hotly denounced them. The names of Maneer, Lebo, and Wagenseller remained for many years synonymous with corruption. At Harrisburg the hotels long refused to receive them, and in this city old politicians have not yet forgotten to regard them with contempt. The result of this unforeseen defeat of Col. Forney was to lose the Senate house an accomplished publicist, and to give Philadelphia, in the career which opened before him a few months later, its most eminent journalist.

The night of the 18th of January, 1857, has long been a memorable one to the firemen who were called upon to brave its severity. It was on a Sunday, and the snow had been falling in large drifts, which it was almost impossible to wade through. The winds were howling a perfect gale, and the mercury in the thermometers was on the verge of touching zero. Several alarms of fire were struck. The volunteers responded with undaunted energy. The principal alarm came from the Tabernacle Methodist Church, at Eleventh and Oxford Streets, which was then far up

town. When the men after tremendous labor had cleared their way through the snow, they found nearly all the plugs frozen. The church and some adjoining dwellings were destroyed, and the firemen thought themselves fortunate in not perishing in the intense cold. The next morning the snow-banks at places were as high as a man's head, and it was more than a week afterwards before the railroads were sufficiently cleared of the drifts that trains could be run on schedule time.²

The newly-built Academy of Music was to have been thrown open to the public on the night of the 20th, but so great were the piles of snow in the streets that the event was postponed, and did not take place until the 26th. The occasion was signalized by a ball and concert. About four weeks later a Maennerchor ball, the first of a long series of these festive events at that house, was given. On the following night, the 25th of February, a brilliant audience assembled to witness the first operatic performance on the Academy stage. The opera was Verdi's "Trovatore," then almost new to Philadelphia ears. Gazzaniga was the Leonora, and Brignoli the Manrico of the occasion. The company was Maretzek's, and had just come from Havana.³ The opening was most successful. The series of performances which followed by the same troupe, and which embraced the range of all the popular operas of the period, like "Lucresia Borgia" and "Norma," was pronounced to be the most "brilliant and lucrative season ever known."

The news of the death of Dr. Elisha Kent Kane, in Havana, was received in Philadelphia with general sorrow. On the 27th of February, Mayor Vaux presided at a meeting which was called to make preparations for receiving the body of the great explorer. The feasibility of erecting a monument to his memory was, as is usual at such meetings, a subject of discussion. A list of pall-bearers was prepared, consisting of Horace Binney, Commodore Read, ex-Governor Pollock, George Peabody, Commodore Stewart, Maj. C. J. Biddle, Dr. Dunglison, Chief Justice Lewis, Judge Grier, Bishop Potter, Rev. H. G. Boardman, William B. Reed, John A. Brown, Henry Grinnell, Maj. Hagner, and Professor A. D. Bache.⁴ On the 11th of March the remains of Dr. Kane arrived at the Baltimore depot. A committee of citizens, members of Councils, and a military escort, consisting of the Washington Grays and the First City Troop, conveyed the body to Independence Hall. The next day it lay in state, and was viewed by many thousands of people. The funeral procession, which, in the mean time, was forming on the streets, was a notable

² The body of a person lost in the snow on the streets was found several days afterwards.

³ E. A. Marshall was the lessee, and Peter Richings the stage-manager. The price of the best seats was one dollar.

⁴ Messrs. Hagner, Grinnell, and Bache did not bear the pall in the funeral, and their places were taken by Dr. Dillard, Samuel Grant, and Professor H. L. Hodge.

¹ This was Gen. H. G. Sickel, for some years the president of the Board of Health.

one. It consisted of the military, which preceded the hearse, Kane's comrades in his Arctic expedition, members of Councils, committees from Baltimore and New York, clergymen, officers of the State government, Society of Sons of St. George, Albion Society, St. Andrew's Society, Scotch Thistle Society, naval officers in uniform, distinguished visitors, judges and officers of the various courts, the American Philosoph-

E. M. Kane

ical Society, United States civil officers, members of the bar, Corn Exchange, the Fire Department, Odd-Fellows, American Protestant Association, order of Druids, Young Men's American Club, faculty and officers of Girard College, Princeton College, and the Central High School, medical faculties and students, and various other organizations. The vast cortege moved to the Second Presbyterian Church, on Seventh Street, below Arch, where the funeral sermon was delivered by Rev. C. W. Shields. The body of the great Philadelphian was laid to rest in Laurel Hill.

In January, 1857, a new plan of numbering the houses, the ordinance for which had been signed by Mayor Vaux on the 16th of September, in the preceding year, and which was chiefly the work of Councilman Mascher, went into operation. It was slow work in inducing the citizens to comply with the reform, but before the beginning of 1858 the new system had been pretty generally introduced.

The spring election of 1857 caused hardly a ripple of excitement. The opposition to the Democrats entertained little or no hope of beating them. William V. McGrath was elected city treasurer, and James Logan city commissioner, over the Native American and the Republican candidates without much difficulty. On the night of the election ex-President Pierce, who was stopping at the La Pierre House, was serenaded by the jubilant Democrats.

The question of the suppression of polygamy was, at this time, one of national interest, and bloodshed in Utah between the United States troops and the

followers of Brigham Young was imminent. The Mormons were still objects of great curiosity in the East, and the ship "Westmoreland," which arrived at this port on the 31st of May with five hundred and fifty-two converts to the faith, was described as carrying "extraordinary freight." These people, who were mostly Norwegians, had been recruited by Matthias Cowley, and were shipped to the West on the Baltimore and Ohio Railroad, by the "General Mormon Emigration Agent for United States Shipping Ports," one A. F. Cannon, whose name has since become distinguished in the polygamous annals of Utah. Not long afterward the ship "Tuscarora" brought over five hundred and thirty-seven more Mormon proselytes, whom the industrious agents of Brigham Young had gathered together in England, Scotland, Wales, Denmark, and Sweden.

About this time Mayor Vaux established what was known as "The Fire Police," a department of the municipal service which was ordered to consist of a chief, an assistant, "who is an experienced builder," and such officers as may be deemed necessary. High Constable Blackburn was the first chief in a position which afterward was known as fire marshal.

The Melodeon building, which occupied a site on Chestnut Street above Sixth, was burned down on the 3d of June, after a performance by a band of negro minstrels known as Myers & Landis' Virginia Serenaders. It had been built in 1854, on the walls of the old Bolivar House, and it turned out to be an unfortunate speculation. David Matthews, a member of the America Hose Company, was killed by falling walls at this fire.

An event in which almost the entire German population of the city were participants was the musical jubilee, which began at the Academy on the 14th of June by an oratorio performance, and which, with a ball, a parade, a concert, a picnic at Lemon Hill, and a banquet, was kept up for four days, bringing together many singing societies from the Eastern and the Middle States.

In recognition of the service which William B. Reed had performed in turning over many of the old-line Whigs to the support of Mr. Buchanan in 1856, he was appointed minister to China. His mission was looked upon as a most important one, and he was well fitted for it by the tact, dexterity, and coolness of his diplomatic qualities. On the 23d of June a large company of his Philadelphia friends invited him to a public dinner at the La Pierre House. Joseph R. Chandler presided, and the guest, who was a master of pure English, delivered a graceful speech on the importance of his mission in opening a pathway to American commerce in the East. A few days later Mr. Reed sailed for China from Norfolk in the United States ship "Minnesota," which had been elaborately fitted up for his accommodation.

During the spring and summer of 1857 a large number of churches were either about to be opened

or in process of construction. Among these were the Protestant Episcopal Church of the Holy Trinity, Walnut and Nineteenth Streets (corner-stone laid May 25th), First Southwark, Presbyterian, German below Third (corner-stone laid April 2, 1857), Protestant Episcopal Church of the Evangelist, Catharine and Seventh, Westminster Presbyterian Church, Broad and Fitzwater (corner-stone laid May 10, 1856), Front Street Methodist Episcopal Church, Front above Maiden (corner-stone laid July 10, 1857), Zion Protestant Episcopal Church, Eighth and Columbia Avenue (corner-stone laid May 20, 1856), St. Clement's Protestant Episcopal Church, Twentieth and Cherry (corner-stone laid May 10, 1856), Olivet Baptist Church, Sixth and Federal (corner-stone laid August 20, 1857), Scott Methodist Episcopal Church, Eighth and Dickinson (corner-stone laid July 7, 1857, by Bishop Scott), and Emanuel Protestant Episcopal Church, Holmesburg (corner-stone laid September 21st, by Bishop Potter).

The Odd-Fellows of Philadelphia on the 1st of June dedicated a statue of Franklin in their cemetery, celebrating the occasion by a large parade; on the 4th of August, in the same cemetery, the firemen of the city, after a fine procession, dedicated a monument, and listened to an oration by Charles M. Neal; a month later the colored Odd-Fellows, on the 3d of September, made an imposing display in honor of the laying of the corner-stone of their hall on Lombard Street below Seventh.

The financial panic of 1857 was precipitated upon Philadelphia by the closing of the doors of the Bank of Pennsylvania on the 25th of September. Within an hour the Girard and the Commercial declared a suspension of specie payments. Business men were thrown into a fever of excitement, and the managers of some banking institutions called for detachments of police to protect them from the clamorous importunities of creditors. The alarm caused by these events spread quickly through all classes of society. Many of the leading business men insisted that the State Legislature should give relief to them by legalizing the suspension of specie payments. On the 8th of October they held a mass-meeting in Independence Square, at which Charles Macalester presided, urging the General Assembly to do something that would relieve the "suffering community" in its monetary distress. There were other citizens who did not favor such a measure, and they held a mass-meeting in the same square, at which George M. Wharton, John Cadwalader, Charles Brown, and Joshua T. Owen protested against a legalization of the suspension of specie payments. The Legislature, however, did pass such a measure a short time afterward.

In the mean time there was a great depression in almost every branch of trade and industry. Before the middle of October there was a general suspension of labor in mills and factories. The streets were soon full of unemployed men. Demands were made on

the city authorities for assistance. Demagogues in Councils were in favor of ordering a virtual issue of paper money by the municipality. On the afternoon of the 12th of November, while Councils were discussing the question, ten thousand workmen assembled in Independence Square in order to stimulate their representatives in the State-House to an appreciation of their troubles. The effect of their appearance was the passage of ordinances by Councils appropriating money for extending wharves, building culverts, and repairing other public works. Only a short time before this they had adopted resolutions calling on the departments to cut down expenses, to practice the most rigid economy, and otherwise to comport themselves with the "hard times." But Mayor Vaux refused to give them his approval, and, in a special message, took the ground that in such an emergency it was the duty of the city to spend its money freely, and thus relieve the general embarrassment.

There were many meetings of tradesmen, workmen, and philanthropists during this period, all having some bearing on the prevailing distress; one or two of them muttered "bread or fight;" some endeavored to reduce the price of provisions, some formed plans for sending unemployed women to the West, and others made preparations for what it was thought would be a winter of unexampled suffering. In November, George J. Henkels set the example of distributing bread to the needy, and it was followed by many other citizens. It is sufficient to say, however, that while the suffering among the working classes was widespread, it was by no means so severe as had been anticipated, in consequence largely of the charity of the opulent, but principally because the winter that succeeded was unusually and unexpectedly mild.

The financial uproar in September quite overwhelmed the autumn political campaign. William F. Packer had been nominated by the Democrats for Governor, David Wilmot by the Republicans, and Isaac Hazlehurst, of this city, by the Americans. The campaign did not awaken much interest. Its most remarkable feature was the appearance of the author of the "Wilmot Proviso" on the local stump in his efforts to organize the Republicans. The election resulted, as had been generally anticipated, in a clean sweep for the Democrats. In the city the vote for Governor was Packer, 27,749; Hazlehurst, 14,455; and Wilmot, 10,001. It was at this time that James R. Ludlow, then a popular Democratic orator, was elected to the judicial bench, on which he has so long sat. He beat, by a majority of upwards of five thousand, ex-Mayor Conrad, the candidate of the Americans and Republicans.

The firemen's parade, on the 5th of October, was an event for which not less than one hundred thousand dollars had been spent in preparation. For months the companies had been looking forward to it with in-

tense interest. On the day of the procession the city was in holiday attire. There were visitors in the line from New York, Harrisburg, Washington, Baltimore, and many other cities. The chief marshal was John F. Gibson, and upwards of one hundred organizations made up the long and brilliant column.

On the 2d of November there was a fine display made by the American United Mechanics under the marshalship of H. C. Cobb. The dedication of their new hall at Fourth and George Streets, where Col. H. H. K. Elliott delivered the oration, was the occasion of this celebration. Two weeks later there was a fine parade of the militia at the dedication of the National Guards Hall by John W. Forney.

All through the year 1857 there was a lively agitation over the introduction of passenger railways into Philadelphia. In December, 1855, a meeting had been held in Frankford looking to the establishment of a railway that would connect that suburb with the city proper. During the first two or three months of the following year petitions were freely circulated asking the Legislature to authorize the construction of such a road between Frankford and Southwark. In a short time the elements of opposition to the project began to be stirred up. They manifested themselves in a vigorous fashion at a public meeting on the 26th of March, 1856, in which Dr. W. Jewell, J. Altamont Phillips, and others, were the principal movers, declaring that Fifth and Sixth Streets were too narrow for a railway, and intimating that the enterprise was the offspring of that most unpopular of corporations, the Camden and Amboy Railroad. During the next twelve months the feasibility of the undertaking furnished a very decided conflict of opinion in the press, in pamphlets, and before Legislative committees. Finally, in May, 1857, the General Assembly granted to the "Philadelphia and Delaware River Railroad Company" the right to build a railway on Fifth and Sixth Streets from Frankford to Southwark, and at the same time conferred similar authority on the projectors of the West Philadelphia Railway Company. The Frankford and Southwark corporation¹ was not slow in making use of their franchises, and by the opening of the year 1858 their tracks were laid. On the 8th of January the first car passed over the route, but in consequence of a difficulty with the owners of omnibuses, whose vehicles the company were compelled to buy, the line could not be opened to the public until the 20th of January. The route extended from Chatham Street, at the northern terminus, to Morris Street at the southern terminus, a distance of seven and six-tenths miles, for traveling over which the passenger was charged five cents.² The undertaking was an immediate success. The receipts were nearly six hundred

dollars a day, and before the winter was over there was a perfect swarm of new railway enterprises.

The strong opposition to railways was slow in subsiding. That the streets were too narrow, that they would be spoiled both as to their looks and purposes of trade, and that powerful monopolies would be engendered, was the burden of the argument against them. Much of this prejudice was, doubtless, due to the unsightly and annoying freight railroad which ran along Market and Third Streets, and which business men had been trying to have removed. At any rate, the capitalists, who, stimulated by the success of the Fifth and Sixth Streets Railway, immediately began to form plans for similar railways on Spruce and Pine Streets, Ridge Avenue, Second and Third, and other thoroughfares, found that the resistance of the conservative element had not entirely disappeared, and were obliged still to combat the arguments that were made against them at numerous public meetings in the spring of 1858, as well as in the columns of some of the influential newspapers.

The attempt of President Buchanan's administration to impose what was known as the "Lecompton Constitution" upon the people of Kansas in the proslavery interest, had been received with considerable disfavor by many of his warmest supporters in Philadelphia. Their distrust, which had been expressed very pointedly in the columns of Forney's *Press*, was also conveyed to the mind of the Executive in the form of speeches at a meeting in National Hall, over which John W. Forney presided, and which embraced those Democrats who had voted for Buchanan in 1856, but who were "inexorably opposed to all attempts to force the Lecompton Constitution on the people of Kansas." The resolutions declared faith in the national administration as regards all other matters than this, requested the Philadelphia congressmen to resist the fraud, and commended the stand of the Douglas men. From this time on the famous break between Forney and Buchanan grew wider, and this meeting was the first step which finally led many Philadelphia Democrats over to the Republican party.

The operations of a company which had been formed to raise some of the one hundred and six vessels that had been sunk in the harbor before Sebastopol, in the war between Russia and the allied powers, attracted some attention at this time. It was known as the "Philadelphia Marine Exploring Company,"³ and in April of the previous year had taken out to Europe one hundred and fifty men for this work.

The May election in 1858 resulted in the complete discomfiture of the local Democracy. The administration of Mayor Vaux had been conducted on strict party principles. In many respects it was vigorous,

¹ Martin Thomas was the first president of the company.

² A few weeks after the road was opened J. A. Wear emphatically protested through the press against his being compelled, along with other colored people, to stand on the front platform of the cars.

³ The principal parties to this enterprise were John Tucker and Dr. Morris S. Wickersham.

efficient, and satisfactory, but complaint against the character of its police force was limited not entirely to its political opponents. This was described in very cautious and conservative quarters as a "terrible load" to carry. The *Ledger*, which had made many complaints of its inefficiency during the previous two years, was in favor of making the discharge of the bad policemen the issue in the election for mayor. The result of this dissatisfaction was the formation of a People's ticket in a convention at Spring Garden Hall.¹ Alexander Henry was nominated for mayor, and the Americans and the Republicans were, with but little difficulty, induced to unite in his support. The combination defeated Mayor Vaux by more than four thousand majority, and elected the remainder of their ticket² by about one thousand majority less.

Mayor Vaux, on leaving office, took pains to impress his policemen with a sense of his confidence in them. In a long address he declared that they had done their duty well, and that the prejudices which had been raised against them were the results of political calumny. No sooner had his successor taken his place than there was a clamorous demand by his supporters for places on the police force. During the first month of Mayor Henry's administration there were days when his office was so crowded with these importunates that it was almost impossible to force a passage through them to his presence.

A new political movement which originated in Washington and was intended to be national in its scope created some interest during the summer. It was inaugurated in Philadelphia, on the 15th of June, at a meeting in National Hall, over which Henry C. Carey presided. The call stated that its purpose was "to unite all the opposing elements to the Democratic party in a national organization." This was to be done by agitating the tariff question in favor of a restoration of the protective system and to put an end to what was declared to be the free-trade policy of the Buchanan administration. Simon Cameron and E. Joy Morris, in particular, were commended for their course in Washington. Addresses were made by several statesmen of national reputation,—Jacob Collamer, of Vermont; Solomon Foote, Humphrey Marshall, and Richard W. Thompson; and Mr. Carey was empowered to appoint a committee of seventy-six. The movement attracted some attention, but was soon lost in the more absorbing agitation of the anti-slavery issue.

The news that the first Atlantic cable had been put in operation by a message from Queen Victoria to President Buchanan, occasioned much rejoicing in

the latter part of August, 1858, guns being fired and flags displayed. On the 1st of September a general celebration took place. The day was virtually a holiday. In the morning there were two processions, one made up of the local military, and the other of civic societies. They both marched to Independence Square, where a great crowd was listening to Judge William D. Kelley's oration. Chief Justice Lewis, who presided, stated that they had assembled to commemorate "the greatest event the world ever witnessed." At Jayne's Hall the Young Men's Christian Association held a special celebration, in which George H. Stuart, Rev. Byron Sunderland, Dr. Leyburn, and John Chambers were the principal participants. In the evening the firemen paraded with their torches, dwellings and public buildings were illuminated, there were numerous transparencies and emblematic devices displayed from the windows, and at Broad and Spring Garden Streets many thousands of people were congregated to witness Professor Jackson's fire-works. There were not a few people who were opposed to these public demonstrations,³ and when it was soon afterward discovered that the cable could not be regularly operated, they were somewhat sarcastic at the tumultuous rejoicing of the more enthusiastic.

On the 6th of September the services of Baron von Steuben, of Revolutionary fame, were commemorated at Lemon Hill by a picnic, which more than ten thousand people attended. There was also a parade. The career of the German patriot was eulogized by Col. J. Ross Snowden and Dr. Godfrey Vellner, the editor of the *German Democrat*.

The bitter fight which Stephen A. Douglas was waging against the Buchanan administration, and in which John W. Forney's energies were enlisted on behalf of the Illinois statesman, had its effect in Philadelphia in the autumn campaign of 1858. Col. Thomas B. Florence, who represented the first district in Congress, who professed the warmest interest in the poor and laboring classes, and who was widely known under the cognomen of "the Widow's Friend," had sustained Buchanan's course on the Kansas question. This, together with some offense given by his distribution of navy-yard "patronage," had arrayed against him a formidable opposition within his own party. A split convention put Dr. George W. Nebinger, a popular Southwark Democrat, in nomination against him. The Douglas Democrats, headed by Forney, Daniel Dougherty, George W. Thorn, and Dr. Kamerly, supported Nebinger with great vigor. The Democratic ticket in the remaining Congressional districts and in the city was not openly opposed by this element, but it doubtless suffered from the opposition which was ostensibly concentrated on

¹ The citizens who were mentioned on this occasion as candidates for the mayoralty were Alexander Henry, Henry D. Moore, Peter Fritz, H. T. King, John S. Watmough, Morton McMichael, Charles Gilpin, James C. Hand, E. D. Wagner, O. H. P. Parker, Jacob Dock, W. D. Lewis, John G. Thompson, and M. Russell Thayer.

² It consisted of Henry T. King for city solicitor, George W. Hufty for controller, A. J. Flomerfelt for receiver of taxes, and E. R. Williams for city commissioner.

³ Col. Page, at a public meeting of the firemen, warmly dissented from the proposition to parade, and succeeded in persuading a large number of companies not to take part in the celebration.

Florence. The Native Americans and the Republicans made substantially pretty much the same coalition, under the name of the People's party, that had been so successful in the May election. With William H. Kern at their head for sheriff, they carried the city by more than 5000 majority. The rebuke to Buchanan's administration on the Kansas question was emphatic. Of the Democratic Congressional candidates—Martin, Landy, Phillips, and Florence—all were beaten except Florence, who managed to secure a plurality of about 300 over Col. John W. Ryan,¹ Nebinger having taken away about 2500 Democratic votes from the regular candidate.²

Although the depression that followed the '57 panic had served to make the year 1858 a dull one generally in Philadelphia, this stagnation was not visible in railway circles. Fourteen charters for the construction of such roads had been obtained from the Legislature, and before the year was over workmen were busy in tearing up many of the streets and laying rails. The West Philadelphia road, on Market Street, was the second to go into operation, and was closely followed by the Tenth and Eleventh, on the 29th of July. At this time the Spruce and Pine, Second and Third, Green and Coates, and Race and Vine were in course of construction, and the Chestnut and Walnut Street Company was still engaged in beating down a bitter opposition. The fourth road to go into operation this year was the Spruce and Pine, on the 3d of November. An unsuccessful agitation for the running of the cars on Sunday served to create some asperities at this period.

In November, Councils ordered the removal of the old market-sheds which occupied the middle of Market Street and had given it its name, and during the winter and spring of 1859 the ordinance was complied with. But this improvement was not effected without resistance. A "Market Protection League" was formed to save the sheds from demolition, but the great majority of the butchers and stall-owners, chiefly under the influence of Philip Lowry, were inclined to acquiesce with the popular demand for clearing the streets of obstructions. They were partly induced to take this submissive position by the stipulation which they made with the city, that the "shiners," who occupied the curbstones and sidewalks, should be broken up. In return for this favor the occupants of stalls in the sheds in the upper portion of Market Street expressed their willingness to build a new market-house at Sixteenth Street. They formed the Western Market Company, and had gone to work with their plans so promptly that, on the 16th of November, Mayor Henry laid the corner-stone of this building.

The launching of the United States sloop-of-war

"Lancaster," on the 20th of October, brought an immense crowd to the navy-yard. The vessel had been named in compliment to President Buchanan's county, and his popular niece, Miss Harriet Lane, broke over the bow the bottle of wine with which the ship was christened.

No man who has performed the duties of a professional teacher has occupied a higher place in the estimation of this community than John S. Hart. For nineteen years he had been the principal of the Central High School, and three thousand nine hundred pupils had been under his careful charge. His retirement from that institution, on the 3d of December, 1858, was therefore felt to be a genuine public loss. On this occasion he was presented by his pupils with a silver set. Some of the boys who took part in the exercises were afterward widely distinguished. George Alfred Townsend, who in a few years became the most brilliant and original of newspaper correspondents, delivered the valedictory poem, and the presentation speech was made by Joel Cook, Jr., now an editor of the *Public Ledger*.

It has been frequently remarked that a period of stringency and distress in business is apt to be followed by religious excitement. This was to some extent the case in Philadelphia during the year 1858. There was general economy in all classes of society. There was no disposition to engage in new movements or enterprises. The second season of opera at the Academy had been a dire failure. It was, therefore, not difficult to start the religious revivals which were frequent during the early part of the year. They even went so far as to lead the reformatory meetings of pious men and women in the houses of the fire companies,—a class of the community which had been more than ordinarily turbulent this year, and which Mayor Henry and Fire-Marshal Blackburn had been trying to reduce to an orderly condition. But religious circles themselves were to be stirred up before the year was out by a man who, at this time, acquired great notoriety for his professions of atheism. This was Joseph Barker. He appeared in Philadelphia in November, speaking on Sunday mornings at the Assembly Building, Tenth and Chestnut Streets, and at Ninth and Arch Streets, and in the evenings at Franklin Hall, Sixth below Arch Street. For some time he was the talk of the town in the animated controversies which he carried on with the Rev. John Chambers and other defenders of Christianity. The Young Men's Christian Association was also a centre of considerable activity during this period. Its anniversary in December was celebrated with much fervor, and Mr. John Wanamaker, then an unknown young man, figured in the committee on celebration.

The Douglas Democrats were greatly elated by a visit from their leader on the 3d of January, 1859. As the "Little Giant" landed at Walnut Street wharf a display of fire-works in his honor was made on Smith's Island. The committee on reception then

¹ Ryan tried to contest Florence's seat on the ground of fraud, but was unsuccessful.

² The successful Congressional candidates of the People's party were E. Joy Morris, William Millward, and John P. Verree.

escorted him to the St. Lawrence Hotel, where he was serenaded, and where he delivered a speech. The principal local leaders of the Douglas movement who took part in this reception were John W. Forney, Daniel Dougherty, and David Webster. On the following day Mr. Douglas, whose appearance had created quite an excitement in the city, held a public reception in Independence Hall.

The terrible ravages which the yellow fever visitation of 1855 made in the South had impelled a large number of Philadelphia men and women to go to the relief of the sufferers. Many of them never returned from their errand of mercy and humanity. But the memory of the noble deeds which they had performed at Norfolk and Portsmouth did not die with them. In 1858 it was determined to reclaim their bodies, and give them a burial which would be worthy of them. A vault was constructed at Laurel Hill, and a monument, commemorating their sacrifices and untimely ending, was erected over it. The remains of fifteen of the men and women who, as physicians or as nurses, had been stricken down by the deadly pestilence, were interred in this vault¹ on the 18th of January. Impressive services were held in St. Stephen's Church, at which Dr. Ducachet, Dr. Durborow, and Dr. Smith (of Troy) officiated. A slave, known as "Bob" Butt, who had had with his own hands buried eleven hundred and fifty-nine bodies while the plague was raging, attracted general attention, and for a time was quite a hero.

The slavery agitation flamed up into popular excitement in the spring of this year, when an attempt was made by residents of Virginia to reclaim Daniel Dangerfield, a colored man, who, it was alleged, was a runaway slave. The abolitionists in Philadelphia were determined to exhaust every available means of preventing Dangerfield's return. At the hearing, on the 4th of April, before United States Commissioner Longstreth, they were represented by George H. Earle, William S. Pierce, and Edward Hopper. The Virginia complainants had retained Benjamin Harris Brewster, who was made the object of many disagreeable expressions and threats. The case was adjourned until the following day, when the commissioner's office and the street outside were filled with a dense crowd. Inside were Lucretia Mott and many of the most vehement abolitionists. There they remained for fourteen hours. All night long the lawyers examined the witnesses, and, just as the sun was rising on the morning of the 6th, Mr. Pierce concluded his appeal. After Mr. Brewster had finished his speech, the commissioner ordered a recess, in order to make up his decision. When it was announced in the after-

noon that he had discharged the prisoner, because his identity had not been conclusively established, Dangerfield was placed in a carriage, and driven through the streets by a crowd of anti-slavery men.²

The opposition to the continuance of the market-sheds on Market Street had the effect of causing a number of plans to be formed for the erection of regular market-houses like that of the Western Company. In January there was a meeting of stall-owners in the old sheds, who established the plans for the construction of the Eastern Market on Fifth Street. A few weeks afterward work was begun on the Franklin Market, at Tenth and Marble Streets, now occupied by the Mercantile Library, and on the 12th of March the Kater Market on South Street, between Fifteenth and Sixteenth, was opened. The City Market, at Broad and Race, was again put in operation. Much of the material of the old sheds was used for building the South Eleventh Street Market,³ and in no long time the city was adjusted in its new relation to the farmers and butchers, whom it had dispersed.⁴

The session of the Legislature of 1859 was noteworthy for the efforts made to secure legislation on behalf of new railway enterprises in Philadelphia. The charges were freely bruited about the city that much corruption had been practiced in order to obtain the passage of certain laws. On the 23d of February there was a meeting at the county court-house, presided over by John W. Stokes, in which strong resolutions were passed denouncing the demoralization and degradation that had been caused in public life by "the excessive speculative mania over railways." Edward G. Webb brought some very serious charges against the Legislature, and John M. Kennedy thought the fares should be reduced to three cents. Judge Kelley, who was not entirely in sympathy with the purposes of the meeting, thought that the "indiscriminate charges of fraud and corruption were too vague," and he was in favor of attaining cheap fares by fostering competition among more companies. A short time after this movement, Joseph Harrison, Jr., addressed a communication to the Legislature, in which he took the ground that the right to occupy the streets was a valuable one, which should be disposed of to the highest bidders, and that a yearly rent of a thousand dollars a mile should be charged. The speculative interest which the new railways had excited among the people was attested in April by a rush, which was made in Dock Street, to subscribe to the stock of the Chestnut and Walnut Street Com-

¹ The following were the Philadelphians who died at Portsmouth and Norfolk: Robert H. Graham, Thomas W. Handy, John O'Brien, E. Perry Miller, Dr. Courtland Cole, Mrs. Olive Whittier, Singleton Mercer, J. Jackson Thompson, Dr. Thomas Craycraft, Edmund R. Barrett, Frederick Muhlsfeet, Henry Spriggman, Dr. Hermann Kierson, Miss Lucy Johnson, and James Hennessey.

² Mr. George F. Gordon, a member of Common Council, offered a resolution inquiring why Mayor Henry had permitted his police to assist in an effort "to consign a free man to slavery."

³ John H. Taggart, now the editor of the *Sunday Times*, was active at public meetings for the establishment of this market.

⁴ Many of the farmers, through the exertions of Ellis Branson and Samuel W. Hess at public meetings, were induced to locate themselves on Callowhill Street, from Broad Street westward.

pany. This craze was repeated with more violent symptoms on the 9th of May, when the books of subscription to the stock of the Thirteenth and Fifteenth Street Railway Company were opened at Washington Hall to a crowd of men who had been in waiting all night, and who fought one another like lunatics in their efforts to reach the counters.

On the 26th of April there was an imposing parade of Odd-Fellows in honor of the fortieth anniversary of the establishment of that order in the United States. The participants took advantage of the occasion to dedicate an Odd-Fellows' Hall at Ridge Avenue and Twenty-third Street, James B. Nicholson delivering the oration.

The municipal election of 1859 was one of the quietest ever held in Philadelphia. The combination known as the "People's party" was again renewed, and on a light vote it elected Benjamin H. Brown city treasurer, and Charles M. Neal city commissioner, by a majority of more than 2000 votes.

The arrival of William B. Reed on the 11th of May, after having completed his diplomatic mission in China, would have been commemorated by a public dinner had it not been that Mr. Reed declined the proffered honor, wishing, instead, to meet his fellow-citizens at a general reception. This was accorded him on the 31st of May, at the Board of Trade rooms, a formal welcome being given him by Mayor Henry. Mr. Reed delivered an elaborate address in explanation of the details of the treaty which he had negotiated with the Chinese government.

All through the year 1859 the subject of running the street-cars on Sunday was discussed with much feeling in the press and the pulpit, and finally was carried into the courts. There was an emphatic demand from a considerable number of the people that they should be accommodated on Sundays in the new cars. The opponents of Sunday travel, who had a powerful following, resisted this demand with great zeal and activity. That the sentiment in favor of it was not confined entirely to the non-religious classes of the community was shown in the petitions which some of the Lutherans of Frankford sent to the Legislature during the winter, praying for a modification of the Sunday laws that would enable them to travel in the cars on Sunday. The agitation became so persistent that, on the 10th of July, the Green and Coates Street Railway Company, together with the Girard College (Ridge Avenue) line, determined to bring the matter to an issue. The running of cars on that day by the former company gave great offense to the congregation of the Green Street Methodist Church, of which Rev. George Duffield was pastor. They lodged a complaint with the mayor, and in the mean time a meeting was held at Spring Garden Hall on the 13th of July, to protest against the alleged desecration of the Sabbath. It was presided over by J. H. Shillingford, and in the course of the speech-making William S. Pierce intimated that some "Saturday night

the Green and Coates Railway Company might find a square of their road torn up, as was done years ago with another railroad company by the women of Kensington." This remark elicited much attention and criticism at the time, and was sharply commented upon, even by the Rev. John Chambers, one of the most earnest champions of the Sunday laws. A few nights afterward another meeting was held in the same hall, at which resolutions were passed to the effect that the running of the cars on Sunday would disturb the worship of God, would impair the morals of the public, would cause much additional labor, would create a great demand for intoxicating liquors, would tempt the laboring classes to squander their money, and would expose the suburbs of the city to plunderers. The supporters of this and of other meetings with a like object called upon Mayor Henry, and obtained his promise that in case of a repetition of the running of cars on Sunday, the 17th, he would interfere with his police. Accordingly, on that day a detachment of policemen, under the command of Chief Ruggles, was detailed to watch the movements of the employes of the Green and Coates Street Company. Amid the somewhat excitable disapprobation of a crowd which did not relish the interference, the officers stopped a car that had been started out, and arrested the driver, one William H. Jeandelle. This arrest was productive of a very lively agitation. Judge Oswald Thompson, of the Common Pleas, decided, in *habeas corpus* proceedings, that the prisoner should be held for a breach of the peace. On the night of the same day that he made this decision, the 23d of July, five thousand citizens assembled in Independence Square to protest against it, and appointed a committee of ninety-six to agitate for the repeal of the Sunday law. A week afterward there was another demonstration by the same element, at the same place, at which John M. Butler presided, and at which speeches were made by Josiah Bond, C. H. DeWolf, J. Solis Cohen, William B. Sipes, Dr. L. M. Coates, John O'Byrne, and Dr. C. E. Kamerly. In the autumn, when the Jeandelle case came up before Judge Ludlow, he discharged the prisoner on the ground that the charge, which was committing a breach of the peace, and not a violation of the Sunday laws, had not been made out. But the railway companies were not ready to face any more opposition for the present, and the Green and Coates Street Company decided, by a unanimous vote of its stockholders, not to run cars on Sunday.¹

The merchants of the city were disposed to be enthusiastic over a project which was formulated this year for establishing a line of steamships between

¹ The newspapers and the clergy were exceedingly animated in carrying on this exciting controversy. Two sermons, one delivered by the Rev. I. D. Williamson and the other by Rev. William Cathcart, of the Second Baptist Church, dissenting from the view that religion needed to be enforced by the civil law, and that such prosecution was persecution, attracted particular attention.

Philadelphia and Liverpool, and which in September had come sufficiently to a head to warrant the election of a board of directors, consisting of George H. Stuart, M. W. Baldwin, J. Edgar Thomson, Charles Macalister, and S. Morris Waln, and which was known under the title of the "Philadelphia and Crescent Navigation Company." About the same time the Pennsylvania Railroad Company, which was desirous of locating a terminus on the Delaware front, had under consideration two plans,—one for crossing the Schuylkill at Gray's Ferry, and running through the region known as the "Neck" to Greenwich Point, and the other for crossing the Schuylkill on a line with the newly-opened Powelton Avenue, and then reaching the Delaware through a tunnel, which was to be constructed under Callowhill Street, at a cost of a million dollars. This scheme was proposed by S. K. Hoxie, was urged by him with great vigor, and had many advocates. The company, however, chose the other plan.

The chief political event in the fall election was the struggle between Horn R. Kneass, the Democratic candidate, and William B. Mann, the People's candidate, to obtain the district-attorneyship. Beyond this the campaign was devoid of interest. Mr. Mann, together with the remainder of the People's ticket, was successful by a majority of 3000 votes.

The centennial anniversary of the birth of Schiller was celebrated on the 9th and 10th of November. On the evening of the former day there was a torchlight parade by the German population, together with a display of fire-works and the illumination of dwellings. A jubilee took place at the Academy of Music on the following day, when an oration in German was delivered by Gustavus Remak, and one in English by Rev. William H. Furness.

The John Brown raid at Harper's Ferry was the beginning of a popular excitement which may be said not to have entirely quieted down until after the close of the civil war. The most bitter public feeling, exceeding the vehemence of any of the previous agitations of the slavery question, was called forth by this event. On the 28th of October, Joshua R. Giddings, the venerable abolitionist, explained at National Hall what relation he had sustained toward Brown, but as yet no serious signs of a bad public temper had been manifested. When, however, the leader of the famous insurrection was hanged, on the 2d of December, the abolitionists living in Philadelphia were in a perfect fever-heat of indignation. In the morning they held a meeting in National Hall, at which James Mott presided, and in which Lucretia Mott, Theodore Tilton, Mary Grew, and Robert Purvis were the chief participants. When it came the turn of Mr. Purvis to speak, he was unable to proceed for some time on account of the storm of hisses and groans which greeted him from the pro-Southern element that had also responded to the call. When he was able to be heard, he made the remarkable as-

sertion that "John Brown would be looked upon as the Jesus Christ of the nineteenth century." It was only with the protection given by a force of policemen under the command of Chief Ruggles that the meeting was able to adjourn without violence.

Two days afterward the body of Brown arrived in the city at the Broad and Prime [Washington Avenue] Streets Depot. Mayor Henry was determined that it should not remain here if he could possibly secure some other disposition of it. To the requests of the abolitionists at the depot, and of a deputation of colored men from a "sympathy prayer meeting" that had been held at the Shiloh Baptist Church, Mr. Henry replied that the peace of the city was more important than their arguments. When the train arrived with the remains of Brown, it was found necessary to practice a trick on the clamorous crowd in the streets. A box, decked out as if it were a coffin, was solemnly carried out by six men, and soon afterward the real body was quietly and safely conveyed to the New York Ferry at Walnut Street wharf.

These demonstrations by the sympathizers with Brown aroused the passions of the lawless, and caused no little concern to the mercantile interest. The abolitionists met with little consideration from the great majority of the people. The feeling of the community at this time was essentially a conservative one. Even the reticent and dispassionate *Ledger* was moved to denounce the "band of fanatics" and "incendiaries" for what was called their treasonable proceedings. Business men, who were largely interested in the Southern trade, were particularly anxious to impress upon the South a sense of their hostility to the John Brown movement. A general meeting, called without distinction as to parties, for the purpose of "preserving the Union," and said to be one of the largest meetings ever held in the city, took place at Jayne's Hall, December 7th. Joseph R. Ingersoll was made chairman. The resolutions assured "our brethren of the South that there exists a determined spirit to assert and maintain the Constitution of the Union, and the rights of the States under it." The addresses, delivered by William B. Reed, Richard Vaux, Charles Ingersoll, Robert Tyler, James Page, Isaac Hazlehurst, Benjamin Harris Brewster, Henry T. King, and John C. Bullitt (the last-named speaking from the balcony of the hall), were in a similar vein. In the following week the annual meeting of the Pennsylvania Anti-Slavery Society was held at the Assembly Building, and the speeches delivered by Theodore Tilton and Oliver Johnson, of New York, and Mary Grew, served only to intensify the prevailing excitement.

A telegram from Governor Wise, of Virginia, to the Southern young men at the Philadelphia medical colleges, requesting them to withdraw from those institutions, and assuring them that if they should come to Richmond and other cities in the South to finish their education, they would receive the heartiest welcome,

helped to create fresh anxiety and alarm. A large number of the medical students immediately accepted the invitation. Just at this time all the vigilance of Mayor Henry and his officers was needed to prevent a riotous outbreak. George William Curtis, of New York, had been announced to deliver an address at National Hall on the 15th of December, his subject being the "Present Aspect of the Slavery Question." There was a desire on the part of the extreme anti-abolition element to prevent Mr. Curtis from speaking at all. In order to effect this purpose, a meeting was held on the street in front of National Hall, and warm speeches on behalf of the Union were made by John D. Miles and John S. Painter. Fearing that the two meetings would come into violent collision with each other, the mayor had ordered fifty policemen to protect Mr. Curtis. The orator was introduced by Judge Kelley, and it was only amid great confusion and many interruptions, with some stone throwing, that he was able to finish his address.

Among the other events of interest that took place during the year 1859 was the opening of the Girard College (Ridge Avenue) Railway on the 14th of March; the repetition in the spring by Edward Everett of his famous lecture on Washington at the Academy of Music; the meeting on September 7th of the national convention on prison discipline; the convention of the American Vegetarian Society on the 22d of September; the continuation of Joseph Barker's addresses; the launching of the United States war sloop "Pawnee" on the 10th of October; the celebrated cricket match between the All England eleven and an American twenty-two, in which the Englishmen were the winners by six wickets; the beginning of work in October on the Reading Railroad Depot at Broad and Callowhill; the opening, on the 27th of October, of the Pennsylvania Hospital for the Insane; and the opening of the Eastern Market on the 26th of November.

The year 1860 might be concisely described as a period of politics. From almost the beginning of January to the close of December the slavery question, together with its bearings on the Presidential election, was a subject of continuous agitation. As early as 1859 the Central Republican Club had, in preparation for the campaign of 1860, opened its rooms at Seventh and Chestnut Streets, with addresses by George A. Coffey and George Inman Riche. Early in the year the class of politicians who had been Fillmore men in 1856 began to make preparations for the Presidential struggle by founding a new political organization. On the 14th of January, under the guise of a dinner to Bailie Peyton, of Tennessee, the movement was started in Philadelphia. The parquet of the Academy of Music was floored over, and upward of seven hundred citizens occupied seats at the tables. The parquet circle and the balcony were filled with spectators. The principal speakers were John J. Crittenden, of Kentucky, Horace Maynard, of Ten-

nessee, Thomas W. Gilmer, of North Carolina, and Morton McMichael. This was the first manifestation in this city of the national movement for a Constitutional Union party, which culminated in the nomination of Bell and Everett. The spring election was looked forward to with intense interest. The campaign began as early as February, when Andrew G. Curtin, the nominee for Governor, who had been selected by the convention of the People's party, was indorsed at a meeting of the Central Republican Club, Judge Kelley and A. K. McClure being the speakers. A short time after this there was a great Democratic ratification of the nomination of Henry D. Foster. The meeting was held in National Hall, and among the speakers were Henry M. Phillips, Hendrick B. Wright, and John Cessna. The contest between John Robbins and Mayor Henry for the office of mayor, drew out every available stump speaker from both parties. The Democrats made the most desperate efforts to recover the mayoralty. Party lines were rigidly drawn, for it was generally recognized that the result would have an important effect on the Presidential election. When the votes were counted, in May, it was found that the People's party had re-elected Mayor Henry by a majority of 882 votes.

The fact that the national convention of the Democracy held its prolonged sessions at Charleston during the most important part of this campaign deprived the Democrats of the services of some of their leaders. The Pennsylvania delegation, with the Philadelphians under the leadership of Lewis C. Cassidy, had embarked for that city on the 18th of April in the steamship "Keystone State." A crowd of several thousand people cheering for Stephen A. Douglas saw the vessel off. On this occasion five hundred bottles of domestic liquors, as well as a proportionate supply of beer and wines, were put on board for the comfort of the political tourists.

When John Bell was nominated for President by the Constitutional Union party he was stopping in the city, at the La Pierre House, where his admirers congregated together on the night of May 11th, and honored him with a serenade. The nomination of Abraham Lincoln by the National Republican convention at Chicago was received with general satisfaction by the members of that party. On the 26th of May Independence Square was crowded with them at a meeting called to ratify the nominations. The addresses of Lyman Trumbull, of Illinois, John Sherman, of Ohio, Galusha A. Grow, of Pennsylvania, William Dunn, of Indiana, C. F. Train, of Massachusetts, John B. Myers and Robert P. King, of the city, were received with great enthusiasm. Forming in procession, the crowd then marched up to the Continental Hotel, which had been recently opened, and serenaded Mr. Sherman and Mr. Grow.

The hotel was then as great an object of interest to the populace as any of the distinguished speakers.

It was considered at the time by good judges to be the most magnificent hotel in the country. During the previous year its construction, under the supervision of architect John McArthur, Jr., had been watched with much interest. The earliest public meeting in advocacy of such a hotel had been held in March, 1857, at the Board of Trade rooms, under the direction of Caleb Cope, at which time \$200,000 had been subscribed, but nothing had been done in the way of selecting a site. After considerable controversy, a stock company that was formed to build the hotel decided to purchase the lot at the southeast corner of Ninth and Chestnut Streets for \$355,000, and in August of the same year work was begun by tearing down the ruins of the old Museum building which had occupied the site. With the exception of an interruption in the winter of 1858, caused by the panicky times, the work went steadily on until the completion of the edifice in February, 1860. On the 13th of that month it was opened to the stockholders for inspection, and soon afterward for the accommodation of guests, having been rented to Paran Stevens for twelve years, at \$40,000 a year.

The experiment of running steam-cars on a passenger railway was made in March, on the Fifth and Sixth Streets Railway running to Frankford. It was calculated that one of these cars could be run for a dollar a day, and they were subsequently introduced on that road. About the same time the subject of salting the tracks of the railways after snow-storms first began to excite some adverse comment. It was calculated that during this winter thirty thousand bushels of salt had been scattered over the tracks of the various companies.

The dangerous excitement that had attended the Dangerfield slave case was partially revived on the 27th of March, when Judge Cadwalader remanded Moses Horner, a fugitive slave, to the custody of his Southern owners. When Horner was placed in a carriage to be taken to prison, the vehicle was surrounded by a howling mob, largely composed of colored men, who attempted to rescue him, and who came into a lively collision with the police. Benjamin Harris Brewster represented the complainants in this case. A night or two afterward his admirers serenaded him, in appreciation of his course. In the speech which he made on that occasion, Mr. Brewster declared that "the institution of domestic servitude is a great political necessity,—politically right, socially right, and morally right."

The Arcade, which for many years had been one of the best known of Philadelphia buildings, was demolished in April, and on its site were erected large and commodious buildings by Dr. Jayne. John McArthur, Jr., was the architect of these structures, which since have been used for commercial purposes.

During the spring of this year Philadelphia was the rendezvous of a large number of Mormon recruits, preparatory to their departure for Utah. They

had even established a "conference" among themselves. On the 7th of May about three hundred and fifty of them, joined with as many more from New York, took their departure for the West, thoroughly armed and equipped. Most of those who had been stopping in Philadelphia were English men and women, but fifty of them were natives of this city.

The dedication of a monument in Roxborough on the 28th of May, was the occasion of an interesting and somewhat lively demonstration in that section of the city. This shaft was erected in remembrance of the brave Virginia soldiers who were slaughtered at Wood's barn in 1777. The oration was delivered by Horatio Gates Jones, and there was a military display under the command of Maj. Charles Thomson Jones. While the ceremonies were in progress there was a disagreement between Maj. Jones and Brig.-Gen. Miles as to the places they should occupy at the head of the column. It resulted in the withdrawal of Miles and his soldiers, a proceeding which drew upon him much unfavorable comment.

The arrival of the famous Japanese embassy of 1860 had been awaited for some weeks with an intense feeling of curiosity. On the 9th of June there was an immense mass of humanity at the Broad and Prime Streets Depot to catch a glimpse of the ambassadors. The hospitality of the city was extended to them by Mayor Henry, and by the time the military parade was ready to start it seemed as if the whole population had poured out into the streets to see the princes of Nippon. It was estimated that, with the numerous visitors who came to the city from the country, the multitude numbered half a million people. The Japanese were taken to the Continental Hotel, and during all the next day the streets outside were crowded with people, eager to catch sight of the strange faces of these Asiatic dignitaries. On Monday, the 11th, they were escorted to factories, stores, and public institutions, on the 12th they attended a special *matinée* performance, consisting of farce, pantomime, and opera, at the Academy of Music; on another day they witnessed a balloon ascension in the First Ward, and much of the remainder of their stay was occupied at the Mint, in comparing and testing our coins with those of Japan. The hospitality of the citizens was practically unbounded; indeed, during that week, there prevailed a "Japanese fever." So strong was it that five days after their arrival Councils could not get a quorum together. The presents received by the Japanese and the articles which they purchased while in the city were valued at one hundred thousand dollars. For some time the reigning sensation of that summer was the popular, nimble-witted "Japanese Tommy" and his American lady-loves. When the ambassadors left this country they donated twenty thousand dollars to the policemen who in the various cities had taken care of them, and more than three thousand dollars of this amount was subsequently distributed among the policemen of Philadelphia.

The question of erecting public buildings on Penn Square was agitated with great earnestness during the greater part of this year. A commission which had been called into being by an act of Assembly, had decided that the site for them should be at that point. The controversy was vigorous, and at times bitter, the opponents of the commission declaring that Broad and Market Streets was a location too far west, and that Independence Square should have been chosen. With the coming on of the civil war this movement received a check, and was not revived until ten years afterward.

The visit which Col. Elmer E. Ellsworth's "Chicago Zouaves" made in the last week of July, had no small effect in arousing a military spirit among the young men of the city, and the melancholy ending of Ellsworth's career a year later at Alexandria, together with the renown which his men achieved in the early days of the Rebellion, caused this visit to be remembered subsequently with much more than ordinary interest.

The mammoth vessel, the "Great Eastern," which was anchored off Cape May toward the end of July, was visited on the 31st of that month by a large excursion-party from Philadelphia on board the steamer "John A. Warner." The excursion was ill managed, so much so that an indignation meeting was held in the city several days afterward.

John C. Heenan, the prize-fighter, who was then an object of much admiration from a considerable number of Americans in consequence of his recent pugilistic contest in England with Sayers, arrived in the city on the 15th of August. A popular reception was accorded him at Camac's woods, and in the evening his admirers assembled to the number of several thousand in and around the Girard House and complimented him with a serenade.

The visit of the Prince of Wales on the 9th of October was not attended with any of those demonstrations of popular excitement that had characterized a few months before the arrival of the Japanese princes. In company with Mayor Henry he was quietly driven in a carriage to the Continental Hotel. The October election took place on this day, and the royal visitor was much interested in its results. On the following day he made an inspection of our public institutions, attended the races at Point Breeze, and in the evening was welcomed at the Academy of Music in a private box by a brilliant audience. On this occasion one act of the opera of "La Traviata" was performed, with Pauline Colson as *Violetta*, and the whole of the opera of "Martha," with young Adelina Patti as *Henrietta*.

The Presidential campaign of 1860 followed closely upon the spring election. It was accompanied also by a canvass for the Governorship of Pennsylvania. After the nomination of Stephen A. Douglas for the

Presidency, and that of John C. Breckinridge for the same office, the split in the ranks of the local Democracy over national questions became wider. It did not extend, however, to State and local issues. They were substantially united in their support of Henry D. Foster for Governor. The larger proportion of the Bell and Everett men was also in his favor. The People's party, which by this time had really become the Republican party, although still not generally known in Philadelphia by that title, supported Lincoln for President, and Curtin for Governor, with all the enthusiasm of which they were capable. They had what they had never possessed before,—a well-disciplined organization, under the guidance of Alexander K. McClure as chairman of the State Committee. In the city they made themselves particularly active and conspicuous in clubs and associations, known under such names as the "Wide Awakes," "Lincoln Defenders," "Republican Invincibles," and "Rail Splitters." The Constitutional Union leaders also aroused a fair share of enthusiasm for their candidates by organizing such bodies as the "Bell Ringers" and the "Minute-men of '56." The followers of Douglas were at all times exceedingly demonstrative, and the Breckinridge men were not far behind them in this respect. The amount of money spent on public meetings and parades had not, up to this time, been exceeded in political campaigns. It would be impossible, so numerous were these gatherings, to give an account in a brief space of the most interesting and significant of them. In the main they were all conducted with as much decorum as could be expected in a period of so much contention and rivalry, and with but little of the violence that had been anticipated at the opening of the year.

The election in October resulted in the success of the People's or Republican ticket, headed by Alfred C. Harmer for recorder of deeds, by an average majority of 2000. The Republicans elected three out of their four Congressional candidates, but in the city Curtin, their candidate for Governor, was 2000 behind Foster. He was elected, however, by his majorities in the interior of the State, and the Republicans were wildly jubilant over the assurance thus given them of the coming triumph of Mr. Lincoln. The Democrats immediately lost heart. The remainder of the Presidential campaign was without excitement, and even before the election, newspapers which had not supported him began to speak of the "Lincoln administration." When the votes were counted up, on the 6th of November, it was found that, while the Bell ticket had received 7131, and the Breckinridge and the Douglas tickets together 30,053, the Lincoln ticket had obtained 39,223, or a majority of more than 2000 over all, and the first of the long line of distinctively Republican victories in Philadelphia had been achieved.

CHAPTER XXVI.

THE CIVIL WAR.¹

ON the 6th of November, 1860, the long political struggle between the North and the South on the slavery question, which began in the Constitutional Convention of 1787, and which was intensified by the purchase of Louisiana in 1803, ended with the election to the Presidency of Abraham Lincoln and the triumph of the Republican party. The accession of the anti-slavery party to political power filled the South with dismay and created the greatest excitement throughout the country. Hardly had the result been ascertained before some of the extreme Southern States began military preparations, and set on foot measures to carry into effect their oft-repeated threats of secession and combination in resistance to alleged Northern encroachments. Meetings were held in every city, town, and village of the South, and these were addressed in vehement language by members of Congress and other prominent speakers. Resistance to the authority of the new administration and the duty of the Southern States to secede from the Union were the chief topics of their impassioned appeals to the people. On the 20th of December the State convention of South Carolina, after a brief debate, passed the ordinance of secession by a unanimous vote, and on the following day a declaration of the causes which had led to this action was also adopted.

The announcement of the passage of the ordinance of secession excited general enthusiasm in all the more Southern slave States, but in other slave States, particularly the border States, it served to intensify the painful feeling with which their people had watched the progress of events in South Carolina. That the action of the latter State had been hasty and ill-judged a majority even of the people of the South admitted, and this fact gave additional poignancy to the general sorrow with which this first disunion movement was regarded. By the passage of the South Carolina ordinance of secession an impetus was given to the prevailing excitement in the South, and the measures of the cotton States, looking in the same direction, were greatly accelerated. Mississippi followed the example of South Carolina on the 9th of January, 1861; Alabama and Florida, January 11th;

Georgia, January 20th; Louisiana, January 26th; Texas, February 1st; Virginia, April 17th; Tennessee, May 6th; Arkansas, May 18th; North Carolina, May 21st; and Kentucky, November 20th.

The progress of these events caused intense excitement in Philadelphia, where the people were pronounced and decided in their support of the Union. The geographical position of the State of Pennsylvania, added to its overshadowing political importance, made the duties of the Governor peculiarly responsible and perplexing. Separated from the slave States by an imaginary line, and looked to from both the North and the South to exhaust its great moral and political power to avert the threatened conflict, every expression from its government was awaited with profound interest. It was under these grave circumstances that Andrew G. Curtin took the gubernatorial chair. The conflict which was then raging throughout the country obliterated old and sacred landmarks in political teaching, but in his inaugural address of January, 1861, Governor Curtin proclaimed the duties of patriotism, and sounded the sentiments of the North upon the relations of the States to each other. In that address he said, "No one who knows the history of Pennsylvania, and understands the opinions and feelings of her people, can justly charge us with hostility to our brethren of other States. We regard them as friends and fellow-countrymen, in whose welfare we feel a kindred interest, and we recognize in their broadest extent all our constitutional obligations to them."

Upon the right of a State to secede from the Union, he said, "No part of the people, no State, nor combination of States, can voluntarily secede from the Union, nor absolve themselves from their obligations to it. To permit a State to withdraw at pleasure from the Union without the consent of the rest, is to confess that our government is a failure. Pennsylvania can never acquiesce in such a conspiracy, nor assent to a doctrine which involves the destruction of the government. If the government is to exist all the requirements of the Constitution must be obeyed; and it must have power adequate to the enforcement of the supreme law of the land in every State. It is the first duty of the national authorities to stay the progress of anarchy and enforce the laws, and Pennsylvania, with a united people, will give them an honest, faithful, and active support. The people mean to preserve the integrity of the National Union at every hazard."

Again on the 30th of April, when the Legislature met in extraordinary session in obedience to his proclamation, he said, "The time is past for temporizing or forbearing with the rebellion, the most causeless in history. . . . The insurrection must now be met by force of arms, and a quarter of a million of Pennsylvania's sons will answer the call to arms, if need be, to wrest us from a reign of anarchy and plunder, and secure for themselves and their children, for

¹ In the limited space at our command it is impossible to treat that portion of the history of the city of Philadelphia between the election of President Lincoln, on Nov. 6, 1860, and 1866, except in the briefest possible manner. During the period of the great civil war, almost every day bristled with prominent local events, and every week gave birth to numberless incidents of local or general interest. The magnitude of the subject and the multiplicity of the details required in a connected narrative of one of the most interesting and stirring epochs in the history of the city demand a far more extended and elaborate treatment than can be given within our present limits, and we have therefore been forced, reluctantly, to content ourselves with simply a chronological presentation of the most prominent events in Philadelphia history from Nov. 6, 1860, to January, 1866.

ages to come, the perpetuity of this government and its beneficent institutions."

Finally the Legislature of the State passed the following resolutions, early in the session of 1861, upon the subject of secession, then being actively pushed in the Southern States, which were a fair index to the temper of the people, and which gave no uncertain sound as to the course which Pennsylvania would pursue in the impending crisis:

"*Resolved*, That if the people of any State in this Union are not in full enjoyment of all the benefits to be secured by them by the said Constitution, if their rights under it are disregarded, their tranquillity disturbed, their prosperity retarded, or their liberties imperiled by the people of any other State, full and adequate redress can and ought to be provided for such grievances through the action of Congress and other proper departments of the national government. That we adopt the sentiment and language of President Andrew Jackson, expressed in his message to Congress on the 16th of January, 1833, 'that the right of a people of a single State to absolve themselves at will and without the consent of the other States from their most solemn obligations, and hazard the liberties and happiness of millions composing this Union, cannot be acknowledged, and that such authority is utterly repugnant, both to the principles upon which the general government is constituted, and the objects which it was expressly formed to attain.' That the Constitution of the United States of America contains all the powers necessary to the maintenance of its authority, and it is the solemn and most imperative duty of the government to adopt and carry into effect whatever measures are necessary to that end; and the faith and power of Pennsylvania are hereby pledged to the support of such measures in any manner, and to any extent that may be required of her by the constituted authorities of the United States. That all plots, conspiracies, and warlike demonstrations against the United States, in any section of the country, are treasonable in character, and whatever power of the government is necessary to their suppression should be supplied to that purpose without hesitation or delay."

The authorities of Pennsylvania understood the magnitude of the impending conflict, and resolved to prepare for it according to their appreciation of the public danger. With a long line of southern border exposed to the sudden incursions of the Confederates, and the Union army at first composed of only three months' men, and likely even with these to be outnumbered in the field, they determined not to rely upon the mistaken conceptions of the Federal authorities for the protection of the State. Immediate steps were taken to organize troops, subject to the call of the Federal government, if needed, and to be at all times in readiness for active service. And when the nation stood appalled after the disasters at Bull Run, and Washington was exposed to the attacks of the

Confederates, Pennsylvania was the first to forward a thoroughly organized and equipped military force to strengthen and reinspire the Union army in defense of the capital. The reputation of 1860 the State for promptness in furnishing troops when called for by the government was maintained throughout the war. Pennsylvania, during this crisis, was an empire in itself, and its vast wealth and resources were constantly tempting to devastate it. She, however, never asked that the armies in the field should be diminished to defend her territory or maintain the State's authority; but, on the contrary, she cheerfully supplied every demand for troops as fast as called for, and in addition always displayed a willingness to raise forces for her local protection. The Legislature gave an attentive ear to the government appeals for aid in defense of the Union, and voted liberally millions of money in support of the cause. Besides all this, Pennsylvania was ceaseless in her devotion to the interests and wants of those whom the State had given for the national defense. She sent kind agents to the field, who visited the soldiers in their camps and provided for their wants. Wherever were sickness, or wounds, or death, there was the official agent of the State to perform every duty to the living and the last rites to the dead. The bodies of the deceased were brought back to sleep with their kindred, and their names enrolled in the lists of the martyred patriots.

The election of Mr. Lincoln excited comparatively little interest in Philadelphia. The result had been accepted beforehand as a foregone conclusion. "We never saw an election," said a Philadelphia paper of November 7th, "for even ward officers, that excited so little interest. . . . After nightfall persons began to assemble about the newspaper- and telegraph-offices to get some news from New York. But there was even here nothing like the interest usually evinced in a Presidential election." About nine o'clock at night a procession of men and boys made its appearance on Chestnut Street, with a transparency at its head bearing the inscription, "Lincoln on his way to the White House." The illustrations of this text were, however, so equivocal as to make it uncertain what party the men belonged to, and, finally, when the procession reached Fifth and Chestnut Streets, a disturbance occurred, which caused the interference of the police and the arrest of the more active participants. During the evening processions were formed by the Lincoln clubs belonging to the different wards, each having transparencies with the majority given in the ward represented by it.

—At a meeting of the Democratic Association of the Twenty-second Ward, held at their hall in Germantown on the 8th of November, Harry Ingersoll, late Democratic nominee from the Fifth Congressional District, presiding, and Franklin Jones, secretary, resolutions were adopted regretting the result of the election, but declaring it to be the duty of all

Democrats to acquiesce in the will of the majority constitutionally expressed. At the same time it was resolved "to extend to that portion of our 1860] fellow-countrymen of the South, who think differently, the assurance of a cordial and respectful fellow-feeling, under the invasion of their constitutional rights and domestic peace and dignity to which they have been so long subjected by the controlling voice of the party which has now prevailed in the choice of a Chief Magistrate." The South was also urged to reflect well before proceeding to extreme measures, and was appealed to not to desert "the weaker party at the North, struck down in their defense." The sentiments expressed by Mr. Lincoln in his speeches were denounced as being "subversive of our mixed federal and national system," and it was declared that they (the members of the meeting) were "not yet able to spare a single star or a single stripe from the glorious flag of the Union." Among those who advocated the resolutions were J. G. Gibson, A. S. Tourison, Albertis King, George W. Wolf, William Best, H. Harkins, and Harry Ingersoll.

—On the 22d of November the banks of Philadelphia determined to suspend specie payments. The measure was precipitated upon them, and the other banks of the Union, by the political agitation which had destroyed confidence between the North and South, suspended trade, and produced widespread monetary embarrassments. The suspension, though it came suddenly upon the community, was generally regarded as unavoidable, and was acquiesced in as a probably temporary inconvenience, which a favorable turn in the aspect of political affairs might render of only short duration. The large manufacturing interests of Philadelphia, on the other hand, did not feel the effects of the crisis until some time after the election. The *Public Ledger* of November 27th said, "The present financial and political derangement of affairs does not seem to affect the large manufacturing interests of Philadelphia to any great extent. At least most of those we visited yesterday have their usual number of men employed, and are receiving orders and remittances from the South. . . . Some of the large manufacturers of furniture, which is sold to dealers in the South, have been somewhat affected, but as yet only a few men have been discharged. . . . The manufacturers of carriages, which are sold at wholesale to the South, feel the effects of the pressure considerably, but not to such an extent as yet as will be likely to lead to a general discharge of hands, for there are still orders arriving."

—Thursday, November 29th, was observed as Thanksgiving Day in Philadelphia with the usual services in the churches. Among the sermons preached on this occasion was a discourse by Rev. E. W. Hutter, on "The Blessings of the Union," delivered in St. Matthew's Lutheran Church, New Street below Fourth. Rev. W. T. Brantley preached at the First

Baptist Church, corner of Broad and Arch Streets, on the causes of the political troubles with which the country was afflicted. In the afternoon there was a parade of military organizations.

—At a meeting of manufacturers and business men of Philadelphia and vicinity, held at the Manufacturers' Exchange on the 1st of December, W. Blakely, of Delaware County, presiding, it was decided, in view of the business depression, to recommend to manufacturers of cotton and woolen goods that they should run their mills at half time until increased sales or reduced stocks justified full-time production once more. A resolution was also adopted to the effect that the longer selling of domestic dry-goods on eight and ten months' credit was impolitic.

—In the Select Council, on the 6th of December, Mr. Drayton offered the following:

"WHEREAS, There is great reason to fear that there is serious peril of the dissolution of the Union of these States, under whose protection we have grown to be a great and prosperous nation, and it is fitting that the citizens of Philadelphia,—that city in which the great principles of the Union were first embodied and promulgated,—should in some suitable way express their love for the Union and their devotion to its perpetuation, and to the strengthening of those bonds which unite us, whether of the North or the South, the East or the West, as one great and united people; therefore,

"Resolved, By the Select and Common Councils of the city of Philadelphia, that the mayor of the city be, and he is hereby requested by his proclamation, to invite our fellow-citizens who love the Union to assemble at the old State-House, at twelve noon of a day to be appointed for the purpose, there to express their attachment to the Constitution of the United States, and their love for the Union which it creates and protects.

"Resolved, That a joint special committee, consisting of six members from each chamber of Councils, to which shall be added the presidents, be appointed to co-operate with the mayor in such arrangements as may be proper in their judgment by way of preparation for such meeting."

The resolutions were adopted by a unanimous vote. In Common Council, after a prolonged discussion, the resolutions, as they came from Select Council, were passed by a vote of fifty-three to sixteen.

—It having been announced that George William Curtis would deliver an abolition lecture before the People's Literary Institute on the 13th of December, intimations were given out that if the lecturer attempted to speak there would be a disturbance, and it was said a mob had been organized to break up the assemblage. In consequence of these reports, Mayor Henry addressed a letter to J. W. White, chairman of the lecture committee of the institute, stating that the appearance of Mr. Curtis as a lecturer would be extremely unwise, and that if he possessed the lawful power he would not permit it. The lessee of Concert Hall, in which the lecture was to have been delivered, notified Mr. White that he had been informed officially that a riot was anticipated, and that, under the circumstances, he could not permit the hall to be used for the purpose indicated. The lecture was accordingly postponed.

—In accordance with the resolutions of the City Councils, Mayor Henry issued a proclamation calling a meeting of citizens in Independence Square, "to counsel together to avert the danger which threatens

our country." At the request of members of the bar who desired to participate, the courts adjourned over the day of meeting, and the navy-yard was closed by order of Commodore Stewart. The meeting was held on Thursday, December 13th, in the presence of an immense concourse of spectators, estimated to number fifty thousand persons. Charles B. Trego called the meeting to order, and nominated as chairman Alexander Henry, mayor of Philadelphia, who was received with cheers. William H. Drayton then read the following list of vice-presidents and secretaries:

Vice-Presidents, Samuel Breck, Charles Macalester, C. W. Poultney, William J. Duane, John B. Myers, John M. Irwin, Edward Coles, Matthew Baird, Joseph Lea, Charles J. Ingersoll, John B. Austin, A. J. Boswell, David S. Brown, L. J. Leberman, Thomas Barnett, Robert Morris, Benjamin Gerhard, Pierce Butler, T. T. Tasker, Sr., John Thomson, Robert Kelton, Anthony J. Drexel, Charles S. Cox, John T. Smith, M. Robinson, V. L. Bradford, G. W. Toland, Gen. Robert Patterson, S. M. Felton, Robert Ewing, D. Rodney King, Peter A. Keyser, Josiah Randall, Edward S. Whelen, William Martin, Robert Steen, C. R. Moore, W. A. Blanchard, Dr. C. D. Meigs, E. G. Dutilh, Abraham Hart, J. E. Thomson, Elijah Dallett, Thomas H. Powers, John Robbins, Jr., Jasper Harding, George D. Rosengarten, Charles H. Fisher, John L. Goddard, Samuel V. Merrick, J. Eisenbrey, Jr., Stephen Colwell, Eli K. Price, J. H. Campbell, Charles N. Retilly, C. W. Littell, E. S. Amer, William Sergeant, W. Clifford, J. C. Fryer, J. Ballenger.

Right Rev. Dr. Potter, Protestant Episcopal bishop of Pennsylvania, at the invitation of Mayor Henry, delivered a prayer, in which he petitioned that "a double portion of the wisdom and patri- [1860] otism of the fathers" might "descend and rest upon their sons, that from this place there may go forth an influence which will be felt throughout the republic,—an influence which will tend to the healing of the waters of strife and discord, and to the bringing back to our distracted land the reign of unity and concord." Mayor Henry then delivered an address, in which he stated that the people of Philadelphia were now called upon to avow their unbroken attachment to the Union and their steadfast determination that no honest effort should be left untried to preserve its integrity. John B. Myers read a series of resolutions proclaiming the attachment of the people of Philadelphia to the Union, pledging that every statute in force in Pennsylvania, if there were any such, invading the constitutional rights of a sister State, should be repealed, recognizing the obligations of the act of Congress of 1850, commonly known as the fugitive slave law, pointing "with pride and satisfaction" to the recent punishment and conviction in Philadelphia of those who had broken the provisions of the fugitive slave law, by aiding in the attempted rescue of a slave, as proof that Philadelphia was faithful in her obedience to the law; recommending to the Legislature of Pennsylvania the passage of a law giving compensation in case of the rescue of a slave by the county in which such rescue occurred; acknowledging and submitting "obediently and cheerfully" to the decisions of the Supreme Court of the United States as to the recognition of slaves as property and the rights of slave-owners in the Territories; declaring that "all denunciations of slavery as existing in the United States, and of our fellow-citizens who maintain that institution and who hold slaves under it, are inconsistent with that spirit of brotherhood and kindness which ought to animate all who live under and profess to support the Constitution of the American Union;" cordially approving the suggestion that a convention of delegates from the several States be held for the purpose of suggesting remedies for the dangers that menaced the Union, and appealing to those Southern States which were considering the question of seceding from the Union to forbear and not destroy "so great and so fair an inheritance." Speeches indorsing the resolutions were made by Hon. Joseph R. Ingersoll, Judge Woodward, Charles E. Lex, Theodore Cuyler, and Isaac Hazlehurst, after which S. Benton offered a resolution, which was adopted, that the presiding officer appoint a committee of three citizens to prepare a report of the proceedings and provide for its widest possible circulation throughout the Union.

The demonstrations in behalf of union and peace were not confined to the mass-meeting. Nearly all the wholesale stores and many of the retail stores on

Second, Third, Market, Chestnut, and Eighth Streets were closed and decorated with flags. The Continental Hotel displayed three large American flags. The balcony was draped with the national colors, and along the front of the building was exhibited the motto "Concession before Secession." A number of private dwellings were decorated with bunting, and attached to the horses and cars of the street railway lines were small streamers of red, white, and blue. On the 15th it was announced that Mayor Henry had been deputed to transmit the resolutions adopted by the meeting and reports of the speeches to the authorities of South Carolina.

—On the 14th of December a meeting of the Twenty-second Ward Democratic Association was held in Germantown, which also included "friends of the Union irrespective of party." Benjamin Rush presided. George W. Wolf offered a series of resolutions, which were adopted, approving the measures recommended by the Union meeting in Independence Square, and cordially responding "to all the inspiring proceedings and patriotic resolutions of the great Union demonstration." A resolution offered by C. W. Littell was also adopted, commending Governor Hicks, of Maryland, for "his declination to convene the Legislature of his State for the purpose of adopting measures preparatory to her secession from the Union." A. King having been called to the chair, the president, Benjamin Rush, offered a series of resolutions, which were unanimously adopted, declaring that the meeting could give "no countenance to the extraordinary doctrine lately set up, that this great Union possesses no power to maintain its integrity," and that it contemplated with infinite pain the projected secession of South Carolina, hoping, however, that she would not put it out of her power to retrace her steps. Addresses on behalf of the Union and conciliation, and in favor of securing the just and equal rights of all the States, were delivered by Mr. Rush, John S. Littell, Henry Flanders, Emmanuel Rey, and Samuel Johnson.

—December 18th it was announced that Mayor Henry had selected S. Benton, J. B. Lippincott, and J. S. Newlin as a committee to attend to the distribution of the pamphlet containing a report of the proceedings of the Union mass-meeting.

1861.—Desiring to obtain a parade-ground for the troops under his command, Gen. Patterson, who was then major-general First Division Pennsylvania Volunteers, made application early in the fall of 1860 to the City Councils for permission to use the arsenal lot. The Councils referred him to City Solicitor Charles E. Lex, and a number of letters passed between Gen. Patterson and Mr. Lex, which were published in the newspapers of Jan. 2, 1861. The lot in question had been conveyed by the city of Philadelphia to the State of Pennsylvania as the site for an arsenal, but had been rented by the adjutant-general

to the Western Market Company. It was alleged that the adjutant-general had acted without authority and in violation of the agreement between the city and State. Gen. Patterson applied to City Solicitor Lex to know what steps could be taken to recover possession, and Mr. Lex replied that the only remedy he could suggest was the placing of a fence around the square by the military, and if the market company attempted to tear it down, the bringing of an action of trespass against them to test the right of the adjutant-general to make the lease complained of. Mr. Lex's advice did not satisfy Gen. Patterson, who, in a rather caustic letter, said, "I cannot bring myself to believe that when Councils referred my communication to the City Solicitor, they intended that officer to tell the military to put up a fence around the arsenal yard, to employ men to watch for the person who tore the fence down, and whose butcher, huckster, or fish wagons were put on the arsenal yard or lot, and that then when this was ascertained, that the military or the major-general was to employ counsel, commence an action for trespass against the offenders, waste his time and dance attendance at courts in a controversy with persons who never had a transaction with him, and who, when he got a verdict, would probably not be able to pay the costs, and all this to test the right of the adjutant-general to make the lease complained of." He added that if it was Mr. Lex's opinion that the Councils intended, in referring his complaint to him (Lex), "that the military should incur the expense and trouble of protecting the public interests and property," he would thank him to say so. On the 26th of December, after the lapse of some weeks without action on the part of the City Solicitor, Gen. Patterson again wrote to the City Councils, stating that, having been disappointed in the hope that the City Solicitor would take measures to protect the interests of the city and have the fence removed by the market company replaced, as the lot was required for storing certain articles and for the use of the men under artillery instruction, he would make application to those bodies for the necessary action to have the lot fenced in.¹

—On the 3d of January, Capt. C. M. Berry, of the Minute-men of '76, fired three salutes of thirty-three guns in honor of Maj. Anderson, the commander at Fort Sumter, S. C.,—one at two o'clock at the corner of Broad and Spring Garden Streets, one at three o'clock at Broad and Prime Streets, and one at Reed Street wharf. After the firing three cheers were given by the spectators for Maj. Anderson. A salute of thirty-three guns was also fired by the Shiffler Hose Company in front of their house.

—On the evening of the same day a meeting was

¹ In printing this correspondence the *Press* remarked that "should hostilities grow out of our present unhappy divisions the counsels of Gen. Patterson will be sought by men of all parties," on account of "his large experience in military matters, his undoubted patriotism, his services in the Mexican war, and his devotion to his own State."

held at the Board of Trade rooms, mainly representative of the mercantile interests of the city, at which reports were received from the district committees charged with the work of procuring signatures to a memorial to the State Legislature praying for the repeal of certain sections of the statutes relating to the return of fugitive slaves, and also "asking for the repeal of any former legislation which might be deemed unfriendly to our Southern brethren." During the meeting it was stated by Marcellus Mundy that the memorialists were likely to be misunderstood, as from the memorial it might be made to appear that they desired the repeal of the law against kidnapping. They desired no such repeal, and Mr. Mundy suggested that the sections of the law which were desired to be repealed should be printed and sent to the Legislature along with the memorial.

—On the 4th of January a meeting composed of about one hundred and fifty leading citizens of Philadelphia was held at the Board of Trade rooms, Chestnut Street above Fifth, in pursuance of a call signed by C. G. Childs, Henry C. Carey, M. McMichael, Edward G. Webb, Charles Gilpin, Ellis Lewis, C. C. Lathrop, Lewis C. Cassidy, William D. Lewis, William H. Kern, and Daniel Dougherty. In the call it was stated that the object of the meeting was to consider "what measures should be adopted by the citizens of Philadelphia in the present condition of our national affairs to aid the constituted authorities of the State and general government in the enforcement of the laws, to remove all just ground of complaint against the Northern States, and to secure the perpetuity of the Union." On motion of Sheriff William H. Kern, C. G. Childs was called to the chair, and Lewis C. Cassidy, who had acted as secretary of a previous meeting, was, at the suggestion of Charles Gilpin, appointed secretary. In taking the chair Mr. Childs said that a few days before some half-dozen or more gentlemen had met at that place "to talk over matters, and ascertain, if possible, the best course to be pursued, and it was agreed that each should make inquiries among his circle of friends and acquaintances, in order that when they again met, by comparison they might ascertain what the sentiments of the people of Philadelphia were." The speaker expressed the hope that they would be able to present a united front, and that the measures adopted by the meeting would be in accordance with those patriotic feelings which ought to govern a State in which the Declaration of Independence was adopted and promulgated." In conclusion he said, "Let our action here to-day show that we are determined to uphold and strengthen the administration of the government, and to put down disunion and everything that looks like a separation of this glorious confederacy." Hon. Ellis Lewis, who had signed the call for the meeting, followed Mr. Childs, with the request that his name be stricken from the call, as he found that his views did not agree with those of some of the other gentle-

men, and he feared that, if urged, they might disturb the harmony of the meeting. The president replied that an effort had been made to bring together gentlemen of all political parties [1861 in order that a free interchange of opinion might be had, and he hoped Judge Lewis would remain and give the benefit of his counsel. C. C. Lathrop also urged Judge Lewis not to withdraw, and Daniel Dougherty called attention to the fact that as the motion of Chief Justice Lewis to have his name stricken from the call had not been seconded, it was not before the meeting, and he hoped he expressed the unanimous wish that he would remain and take part in the deliberation. If not considered discourteous he would offer a series of resolutions, with the request that they be referred to a committee, with the exception of one, on which he desired immediate action. This resolution was as follows:

"Resolved 4, That we heartily approve the conduct of Maj. Anderson, the gallant commander of the United States Fort Sumter, in Charleston Bay, and we thus express the unanimous feeling of our great State; and that we call upon the Federal authorities to furnish him such reinforcements as will convince him and the enemies of the republic that the laws are to be enforced at all hazards, and that resistance to these laws is treason, and will be punished as such."

The reading of the resolution was greeted with great applause, which was followed by cheers, when Judge Lewis said, "Mr. President, allow me the pleasure of seconding that resolution." Mr. Dougherty then read the other resolutions, which declared, first, "that there exists no right of peaceable secession, that secession is rebellion, and that the laws of the United States must be enforced by the proper authorities;" second, "that the Constitution is the supreme law of the land, and that the Union, like the Constitution, was intended to be perpetual, because it asserts no power of self-destruction, and provides for its alteration by a certain explicit mode;" third, "that we will cheerfully sustain the Federal government in all honorable efforts to maintain the Constitution and enforce the laws, but that any refusal to do so ought to be punished by the impeachment of all the guilty parties;" fourth, "that in view of the threatening aspect of public affairs, it is advisable that the military establishment of Pennsylvania should be put upon a new footing by the augmentation of the present regiments, and by such State legislation as will encourage all citizens to enroll themselves at once, either by increasing the present militia force or by an appropriation out of the public treasury;" fifth, that "we heartily indorse the sentiments of the message of Governor Packer, as well as the speeches of Robert M. Palmer, Speaker of the Senate, and Elisha W. Davis, Speaker of the House, as to the propriety of Pennsylvania repealing any law that may be improperly construed to give offense to the rights of the people of any sister State;" and, sixth, that "we call upon the senators and representatives of Pennsylvania in the Congress of the United States, without

reference to party ties, to join in any honorable adjustment that will restore the ties of brotherhood that until recently have united all the people of the republic." Charles Gilpin moved that these resolutions be referred to a committee; but, before the motion was put, Judge Lewis offered another set of resolutions, to the effect that, as the people of the Southern States had "contributed their blood and treasure in the acquisition of the Territories equally with those of the other States," the principle which recognizes the rights of all the States to the same "is founded on the clearest equity, and ought to be supported by every good citizen, unless a satisfactory division line can be settled by an amendment to the Constitution;" that "it is equally clear that every constitutional right in the Territories, as elsewhere, ought to be protected by appropriate legislation;" that "every State is bound by the Constitution of the United States to aid in delivering up fugitive slaves to their owners, and all legislation which refuses such and throws obstructions in the way is unconstitutional, and ought to be repealed and substituted in accordance with the Federal duties of the respective States;" that "no State has a constitutional right to resist the laws of the Federal government by force, whether in the form of partial nullification or secession, and that such armed resistance is treason and rebellion, and should be put down by the naval and military power of the nation;" that "if the Northern States should be unwilling to recognize their constitutional duties toward the Southern States, it would be right to acknowledge the independence of the Southern States, instead of waging an unlawful war against them." Mr. Gilpin moved that all the resolutions be referred to a committee, and pending action in the matter addresses were made by William B. Mann, Hon. Charles Brown, and John W. Forney. Mr. Mann urged that the meeting take such action as would make plain the intention of the people of Philadelphia, after full justice had been done the people of the South, that "at all hazards and every sacrifice these people are to be preserved one people under the Constitution." Mr. Brown's speech was strongly pro-Southern in tone. He opposed coercion, and declared that if the people of the North could not do the people of the South justice and satisfy them that it was to their interest to remain in the Union, it was their duty to part from them in peace. If the Northern conquered the Southern States, he added, they "might hold them as conquered provinces, but they could not afterward be held as equals." Mr. Brown's remarks created great excitement and confusion, and toward the close were frequently interrupted. Mr. Forney claimed that the resolutions offered by Mr. Dougherty contemplated no attack upon the South, but simply meant that when the laws created in pursuance of the Federal Constitution had been resisted the power of the

government came in force. "We do not propose," he added, "to go to South Carolina, or to any seceding State, for the purpose of compelling such State to come back into the Union. If she chooses to remain outside and deprive herself of the benefits of the government and does not interfere with it and destroy us, that is her loss. But when she attempts to set herself up in defiance of the law and to ruin Philadelphia and New York, to laugh at the authority of the President and to defy this great government, which has made us the proudest people at God's footstool, then the instinct of self-preservation comes in, and we will maintain the Constitution and enforce the laws. That is all." Mr. Forney said further that the people of the South were brothers, not savages, and he therefore proposed that every peaceable remedy should be exhausted, party platforms set aside, individual records cast to the winds, and that all should "unite in asking them to come back to us." On the other hand, if, after all possible concessions had been made, they continued to attack the laws, and showed their purpose to be the destruction of the government, he for one was ready "to go in such a cause, and to die in the last ditch in defense of my country." The question was then taken to refer all the resolutions to a committee to be appointed by the president, and it was agreed to. Mr. Ford offered a resolution that "Maj.-Gen. Patterson be requested to call a meeting of the officers of his division at the earliest practicable period, for the purpose of taking such measures as they may deem necessary to increase the force and make its efficiency equal to any emergency." This resolution was also referred to the committee, but leave was given Marcus Mundy to address the meeting in connection with the resolution. Mr. Mundy declared his devotion and the devotion of the Bell-Everett party, which he represented, to the Union, but deprecated any hostile collision between the two sections. Mr. Gibbons said that, as a Republican, he regretted the last resolution had been introduced, as the military arm of the government, if required for any purpose whatever, would be called upon by those in authority, and not by a miscellaneous assembly such as the one he was addressing. Mr. Ford then said that as his resolution had created more discussion than he anticipated, he would withdraw it. This announcement was greeted with cheers. Mr. Gibbons, continuing, said he was "sure there was no man in the room, or in this city, or in this commonwealth who contemplated so serious and frightful a resort as making war upon the fifteen Southern States. . . . At the same time he hoped that they would all be prepared, should the dread hour ever come, to stand by the constituted authorities in the maintenance of the laws and the preservation of the Union." J. Murray Rush called attention to the fact that the meeting had forgotten in the midst of its patriotic deliberations to pay a tribute to the gallant conduct of Governor Hicks, of Maryland, who, placed in a delicate and trying posi-

tion as the executive of a border slave State, had shown himself to be calm, manly, and intelligent in the present crisis. Mr. Rush therefore proposed the following:

"Resolved, That we have observed with admiration, and approve to the fullest extent the bold and patriotic course of the enlightened Governor of Maryland, Thomas H. Hicks; that it entitles him to the cordial support of every lover of the Union, and if persevered in will give him an enviable name on the page of American history."

The resolution was adopted, and the meeting adjourned. A few minutes later, while the gentlemen who had composed the meeting were still conversing, a telegraphic dispatch conveying the news that Maj. Anderson was besieged at Fort Sumter by the forces of the disunionists was received and read. Great feeling was occasioned by this intelligence, and a call for a public meeting to be held at Independence Square was immediately prepared and signed by those present. "Whatever differences may have taken place," said a newspaper at the time, "in reference to other matters, there was but one sentiment on this subject,—that was, admiration for Anderson and hostility to all his foes. Among those who signed the call were Democrats, Republicans, and Americans." In the same journal it was announced that a subscription had been set on foot to purchase a sword of honor to be presented to Maj. Anderson in acknowledgment of his patriotic conduct at Charleston." Pending the appointment of a committee for the purpose, Joseph Curtis of the Orleans House, Chestnut Street, received subscriptions.

—In accordance with the recommendation of the President of the United States, Friday, January 4th, was observed as a fast day in Philadelphia. In many churches special services were held. Sermons were preached at St. Stephen's Protestant Episcopal Church, by the rector, Rev. Dr. Ducachet; at the Arch Street Presbyterian Church, by Rev. Dr. Wadsworth; at St. Matthew's Lutheran Church, by Rev. E. W. Hutter; at the Third Baptist Church, by Rev. Reuben Jeffrey; at the Protestant Episcopal Church of the Epiphany, by Rev. T. W. Cracraft; at the Moravian Church, corner of Franklin and Wood Streets, by Rev. A. A. Reinke; at the Presbyterian Church, corner of Broad and Sansom Streets, by Rev. John Chambers, and at a number of other churches, at all of which, with one or two exceptions, the dangers threatening the country were alluded to. At Reed Street wharf the Shiffler Hose Company fired a salute of thirty-three guns in honor of the State of Delaware, which had rejected the proposals of the secessionist commissioner, Mr. Dickinson, and the citizens of Manayunk fired a similar salute in honor of Maj. Anderson. Some stores and all the public offices were closed. "The anticipations of a war with the secessionists are so fully realized in many minds," said a Philadelphia newspaper of January 5th, "that we are informed of grand propositions on the part of certain boat-builders and ship captains in

this city to inaugurate privateering expeditions so soon as hostilities shall commence. It was reliably rumored yesterday afternoon that most of the coasting vessels now leaving this city are [1861 armed with cannon and ammunition."

—On the evening of Saturday, January 5th, a meeting, in accordance with the call, to sustain Maj. Anderson, was held at National Hall, on Market Street, below Thirteenth. A number of patriotic inscriptions were displayed on the walls; among them, in front of the gallery, the memorable words of Henry Clay, "So long as it pleases God to give me a voice to express my sentiments, or an arm, weak and enfeebled as it may be by age, that voice and that arm will be on the side of my country, for the support of the general authorities and the maintenance of the powers of the Union." Along the front of the platform were displayed the American flag and Webster's sentiment, "The Union, now and forever; one and inseparable." In the rear of the platform, extending across the room, were the following: "'Frown indignantly on the first dawning of an attempt to alienate one portion of the Union from another,'—Washington;" and "'The Union must and shall be preserved,'—Jackson." A band of music, stationed in the gallery, played a number of popular airs, and just before the organization of the meeting the following sentiments were proposed by different persons in the assemblage and greeted with enthusiasm: "The Star-Spangled Banner," three cheers and a "tiger;" "The Union," nine cheers; "Major Anderson," nine cheers; "General Scott," six cheers; "James Buchanan," three cheers; "Senator Crittenden," three cheers; "Governor Hicks, of Maryland," six cheers; "The State of Delaware," three cheers. "After this demonstration," says a contemporary account, "the band was called upon for 'Yankee Doodle,' and the scene which took place as it was played baffles description." Lewis C. Cassidy called the meeting to order, and announced that those present had been invited, without regard to party proclivities, "to meet for the purpose of taking into consideration the situation of that patriot soldier of Charleston, Maj. Anderson." At Mr. Cassidy's suggestion William D. Lewis was chosen to preside. In taking the chair Mr. Lewis said the meeting was one of the most important that had been held in Philadelphia since the Declaration of Independence, and that it had been called "for the purpose of declaring our determination to support the Federal authorities in any measures they may take to support Maj. Anderson, that gallant man who at present represents our government in the harbor of Charleston, and all other measures calculated to prevent the entire overthrow of all law and order." Mr. Lewis denounced the late Secretary of the Treasury, Howell Cobb, and the late Secretary of War, John B. Floyd, as "perjurers and traitors," and said he trusted that "for once this great city, with one voice and one heart, will send forth its hearty greetings to

the brave defenders of their flag, and sustain the government in every act which it may deem necessary to take to support those noble soldiers who
1861] are now, in point of fact, the impersonation of the Union itself." John W. Forney then came forward and read the list of officers, being frequently interrupted by applause as he uttered the name of some popular favorite, the name of Commodore Stewart, or "Old Ironsides," as he was generally called, eliciting three cheers :

President, William D. Lewis; Vice-Presidents, Commodore Charles Stewart, Morton McMichael, Maj.-Gen. Robert Patterson, John W. Forney, John M. Read, Richard Vaux, William Strong, Charles Gilpin, Joseph R. Ingersoll, William D. Kelley, Evans Rogers, Daniel Dougherty, W. M. Meredith, John Grigg, J. Murray Rush, John B. Napheys, Andrew McDole, Robert B. Cabeen.

When the list of officers had been read, John W. Forney introduced J. Murray Rush, who, after making a brief address, in which he urged the importance of extending a prompt and hearty support to the general government, offered a series of resolutions, declaring that the foresight, prudence, and energetic conduct of Maj. Anderson at Charleston merited the hearty approbation of the government and people of the United States, that it was the imperative duty of the President to provide Maj. Anderson with all the force he might require "for the successful defense of his present position;" that "all persons who wage war against the United States for the purpose of destroying the government established by our fathers, or for any other purpose whatever, and all who aid, counsel, sanction, or encourage them, can be regarded in no other light than as public enemies;" that the meeting would "sustain the President of the United States and the constituted authorities of the government in whatever measures they may adopt to support Maj. Anderson, and to maintain the supremacy of the Constitution and the laws of the United States;" and that "the flag of the Union is the property of the people, and whenever lawfully unfurled it must and shall be protected to the last extremity." The resolutions were greeted with nine hearty cheers, after which the band in the gallery struck up the "Star-Spangled Banner." Charles Gibbons seconded the resolutions offered by Mr. Rush, and stated that he had called on the venerable Horace Binney, with the request that he should preside at the meeting. Mr. Binney, however, declined on the ground that his advanced age exposed him to danger from the excitement of such a gathering. At the same time he declared that his heart was bound up in the Union, and expressed the opinion that nothing would overthrow the Union or materially curtail or enfeeble it, "if to the purity and energy of our forefathers we unite that coolness, calmness, and obedience to the Constitution we live under, which carried them to success in their day and generation." Mr. Binney's letter of declination was read to the meeting, and was greeted with cheers, after which Mr. Gibbons read an extract from Washing-

ton's address, pointing out the evils of factional spirit. The resolutions were then put and adopted. At the same time a large American flag was unfurled behind the speakers on the stand, and as it made its appearance was caught by those on the platform and so drawn down as to form a canopy above those on the stage. Marcellus Mundy then made a brief address, in the course of which he mentioned that Maj. Anderson and himself were natives of the same State, Kentucky. Morton McMichael thereupon proposed three cheers for Kentucky, which were given with a will. At the conclusion of Mr. Mundy's remarks the meeting adjourned. An immense assemblage gathered outside the hall, to which the resolutions were read. A number of speeches were also made, "which were all well received, it only being necessary to utter the most commonplace Union sentiment to call forth the greatest applause."

—On the same day (January 5th) an adjourned meeting of citizens was held, without distinction of party, at the Board of Trade rooms, to receive the report of the committee on resolutions appointed at a previous meeting. Joshua T. Owen called the meeting to order, and Cephas G. Childs was chosen to preside. Judge Lewis moved that his resolutions offered at a former meeting be adopted; but the chairman ruled the motion out of order, as no report had been received from the committee. The meeting then adjourned in the midst of great confusion and angry demonstrations on the part of individuals toward each other; and David S. Winebrener moved that a new meeting be organized by calling Judge Ellis Lewis to the chair. Judge Lewis moved toward the chair, but Mr. Blodget, secretary of the Board of Trade, announced that he had been instructed by the board to forbid the use of the room for any political meeting. Judge Lewis, however, took the chair amid great excitement. William B. Mann suggested that all favorable to the original call for the meeting which had just been adjourned, and whose object was to sustain the laws and the American flag, should retire from the room. This suggestion, however, was not acted upon. Daniel Dougherty made an earnest appeal for order, and Marcellus Mundy, after stating it was not the object of those present to break up the meeting, added that in order to meet the exigencies of the situation he would offer a series of resolutions. Mr. Mundy thereupon offered resolutions to the effect that "in the opinion of the citizens of Philadelphia, irrespective of party, the spirit of compromise which characterized the labors of the framers of the Constitution should pervade our national council and influence the action of the people's representatives in settling the difficulties which now threaten the dissolution of the Union and make civil war imminent;" that "the heedless legislation of some of the Northern States in passing personal liberty bills, which would interfere with a proper exercise of the constitutional rights of the slave-holding citizens of Southern States,

is to be deprecated as not only an unwise and unconstitutional assumption of power, but as an abnegation of that comity and courtesy which should characterize the fraternal relations [1861 and intercourse of the several States of the Union with each other;" that "the renunciation by South Carolina of the duty she owes to the confederated government, and her avowed purpose to destroy the Union by withdrawing therefrom, is in utter disregard of the rights of her sister confederates, and a mad sacrifice which should be prevented, as it can, through such pacific measures as will appeal to the patriotism of her people and her sense of right; induced by a generous sacrifice of Northern prejudice against the institution of slavery and a unanimous resolve to adopt as an honorable and at the same time the most practicable basis of compromise, the resolutions proposed by the Hon. John J. Crittenden in the Senate of the United States;" that "while pacific measures and compromises only should be resorted to to allay the fears and apprehensions and appease the resentment of an excited people, as the subjugation of one State, through the combined power of the other States of the Union, would be to deprive her of equality, and thus effectually destroy the constitutional Union of the States, the honor, property, and capital of our general government, if need be, should be preserved and protected by our national army and navy under the proper direction of the heads of government." Mr. Mundy's resolutions were adopted, the persons favoring the original meeting declining to vote for or against them.

—On the evening of January 5th a meeting of natives of Maryland residing in Philadelphia was held for the purpose of approving the course of Governor Hicks in refusing to convene the Legislature of Maryland in obedience to the demands of the disunionists. S. W. De Courcy presided, and Tristram Bowdie acted as secretary. Resolutions warmly indorsing Governor Hicks' action were adopted. On motion of J. W. Kramer it was determined that a society similar to that of the Sons of New England should be organized, and that a festival should be held annually on the 12th of September, the anniversary of the battle of North Point. A letter from J. Murray Rush warmly indorsing Governor Hicks was read, and addresses were delivered by Charles B. Pottinger, Marcellus Mundy, and several others.

—At a meeting of the Republican Invincibles, held on the same evening, Thomas M. Hall presiding, the resolutions adopted at the Union meeting at National Hall were read and adopted. A motion that the Invincibles organize into a military company was laid on the table, but resolutions deprecating any legislation at variance with the principles upon which the campaign had been fought and won, and recognizing "in its fullest extent the truth of Webster's great sentiment, that the will of the people, constitution-

ally expressed, is the supreme law of the land," and declaring that "the will of the people having been unequivocally expressed in the late election, 1861] it becomes the duty of all good citizens and Union-loving men to carry it into execution," were agreed to after considerable discussion.

—Salutes were fired in honor of Maj. Anderson on the 5th by the Minute-men of '76, Capt. Berry, and the members of the Independence Hose Company, on George Street between Second and Third.

—On the 7th of January a meeting of citizens "opposed to war" and in favor of giving guarantees to the South was held at Barr's Hotel, on Sixth Street below Chestnut. Col. Isaac Leech was called to the chair, and John F. Gibson and Charles Leisenring appointed secretaries. On motion of Robert Palethorp it was determined that a mass-meeting of citizens opposed to the use of coercion in settling the difficulties with the South should be held on the evening of the 10th, at National Hall. Mr. Palethorp also offered a resolution indorsing the course of President Buchanan; but it was finally decided, after much discussion, that a committee should be appointed to prepare a set of resolutions to be presented to the public meeting.

—At a meeting of the veterans of the war of 1812, held on the 8th of January at Independence Hall, a resolution was adopted invoking "the blessings of Divine Providence upon our beloved country in these times of peril and alarm, trusting most fervently that our prayer, going up as it does from this sacred place, will be answered, and that the whole people of the republic may live in good fellowship for all time to come." Col. Joel B. Sutherland, president of the association, made an address, in which he denied the right of any State to secede, but counseled moderation. "The occasion," he said, "might possibly be the last whereon the old soldiers would meet under the flag of all the States. He trusted in God that it would not be."

—The meeting of citizens opposed to coercion, which was called for the 10th, was held on the afternoon of that day at Barr's Hotel, Vincent L. Bradford presiding. John McCarthy offered a resolution to the effect that it "would be unwise and inexpedient for those originating this meeting to make arrangements for a mass-meeting purporting to express the opinions of the Democracy of Philadelphia," but his motion, which created some disorder, was not adopted. A series of resolutions to be proposed at a mass-meeting were then read. They admitted the right of a State under certain contingencies to secede, and declared that in the event of secession on the part of the South, Pennsylvania would decide whether she would go "with fanatical New England or with the South, whose sympathies are ours." It was also asserted that neither the President nor Congress had power to declare war against a sovereign State.

—The mass-meeting of the anti-coercionists was

held at National Hall, on the evening of January 16th. Vincent L. Bradford called the meeting to order, and Charles Macalester was elected chairman. In his address on taking the chair, Mr. Macalester said that "the South should have remained loyal to the Union and fought the battle of the Union in the Union, but as they seem determined to go, let them go in peace, and let us say in a spirit of kindness and fraternal love, 'Let there be no strife between us, for we be brethren.'" "Let the Northern States," added Mr. Macalester, "before they commence fighting the South (for which some of them seem so anxious), repeal the odious and offensive nullifying acts called 'personal liberty' bills; let them discard the whole tribe of itinerant lecturers and demagogues who have been so eminently industrious in sowing discord throughout the land, and then let them resolve to mind their own business, and when this is done perhaps there will be no fighting to do." After Mr. Macalester had concluded, cheers were proposed and given for Maj. Anderson, President Buchanan, Gen. Scott, John J. Crittenden, and John C. Breckinridge. The name of Stephen A. Douglas was greeted with hisses. Robert P. Kane proposed a series of resolutions appealing "to the high sense of honor of the South not to turn away in anger from their steady friends, leaving them to the despotism of a sectional party flushed with victory, and which even the danger of disunion and civil war has not yet moved to conciliation," and declaring that among the most important features inculcated in the text-books of the Democratic party "is a strict construction of the Constitution of the United States, a sacred regard for the rights of each State to administer its own domestic concerns, and an absolute non-interference, directly or indirectly, by the people of the several States with the domestic institutions of each other;" that had these principles been respected by the opposition party, the alienation of the North and South might have been avoided; that "the present difficulties in the country are principally attributable to the sentiment prevalent in the North against the moral, social, and political right of the citizens of any State in the confederacy to retain the African race in bondage;" that "the question of domestic slavery for the African race in any of the States of the Union is purely a question of political economy," and that the support of the institution, with such guarantees and protection for the slave as duty and humanity might suggest, did not in any way involve a question of religion or morals; that the common Territories belonged to all, and no right of property of any kind, recognized by a State, could be divested by Congressional action or intervention; that "the denial of this community of interests and the compressions of domestic slavery within its present limits, involves in our judgment, as a matter of right, a violation of the Federal compact, and has led to most pernicious results;" that each of the States was a sovereignty and possessed full power, subject to

the Constitution of the United States, of legislating in such manner as might best comport with the interest of her citizens; that the Legislature of Pennsylvania should at once repeal all acts not consonant with a spirit of friendliness to the sister States, and should, by legislative enactments, "secure to the citizens of every State while within our limits as sojourners, and while coming to and going therefrom, ample protection for themselves and their property;" that any attempt to dissolve the Union should be looked upon with sorrow and alarm, but that "all conciliation failing, if the people of these States cannot live in harmony under the Constitution as it is, it should, by a general convention, be amended; and that failing, which we are loath to believe possible, acquiescence in peaceable separation is so far preferable to the horrors of civil war;" that it (the meeting) was utterly opposed to any such compulsion "as is demanded by a portion of the Republican party," and that the Democratic party of the North would "by the use of all constitutional means and with its moral and political influence, oppose any such extreme policy of a fratricidal war thus to be inaugurated;" that "we cordially approve the disavowal by the President, in his last annual message, for himself and for Congress, of the war-making power against a State of the confederacy;" that, "in the deliberate judgment of the Democracy of Philadelphia, and, so far as we know it, of Pennsylvania, the dissolution of the Union by the separation of the whole South, a result we shall most sincerely lament, may release this commonwealth to a large extent from the bonds which now connect her with the confederacy, except so far as for temporary convenience she chooses to submit to them, and would authorize and require her citizens, through a convention to be assembled for that purpose, to determine with whom her lot should be cast, whether with the North and East, whose fanaticism has precipitated this misery upon us, or with our brethren of the South, whose wrongs we feel as our own, or whether Pennsylvania should stand by herself as a distinct community, ready, when occasion offers, to bind together the broken Union and resume her place of loyalty and devotion;" that "we gladly acquiesce in the plan of compromise, embodied in the resolutions for amendment to the Constitution, offered in the Senate of the United States by Mr. Crittenden, and now pending before that body, as a proper basis for settlement of all existing difficulties;" and finally, that "we earnestly recommend our Democratic brethren in different cities and counties of this State and of New York and New Jersey, who agree with the views enunciated by this meeting, to take the earliest opportunity of holding mass-meetings in their respective localities." The reading of the resolutions was frequently interrupted by mingled applause and hisses. An attempt to introduce a series of adverse resolutions was made by Charles Gilligan, who, however, was ejected from the meeting. George M.

Wharton then addressed the meeting, advising conciliation and opposing secession. He was followed by Charles Ingersoll, who, after making a few remarks in the same strain, was interrupted by [1861 cries for "Brewster" (Benjamin H. Brewster), the confusion finally becoming so great that the speaker was unable to continue. William B. Reed then made an earnest plea in behalf of peace and conciliation, claiming that he spoke the true sentiment of every one around him, "Nay, of all Pennsylvania, except those who, as technical Abolitionists, I count as outlaws." Benjamin H. Brewster, who was the next speaker, declared that the South had been wronged, which would never have happened had not the Democratic party been divided. The South had been too precipitate, but he thought the difficulty might be adjusted even yet if a policy of conciliation were adopted. William Neal, of Ohio, made the closing speech, and the meeting adjourned with cheers for the Union, Stephen A. Douglas, and Maj. Anderson.

—In the newspapers of January 17th appeared the letter of William D. Lewis, chairman of the mass-meeting of January 5th, to Maj. Anderson, transmitting an account of the proceedings, and Maj. Anderson's reply, in which he expressed the hope that "by the blessing of God the impending political storm may be dispersed without bloodshed."

—On Saturday evening, January 19th, a meeting of workingmen, without distinction of party, was held at Spring Garden Hall, Dr. A. L. Kennedy presiding, at which resolutions were proposed in favor of using every effort for the preservation of the Union and of repealing every "unconstitutional enactment" adopted by Northern States which had given offense to the South. The resolutions also called on Congress to take some action to allay agitation and excitement, and to restore confidence throughout the country, and indorsed President Buchanan's declaration of the right of the national government "to use military force defensively against those who resist the Federal officers in the execution of their legal functions, and against those who assail the prosperity of the United States." The first resolution, declaring in favor of resistance to all efforts to dissolve the Union, was adopted, but the second resolution, calling for the rescinding of unconstitutional enactments, was amended by the substitution of one indorsing the Crittenden Compromise. The consideration of the other resolutions was postponed, and, after a committee to arrange for a mass-meeting had been appointed, the meeting adjourned.

—At a meeting of Marylanders residing in Philadelphia, held on the 22d of January, J. M. Stevens presiding, and H. Hollyday secretary, the constitution of the proposed society, to be known as the Maryland Association, was adopted. The society was then organized by the election of the following officers: Rev. J. W. Kramer, president; M. Hall Stanton, vice-president; J. M. Stevens, treasurer; H. Hollyday and

J. D. Watson, secretaries; Thomas Watson, J. D. Watson, William B. McAtee, G. J. Naylor, and H. Dickson, executive committee.

1861] —During the visit of members of the Chicago and Milwaukee Boards of Trade, who arrived in Philadelphia on the morning of January 24th, a number of speeches were made at the reception and banquet given them in which earnest Union sentiments were expressed. At Independence Hall, Mayor Henry, in welcoming the visitors, expressed the hope that "ere long the fanaticism and treason that obscure the early pathway of our country's progress may be dissipated, and happiness again become the heritage of the whole people." At the banquet given by the United Trade Association on the 25th, Gen. Rufus King, responding to the toast "The Great Northwest," said that all the past and present of that section were bound to the Union, and proposed as a toast "The Locomotive and the Cannon,—

The iron that walks,
And the iron that talks.

With the one they could preserve the Union, with the other defend it against all enemies." The sentiment was received with cheers, and all present joined in singing the "Star-Spangled Banner." A. G. Cattell, president of the Philadelphia Corn Exchange, claimed that there was no power, native or foreign, capable of subverting the Constitution; and Commodore Charles Stewart, United States Navy ("Old Ironsides"), declared that the Constitution, like his own ship of that name, "might be sunk by her friends, but was never to be taken."

Charles Stewart, or "Old Ironsides," was born of Irish parents in Philadelphia, July 18, 1778. At the age of thirteen he entered the merchant service, in which he rose from the situation of cabin-boy to the command of an Indiaman. On March 9, 1798, he was commissioned a lieutenant in the navy, and in July, 1800, was appointed to the command of the schooner "Experiment," and cruised in the West Indies, where he rendered efficient service. On September 1st he captured the French schooner "Deux Aims," of eight guns, and soon after "The Diana," of fourteen guns, besides recapturing a number of American vessels which had been taken by French privateers. In 1802, as first officer, he joined the frigate "Constellation," which had been ordered to

the Mediterranean to blockade Tripoli; and on his return, after one year's cruise, was placed in command of the brig "Siren." In this vessel he was engaged in the expedition sent to destroy the frigate "Philadelphia" on Feb. 16, 1804, and subsequently in the blockade and siege of Tripoli. For his services in the bombardment of Aug. 3, 1804, he received the thanks of Commodore Preble in general orders. Promoted to be master-commander on May 19, 1804, he was placed in command of the frigate "Essex," which joined the squadron in Tunis Bay, and subsequently took command of the frigate "Constellation." On April 22, 1806, he was made captain, and was employed in superintending the construction of gun-boats at New York. In December, 1812, Capt. Stewart was again appointed to the "Constellation,"

CAPTAIN CHARLES STEWART.

and proceeded to Hampton Roads, where he assisted in defending Norfolk and Craney Island from the attacks of the British. In December, 1813, he sailed in command of the frigate "Constitution," in which, in February, 1815, he fell in with the British ships-of-war "The Cyane," of thirty-four, and "The Levant," of twenty-one guns, and captured them after a sharp conflict of forty minutes. "The Levant" was subsequently retaken by a British squadron, but the "Constitution" escaped with her other prize to St. Jago. On his return to America he was received with the highest honors. The Legislature of Pennsylvania presented him with a gold-hilted sword,

and a gold medal was ordered to be struck by Congress. He commanded the Mediterranean squadron from 1817 to 1820, when he took command of the Pacific fleet. On his return home he was tried by a court-martial, but was honorably acquitted. He was a member of the board of navy commissioners in 1830-33, and in 1837 succeeded Commodore Barron in command of the navy-yard at Philadelphia. In 1857 he was placed on the reserve list on account of his advanced age, but in March, 1859, he was replaced on the active list by special legislation, and on July 16, 1862, was made a rear-admiral on the retired list. He rendered important service in the organization of the navy, and submitted to the department many valuable papers on the subject. He died greatly lamented at Bordentown, N. J., Nov. 7, 1869.

—The mass-meeting of workmen to take ac-

tion on the political crisis was held in Independence Square on Saturday evening, January 26th. The following officers were chosen: President, Isaac W. Van Houton; Vice-Presidents, John A. Wallace, Alexander McPherson, George W. King, Eli Howell, A. V. Brady, Henry Clark, James Pugh, Joseph B. Hancock, John J. O'Connor, F. B. Smith, S. B. Whiting, Francis Reiley, George Widener, David Conrad, Hiram Gaston, William Cannon, Thomas Gibbs, Alfred A. Kennedy, George Hensler, Hiram Maxwell, Richard Newsham, John Hall, George Oat, William Morton, W. Wells, Passmore M. Collins, John Williamson, Thomas Clark, Joseph Travis, John A. Hughes, George Christy, Frank Walker, Thomas Christy; Secretaries, John A. Fulton, John Keesey, Robert J. Magee, Jonathan E. Fincher, John Curley, and John Call. Speeches were delivered by James B. Nicholson, Stacy Wilson, Henry A. Gilder, and J. J. Greenfield, urging moderation and a conciliatory policy, and resolutions were adopted in favor of the repeal of legislation obnoxious to the people of the South and deprecating collisions between the military force of the general government and the seceding States; but declaring that, after all fair and honorable means of reaching an amicable settlement had been exhausted, the workmen of Philadelphia would sustain the government in all just and legal measures for enforcing the laws. The Crittenden Compromise was indorsed, and the committee of arrangements was authorized to appoint two delegates from each of the Congressional districts of Philadelphia to meet in convention on the 22d of February, as recommended by the mechanics and workmen of Louisville, Ky.

—Hon. Simon Cameron, then United States senator from Pennsylvania, was serenaded at the Girard House on Saturday evening, January 26th, and, in acknowledging the compliment, declared that he was willing to make any reasonable concession, not involving a vital principle, to save the country from anarchy and bloodshed.

—At a meeting of Kentuckians resident in Philadelphia, held on the 29th of January, Dr. S. D. Gross presiding, an address to Governor Magoffin, of Kentucky, stating that the people of the North would in time repeal all obnoxious laws and concede all reasonable demands, and a series of resolutions favoring conciliation and the Crittenden Compromise, were adopted.

—The committee appointed by the meeting of workmen, held on Saturday, January 25th, to present the resolutions passed at the meeting to the United States senators and representatives, and to the Pennsylvania Legislature, repaired to Washington and Harrisburg for that purpose, and on their return were received at the Pennsylvania Railroad depot by a large delegation from the principal machine-shops, and escorted to their headquarters with a band of music. A line was formed, and the proces-

sion, headed by a large lantern, which had inscribed on the face of it in large letters, "Welcome home, committee," moved down Eleventh Street. After marching through several of the principal [1861 streets, the procession halted in front of the Wetherill House, on Sansom Street, where addresses were delivered by Messrs. Van Houton and Lowry. The former, in behalf of the committee, reported that they had been well received in Washington by the President of the United States and the senators from Pennsylvania, and that they had been assured by senators and representatives from the Southern States that the visit of the committee had had more effect upon Congress and the people of Washington than anything that had occurred in the course of the pending political agitation. In the House of Representatives the petition prepared by order of the mass-meeting had been received, read, and ordered to be printed. During their stay in Washington the members of the committee were introduced to Mr. Crittenden (author of the Crittenden Compromise). At Harrisburg the committee had received assurances from all the Philadelphia members of the Legislature, with but one exception, that they would do all in their power to secure the repeal of legislation injurious to the people of other States.

—On the 9th and 10th of February quite a large assemblage was attracted to the wharf of the Reading Railroad Company, foot of Willow Street, by the presence of a large number of heavy cannon, together with several tons of shells. They had been transported from the Fort Pitt foundry, near Pittsburgh, and were destined for the Stevens Water Battery in the harbor of New York. In the excited state of public feeling special significance was attached to the accumulation of war material, and three cheers, proposed by one of the spectators, were given with a will.

—On the 15th of February it was announced that Messrs. Hacker, Bradford, & Wetherill had been chosen by the special committee of Councils appointed to make arrangements for the reception of Hon. Abraham Lincoln, President-elect of the United States, to visit Cleveland for the purpose of presenting resolutions of the Councils inviting Mr. Lincoln to visit Philadelphia on his way to Washington. A committee of citizens was also appointed, which co-operated with the committee of Councils. The former committee adopted as a badge to be worn on the occasion of the President's reception a design comprising a spread-eagle, with the figures of Commerce and Agriculture under the wings. On their return from Cleveland the sub-committee of Councils reported to the committee that Mr. Lincoln had accepted the invitation. It was stated that Gen. Patterson had been called upon in reference to ordering out the First Division of volunteers to act as an escort to the President-elect, but that the general had declined to do so because there was no precedent for it, Mr. Lincoln

not coming in an official capacity. At a meeting of the committee held on the 19th, Mr. Benton, from the sub-committee appointed to ascertain if the First City Troop would parade as a body-guard, reported that Capt. James had been called upon, and had stated that he thought the Troop would be governed by the law of etiquette as laid down by Gen. Patterson. Capt. James afterwards came in and said he had concluded not to order out the Troop, for the reasons which Gen. Patterson had given for not calling out the First Division. He had no feeling in the matter, and at another time would be glad to conform to the wishes of the authorities and citizens. At a meeting of the committee held on the 20th, it was resolved that the citizens residing on the route of the procession be requested to display flags and ensigns, and also that they be requested not to display any of a partisan character.

—The reception of Mr. Lincoln on Thursday, February 21st, was an imposing demonstration. Many of the hotels and public buildings displayed bunting from their flag-staffs, and the city generally wore a holiday appearance. At two o'clock the members of Councils met at the hall, and the citizens' committee in the building opposite, preparatory to taking carriages for the depot. A salute fired by a detachment of soldiers under command of Capt. Berry announced to the multitude assembled at the Kensington Depot the arrival of the train. The committee of Councils appointed for the purpose having met the President-elect at Trenton, there was no particular ceremony after the train entered the depot. The procession to escort the President-elect was formed in the following order: Policemen, mounted, under command of Chief of Police Ruggles, detachment of police on foot; Col. P. C. Ellmaker, chief marshal of the procession, and aids; Conrad B. Andress, marshal, and aids; cavalcade of citizens, James Freeman, chief marshal; Pennsylvania Dragoons, commanded by Maj. Charles Thomson Jones; the President-elect in a barouche drawn by four white horses, and accompanied by the chairman of the committee of Councils and the presidents of Select and Common Councils; suite of the President-elect; committees of the Legislatures of Pennsylvania and New Jersey and officers and members of the City Councils of Philadelphia, all in carriages. A guard of police was posted on the flanks of the carriages and moved with the procession. The streets through which the parade passed were densely thronged, and the assemblage at the depot was so great as to render the sidewalks almost impassable. As the procession was about turning into Girard Avenue salutes were fired from the cupola of the William Penn Hose-house, on Frankford road, which was gayly decked with flags and patriotic emblems. A large American flag floated over the building of the James Page Library Company, on Girard Avenue, below the

Frankford road, and the front of the house of William P. Hacker, on Arch Street, near Broad, was festooned with three large American flags. An evergreen arch, decorated with American flags, extending across the street, was erected on Sixteenth Street, near Chestnut, under which the procession passed. Flags were also displayed from many private residences. Mr. Lincoln was loudly cheered all along the route, and frequently rose and acknowledged the greetings of the spectators. Several handsome bouquets were thrown into his carriage. When the procession reached the corner of Ninth and Walnut Streets the pressure of the crowd was tremendous. On Ninth Street from Walnut to Chestnut a strong force of police was stationed to keep the street clear; but at times its efforts were unavailing. The Continental Hotel, at which lodgings had been provided for Mr. Lincoln, soon became so crowded that it was found necessary to close nearly all the doors and to station policemen at them, in order to prevent the entrance of the thousands who surged toward them after the President-elect had entered. Mr. Lincoln soon after presented himself on the balcony of the hotel, and was greeted with prolonged cheering. A band stationed on the balcony struck up a lively air, at the conclusion of which the mayor of Philadelphia, Alexander Henry, tendered the hospitality of the city to Mr. Lincoln, who responded in a brief address. When he had concluded Mr. Lincoln retired to his apartments, and the vast assemblage slowly dispersed. A little after eight o'clock the President-elect took a position at the head of the grand stairway of the hotel, where he remained some time, in order to gratify the curiosity of those who wished to see him. About ten o'clock an arch of fire-works with the words, "Abraham Lincoln" in large letters in the arch, and the words, "The Whole Union" beneath it, was exhibited at Ninth and Chestnut Streets, extending across Chestnut.

—Washington's birthday, February 22d, was more generally observed in Philadelphia this year than for many years previous. The presence in the city of the President-elect, together with the ceremony of flag-raising at which it had been arranged he should assist, gave the celebration a more important character than ordinarily. From all the public buildings, hotels, shipping, newspaper offices, and engine- and hose-houses the American flag was displayed, and a large number of private dwellings were decorated in a similar manner. At sunrise a national salute was fired, and at seven o'clock a committee of the City Councils waited upon Mr. Lincoln, who was escorted from the Continental Hotel to Independence Hall by the Scott Legion. On entering the hall Mr. Lincoln was formally received by Theodore Cuyler, president of Select Council, to whose address of welcome Mr. Lincoln briefly replied. After inspecting the portraits and relics in the hall, Mr. Lincoln was escorted to the platform in front of the building, where his

appearance was the signal for long-continued cheering. Everything had been arranged for unfurling the new flag with thirty-four stars, the thirty-fourth representing Kansas, then recently admitted as a State. The flag was rolled into a ball in man-of-war style, so that when it reached the peak of the staff it should gradually unfurl to the breeze. The Scott Legion was drawn up in front of the platform. Mr. Benton, chairman of the joint committee of Councils, then said that he had been deputed to request Mr. Lincoln personally to raise the new flag with thirty-four stars, "the first elevated by the city government." Mr. Lincoln consented to perform the ceremony, signifying his acceptance of the invitation in a brief address, in which he said, "I think we may promise ourselves that not only the new star placed upon that flag shall be permitted to remain there to our permanent prosperity for years to come, but additional ones shall from time to time be placed there, until we shall number, as was anticipated by the great historian, five hundred millions of happy and prosperous people." After prayer by the Rev. Henry Steele Clark, Mr. Lincoln grasped the halyards until the flag, having ascended to the peak of the flag-staff, was unfurled. The band played the "Star-Spangled Banner," which was followed by "The Stars and Stripes are Still Unfurled," a piece of music dedicated to Mrs. Robert Anderson, wife of Maj. Anderson, commander of Fort Sumter. During the ceremonies a detachment of the Washington Grays stationed in Independence Square fired artillery salutes. Great enthusiasm was exhibited by the spectators. Having performed the task allotted him, Mr. Lincoln returned to the hotel, and at half-past eight o'clock left in an open barouche drawn by four horses for West Philadelphia, where a special train awaited him. At this point a salute was fired, and a large assemblage witnessed Mr. Lincoln's departure for Harrisburg at half-past nine o'clock. The next feature of the day's celebration was that in which the City Councils took part. Both branches met in joint convention, being called to order by Mayor Henry, and repaired in procession to the platform in front of Independence Hall. Mayor Henry here stated that the object of their meeting there was to listen to the reading of Washington's Farewell Address by the Hon. Joseph R. Ingersoll. Bishop Potter offered a prayer, in which he expressed the hope that Washington's words of warning and admonition might be heeded throughout the length and breadth of the land. Mr. Ingersoll was then introduced and read the address, which was attentively listened to by the vast assemblage. The address was also read at the meeting of the soldiers of the war of 1812, which was held in the Supreme Court room on the same day, Hon. Joel B. Sutherland presiding, by Col. Robert Carr, who had carried a musket at a review of troops by Gen. Washington, and was the oldest of the survivors of the war of 1812. Resolutions were adopted by the meeting requesting Con-

gress and the State Legislatures "to adopt such measures as will present to the people of the several States such amendments to the Constitution of the United States as will tend [1861 to secure peace and amity between the different States, and thus add new strength to our institutions and make our republic the continual admiration of the civilized world;" thanking Virginia "for coming to the rescue and holding out the olive branch of peace to the other commonwealths;" and expressing the hope that the Peace Congress would not adjourn until it had perfected some plan for the preservation of the Union. At Mechanics' Hall a large number of citizens assembled to do honor to the memory of Washington. The building was profusely decorated with flags, and at the back of the speakers' stand portraits of Washington and Commodore Decatur were exhibited. After the national hymn ("America") had been sung, Rev. J. E. Meredith offered a prayer. The choir then rendered the "Birth of Washington," after which the master of ceremonies, William B. Thomas, introduced the orator of the day, Rev. D. W. Bartine, who delivered a patriotic discourse. The day was also marked by an imposing procession of workmen, representing the leading industrial establishments of the city. During the parade bells were rung at frequent intervals, and many beautiful flags, banners, and appropriate emblems were displayed, with inscriptions expressing fidelity to the Union. At National Hall a mass-meeting of workmen was held. Isaac W. Van Houten presided. After Washington's Farewell Address had been read by James Blakeley, Mr. McPherson offered a series of resolutions demanding immediate action on the part of Congress, "either by the adoption of the Crittenden, Guthrie, or Bigler amendments, or by some other full and clear recognition of the equal rights of the South in the Territories;" opposing "any measures that will evoke civil war;" recommending the repeal of all acts of the Pennsylvania Legislature which were not consonant with a spirit of friendliness to sister States, and that the workmen of Philadelphia hold their senators and representatives in Congress and in the State Legislature to "a strict account for the fulfillment of the promises made to the Workingmen's Committee of Thirty-three at Washington and Harrisburg;" and suggesting that the organization of the workmen of Philadelphia should be maintained. In addition to the other observances of the day, there was a parade of the military organizations of the city, including the Minutemen of '76, Capt. Berry, the Garde Lafayette, Capt. Archambault, the Washington Grays, Capt. Parry, the Philadelphia Grays, Capt. Foley, and the Meagher Guards.

—A national convention of workmen began its sessions at the Wetherill House, Sansom Street, on the 23d of February. Delegates were present from Maryland, Virginia, Kentucky, Tennessee, Indiana,

Ohio, Delaware, and Pennsylvania. S. W. Cloyd, of Kentucky, presided. Resolutions deploring the sectional agitation which was disturbing the country, and indorsing the Crittenden Compromise, were adopted. J. B. Nicholson, of Pennsylvania, having been introduced to the meeting, presented the chairman, on behalf of the workingmen of Philadelphia, with a handsomely-bound copy of Washington's Farewell Address. A series of resolutions were offered by Mr. Touchstone, of Maryland, denouncing the "nabobs and aristocrats of the South and fanatics of the North," but having been objected to were withdrawn. On motion of Mr. Lawrence, of Virginia, it was determined to appoint a National Executive Committee, consisting of three persons, with power to increase their number to thirty-four. The convention then adjourned.

—At a convention of workingmen, composed of delegates from the different industrial works of Philadelphia, held at Spring Garden Hall, on the 4th of March, for the purpose of choosing delegates to a national convention to be held at Louisville, Ky., on the 4th of July, Joseph Christy was chosen president, J. M. Stephens vice-president, and Richard Flach secretary. An executive committee was appointed, which, on March 7th, organized by electing the following officers: President, I. W. Van Houton; Vice-Presidents, A. N. Macpherson and E. W. Fraley; Recording Secretary, John Hall; Corresponding Secretary, W. H. Sylves; Treasurer, W. Obdyke.

—Hon. David Wilmot, senator-elect from Pennsylvania, and famous as the author of the Wilmot Proviso, arrived in Philadelphia on Saturday, March 16th, and stopped at the Continental Hotel, where he was serenaded by a number of his political friends. Mr. Wilmot acknowledged the compliment by making an address, in which he defined the principles that would guide his course in the Senate.

—A meeting of the friends in Philadelphia of Hon. J. J. Crittenden was held on the 6th of March at the American Hotel. Dr. Alfred L. Elwyn was appointed chairman, and S. E. Cohen secretary. It was resolved that a committee of ten persons be appointed to confer with Mr. Crittenden "to ascertain when it would be convenient for him to visit Philadelphia, in order to afford its citizens an opportunity of manifesting their deep sense of approbation of the patriotic efforts made by him to maintain and perpetuate the union of these States." The committee, consisting of Hon. Joseph R. Ingersoll, Hon. Peter McCall, Hon. Edward King, Peter Williamson, James C. Hand, Dr. Alfred L. Elwyn, Robert H. Hare, John Hulme, J. E. Peyton, and Marcellus Mundy, wrote to Mr. Crittenden, who replied on the 17th, declining the invitation on account of having been called to his home in Kentucky.

—At a meeting of the Workingmen's Committee of Thirty-four, which was held at the Wetherill House on the 19th of March, it was resolved that "the work-

ingmen of Philadelphia do hereby recommend to all our fellow-workingmen of our common country to lay aside all political and sectional feeling, and to come out in the majesty of their power and show to political party tricksters and to the world that our country must and shall be preserved."

—The action of the Pennsylvania Legislature in postponing the spring municipal election was the occasion of several political meetings in Philadelphia about this time. On the 20th of March the county convention of the Constitutional Union party met at the county court-house, George C. Collins presiding, and after electing S. H. Norris president, S. S. Sunderland secretary, and M. B. Dean treasurer, appointed a committee to draft resolutions denouncing the action of the Legislature, with instructions to report at a subsequent meeting. On the 21st the Minutemen of '76 appointed a committee, consisting of H. F. Knight, James W. Martin, F. S. Altemus, H. C. Laudenslager, and W. J. McMullen, to confer with committees of other associations as to the propriety of holding a mass-meeting to protest against the action of the Legislature. The Democratic City Executive Committee characterized the act as an "outrage perpetrated by the Black Republican majority in the State Legislature," and appointed a committee to consult counsel as to its legality.

—Early on the morning of March 26th a secessionist flag was found flying from a pole in front of the "Jolly Post," in Frankford, and soon attracted a large crowd. It was finally taken down, and the assemblage dispersed.

—A meeting of the Constitutional Union convention was held on the 27th of March, I. H. Norris in the chair, at which resolutions were adopted declaring it inexpedient at that time to attempt to test the constitutionality of the late act of the Legislature by which the spring election had been postponed until the fall, and that the time had come when those "who love their country for their country's good must unite in beating down under foot the fell spirit of disunion, anarchy, corruption, and fanaticism."

—On the 29th of March an opinion was published of City Solicitor Charles E. Lex, rendered in compliance with a request from City Councils, affirming the constitutionality of the act of Legislature abolishing the spring election for municipal officers.

—During the annual session of the Philadelphia Conference of the Methodist Episcopal Church the Committee on the State of the Church, to which was referred the subject of the repeal of the new chapter on slavery inserted into the "Discipline" by the General Conference, reported March 29th, concurring in the resolutions of the East Baltimore Conference requesting the General Conference at its next session to repeal the chapter on slavery, and instead thereof, empower each annual Conference within whose bounds the institution exists "to make such regulations upon this subject as in their judgment may best

subserve the interests of the Redeemer's kingdom among them." The committee also recommended the adoption of an address to the members of the church in Delaware and on the Eastern Shore of Maryland and Virginia. The address assured them that they had the profoundest sympathies of the Conference in their disquietude and agitated condition, and that no exertions should be wanting to secure them redress for their grievances and to maintain their ecclesiastical rights in and under the constitution of the church. It also declared that the change in the church discipline introduced by the chapter on slavery was entirely uncalled for, "highly offensive to our brethren on the border, and lamentably injurious to the welfare of the church among them," and ought to be repealed. The committee also reported that "in view of our present national difficulties and embarrassments, and the consequently disturbed condition of the public mind on the one hand, and the conflicting opinion of our churches in Delaware and Maryland on this subject, we deem it inexpedient to divide the Philadelphia Conference by State lines at this time." The report of the committee was adopted unanimously.

—News of the firing upon Fort Sumter (April 12th) was received in Philadelphia by telegraph on the same day, but did not become generally known until published in the newspapers of the following day. On the reception of the news at Harrisburg the State Legislature immediately passed the bill, drawn up by A. K. McClure, appropriating five hundred thousand dollars toward organizing, equipping, and arming the militia. On Saturday, April 13th, a feverish interest in the dispatches from the seat of hostilities followed the announcement in the morning papers that war had actually commenced. The streets in the centre of the city were thronged until a late hour at night, and "every one who hinted any sympathy with the secessionists was made to take an unequivocal stand." At an early hour on Sunday groups of men gathered around the newspaper and telegraph offices, and eagerly discussed the news of the surrender of Fort Sumter, as published in the extras. The feeling in opposition to secession was very strong, and one individual who openly expressed his sympathy for the South was set upon and chased from Third and Chestnut Streets into Dr. Jayne's drug-store. Here he was protected by policemen, who barred the door, and thus effected his rescue. A hand-bill was circulated during the day calling upon "young men desirous of rallying around the standard of the Union" to enroll themselves immediately in the new volunteer Light Artillery Regiment, "now rapidly filling up, and ready to march upon the receipt of orders from the Governor." This circular was issued by order of Capt. J. Brady, acting major. At most of the city armories the volunteers gathered during the day, discussing the probable effect of the news from a military point

of view. The Union feeling was strongly in the ascendant, and it was agreed on all hands that the government should be sustained at all hazards, and independent of party predilections. [1861 During the evening the throngs on the street increased, and the extras, announcing that a proclamation would be issued by the President calling for seventy-five thousand volunteers, were quickly sold.

—A meeting of the officers of the First Regiment, Washington Brigade, was held at Military Hall, Third Street near Green, on Saturday evening, April 13th, Lieut.-Col. C. M. Berry presiding. Gen. Small stated that he had visited Washington and tendered the command of the brigade to Hon. Simon Cameron, who had accepted. Recruiting soon became general, and the ranks of the volunteer companies filled up rapidly.

—On Monday, April 15th, an excited crowd collected in front of No. 337 Chestnut Street, owing to a rumor that a paper called *The Palmetto Flag*, which advocated secessionist principles, was published in the building. Finally several men entered the door leading to the stairway and attempted to ascend to the third story, where the publication-office was said to be. A policeman interfered, and the men left the building. The crowd, however, continued to increase, and a demand was made that the American flag should be displayed from one of the windows of the room in which *The Palmetto Flag* was said to be published. Mayor Henry soon made his appearance at one of the windows, waving a small flag, and was greeted with cheers. The mayor addressed the assemblage, appealing to all citizens who were loyal to the flag to show their respect for it and for the laws by retiring to their respective homes. The request was not complied with, however, until a large flag had been unfurled from the building, and a number of persons remained until some time in the afternoon. In consequence of the excitement, Town & Co., the publishers of *The Palmetto Flag*, announced that they would suspend its publication. While the crowd was still gathered in front of *The Palmetto Flag* office, the stars and stripes were being run up at the American Hotel, Chestnut Street, above Fifth. By some mismanagement the flag ascended the staff union down. As soon as the mistake had been discovered the flag was lowered, but not until the crowd, having noticed the reversal of the ensign, and interpreting it as an insult to the Union, had made a rush for the hotel. In a few minutes the flag reappeared in the usual way, and was greeted with cheers. About noon the crowd began to move in other directions, visiting various places where flags had not been exhibited as an evidence of the Union sentiments of the occupants, and requiring them to be displayed. A paper, declaring the unalterable determination of the subscribers "to sustain the government in its effort to maintain the honor, the integrity, and the existence of our national Union and the perpetuity of the popu-

lar government," was circulated on the 15th and following days for signatures. Among the subscribers were Horace Binney, S. G. Fisher, James 1861] R. Webb, Joseph R. Ingersoll, J. I. Clark Hare, Samuel C. Perkins, William M. Meredith, Charles Gilpin, B. Gerhard, Richard Vaux, William H. Kern, James Bayard, H. C. Carey, Thomas A. Biddle, William E. Lehman, V. Gilpin, James W. Paul, C. W. Churchman, Oswald Thompson, George M. Stroud, C. N. Bancker, Morton McMichael, L. C. Cassidy, S. A. Mercer, Charles S. Peaslee, Charles Gibbons, Ch. Borie, Charles Platt, David Webster, Charles Dutilh, Edward H. Trotter, John C. Knox, Edward S. Whelen, Matthew Morris, R. Smethurst, John W. Field, William R. White, C. H. Fisher, C. G. Childs, W. Cummings, Alexander Fullerton, William D. Lewis, Charles Gilpin, George H. Stuart, Samuel H. Perkins, Richard S. Smith, E. M. Lewis, Benjamin Rush, Thomas C. Hand, Daniel Smith, Jr., J. Murray Rush, E. A. Souder, H. P. Borie, C. Guillou, J. Hill Martin, I. P. Hutchinson, Victor Guillou, John R. Penrose, William R. Lejee, S. P. Wiltbank, Alexander Biddle, D. Dougherty, Joshua W. Bates, Horace Binney, Jr., Theodore Cuyler, J. H. Curtis, Jr. On the evening of April 15th the members of the Corn Exchange fired a salute of thirty-four guns from their rooms in Second Street in honor of their new flag and the whole Union.

—On the 15th of April, Maj.-Gen. Robert Patterson, commanding the First Division Pennsylvania Volunteers, issued an order calling attention to the President's proclamation asking for seventy-five thousand volunteers, and stating that he relied on the loyalty of the officers and men of his division for the enforcement of a rigid system of military instruction. The brigadier-generals were directed to give orders for special attention to the instruction of members of companies, and to adopt the most efficient means for putting their brigades in condition for immediate service. Under President Lincoln's requisition upon the State of Pennsylvania for sixteen regiments, Philadelphia's quota was six regiments, and the companies in process of organization vied with each as to which should have their ranks full first.

Gen. Robert Patterson died Aug. 7, 1881, aged eighty-nine years. He was for a half-century one of the most conspicuous public men in Philadelphia. His military position gave him unusual prominence. Entering the army of the United States during the war of 1812, he was appointed first lieutenant in the Twenty-second Regiment of Infantry. He was transferred to the Third Regiment in May, 1813, and before the war ended held the position of captain. Returning to Philadelphia, he became interested in the volunteer branch of the Pennsylvania militia. He was elected captain of the Washington Blues upon the formation of that company, on the 17th of August, 1817. The Blues was a large and spirited company,

and was noted for its strength and efficiency in military exercises. Some time after they were formed, Capt. Patterson was elected colonel of the City Volunteer Infantry Regiment, retaining at the same time the command of the Blues. In 1824, Brig.-Gen. Thomas Cadwalader, of the City Brigade, resigned that position, having been previously elected major-general of the First Division, to succeed Gen. Isaac Worrell. Col. Patterson was elected brigadier-general of the City Brigade. In 1833, Gen. Cadwalader having resigned the position of major-general, Brig.-Gen. Patterson succeeded him. He held that rank until 1867, when he resigned. During all that period he was prominent in the city upon occasions of military parades, processions, and as chief commander of the division in times of riot and disturbance, when the services of the troops were called. He was in command of the troops which went to Harrisburg during the Buckshot war in 1835. During the Native American riots of 1844 he had command of the troops in Kensington, and at the church of St. Philip de Neri in Southwark. For some time after the latter riot the city was practically under martial law. Gen. Patterson had his headquarters at the Girard Bank, and remained there until quietness and good order were assured. Upon the breaking out of the war between the United States and Mexico he was appointed major-general in the service of the United States. He was in command at the battle of Cerro Gordo, which was fought on the 18th of April, 1847, in which eight thousand five hundred American troops vanquished twelve thousand Mexicans. He commanded the advance which followed the retreating enemy, and on the 19th of April captured Jalapa. He took part in the subsequent engagements in the heart of Mexico, and entered the city of Mexico with the victorious army. After the close of the war he returned to the United States with the troops, and participated in the reception of the Pennsylvania volunteers by the citizens of Philadelphia on the 24th of July, 1848. At the outbreak of the rebellion he was commissioned major-general by Governor Curtin, and was assigned to the command of the Pennsylvania three-months' volunteers. The United States government immediately appointed him to the command of the military department composed of the States of Pennsylvania, Delaware, Maryland, and the District of Columbia. With the three months' men he crossed the Potomac on the 15th of June, 1861. There were skirmishes and engagements with the rebels. Eventually Gen. Patterson reached Winchester; a rebel force, commanded by Gen. Joseph E. Johnston, being in front of him. While there he was anxious to attack the enemy, but was restrained by positive orders from Gen. Scott to make no movement until directed. *That order to attack never came.* Patterson remained idle at Winchester, menacing Johnston, without authority to fight him. Meanwhile the bulk of the force of Johnston was enabled to slip away

to reinforce Beauregard toward the close of the battle of Bull Run, in consequence of which the Union troops under Gen. McDowell were defeated. This disaster caused great feeling throughout the Union, and Patterson was severely censured for his inactivity. As a soldier he was compelled to bear this odium without being able to show that he was in no fault. It was years afterward before he was able to break the seal of secrecy which had been maintained by the government, and to show by the publication of official orders that Gen. Scott was to blame, by compelling Patterson to remain idle in front of the enemy, waiting for orders which were never issued. On the expiration of the three months' term Gen. Patterson retired from active service, and returned to Philadelphia. Gen. Patterson was the son

of an Irish farmer, and was born in the County Tyrone, Ireland, Jan. 12, 1792. His father came to Pennsylvania, and settled at Ridley, in Delaware County, about 1799 or 1800, and lived upon the estate of John Sketchly Morton. He purchased five or six hundred acres of land on Ridley Creek, not far from the present village called Morton, in Springfield township, and engaged in farming. Robert Patterson was sent to the Springfield school, near by, a somewhat famous academy at the time, at which John Edgar Thomson and others who became eminent men were afterward educated. Having an inclination for a mercantile life, Robert Patterson was placed in the counting-house of Edward

Thomson, who was a leading merchant of this city in the China and India trade, about the year 1808. He was appointed to the United States army while in Mr. Thomson's service. About 1817 he commenced on his own account as a grocer at No. 260 High Street. Some time in 1818 he removed to No. 287½ High Street. In 1833 the store of Robert Patterson & Co. was at No. 182 High Street, between Fifth and Sixth. The wholesale grocery business led Gen. Patterson into purchases of sugar, and gave him extensive connections with the sugar-growing districts of the South, especially in Louisiana, where he became owner of sugar plantations. From sugar he gradually was induced to take participation in the cotton trade, and by degrees the grocery business was abandoned. He became a large dealer in cotton, and furnished the material for cotton-mills. Those interests compelled him

at length to become a cotton manufacturer, not so much from inclination as by necessity. The failure of manufacturers who were his debtors compelled him, in order to save himself from [1861] loss, to purchase their mills, and thus by degrees he became a manufacturer. This interest increased so that he became in time the largest cotton manufacturer in the country. At the time of his death he was the owner of the Patterson Mills, in Chester, the Ripka Mills, in Manayunk, and the Lenni Mills, in Delaware County. His principal offices and counting-houses at the time of his death were at Manayunk and at No. 136 Chestnut Street. Gen. Patterson was a man of strong social instincts. He was a prominent figure upon every social occasion. He was one of the founders of the Aztec Club,

established by officers of the United States army in Mexico in October, 1847, was elected president at that time, and remained in that office until his death. He was one of the founders, and a member until his death, of the Saturday Club of the city. He was a member of the Farmers' Club, a social organization. He held a few prominent civil offices. He was a member of the State Board of Canal Commissioners from 1827 to 1829. He was State director of the Philadelphia Bank for many years, and was afterward director elected by the stockholders. He was for some years president and member of the Board of Inspectors of the Eastern Penitentiary. He was the first president

GENERAL ROBERT PATTERSON.

of the Philadelphia and Wilmington Railroad Company. He was for a long time member and president of the Hibernian Society. In 1874 he was elected a trustee of Lafayette College at Easton. In politics he was always a Democrat. He was a Presidential elector and president of the Pennsylvania electoral college in 1837. Gen. Patterson survived his wife (who was a Miss Engle) about six years. His son, Col. Francis E. Patterson, had command of the First Regiment of Pennsylvania Artillery during the three months' service, and unfortunately died in the service from an accidental pistol-shot wound. His eldest son, William Patterson, is a resident of Tennessee. His son, Gen. Robert E. Patterson, a graduate of West Point, and for some years an officer of the United States army, was engaged in business with him. One of his daughters married the Hon. J.

Ross Snowden, who was for some years treasurer of the United States Mint, and clerk of the Supreme Court of Pennsylvania. Another daughter
1861] married Gen. John J. Abercrombie, of the United States army. Mrs. Lynde was another daughter.

—The Board of Trade and Board of Stock Brokers met on the 16th of April and passed resolutions declaring their unalterable attachment to the Union and their purpose to support the government. Similar resolutions were adopted at a meeting of citizens of the Nineteenth Ward, which was held on the same day at Temperance Hall, Frankford road and York Street. Speeches indorsing the resolutions were made by John M. Carson, Fletcher Budd, A. Warthman, A. J. Holmes, and others.

—On the 16th of April Mayor Henry issued a proclamation declaring that treason against the State of Pennsylvania or against the United States would not be suffered within the city, nor would violence to the persons or property of its inhabitants be tolerated. "I do hereby require all good citizens," continued the proclamation, "to disclose and make known to the lawful authorities every person rendering in this city aid to enemies in open war against this State and the United States by enlisting or procuring others to enlist for that purpose, or by furnishing such enemies with arms, ammunition, provisions, or other assistance. I do hereby require and command that all persons shall refrain from assembling in the highways of this city unlawfully, riotously, or tumultuously, warning them that the same will be at their peril. The laws of our State and Federal government must be obeyed. The peace and credit of Philadelphia shall be preserved. May God save our Union."

Commenting upon this proclamation, the *Public Ledger* of April 17th said, "Under the supposition that manufacturers have been furnishing arms to the secessionists, manufactories have been visited by organized bodies of persons, and the workmen compelled to leave. Private citizens have also had their houses visited, and a display of flags demanded of them." After indorsing the mayor's declaration that persons engaged in rendering aid to the enemies of the United States would be handed over to the lawful authorities, the same paper expressed its approval of the mayor's determination to protect citizens suspected of Southern proclivities from the violence of party spirit.

—A meeting of merchants and manufacturers of Philadelphia was held at the Board of Trade room, on the 17th of April, for the purpose of taking action expressive of their determination to support the government. John E. Addicks called the meeting to order, and nominated David S. Brown as chairman, and William C. Ludwig as secretary. After a brief address by Mr. Brown, S. V. Merrick said, "The executive committee at its last meeting felt that the

time had come when every man should show where he stood,—whether for the government or against it. The committee, on that occasion, passed resolutions expressive of their fidelity to the Union. At the same time it was thought proper that a meeting of the merchants of the city should be called to indorse their resolutions." Mr. Ludwig then read a series of resolutions, to the effect that the merchants and manufacturers of Philadelphia, "forgetting all political differences, unmindful of party lines and distinctions, remembering only that we are fellow-citizens of one beloved country, and that country in danger," pledged themselves to use all their influence to strengthen the hands of the government and cheerfully to bear their share "of the sacrifices and perils of the hour." After speeches by George N. Tatham, George L. Buzby, and W. D. Lewis, the following resolution was offered by Levi T. Rutter:

"Resolved, in the glowing words of our Revolutionary sires, we hereby pledge our lives, our fortunes, and our sacred honor to support the Union, the Constitution, and the laws."

After an earnest pro-Union speech by Marcellus Mundy, the resolution was adopted. Hon. William D. Kelley, Frederick Fraley, and Dr. Elder then addressed the meeting, after which the resolutions as read by Mr. Ludwig were adopted by acclamation.

—On the evening of the same day (April 17th) a number of persons formerly connected with the Washington Grays Artillery Corps met at the Wetherill House for the purpose of organizing a reserve guard for the protection of the city. Charles S. Smith was elected chairman. Col. C. G. Childs said that Independence Hall, the birthplace of liberty, "should be defended against all assaults of those traitors" who were "contemplating the capture of Washington." Col. Childs, Morton McMichael, Joseph M. Thomas, Peter C. Ellmaker, and Charles Gilpin were appointed a committee to draft a series of resolutions expressive of the sense of the meeting, and a paper was submitted for signatures stating that the undersigned, retired and contributing members of the Washington Grays, and other citizens of the city of Philadelphia, over forty-five years of age, agreed to "raise a regiment of at least eight hundred men for the purpose of defending and protecting the city of Philadelphia, to be designated as the Reserve Corps," and pledged themselves to each other to maintain the laws and uphold the constituted authorities of the country in her hour of trial. At the different recruiting-stations the excitement continued unabated, and on the 18th it was announced that the ranks of the Washington brigade were nearly full. The display of the national flag had also become general. "The city," said a contemporary journal, "never presented so brilliant an appearance as at present in the way of the display of the stars and stripes. All the public buildings and hundreds of proprietors of stores have thrown the glorious flag to the breeze, and in some quarters it

floats from private dwellings." The following appeal, said to have emanated from a meeting of ladies, was widely circulated:

"The crisis now impending on the country calls forth the true patriotism of every woman in the community; and while our husbands, fathers, and brothers are engaged in war, that we may not be found wanting in deep sympathy,

Resolved, This 16th day of April, that we, as a body of ladies, do hereafter adopt the colors of the Union, to be worn as a rosette or bow, hoping to express by this simple manifestation the devoted feeling we have for our country, and as we think every true American woman must feel at this present time.

"RED, WHITE, AND BLUE."

The suggestion was promptly complied with, and on the following day, April 18th, a number of women appeared on the streets wearing the rosettes.

—In Select Council, on the 18th of April, Mr. Megary submitted an ordinance authorizing the mayor to issue a proclamation offering a reward of five hundred dollars for the apprehension and conviction of any person or persons who, within the limits of Philadelphia, should violate the provisions of the act then recently passed by the Pennsylvania Legislature defining treasonable acts. An ordinance offered by Mr. Wetherill provided that the sum of ten thousand dollars should be appropriated for the purchase of arms or other munitions of war for the use of a home guard or any other company that might be formed for the defense of the city. In the same connection Mr. Wetherill presented a subscription paper in which the signers volunteered to give five thousand dollars toward the purchase of twelve howitzers and their equipment, to be under the control of the Home Guards. Mr. Dickson submitted an ordinance appropriating one hundred thousand dollars for the relief of families of volunteers. Similar ordinances were offered by Messrs. Bradford and Beideman, and Daniel M. Fox introduced a series of resolutions expressing gratification that Pennsylvania had proven her loyalty. Mr. Benton offered a resolution instructing the commissioner of city property to tender the city halls for the purpose of drilling; and another resolution directing the commissioner to purchase American flags and to have them displayed from the dome of every district hall. Mr. Bradford submitted an ordinance to organize, equip, and pay a mounted police force of five hundred men for a term of three months, the members to receive the same pay as that of the regular police force. A series of resolutions was submitted by Mr. Davis declaring the undying devotion of the citizens of Philadelphia to the Union, and pledging the faith and credit of the city to the general government to the extent of one million dollars to aid in the enforcement of the laws. Mr. Ginnodo submitted a resolution beseeching Maryland to stand by the Union, and pledging the sympathy of the people of Philadelphia to the people of Baltimore in their efforts on behalf of the Union. These ordinances and resolutions were referred to a special committee, which reported in favor of asking Common Council to ap-

point a committee to confer with the Select Council committee as to the measures proper to adopt in the pending crisis. The report was agreed to. Mr. Benton offered a resolution, which [1861] was adopted, instructing the special committee to inquire into the propriety of continuing the salary of any public officer "who shall be enrolled into the service of the United States whose pay is less than two hundred dollars per annum." On motion of Mr. Craig it was determined that a committee should be appointed to tender to Maj. Robert Anderson the hospitalities of the city on his arrival in Philadelphia. In the Common Council, Mr. Quin offered resolutions approving the general government's determination to "enforce the laws, quell rebellion, and preserve the integrity of the Union," and declaring that "the defense of Fort Sumter by the gallant Maj. Anderson demands, and deserves, the highest meed of praise, and that, as a mark of our high appreciation of his incorruptible patriotism and unfaltering courage, the city of Philadelphia present him with a sword, and that the mayor, together with the presidents of Select and Common Councils, be a committee for carrying this resolution into effect." Both resolutions were adopted, the first unanimously, and the second with only one vote in the negative. Mr. Kerr submitted a letter from the clerk of Common Council, Gen. William F. Small, asking leave of absence during the period in which he should be engaged as a soldier in aiding to suppress the insurrection in the Southern States. A resolution was passed granting the desired leave of absence provided it did not continue longer than the first Monday in January following. The resolution was afterward concurred in by Select Council with the exception of a section appropriating five hundred dollars to furnish equipments to Gen. Small. Mr. Potter submitted an ordinance appropriating sixty thousand dollars for the relief and support of such of the families of the citizens of Philadelphia who were then or should be subsequently regularly mustered into the service of the United States, as needed assistance during their absence; the same to be expended for that purpose in such manner as a committee of six of the citizens—three to be chosen by each branch of Councils separately—should, in conjunction with the presidents of Select and Common Councils, the mayor and the city solicitor, from time to time direct. The ordinance recommended to the citizens that they co-operate in this design by individual subscriptions. On motion of Mr. Cattell the amount was made one hundred and twenty-five thousand dollars instead of sixty thousand dollars, and the ordinance as amended was then adopted. Mr. Potter submitted an ordinance, which was passed, appropriating five thousand dollars for the use of the mayor, "to be employed by him as he may deem expedient for the preservation of the public peace, the security of the city, and the detection and prevention of any plans or combi-

nations to destroy the government of this State or of the United States." The mayor was also requested and authorized "to use all and every means in his power to detect and prevent any combinations, conspiracies, or endeavors whatever or by whomsoever made, within the city, to subvert the government of this State or of the United States, or to aid, succor, or assist any person or persons in rebellion against the same, or to molest or disturb the peace or property of the citizens, and to prosecute such person or persons to the full extent of the law." The resolution from Select Council requesting Common Council to appoint a committee to confer with a similar committee of the former body on the state of the country was concurred in. The two committees consisted of the following members: Select Council, Messrs. McIntyre, Megary, Wetherill, Davis, Beideman, Dickson, Drayton, and Riley; Common Council, Messrs. Cathwood, Kerr, Hodgson, Moore, Paul, Lynd, Loughlin, and Potter.

—On the 19th of April a card was published by S. E. Cohen announcing that in compliance with requests from various quarters he had opened a muster-roll at his office, 712 Chestnut Street, for the organization of a battalion of volunteers for home protection, to be known as the Municipal Guard. On the same day all the military companies intended for service under the general government were mustered and placed under marching orders. The Sixth Massachusetts Regiment, Col. Edward F. Jones, which had arrived on the previous evening *en route* for Washington *via* Baltimore, met with an enthusiastic reception. On their arrival at the foot of Walnut Street, by steamer from the Jersey shore, they were greeted with cheer after cheer from the large assemblage of men and women collected on Delaware Avenue and the wharves in the vicinity. The regiment formed in line on Delaware Avenue, and marched up Walnut to Dock Street, up Dock to Third, up Third to Chestnut, and up Chestnut to the Girard House. So great was the crowd about the hotel that it was with much difficulty that the troops obtained admission. In the evening the regiment was entertained at the Continental Hotel.

—The news of the attack in Baltimore, on the 19th of April, on the Sixth Massachusetts Regiment and the troops from Philadelphia created great excitement in the city and intensified the Union sentiment. The Philadelphia troops, consisting of one-half of the Washington Brigade, comprising six companies of the First Regiment, Lieut.-Col. Berry, and four companies of the Second Regiment, Lieut.-Col. Schoenleber, left Philadelphia for Washington at three o'clock on the morning of the 19th, under the command of Gen. William F. Small. They numbered about eighteen hundred men. A short time before their departure the Massachusetts volunteers had left their quarters at the Girard House, and having marched to the Philadelphia, Wilmington and

Baltimore Railroad Depot, took the cars for Washington. On their arrival at the President Street Depot in Baltimore, the Massachusetts troops were met by a mob, which obstructed their passage through the city. On attempting to force their way they were attacked by the rioters, and three of the Massachusetts soldiers were killed and several wounded. The troops returned the fire, killing eleven of the citizens, and finally succeeded in reaching the Camden Depot, whence they proceeded over the Baltimore and Ohio Railroad to Washington. At the request of the Governor of Maryland and the mayor of Baltimore, the train containing the Philadelphia troops was ordered by the railroad officers to remain in the depot. The Philadelphians were unarmed, and without uniforms. Missiles were thrown at them while in the cars, and some of them were injured. In his report of the affair, as narrated to a newspaper reporter, Gen. Small said that the Pennsylvanians behaved gallantly, and many of them sprang from the cars upon their assailants and engaged in a hand-to-hand conflict with them. It was impossible, however, to distinguish friends from foes, as the mob was composed of Union men and secessionists, who were fighting among themselves, and the Pennsylvanians, not being uniformed, could not be distinguished from either. This state of things continued more than two hours, when Marshal Kane, the chief of police of Baltimore, appeared upon the ground, restored something like order, and placed the Pennsylvanians in cars ready to be returned North. The officers and men from Philadelphia, he added, conducted themselves with the utmost courage and deliberation. Regular troops could not have behaved better. The main body of the Washington Brigade returned on the night of the 19th, reaching the depot at Broad and Prime Streets at eleven o'clock. Twenty-eight members of the force became separated from the rest of the command, and according to the statement of one of their number, Samuel Baker, of Philadelphia, after fleeing about twenty-two miles from Baltimore in a northwesterly direction, they were arrested by a number of secessionists, marched across the country to Belair, Harford Co., Md., and there placed in jail. On the following day, however, they were released and escorted by troops to the Pennsylvania line, whence they proceeded to Philadelphia. The Baltimore riot produced intense resentment in Philadelphia, and called forth strong expressions of indignation from public bodies. In the City Council prompt action was taken for aiding a vigorous prosecution of the war. The special committee appointed by Select and Common Councils reported in favor of passing ordinances,—first, requesting the citizens of Philadelphia to assemble in their respective wards and form companies of one hundred each for the purpose of drill for home service, and to answer any call from the government; second, instructing the Committee on Finance to

report at the next meeting an ordinance for a loan of one million dollars for the purpose of meeting the appropriations to provide for the families of volunteers and for other purposes connected with the disturbed condition of the country; third, that the commissioner of city property be requested to place at the disposal of any military organization for drill any of the city halls, when not otherwise occupied, free of charge; fourth, that "the fervent devotion to the Union manifested by the citizens of Baltimore entitles them to the warmest thanks of the citizens of Philadelphia and to the unbounded admiration of every Union-loving citizen of the United States;" fifth, that "the patriotic stand against secession maintained by Thomas H. Hicks, Governor of Maryland, proves him a patriot worthy of the proudest days of Greece or Rome, and will hand down his name to posterity engraven with the same scroll with the worthiest of the heroes and sages of 1776;" sixth, that fifty thousand dollars be appropriated for the purchase of such arms and other munitions of war, "for the use of a Home Guard, or any other company hereafter to be formed for the defense of the city;" seventh, that one hundred and twenty-five thousand dollars be appropriated for the relief and support of the families of volunteers engaged in the service of the Union; eighth, that the determined attitude taken by the general government for the suppression of the Rebellion be heartily approved, and that a sword be presented to Maj. Anderson; ninth, that five thousand dollars be appropriated to the use of the mayor for the preservation of peace in the city, the detection of persons engaged in treasonable designs against the government, and of persons engaged in molesting the property of citizens of Philadelphia. All of these recommendations were agreed to by both Select and Common Councils. Mr. Benton submitted a resolution continuing the salary of any officer of the city who, before the proclamation of the President of the United States, was connected with volunteer companies, and who might be called into service. This resolution was referred to the special committee. The activity at the recruiting stations was greatly increased after the attack upon the Massachusetts and Pennsylvania troops in Baltimore had become generally known. On the 19th, Maj.-Gen. Robert Patterson issued an order directing the regiments and companies of the Second and Third Brigades, who had volunteered for service, to report to Brig.-Gen. George Cadwalader for instructions. The troops, it was stated, would be inspected and mustered into the service of the United States by Maj. Ruff and Capt. Heth of the army, and would march as soon as arms, ammunition, great-coats, blankets, and other appointments indispensable for the health of the men could be procured from the government. The First Division received orders to be in readiness to march at two hours' notice, and the armories all day on the 19th presented an animated appearance. The organization of companies of Home

Guards in the different wards also received an impetus from the news from Baltimore, it being apprehended that if the secessionists retained possession of Baltimore, an attack might [1861 be made on Philadelphia. At a meeting of the soldiers of the war of 1812, held at Independence Hall, Hon. Joel B. Sutherland presiding, resolutions were adopted complimentary to Gen. Scott, Maj. Anderson, and Hon. Simon Cameron, Secretary of War, and pledging the support of those present to the general government in its efforts to put down domestic treason. A committee was appointed to draft an address to soldiers of the war of 1812 throughout the Union. During the quarterly meeting of the State Council of Pennsylvania, Order of United American Mechanics, held on the 19th, at their hall, corner Fourth and George Streets, it was determined to recommend the several councils to take such action as was necessary to provide for the keeping of such of their members in regular standing as might leave their homes for the defense of their country, and make such provision for their families as their necessities required. The members of the Tivoli Hose Company having volunteered for service in the Union army, decided, at a meeting held on the 19th, that the apparatus be placed in the hands of the citizens and police, to be used during their absence. It was also resolved to appropriate one hundred dollars out of the amount received from the city for the benefit of the families of volunteers.

—On the evening of the 19th of April the Eighth Regiment Massachusetts Volunteers, Col. Monroe, arrived in the city. As they marched from Walnut Street wharf to their quarters at the Girard House they were enthusiastically cheered, and, on reaching the hotel, were received by an assemblage that crowded Chestnut, Eighth, and Ninth Streets in that vicinity. On the following day the regiment proceeded southward, taking a steamer at Havre de Grace for Annapolis. The Seventh New York Regiment arrived at Camden, N. J., early on the morning of the 20th and proceeded *via* Washington Street to the Broad Street Depot, where it remained until Saturday afternoon, when, news having been received of the interruption of travel southward *via* Baltimore, it returned to Washington Street wharf and embarked on the steamer "Boston," which dropped down the Delaware.

—A seizure of contraband goods was made on the 19th of April by officers Taggart and Sharkey, who took possession of nine cases which, it was said, had been packed for shipment to Savannah, Ga. Four of the cases contained camp equipage, kettles, and pans; the other five were filled with knapsacks and haversacks. The goods were found in possession of a mercantile firm, which, upon discovering their character, declined to ship them. The officers were unable to trace them to first hands. On being opened the cases were found to contain two hundred and fifty camp-

kettles, two hundred and fifty mess-pans, five hundred and fifty knapsacks, and five hundred and fifty haversacks, all of which were turned over to the commissary department.

—On the night of Friday, April 19th, Fort Delaware was garrisoned with one hundred and seventy-five men from Philadelphia, and on Saturday five thousand stand of muskets arrived in the city and were distributed among the troops. The Girard House was selected by Governor Curtin as a military depot, and a notice was posted on the streets on the 20th stating that women were wanted to make up army clothing for the Pennsylvania troops. On Saturday and Sunday, April 20th and 21st, the recruiting stations throughout the city were the scene of much excitement in consequence of the large numbers of volunteers who presented themselves for enlistment. On Sunday the companies belonging to the National Guard Regiment were drilled in Franklin Square. Drilling was also going on in most of the armories of the city.

—The Buena Vista Guards, attached to the Washington Brigade, returned to Philadelphia from Baltimore on the 20th. Their commander, Capt. E. W. Power, returned the following list of casualties: killed, Peter Rogers, John V. Greaves; wounded, John McGercher, James Teague, Richard Mooney, Patrick J. Campbell, James Agnew, Miles Shield, John P. Murray, Thomas Foster, Thomas P. Little.

—A town-meeting was held at the Exchange on the 20th, at which it was resolved that, "in view of the impending danger to our homes and liberties," it was "indispensable that a body of not less than ten regiments of resident citizens should be organized as a Home Guard without delay, each regiment to be composed of ten companies of not less than eighty men each, and that a committee of citizens be appointed to solicit subscriptions to the amount of two hundred and fifty thousand dollars for the purchase of arms. Meetings were also held in the different wards, at all of which patriotic resolutions were adopted, and in some instances measures taken for the organization of companies of Home Guards. On the 20th Mayor Henry issued an order appointing Col. Augustus J. Pleasonton commander of the Home Guard in Philadelphia, with authority to organize, under the direction of the mayor, a force to be composed of the residents of Philadelphia for cavalry, artillery, infantry, and light infantry service.

—On the night of April 19th the railroad bridges on the Philadelphia, Wilmington and Baltimore Railroad west of Havre de Grace and on the Northern Central Railroad south of Cockeysville were burned by Marylanders in order to prevent the passage of Northern troops through Baltimore to the South, thus necessitating their transportation from Havre de Grace by water to Annapolis. The country residence of Gen. George Cadwalader, on the Gunpowder River, Harford Co., Md., was also burned.

—On the 22d of April it was announced that the total number of men enrolled up to that time in the three Philadelphia brigades, exclusive of Gen. Small's brigade, which numbered two thousand men, was seven thousand six hundred. In addition to these, a number of independent companies had been formed. Gen. Robert Patterson, it was added, had been appointed to the chief command of the Pennsylvania troops, and Gen. Cadwalader to the command of the whole of the First Division, comprising the First, Second, and Third Brigades, all of Philadelphia.

—Seizures of four tons of lead and a lot of gun-stocks, locks, and other portions of guns on their way South were made in Philadelphia on the 21st.

—A number of ladies who were stopping at the Continental Hotel asked permission of Capt. Gibson, in charge of the military depot at the Girard House, to assist in making up clothing for the troops. Their offer was accepted. Hundreds of workingwomen congregated at the Girard House in order to obtain employment.¹ During the day two hundred cutters were employed, and enough sewers to make up one thousand suits a day. At the town hall, Germantown, work of a similar character was given out.

—On the 21st of April a joint committee of the City Councils, headed by Charles B. Trego, had an interview with Maj. Anderson in New York, and tendered that gentleman the hospitality of the city. Maj. Anderson expressed his gratification at the compliment, but said he was unable to make any engagement at that time.

—A number of ladies met at 912 Chestnut Street on the 22d of April and organized the "Philadelphia Military Nurse Corps." It was decided that the members wear a uniform consisting of blue Canada flannel and a Shaker bonnet trimmed with red, white, and blue. Each lady subscribed to a pledge to act as nurse in the United States army.

—On the 23d of April it was announced that George Leisenring, a member of Gen. Small's brigade, who was severely stabbed during the riot in Baltimore, had died the night before at the Pennsylvania Hospital.

—The uniform of the Home Guards, as determined by the commander, Col. Pleasonton, consisted of a single-breasted light- or cadet-gray frock-coat, with standing collar and buttons of the arm to which the regiment belonged, pantaloons of drab color, army pattern, and a rosette of the national colors.

—A meeting of members of the bar of Philadelphia was held at the Supreme Court room on the 22d of April. Hon. William M. Meredith presided, with St. George Tucker Campbell, Judge Hare, and H. J. Williams as vice-presidents. On motion of O. W. Davis it was resolved that a committee be appointed

¹ This fine hotel was vacant at the time when the attack was made on Fort Sumter, and it was very convenient for the use to which it was put at this period.

to receive subscriptions from members of the bar for the support of families of volunteers who were dependent upon their daily labor. Marcellus Mundy offered a resolution, which was adopted, that "the bar of the city of Philadelphia, in meeting assembled, are anxious and ready to tender their services as volunteers to protect the city of Philadelphia, and, if called upon, the government of the United States from the assaults of the rebels who are now in arms in the South," and that "a company be at once formed, in accordance with the above resolution." Consideration of the matter was postponed.

—On the 24th of April it was announced that the Philadelphia, Wilmington and Baltimore Railroad Company having been taken in charge by the Federal government through an agent in Philadelphia, all its equipments were under the control of the government, and trains with troops were being sent out as fast as possible, an uninterrupted route to Washington having been completed. The Chesapeake and Delaware Canal, used for conveying troops from Philadelphia to the Chesapeake, was guarded by a force of one thousand men of Gen. Cadwalader's division. The arrival of troops in Philadelphia was now a matter of daily occurrence, the city being the chief point of concentration for the dispatch of military forces to the South. On the 23d the First Regiment of Infantry, Col. William D. Lewis, Jr., with ten full companies of about one hundred men each, paraded, marching through the principal streets. Although men enough to make up six regiments had already been enrolled, recruiting was still proceeding rapidly. On the evening of the 23d the Reliance Fire-Engine Company held a meeting, and appropriated one hundred dollars per man to provide equipments for those members who had volunteered for military service. On the 24th it was announced that the Municipal Guards had elected the following officers: S. E. Cohen, Sr., captain and acting major of battalion; Col. William H. Dinmore, vice-president; William H. Helmbold, secretary; and J. L. Hamelin, battalion paymaster. On the same day the following appointments by Gen. Reuben C. Hale, quartermaster-general of the Pennsylvania militia, were made public: Assistant Quartermasters, John K. Murphy, W. V. McGrath, William M. Hale, R. R. Young; Assistant Quartermaster for duties in Ordnance Department, A. L. Magilton; Assistant Quartermasters for the transportation of troops and provisions from West Philadelphia, F. A. Showers and O. D. Mehaffey; Clerks, H. H. Shillingford, Samuel W. Wray, and James McMullin; Commissary Department, Reuben C. Hale, acting quartermaster-general; Assistant Commissaries, John Derbyshire, A. J. Antelo, Thomas Webster, Jr., John Haviland, Thomas J. Diehl; Chief Clerk, Evan W. Grubb; Clerk, Jonathan Cummings; Messengers, John R. Dialogue and E. P. Stiles. At a special meeting of the trustees of the city ice-boat held on the 23d, it was determined to tender the vessel to Capt. Dupont,

commandant at the navy-yard. Capt. Dupont accepted the boat, and said she would be employed on important business at once. Col. Pleasonton, commander of the Home Guards, announced [1861 on the 24th the following appointments:

Aids, Samuel B. Henry, Andrew Cohen, Lewis H. Ashhurst, and Thomas B. Dwight; Secretary, Lewis A. Scott; Quartermaster and Commissary, Col. William Bradford; Assistant Commissary, James S. Watson; Secretary to the Quartermaster, Henry C. Kutz.

—A movement to create a "Volunteers' Home Fund" was inaugurated at a meeting held in West Philadelphia on the 23d, Judge Allison presiding. The subscriptions were payable in monthly installments during the ensuing six months, and were to be distributed through a general executive committee. At a meeting of residents of Chestnut Hill, on the evening of the 22d, Col. C. G. Childs presiding, similar action was taken for creating a fund for the relief of families of volunteers.

—An adjourned meeting of members of the bar of Philadelphia was held on the 22d, for the purpose of taking final action upon Mr. Mundy's resolution for the formation of a military company. Judge Knox proposed the form of a paper for members to sign, tendering their services as volunteers to protect the city of Philadelphia, and "to aid, if called upon, the government of the United States in the suppression of the rebellion now existing in some of the Southern States." The document was approved by the meeting, which then adjourned, whereupon Mr. Mundy drew up a more specific paper, which he submitted to the members for signatures, declaring that the subscribers volunteered their services to guard and defend the city of Philadelphia, "and, if required by the constituted authorities, to aid in the defense of the government and the American flag." Mr. Mundy, however, did not meet with much success in obtaining signatures.

—On the 25th of April it was stated in the Philadelphia newspapers that the delay in forwarding troops to Washington from Philadelphia, caused by want of information as to the condition of the route *via* Havre de Grace and Annapolis, Md., had been obviated. Armed men had been placed along the whole route of the railroad from Elkton, Md., to Havre de Grace, at which point a fleet of vessels had been concentrated for the purpose of conveying troops to Annapolis, and the railroad being in the hands of the Federal government, the transportation of troops and stores was being prosecuted with great energy.

—In addition to the armories the public squares were now used for drilling troops, and the city had the aspect of a great military camp.

—The Ladies' Union Relief Association announced on the 25th that they would be glad to receive contributions of money or materials, such as flannel, cotton socks, handkerchiefs, and crash, to be made up for the soldiers who had volunteered in defense of

their country. At this time over two thousand persons were employed in the manufacture of army clothing at the Girard House. Among those
1861] engaged in the work were many ladies from fashionable portions of the city. At the United States Arsenal a large force of women was employed in the same kind of work. A meeting of ladies representing various Christian denominations was held at Rev. Dr. Boardman's church on the 24th of April, to concert measures for the relief of sick and wounded soldiers and sailors. Dr. Boardman opened the meeting with prayer, and Mrs. Judge Jones was chosen to preside. It was resolved to proceed at once to carry out the objects of the meeting, and a committee was appointed to procure the requisite information as to the furnishing of a hospital and other matters.

—On the 25th it was announced that the chairman of the bar meeting, held on the 22d, had appointed O. W. Davis, H. M. Phillips, E. S. Miller, D. Dougherty, and Charles Gibbons a committee to receive contributions to the fund for the support of the families of volunteers.

—A meeting of the committee of superintendence, appointed at a general meeting of the soldiers of the war of 1812, was held on the 23d, Peter Hay presiding, and Edward King secretary, at which it was resolved that there being still some among them some whose physical energies had not been materially impaired, they would organize a corps for the defense of the city, and the maintenance of order and public security. It was also determined that subscription-lists or enrollments of soldiers of the war of 1812 should be opened at the offices of Alderman Hay and Matthew Newkirk, and at the residence of Col. Lemuel Painter, and that when the enrollment had been completed a meeting should be called for the organization of a command to be known as "The Veteran Guard of the War of 1812."

—As the bell at Independence Hall struck twelve o'clock on the 24th an American flag with thirty-four stars was unfurled from the flag-staff of Carpenters' Hall, where the first Continental Congress met. The ceremony was accompanied by the singing of the "Star-Spangled Banner" by a chorus of young ladies. On the morning of the same day a meeting of the Carpenters' Company was held at the hall (with James A. Campbell presiding, John Williams secretary), at which patriotic resolutions were adopted. It was also decided that those of the members who were able and willing should form themselves into a volunteer company, to be known as the Carpenters' Company, to be attached to the Home Guard of the city of Philadelphia, to be used in such service, either mechanical or military, as might be deemed most advisable.

—Col. George Gibson, Jr., of the United States army, who, at Governor Curtin's request, accompanied R. L. Martin, the Governor's special agent,

to the city to assist in getting up the ten thousand uniforms required for the troops then concentrating in the field, published a card on the 25th, acknowledging the services rendered the State by the cutters and trimmers of the Schuylkill arsenal, in cutting out from United States patterns the various garments to be used by the volunteer troops. Col. Gibson, on behalf of the Governor, returned sincere thanks to all who were engaged in sewing clothing for the troops. "Never," he added, "has been witnessed such devotion to the comforts of the soldier as is presented by the crowds of ladies (both rich and poor) daily besieging the doors of the Girard House for employment."

—The Germans of Philadelphia held several meetings for the purpose of devising measures for the relief of the families of German volunteers, and a committee of fifty was finally appointed to solicit contributions. The following were elected permanent officers of the organization: President, Jacob Kemper; Vice-President, Julius Hein; Treasurer, C. A. Thudium; Secretary, F. Reuter. A sub-committee, consisting of Capt. V. Wicht, Julius Hein, Fr. Staake, John Weik, and August Bourkner, was appointed to confer with the city authorities with regard to the distribution of the relief fund appropriated by Councils. About three thousand Germans, it was stated, had thus far entered the service of the government in Philadelphia.

—At a meeting of the St. George's Society, held on the 23d, the members passed a series of resolutions expressive of their loyalty to the government under which they lived, and calling earnestly upon all Englishmen residing in Philadelphia to declare themselves in support of the stars and stripes. It was also decided that, in view of the distracted state of the country, the usual anniversary dinner be dispensed with, and that the money which would have been devoted to it should be subscribed for the relief of families of volunteers requiring aid.

—In the City Councils, on the 25th of April, the committee under whose control the one hundred and twenty-five thousand dollars appropriated for the relief of families of volunteers was to be distributed was announced as consisting of the mayor, city solicitor, presidents of Select and Common Councils, M. W. Baldwin, John Robbins, Jr., and Peter Williamson, on the part of the citizens, and Thomas Potter and William Loughlin, on the part of Councils. Mr. Kerr submitted a communication from J. J. Gumper, in which he stated that, "believing it to be the duty of every citizen to aid the constituted authorities to the extent of his abilities during the present unnatural rebellion," he would tender to the city of Philadelphia a loan of five thousand dollars without interest for two years if the war should last so long. The reading of the letter was greeted with loud applause, and a resolution thanking Mr. Gumper was adopted. An ordinance authorizing the mayor, in connection with the joint special committee of

Councils, to take such measures as he might deem necessary for the safety of the city and the protection of property, and appropriating two hundred thousand dollars therefor, was passed by both branches of Councils. In the Common Council, Mr. Quin announced that the Buena Vista Guards, of Philadelphia, had assigned to him the duty of presenting to the city of Philadelphia, through the president of the chamber, the first trophy gained in the war just inaugurated. The trophy was the flag borne by the secessionists and under which they had fought during the riot in Baltimore on the 19th of April. It was captured by the Buena Vista Guards, who formed part of Gen. Small's command, and brought it to Philadelphia. The Council adopted a resolution thanking the donors.

—The Southwark Navy-Yard became the scene of great activity soon after the firing upon Fort Sumter, and on the 25th over six hundred men were at work fitting out vessels for the use of the government. A large quantity of stores had been concentrated at the yard, over fifty thousand dollars' worth of provisions and clothing having been removed from Norfolk, Va., before the destruction of government property at that place. Great activity also prevailed at the rendezvous for shipping seamen, from twenty to thirty being sent to the yard daily. At the Bridesburg Arsenal the employes worked day and night to fill orders for arms and ammunition.

—On the 26th of April news was received that the Baltimore and Ohio Railroad, between Baltimore and Washington, had been put in condition for travel, and that the New York Seventh and the Massachusetts regiments, which had left Philadelphia for the national capital *via* Havre de Grace and Annapolis, a week before, had arrived at Washington. It was added that the route being now unobstructed, the Philadelphia and Pennsylvania troops would be sent off as rapidly as they were equipped.

—Announcement was made on the 29th of April that the full quota of men called for from Philadelphia under the requisition of the Governor had been furnished, and that most of the companies had received their equipments and were ready to march.

—In compliance with the advice of the United States attorney for the Eastern District of Pennsylvania, William Millward, marshal of the district, gave notice on the 27th of April that he would take into custody all flour and other provisions, and also all munitions of war and military stores, directed and intended to be sent to Maryland, Virginia, North Carolina, Arkansas, and all other States engaged in making war on the Federal government, and would hold them subject to legal process or the order of the government. Under this order Deputy Marshal Jenkins seized two hundred and fifty barrels of flour at the Baltimore Railroad Depot, intended for Baltimore, two kegs of powder, and six revolvers, which

were found at the same place among the effects of a resident of Cecil County, Md.

—During the excitement in Baltimore [1861 which followed the 19th of April riot, a number of Union sympathizers left the city, and most of them came to Philadelphia. On the evening of the 26th addresses were delivered to a large assemblage in front of the Continental Hotel by some of the refugees. Among the speakers were J. B. Shoemaker, E. Rawlings, and T. J. Rogers. A meeting of Marylanders, resident in Philadelphia, was held at the American Hotel the same evening, for the purpose of devising some means of relieving those Baltimoreans who had been summarily compelled to leave their homes. H. Dickson was called to the chair, and A. Holland was appointed secretary. A communication was read from the Hibernia Fire Company tendering the use of their hall for the Baltimoreans, and it was determined that those present should act in connection with a committee which had been appointed by the Hibernia Company for aiding the refugees.

—On Sunday, April 28th, after the benediction, the organ at St. Stephen's Protestant Episcopal Church pealed forth "The Star-Spangled Banner," the rector, Rev. Henry W. Ducachet, D.D., remaining in the chancel until it had ceased. Dr. Ducachet had already accepted the appointment of chaplain of the First Regiment Pennsylvania Volunteers, commanded by Col. William D. Lewis, Jr.

—An order of Lieut.-Gen. Winfield Scott, extending the Military Department of Washington so as to include, in addition to the District of Columbia and Maryland, the States of Delaware and Pennsylvania, and assigning Maj.-Gen. Robert Patterson to the command, was published in the Philadelphia newspapers of April 30th. Gen. Scott instructed Gen. Patterson, in the same order, to post the Pennsylvania volunteers as fast as they were mustered into service all along the railroad from Wilmington, Del., to Washington City in sufficient numbers and in such proximity as would give reasonable protection to the lines of parallel wires to the road, its rails, bridges, cars, and stations. In compliance with Gen. Scott's instructions Gen. Patterson issued an order, from his headquarters in Philadelphia, directing that commanders of troops entering the department from the East, North, or West should, on their arrival, report for instructions, and stating that Lieut.-Col. Hale, quartermaster-general of Pennsylvania, would be prepared to furnish cooked rations for three days to the troops of any State on their way to Washington. Gen. Patterson cautioned the troops against molesting peaceable citizens, but announced that those who were not peaceable, or who were disposed to resist the authority of the government, would be punished. Commanders of corps were instructed to "shoot down without hesitation any man or party of men caught in the act of arson," or in any attempt to interrupt the line of communication.

—The Providence Marine Artillery, of Providence, R. I., which arrived in Philadelphia on the 28th of April, and was quartered at the Broad and Prime Streets Depot, left for Washington **1861]** *via* Annapolis on the 30th. The Eighth Regiment Pennsylvania Volunteers, from Schuylkill County, which arrived in Philadelphia on the 23d, encamped near the depot. Three companies of this command left on the 25th for Elkton, and the rest remained at the depot drilling. The regiment left Philadelphia on the 7th of May for points on the Philadelphia, Wilmington and Baltimore Railroad.

—A Committee of Public Safety, appointed by the citizens of Philadelphia, co-operated with the municipal authorities in preparations for defense. On the 1st of May it was stated that many of the Philadelphia corporations had responded most liberally to the solicitations of the Safety Committee for funds.

—C. A. Greiner, of Georgia, was arrested on the 30th of April by Capt. McMullin, by order of Gen. Patterson, on the charge of treason. The family of Mr. Greiner had been living in Philadelphia for some months, but he had reached the city only a few days before his arrest. It was alleged against Mr. Greiner that he had headed the citizens of Savannah, Ga., who drove the United States forces from Fort Pulaski. Mr. Greiner admitted that he had participated in the capture, but only as a private, and claimed that he had done so in order to aid in preventing the fort from falling into the hands of a mob. He added that he was a native of Philadelphia and as good a Union man as could be found. He was committed for trial, but after a hearing before Judge Cadwalader was released on ten thousand dollars bail to keep the peace.

—In his message to the Legislature of Pennsylvania, in extra session, on the 30th of April, Governor Curtin stated that seven regiments had already been organized and mustered into service in Pennsylvania.

—At a meeting of the British residents of Philadelphia, held on the 2d of May, it was determined to form a company for home defense.

—Maj. Robert Anderson, who had commanded the Union garrison at Fort Sumter, arrived on the 3d of May, on his way to Washington. As he passed through the streets he was frequently recognized from the numerous portraits of him in circulation, and enthusiastically cheered.

—In the daily papers of May 6th appeared an address to Gen. Winfield Scott, dated April 30th, and signed by about two hundred leading citizens, expressing their admiration, and offering their thanks for his services to the country. Among the signers were Alexander Henry, Richard Vaux, Theodore Cuyler, Horace Binney, William M. Meredith, and C. Macalester.

—An iron car, built for the government at the locomotive-works of Baldwin & Co., and to be used for defensive purposes on the Philadelphia, Wilmington

and Baltimore Railroad, was taken to the Broad and Prime Streets Depot on the 4th of May. The sides and top were of the best boiler-iron, warranted to resist rifle-balls. One-half of the car was furnished with port-holes, so as to permit the use of a cannon which moved on a pivot. It was also pierced with holes for the use of riflemen. The battery was placed in front of the locomotive.

—Moyamensing Hall, on Christian Street between Ninth and Tenth, was fitted up as a military hospital, and was in operation on the 6th of May, only one patient, however, having been received. The medical staff consisted of Dr. John Neill, medical director; and Drs. Francis G. Smith, S. S. Hollingsworth, John McClellan, and Ellerslie Wallace, aids; Drs. John Brinton, John Packard, George C. Harlan, and F. W. Lewis, assistant surgeons; and Dr. C. H. Boardman, resident physician.

—Right Rev. Alonzo Potter, D.D., bishop of the Protestant Episcopal Diocese of Pennsylvania, issued an appeal to the clergy and laity of his jurisdiction, early in May, expressing the hope that chaplains—"men of the right stamp"—would be numerous, and that Testaments, Bibles, and tracts would be supplied to the volunteers in liberal measure. It was the earnest desire, added Bishop Potter, to offer a copy of the prayer-book to every Pennsylvania volunteer who might be willing to receive it, but, in order to accomplish this object, it needed additional contributions. Bishop Potter accordingly recommended that in every congregation a special contribution should be taken up to aid in the work.

—On the afternoon of the 7th of May the Twentieth New York Regiment, Col. G. W. Pratt, arrived *en route* for the South.

—The First Artillery Regiment, Pennsylvania Volunteers, Col. Francis E. Patterson, composed of old and regular organizations of militia, left the city for the South on the 8th of May. The regiment formed at Washington Square at eight o'clock in the morning. A large assemblage of spectators had congregated at the square, and the route of march to the depot was lined with people. At nine o'clock the regiment, headed by a fine band and drum corps, started for the depot. As it passed the Franklin Hose-house, on Broad Street, the hose-carriage was brought out into the street, and the bells rang out a merry peal. At the depot many painful scenes were enacted while friends and relatives were taking leave of the departing soldiers. Thousands of persons accompanied the cars as far as Gray's Ferry bridge, being able, without difficulty, to keep up with the train. The other regiments which had received orders to move at the same time as Col. Patterson's received contrary orders during the night, but were instructed to hold themselves in readiness for marching at any time. On the afternoon of the same day the Third Regiment United States Infantry, commanded by Maj. Sheppard, passed through Philadelphia on its way

to the South. The Philadelphia regiment passed through Baltimore on the 9th, accompanied by the Third United States Infantry and Sherman's Battery.

—The work of reconstructing the bridges on the Philadelphia, Wilmington and Baltimore Railroad was commenced, with a large force of workmen, on the 10th of May.

—At a meeting of the Ladies' Union Relief Association held on the 8th of May, a statement of the work accomplished by the society, the receipts and expenditures, etc., was made. The chief object of the organization was to supply needy volunteers with a second outfit of clothing and other necessary articles. The officers were: President, Mrs. M. P. Ketterlinus; Vice-Presidents, Mrs. Parker and Mrs. Neff; Secretaries, Miss Baird and Miss Pauline Roberts; Treasurer, Mrs. Dorsey; Distributors of Outfits, Mrs. Whiteman and Mrs. Patterson.

—The First Regiment of Infantry, Col. William D. Lewis, Jr., paraded on the 9th of May, and was presented with two flags from lady friends of the members. After marching from Broad and Chestnut Streets down Broad to Walnut to Eighteenth to Chestnut, and down the latter street, they halted at the United States Mint. Here Col. Lewis and staff left the line and mounted the steps for the purpose of receiving the colors,—a national and a State flag,—which were presented by David Paul Brown. After an address by Mr. Brown, and a brief acknowledgment from Col. Lewis, Rev. Dr. Ducachet, rector of St. Stephen's Protestant Episcopal Church, and chaplain of the regiment, blessed both flags and kissed them. The regiment then took up the line of march again to its quarters and was dismissed.

—Col. Robert Anderson, of Fort Sumter fame, arrived in Philadelphia again on the 10th of May, accompanied by Mrs. Abraham Lincoln, who was on her way to Boston. A committee of the City Councils, consisting of Messrs. Craig, Dougherty, Smedley, and McMakin, of Select Council, and Messrs. Peale, Case, Cattell, and Queen, of Common Council, met the colonel at the railroad depot, and, after an interchange of civilities, escorted him to the Continental Hotel, where he was received by Theodore Cuyler, president of Select Council. On the following day (May 11th) Col. Anderson was formally received by the mayor and City Councils at Independence Hall. He was escorted from the hotel by a military procession, consisting of the Black Hussars, Capt. Beaker, Philadelphia Light Guards, Col. Morehead, and the National Guards, Col. Lyle. The line was formed on Ninth Street, and when Col. Anderson made his appearance and took his place in an open barouche, drawn by four white horses, he was greeted with deafening cheers by the immense crowd which had congregated there. All along the route to Independence Hall he was repeatedly and enthusiastically cheered. At the hall the mayor and both branches of the City Councils were in waiting, together with

the venerable Commodore Charles Stewart, Col. C. G. Childs, Col. Pleasonton, Rev. Drs. Ducachet and Boardman, and other leading members of the community. As Col. Anderson entered [1861 the hall, accompanied by Mr. Cuyler, president of Select Council, he was received by Mayor Henry, who welcomed him in terms highly eulogistic of his conduct at Fort Sumter. Col. Anderson replied briefly, after which the persons present were introduced to him. Before leaving the hall he entered his name on the visitors' book, "Robert Anderson, Colonel U.S.A., Kentucky," and then exclaimed to those near by, "Thank God, she is still in the United States!" After he had returned to his carriage, the military marched past, honoring him with a salute, and when the line had filed by a gentleman stepped forward, and, on behalf of Miss Albright, presented Col. Anderson with a handsome national flag. He took it and waved it, and as he did so the band struck up the "Star-Spangled Banner," amid the enthusiastic cheers of the multitude. In the afternoon Col. Anderson left Philadelphia for New York.

—On the 13th of May the repairs to the bridges on the Philadelphia, Wilmington and Baltimore Railroad had been completed, and two passenger trains passed through to Baltimore during the day and evening.

—The First City Troop, Philadelphia's ancient cavalry company, was mustered into the service of the United States on the 13th. The troop numbered eighty-five men, and its officers were: Captain, Thomas C. James; First Lieutenant, Richard Butler Price; Second Lieutenant, William Camac; First Sergeant Lieutenant, Richard C. Devereaux; Second Sergeants, William D. Smith, Charles F. Taggart, and Fairman Rogers.

—On the 14th of May the First Regiment National Guards, Pennsylvania Volunteers, Col. Peter Lyle, the Philadelphia Light Guards Regiment, Col. Turner G. Morehead, and the First Regiment, Pennsylvania Volunteers, Col. William D. Lewis, Jr., left Philadelphia for the South. The scenes of excitement and enthusiasm which attended the departure of Col. Patterson's regiment were repeated. The regiments proceeded by rail to Perryville, where they were transferred to steamers for Baltimore, where they were stationed for some time.

—A musical entertainment was given at the Academy of Music on the evening of the 16th of May by the pupils of Zane Street (Female) Grammar School, the proceeds to be devoted to the formation of a fund for the relief of volunteers. The feature of the evening was the singing of the "Star-Spangled Banner."

—Suffolk Park, a race-course in the southwestern portion of Philadelphia, was used as camping-ground for troops, and was given the name of "Camp McClellan." Two regiments from Ohio—the First Reg-

iment, Col. A. D. McCook, and the Second Regiment, Col. Wilson—were the first organizations to occupy it, and during their stay the camp was visited **1861** daily by thousands of people from Philadelphia. On the 17th of May one of the regiments (the Second Ohio) was presented with a stand of colors by Col. Bradford, representing citizens of Philadelphia. At Hestonville, a suburb of Philadelphia, another camp was established about the same time with the name of "Camp Owen," in honor of the commander of the Irish regiment of Pennsylvania volunteers located there. The Ohio regiments left Philadelphia for the South on the 23d.

—The Fourteenth (New York) Regiment, or Brooklyn Chasseurs, Col. A. M. Wood, arrived May 19th, on their way to Washington.

—Three small schooners, the "Mary Willis," "Emily Ann," and "Delaware Farmer," were towed to the navy-yard on the night of the 17th of May by the propeller "Live Yankee" from the mouth of the James River, Va., where they had been captured by the United States blockading squadron. They were loaded with tobacco and pig-lead, which they were taking from Richmond to Baltimore. They were the first prizes of the war that were taken to Philadelphia. On the 25th, Judge Cadwalader, of the United States District Court, released them, on the ground that the fifteen days allowed by the blockading proclamation had not expired at the time of the seizure.

—In the Presbyterian General Assembly (O. S.), which was in session in Philadelphia during the month of May, a resolution was offered by Rev. Dr. Spring on the 18th, that "a special committee be appointed to inquire into the expediency of this Assembly making some expression of their devotion to the Union of these States and their loyalty to the government, and if in their judgment it is expedient to do so, they report what that expression shall be." The resolution was laid on the table by a vote of one hundred and twenty-three yeas to one hundred and two nays. Toward the close of the meeting, however, a call was read, inviting such members of the Assembly as felt a desire to give expression to their loyalty to the Union to meet in the basement of the church. This meeting was organized by the election of Rev. William C. Anderson, of San Francisco, chairman, and Rev. J. D. Smith, of Columbus, Ohio, secretary. A committee to prepare business was appointed, after which the meeting adjourned, subject to the call of the chairman.

—In the United States District Court, on the 20th of May, Judge Cadwalader addressed the grand jury, defining the nature of treason and misprision of treason, and charging them that all questions arising under these heads should be considered with calmness and caution.

—The Second New York Regiment passed through the city on the 20th of May, going South. It was

enthusiastically cheered as it marched through the streets.

—Another naval prize, a fine ship called the "General Parkhill," belonging to parties of Charleston, S. C., was brought into port on the 21st of May by Midshipman W. Scott Schley. The "General Parkhill" was captured off Charleston by the United States vessel "Niagara."

—On the 21st the Scott Legion Regiment, Col. Gray, attended Rev. Dr. Boardman's church, at Twelfth and Walnut Streets, for the purpose of hearing a discourse by the pastor, preparatory to the regiment's departure from the city.

—When, on the 23d of May, the announcement was made in the Presbyterian General Assembly that the "record" of the Synod of South Carolina had been received, a scene of subdued excitement followed. Rev. Dr. Bergen, who submitted the record, said he rejoiced to learn from it that certain preambles and resolutions of a character unfriendly to the United States government had been laid upon the table by a vote of seventy-seven to twenty-one, and that a resolution to take up the matter again had been overruled. The committee appointed to draft resolutions expressing the sentiments of the Synod had reported that "the Synod of South Carolina is one of thirty-three which comprise the Old-School Presbyterian Church of this country, and from our brethren of the whole church annually assembled we have received nothing but justice and courtesy." The committee of the Assembly on Synodical Records recommended that the report from South Carolina be adopted, on the whole, with the exception of the following passage: "The act of 1818 was adopted by the South of that day as well as by the North, but has been since virtually rescinded." A motion to strike out this clause gave rise to a debate, which was postponed, the Assembly finally adopting the record, with the exception of a clause concerning the political action of South Carolina. On the 24th an exciting debate occurred on a series of resolutions introduced by Rev. Dr. Spring, two days before, appointing the 4th of July as a day of general prayer, petitioning God "to turn away his anger from us and speedily restore to us the blessings of a safe and honorable peace," and declaring that, "in the judgment of this Assembly, it is the duty of the ministers and churches under its care to do all in their power to promote and perpetuate the integrity of these United States, and to strengthen, uphold, and encourage the Federal government." Speeches were made by Rev. Dr. Thomas, of Ohio; Mr. Gillespie, of Tennessee; J. G. Bergen, of Illinois; and Rev. Dr. Hodge, of Princeton. Rev. Dr. Hodge offered as a substitute for Dr. Spring's resolutions an elaborate paper professing amicable feelings toward the members of the denomination at the South, but at the same time declaring that "both religion and patriotism require us to cherish a union which, by God's blessing, may yet be a

powerful and beneficial means of reuniting the broken links of our political Union, and spreading peace and joy over a grateful land." Dr. Spring's resolutions were strongly advocated by Dr. Anderson, of San Francisco; Dr. Spring; Judge Ryerson, of New Jersey; Rev. Mr. Hastings, of Pennsylvania; and Rev. Dr. Musgrave, of Kentucky; and were opposed by Rev. Mr. Watt, of Pennsylvania, and Professor Hoyt, of Nashville, Tenn. Before a vote was reached the Assembly adjourned for the day. On the following morning the debate was resumed, and Rev. Dr. E. C. Wines read a dispatch from Hon. Edward Bates, Attorney-General of the United States, in which Mr. Bates said he thought the best thing the Assembly could do to strengthen the government and maintain the Union was "to preserve the unity of the Presbyterian Church by abstaining from any deliberation upon the present troubles." In conformity with this advice Dr. Wines offered a resolution, that "the General Assembly deem it injudicious at the present time to give any formal expression touching upon the existing crisis, and therefore the matter be indefinitely postponed." Judge Allen, of Ohio, then addressed the Assembly in favor of Dr. Spring's resolution, but suggested that the second resolution should be amended by providing that the Assembly would support the government "in the just exercise of all its functions under our noble Constitution." Dr. Spring accepted the amendment. Rev. Mr. Matthews, of Kentucky, then spoke on the resolutions, commencing with, "Mr. Moderator,—It is, sir, with great pleasure that it is known that the State from which I come unfurls the stars and stripes of our government." At this point Mr. Matthews was interrupted by a wild outburst of mingled hisses and applause. "The house," says a contemporaneous account, "was thrown into a perfect furor. Cheers, with clapping of hands and stamping, commingled with hissing, were almost deafening in effect." It was with great difficulty that the moderator succeeded in restoring order. A prolonged discussion resulted, and no action was taken prior to adjournment. Another debate ensued on the 27th, in the course of which Dr. Spring offered a substitute for his resolution, pledging the Assembly to support the government, as follows: "*Resolved*, That this General Assembly, in the spirit of that Christian patriotism which the Scriptures enjoin, and which has always characterized this church, do hereby acknowledge and declare an obligation to promote and perpetuate the integrity of these United States, and to strengthen, and uphold, and encourage the Federal Constitution, in the exercise of all its functions under a noble Constitution." Various substitutes for and modifications of Dr. Spring's resolutions were proposed from day to day, and the discussion was kept up with much energy and warmth. On the 29th a telegram from Hon. Salmon P. Chase, Secretary of the Treasury, was read in the Assembly, stating that he could perceive "no valid

objection to unequivocal expressions," on the part of the Assembly, "in favor of the Constitution and freedom." A substitute for Dr. Spring's resolution, recommended by a special committee to whom they had been referred, was rejected on the 29th of May, by a vote of eighty-four to one hundred and twenty-five, and the resolutions, as proposed and amended by Dr. Spring, were adopted by a vote of one hundred and fifty-four to sixty-six. A protest against the action of the Assembly, which was signed by over forty members, was filed on the following day. The adoption of Dr. Spring's resolutions was characterized in this protest as "a great national calamity, as well as the most disastrous to the interest of the church which has marked its history."

—Saturday, May 25th, was a day of great excitement in Philadelphia, owing to the reception of news that the Federal army had on the previous day commenced its march into Virginia, and that Col. Ellsworth, commander of "Ellsworth's Zouaves," had been shot and killed at Alexandria. At half-past nine o'clock on the evening of the same day a train arrived at Philadelphia bearing Col. Ellsworth's remains, accompanied by a guard of honor consisting of seven Zouaves. Among them was Francis E. Brownell, the man who shot Col. Ellsworth's murderer, and who had with him the secession flag cut down from the "Marshall House," Alexandria, by Col. Ellsworth. The body was taken from the Baltimore Depot to the New York Depot at Kensington, where a special train was in waiting. Although it was not generally known that Col. Ellsworth's body would be brought to Philadelphia, there was a large crowd at the depot, and the Pennsylvania Rangers, Capt. Davis, were in attendance; Mayor Henry was also present. At the request of the committee which accompanied the remains, representing the citizens of Chicago and the New York fire department, no other escort was provided, except the guard of honor, composed of Zouaves, the committees, and a squad of policemen. As the cortege passed out of the building every head was uncovered.

—On the 27th of May it was announced that the Charity Hospital had been offered to the City Council for the use of the volunteers, and had been accepted.

—At the breaking out of the war gray was generally used for uniforming the volunteer regiments, but after experience in the field it was found that great confusion and danger resulted from the similarity of the Confederate uniforms, the troops of the enemy being frequently mistaken for friends, and Union regiments for bodies of the enemy. The change to blue, as the regulation color for uniforms, was made very gradually, and for some time after the battle of Bull Run gray clothing continued to be dealt out to the Pennsylvania volunteers. Among the first regiments to adopt gray uniforms was the Gray Reserves of Philadelphia, Col. P. C. Ellmaker.

—On Thursday, May 30th, there was a general move-

ment of troops from Philadelphia toward Chambersburg and other points in Southern Pennsylvania, preparatory to an advance on Harper's Ferry, 1861] Va. Among the commands ordered to the front was the historic First City Troop, Capt. Thomas C. James, which left Philadelphia on the 30th.

—In Select Council, on the 30th of May, a resolution was adopted requesting the mayor to tender to Lieut. Slemmer, the defender of Fort Pickens, the use of Independence Hall for the purpose of receiving his friends. In the Common Council, on the same day, an ordinance was adopted authorizing a loan not exceeding one million dollars for the relief of families of volunteers.

—On the 2d of June, Maj.-Gen. Robert Patterson left Philadelphia for Chambersburg, to take charge of the Federal advance into Virginia by way of Harper's Ferry.

—The Presbyterian General Assembly adjourned on the 1st of June. In dissolving the Assembly the moderator, Rev. Dr. Backus, said the church had, during the session just ended, passed through the severest ordeal it had ever had to encounter. With a firm reliance in God he hoped that prosperity and harmony would soon again prevail throughout the country. He then delivered a fervent prayer asking for a special blessing upon all the members of the Assembly.

—On the 4th of June it was announced that the Pennsylvania Regiment of Independent Riflemen had been thoroughly reorganized, with the following staff: Colonel, E. G. Chorman; Lieutenant-Colonel, S. M. Ramsey; Major, A. E. Griffith; Adjutant, N. W. Kneass; Quartermaster, W. M. Singerly; Surgeon, H. Ernest Goodman; Assistant Surgeon, David G. Bowman; Chaplain, Rev. Mr. Egan. About the same time the organization of Col. William F. Small's regiment was completed, with the following officers: Colonel, William F. Small; Lieutenant-Colonel, Rush Van Dyke; Major, Casper M. Berry; Quartermaster, John Adler; Quartermaster-Sergeant, William Dickinson; Adjutant, Joseph Dickinson; Sergeant-Major, George Wigner; Chaplain, Rev. Charles A. Beck; Commissary-Sergeant, Robert L. Bodine; Assistant Surgeon, John W. Mintzer; Hospital Steward, Luther Gerhard; Sutler, J. L. Gihon.

—The Union troops in passing through the city received many kind attentions from citizens of Philadelphia, especially from the ladies in the lower section of the city. A number of families residing in the vicinity of Washington Street Depot made it a rule to deal out coffee, sandwiches, etc., to the soldiers on their arrival at that point. Persons wishing to aid them in their patriotic work were requested to send contributions of money, coffee, sugar, hams, etc., to 110 South Street. In order to notify the ladies of the expected arrival of troops guns were fired, each gun representing the hour of the expected arrival of the

soldiers. By this arrangement persons in the district inclined to assist in the preparation of food, knew at what period they should be ready.

—At the commencement of the June term of the Court of Quarter Sessions, on the 3d, Judge Allison called the attention of the grand jury to the bill, then recently passed by the Legislature of Pennsylvania, providing for the punishment of those residents of the State who extended aid and comfort to the enemies of the Union, or accepted commissions in the Confederate service, or aided in procuring or furnishing vessels for the Southern privateer service. In this connection Judge Allison said, "The mere expression of opinions, spoken or written, adverse to the government and the war waged by it in defense of the unity and integrity of the States composing it, unless such written declarations assume the form of a traitorous correspondence with the enemies at war with this State or the United States, however ill-advised such conduct may be at the present juncture of affairs, is not an offense punishable under the act of Assembly, though it may reasonably be regarded as subjecting the person thus acting to a well-grounded suspicion of disloyalty, of being at heart a traitor, wanting but the opportunity to consummate his treason, though not liable to indictment. The law punishes only the overt act, and if it comes to your knowledge as grand jurors that any one belonging to or residing within this jurisdiction has offended against the law to which I have called your attention, let such an one be presented without 'fear, favor, or affection,' that the law may be vindicated, the hands of the government strengthened, and the guilty brought to speedy and condign punishment."

—On the 4th of June the cases of three Baltimoreans charged with being concerned in the destruction of bridges on the Northern Central Railroad came up before Judge Cadwalader, of the United States District Court, on an application by their counsel for a writ of *habeas corpus*. George H. Williams, of Baltimore, one of their counsel, had come on to Philadelphia, but having seen an article in a Sunday newspaper counseling the men of Gen. Small's command to hang him on account of his supposed complicity in the Baltimore riot of the 19th of April, and having received anonymous warnings to the same effect, he determined to return to Baltimore. Accordingly, when the cases were called he did not make his appearance in court. On being informed of the cause, Judge Cadwalader said that ample protection would have been afforded Mr. Williams had he applied for it. Mr. Wharton, another of the counsel for the defense, then announced that just before coming to court he had received a letter from Mr. Williams stating that, by orders of the War Department, the petitioners had been discharged, and that they were at their homes in Maryland.

—In the local newspapers of June 5th it was announced that the government had purchased the

steamer "Keystone State," which had formerly plied between Philadelphia and Charleston, S. C., and which carried the Pennsylvania delegation to that city to attend the Democratic national convention, with the view of converting her into a gun-boat, to be commanded by Commander S. D. Trenchard, carrying thirty-two-pounders and two nine-inch guns.

—Early in June, Governor Curtin appointed a commission, consisting of B. Haywood, Jacob Fry, Jr., Charles F. Abbott, Caleb Cope, and Evans Rogers, to investigate the alleged frauds in furnishing supplies to the troops at Philadelphia.

—Orders were received at the navy-yard on the 5th directing that the work of constructing one of the new sloops-of-war ordered by Congress should be commenced forthwith. The vessel was to be constructed after the drawings and models of the "Wyoming," one of the finest ships ever launched at this yard.

—At a special meeting of the Democratic City Executive Committee, held on the 5th of June, to take action concerning the death of Senator Stephen A. Douglas, a series of suitable resolutions was adopted, and it was determined to send a copy of them to the family of the deceased "as an evidence of the sentiments of his party in Philadelphia." Similar action was taken in Common Council on the 6th of June.

—The field and staff officers of the Philadelphia Light Artillery Regiment, which had been accepted by the United States government for three years or the war, were announced on the 6th of June to be the following: Colonel, Max Einstein; Lieutenant-Colonel, Charles Angeroth; Major, William Schoenleber; Adjutant, Shreve Ackley; Aide-de-Camp, Charles K. Doran, M.D.; Quartermaster, Frederick Breiting; Surgeon, H. Heller; Assistant Surgeon, M. Heller, Jr.; Sergeant-Major, Worthington Cromline, Jr.; Quartermaster-Sergeant, B. Reiter; Commissary-Sergeant, A. Gollem; Regimental Ensign, Herman Heymann; Drum-Major, C. Bassler.

—On the 7th of June four companies, mustered into the service of the State under the command of Capt. J. C. Chapman, John H. Taggart, C. S. Preall, and Casper Martino, left the city for Camp Curtin, Harrisburg.

—The United States sloop-of-war "Jamestown," Capt. Charles R. Green, left the navy-yard on the 9th of June for the Gulf of Mexico to form one of the blockading squadron there.

—On the 11th of June a public reception was given to Lieut. Slemmer, commander at Fort Pickens, at Independence Hall. At eleven o'clock Col. Small's regiment formed on Ninth Street near the Continental Hotel, and Company G, Capt. Adams, was detailed as a guard of honor. Lieut. Slemmer was escorted to Independence Hall, where he was received by Mayor Henry, to whose address of welcome and congratulations the lieutenant briefly replied. Before

leaving the hall he recorded his name directly after that of Maj. Anderson.

—A regiment raised by Col. John K. Murphy was accepted by the United States War Department on the 10th of June. The commander was Col. Murphy; Lieutenant-Colonel, Charles Parham; Major, Michael Scott. On the 11th of June, Col. Einstein's regiment paraded for the first time, and was presented with the national and State colors by Moses A. Dropsie on behalf of the lady friends of the command, the ceremony taking place at Franklin Square. Lewis C. Cassidy responded on behalf of the regiment. Company F (Harrison Guards), Capt. Sperring, was selected as the color-guard.

—On the 12th of June news was received of the death on the previous day of Lieut. John T. Greble, of Philadelphia, who was killed during the Big Bethel affair. Lieut. Greble was a son of Edward Greble, and a member of the Second United States Artillery. Lieut. Greble's remains reached Philadelphia on the following day, and on the 13th the funeral services were held at the residence of his father, No. 128 South Nineteenth Street, after which the body was escorted to Independence Hall by a committee representing the City Councils, and Company G, Capt. Goodfellow, of Col. Small's regiment. From the hall it was conveyed to Woodland Cemetery, escorted by Col. Small's regiment, Sharp's Rifle Guards, Capt. James Alexander, Union Artillery Guard, the Quaker City Artillery, Capt. T. W. Miller, and other organizations.

—The Keystone Regiment was organized in June and accepted by the War Department. Its officers were: Colonel, Peter Fritz; Lieutenant-Colonel, Edmund R. Badger; Major, William C. Rice; Quartermaster, Lewis W. Ralston; Surgeon, John H. Packard.

—On the 13th of June a large number of persons called upon the Hon. George M. Dallas, ex-minister to England, who had just returned from Europe, in order to pay their respects and express their approval of his course. Col. J. Ross Snowden addressed Mr. Dallas on behalf of those present, and Mr. Dallas replied, expressing his gratification at the cordial welcome which had been extended to him, and his devotion to the cause of the Union.

—On the 15th of June the State and national colors were presented to the regiment commanded by Col. William F. Small, at the residence of George F. Jones, on Girard Street. The State flag was the gift of three daughters of Mr. Small, and the national colors were obtained through the instrumentality of Mrs. Finletter and the wife of Col. Small. The national flag was presented by Thomas K. Finletter, and the State flag by George A. Coffey, both of whom addressed the regiment. A suitable reply was made by Col. Small.

—The advance-guard of Maj.-Gen. Patterson's force, consisting of ten thousand men, arrived in the

neighborhood of Harper's Ferry, Va., on the 15th of June. The place had previously been evacuated by the Confederate troops. The First Division, 1861] under Gen. Cadwalader, crossed the Potomac on the 16th, the troops wading the stream up to their waists in water, covered by two pieces of the Rhode Island Battery, which had been planted on a bluff near Williamsport.

—Thomas Young was arrested on the night of June 16th on the charge of inciting to riot, and was taken before Mayor Henry for a hearing. It was alleged that Young had declared in public, in front of the Methodist Episcopal Church on Green Street above Tenth, that privateersmen should not be regarded as pirates and hung, and that the shooting of Col. Ellsworth was justifiable under the circumstances. These assertions greatly excited an assemblage which had gathered in front of the church, and Young was finally compelled to take refuge in a neighboring house, whence, having been discovered by the mob, he was taken to the station-house under a strong guard of policemen. Mayor Henry decided that Young could not be held, as he was simply exercising the right of free speech, and therefore discharged him.

—On the 17th of June the two Philadelphia regiments, commanded by Cols. Small and Einstein, left Philadelphia, the former for Baltimore, and the latter for Chambersburg.

—The Light Infantry Corps, composed of students of the University of Pennsylvania, were presented, on the 17th of June, with a national flag by Professor Coffee, on behalf of Mrs. George H. Boker.

—On the 19th of June it was announced that Philadelphia had ten regiments in the field, under Cols. Francis E. Patterson, William D. Lewis, Peter Lyle, William H. Gray, John F. Ballier, T. G. Morehead, Charles P. Dare, Joshua T. Owen, William F. Small, and Max Einstein. These regiments numbered in all about ten thousand men. Col. Dare's regiment was originally sworn in for three months, but the larger portion of the command had already decided to enlist for the war. The lieutenant-colonel, David B. Birney, assumed command under the new organization. In addition to these, Col. E. D. Baker's California Regiment, at New York, had been reinforced by some nine hundred Philadelphians. Gen. Sickles' brigade also received large accessions from Philadelphia, and the Garibaldi Regiment of New York had at least four hundred Philadelphians in its ranks. Including Capt. McMullen's Independent Rangers, eighty-four men, and the First City Troop, one hundred men, the number of Philadelphians then in the field was about fourteen thousand. At this time five new regiments, which had been accepted by the government, were in process of formation, viz.: Col. Peter Fritz's Keystone Regiment, Col. J. K. Murphy's Jackson Regiment, Lieut.-Col. Stees' Cameron Life Guards Regiment, Col. William

E. Seymour's Chippewa Guards Regiment, and Col. Chantry's regiment.

—The "Commonwealth Artillery," mainly composed of Philadelphians, was stationed at Fort Delaware. The officers were: Captain, James E. Montgomery; First Lieutenant, Francis A. Lancaster; Second Lieutenant, Archibald McL. Roberts; Ensign, John W. Kester, Jr.

—The military hospital on Christian Street above Ninth had sixteen patients in it on the 20th of June.

—The new wing of St. Joseph's Hospital (the corner-stone of which was laid on the 19th of July, 1860) was blessed on the 20th of June by the Right Rev. Bishop Wood. The new building was four stories in height, facing Girard Avenue, with Nineteenth Street on the west.

—The Twenty-ninth (New York) Regiment, composed principally of German residents of New York and Philadelphia, arrived at the latter city on the night of the 21st of June. The Turner Society marched to the depot at the foot of Washington Street to receive the regiment, to which it presented a handsome flag.

—An association of residents of southern Philadelphia, formed for the purpose, rendered valuable service by supplying soldiers passing through the city with food. A lot at the corner of Swanson and Washington Streets was secured, and here the troops, on their arrival at Washington Street Depot, were provided with substantial food and coffee.

—The Philadelphia Battalion, composed of the third company State Fencibles, Capt. J. F. Nagle; Wetherill Blues, Lieut. J. Book commanding; Greble Guards, Capt. O. B. Griffith; and the second company Garde Lafayette, Capt. Theodore H. Peters, were attached to Col. D. H. Williams' regiment of Pittsburgh.

—On the 22d of June the "People's party" convention for the Second Congressional District met and nominated Charles O'Neill for Congress, and adopted resolutions denouncing the Rebellion and pledging the support of the members to the Federal government. The Democratic convention met on the 24th, adopted similar resolutions, and nominated Charles J. Biddle. The Constitutional Union convention, which met on the same day, adopted a resolution requesting Mayor Henry, Theodore Cuyler, Charles B. Trego, Horace Binney, Henry C. Baird, Morton McMichael, Robert P. King, Joseph P. Loughhead, James Traquair, Benjamin F. Brewster, Samuel H. Perkins, William L. Hirst, Henry M. Watts, Benjamin Gerhard, George W. Biddle, Samuel W. De Coursey, Daniel Haddock, Samuel Sparhawk, Dr. Samuel Jones, Wetherill Lee, J. Price Wetherill, Hon. Oswald Thompson, and Hon. George Sharswood to act as a committee of citizens, irrespective of party, in nominating a candidate to represent the Second Congressional District. "The qualifications of said nominee to be: first, ability for the duties of

the position; second, unfaltering devotion to the union of the States and the maintenance and support of all its laws." The committee subsequently nominated Hon. William M. Meredith, who, however, declined to serve.

—The Philadelphia Merchant Troop, Capt. E. B. Martin, which was attached to Col. W. H. Young's Kentucky regiment, was inspected by the regimental commander on the 25th of June.

—The ship "Amelia," Capt. Kenzie, which sailed from Liverpool on the 23d of April with a cargo of iron, camp-ovens, camp-equipment, etc., for Charleston, and was captured off the latter port while attempting to force the blockade by the United States gun-boat "Union," arrived at Philadelphia on the 26th of June in charge of an officer of the navy. The "Amelia" was a large and valuable vessel.

—The Seventy-first Regiment Pennsylvania Volunteers, or the California Regiment, was raised by Col. Edward D. Baker, who had been a resident of California from 1852 to 1859, and who was senator from Oregon at the outbreak of the war. He raised "the California Regiment" partly in New York and partly in Philadelphia, and gave it that name in allusion to his former residence in California. The regiment arrived on the 29th of June, and encamped at Suffolk Park. The lieutenant-colonel, Isaac J. Wistar, and the major, R. A. Parrish, were Philadelphians. On the 30th a flag was presented to the regiment by Lieut. Todd, of Company C, on behalf of Mrs. Yeager, whose husband was a member of the company. The regiment proceeded southward on the 4th of July, and was sent to Fortress Monroe. Col. Baker was killed at Ball's Bluff on Oct. 21, 1861.¹

—There was a pension board established in Pennsylvania by acts of March 31, 1812, and Feb. 26, 1813, for soldiers in the Pennsylvania line during the Revolutionary war who were regularly discharged, and who, "from bodily infirmity or other cause, were unable to earn a living." This provision was extended, Feb. 7, 1814, to soldiers who were wounded during service in the Pennsylvania line, and who did not have property sufficient to maintain them. By act of May 15, 1861, widows of soldiers who died after being mustered into the service of the United States, or of this State, were entitled to pensions if they had

minor children under the age of fourteen years, and were to receive eight dollars per month until the children were fourteen years old. By act of March 27, 1865, any honorably-discharged officer [1861 or soldier, including volunteers, militia, or drafted men, since the 4th of March, 1861, disabled by any wound received or disease contracted in the service of the United States, are entitled to eight dollars per month or less, according to circumstances, the pension continuing during the existence of said disability, or until the party receives a gratuity or pension from the United States. By act of March 13, 1866, gratuities, or pensions, on account of the services of soldiers in the war of 1812, were restricted to soldiers who had served at least two months in said war, or who were wounded or disabled in said service, or to their widows who had not married. A gratuity was given of forty dollars at once, and forty dollars per annum. By act of March 24, 1868, the provisions of the law were extended to soldiers who had not been in service two months, but who had been in any actual engagement with the enemy. By the same act the term "necessitous circumstances" was construed to mean "not to be possessed of real or personal estate to the value of five hundred dollars."

—In June two regiments of the Home Guards were organized, one of artillery and the other of infantry. Besides these there were a number of unattached companies organized in the different wards, the total force footing up nearly five thousand men.

—The remains of Commander James H. Ward, who was killed on the steamer "Freeborn" on the 27th of June, while attempting to cover the landing of troops at Mathias' Point, were brought to Philadelphia on the 29th. On the following day they were transferred from the undertaker's to the foot of Walnut Street, to be conveyed by the Camden and Amboy Railroad to New York, and thence to Hartford, Conn., where Commander Ward was born. The body of Assistant Surgeon William N. Handy, of Col. Lyle's Philadelphia regiment, who had died in Baltimore of apoplexy, reached Philadelphia on the 29th, with an escort of twenty men, two from each company of the command.

—On the 1st of July, Mr. McMurtrie, the prize commissioner, filed in the United States District Court his report of the testimony taken in the case of the ship "General Parkhill," seized off Charleston, S. C., for attempting to violate the blockade. The owners of the vessel, Messrs. Patterson & Stock, appeared through their counsel, Messrs. Wharton, Harrison, and Guillou, and presented their claim. The point was raised by Mr. Harrison, whether the blockade was lawful, and, if lawful, whether the ship was endeavoring to run it. No authority, he argued, could be found in the Constitution permitting the President of the United States to establish a blockade, and the owners of the vessel, who were citizens of the United States, had a perfect right to question

¹ Col. John W. Forney, in his "Recollections of Public Men," thus graphically describes a scene that took place in the United States Senate between Col. Baker and Hon. John C. Breckinridge, of Kentucky:

"Perhaps the most dramatic scene that ever took place in the Senate-chamber—old or new—was that between Breckinridge and Col. E. D. Baker, of Oregon, on the 1st of August, 1861, five days before the adjournment *sine die*, in the darkest period of the war, when the Rebellion was most defiant and hopeful. . . . Breckinridge rose to make his last formal indictment against the government. Never shall I forget the scene. Baker was a senator and a soldier. He alternated between his seat in the Capitol and his tent in the field. He came in at the eastern door (while Breckinridge was speaking), in his blue coat and fatigue cap, riding-whip in hand. He paused and listened to the 'polished treason'—as he afterward called it—of the Senator from Kentucky, and, when he sat down, he replied with a fervor never to be forgotten."

the legality of the blockade. Chief Justice Taney had decided in the Merryman case that the President had no power to declare martial law and suspend the writ of *habeas corpus*, and it followed that he had no more right to issue the proclamation under which the "General Parkhill" had been captured and brought into court.

—The election to fill the vacancy caused by the resignation of E. Joy Morris, congressman from the Second District, which was held July 2d, resulted in the choice of Col. Charles J. Biddle, Democrat, over Charles O'Neill, People's candidate; Hon. William M. Meredith, nominated by the Citizens' Committee, selected by the Constitutional Union party, having declined to serve. The vote was, Biddle, 3937; O'Neill, 3694; Biddle's majority, 243.

—Col. Baker's California Regiment left Suffolk Park on the 3d of July with the intention of proceeding to Fortress Monroe on the steamers "Virginia" and "Richmond," but after a portion of the command had gone on board, a dispatch was received from Washington directing it to proceed to Baltimore. Accordingly the regiment left on the night of the 3d for Baltimore by rail.

—The Fourth of July was celebrated with more than usual spirit this year, one of the features of the day being an imposing parade of the local military organizations. The line was formed at seven o'clock in the morning on Broad Street, the right resting on Ridge Avenue. At the head of the line marched a platoon of policemen, following which came the First Regiment, Gray Reserves (Col. P. C. Ellmaker), and next the Blue Reserves under Lieut.-Col. Taylor. The battalion of Light Infantry followed, consisting of the Boys' Own Infantry, Capt. Isaac Starr, Jr.; University Light Infantry, Capt. J. D. Hartranft; Commonwealth Light Infantry, Capt. Sutherland Prevost; Quaker City Artillery, Capt. Frank Miller; National Guards Cadets, Capt. Bland; Pennsylvania Cadets, Capt. John Sword; Garde Lafayette Cadets, Capt. E. J. Hincken. Next came the first battalion of the First Regiment of Rifles, Capt. John A. Koltes; First Battalion Second Regiment of Rifles, Capt. Charles E. Graeff; First Regiment Infantry of the Line, Col. J. M. Bickel; Second Regiment Infantry of the Line; battalion of the Third Regiment of the Line, Capt. L. B. Thomas commanding; First Battalion First Regiment of Artillery, Capt. Matthew Hastings commanding; Battery of Field Artillery, Capt. Chapman Biddle; first squadron, First Regiment of Cavalry, Capt. John Bavington. The column was reviewed by the mayor and City Councils at Penn Square. A salute of thirty-four guns in honor of the day was fired by the French ship "David," Capt. Barron, lying at Lombard Street wharf. The compliment was returned by a number of custom-house officers, who procured a cannon and, having run up the French flag, saluted it with twenty-one guns.

—The general business prostration caused by the war had already occasioned much distress among the workingmen, and on the 8th of July a mass-meeting of unemployed mechanics and laborers of the Fifteenth Ward was held, with James Bigger as chairman, at which it was resolved to call upon the City Councils "to pass, without delay, an ordinance authorizing the several departments to proceed forthwith to execute such work as must be done some time, and which can now as well be done as at any time in the future, such as the laying of gas-pipes, water-pipes and mains, grading of streets, building of school-houses, improvement of the public park, and such other work as Councils may in their judgment determine upon." In Select Council, on the 11th of July, Mr. Dickson, of the committee appointed to devise work for the unemployed of the city, reported an ordinance appropriating money for the prosecution of various public works.

—The Twenty-second Regiment of Infantry, Pennsylvania Volunteers, known as the Philadelphia Light Guard, and commanded by Col. T. G. Morehead, was accepted July 15th by the Secretary of War for three years' service.

—On the 15th of July, Lieut. McFarland, of Company A, Third Pennsylvania Regiment, arrived in Philadelphia from Martinsburg, Va., with five Confederate prisoners, who had been captured by the Third Pennsylvania Regiment while performing picket duty. They were taken to Fort Delaware.

—There was a large gathering on the 15th at Engel and Wolf's farm of the friends of Col. Schimmelpfennig's regiment, which was about to leave for the seat of war. The Young Maennerchor, Teutonia, Saengerbund, Germania, Orion, and Orpheus singing societies, and the Maennerchor Rifles, Citizens' Rifles, Sharpshooters, Turners' Home Guard, Hlasko Cadets, Blücher's Home Guards, Capt. Schoeminger, Louis Winter's pupils, and Hildebrandt's Gymnastic Zouaves were present. The day was spent in military exercises, singing, dancing, and theatrical performances.

—The First City Troop, Home Guard, having been fully equipped, offered their services to the government, but were informed by the War Department that no more troops would be accepted unless authorized by Congress. The Lincoln Legion, under the command of Col. Romaine Lujeane, received their mustering orders about the same time. The Legion had their encampment on the Judge Peters farm, on the Schuylkill, a short distance above Columbia bridge. It was known as Camp Sweeney.

—The Philadelphia Merchant Troop, Capt. E. B. Martin, was sworn into the service of the United States on the 18th of July.

—In response to a letter to Gen. Scott from a number of prominent citizens, expressive of their appreciation of his distinguished services, the following reply was received and published on the 19th of July:

"WASHINGTON, July, 1861.

"GENTLEMEN,—Of the testimonials with which I have at different times been honored by portions of my countrymen, not one has been more precious to me than that I had the happiness to receive from you, my esteemed friends of Philadelphia. It cannot be long before my public acts will be reviewed by posterity, when its judgment, I humbly hope, may be somewhat colored by the partiality that now cheers my declining years. I have the honor to remain, gentlemen, your grateful servant,

WINFIELD SCOTT.

"MESSRS. ALEXANDER HENRY, HORACE BINNEY, RICHARD VAUX, WILLIAM MEREDITH, and two hundred and five others."

—Committees appointed by the companies of Home Guards, Reserve Blues, Reserve Grays, and Zouaves favorable to the formation of a regiment to be offered to the general government for active service, met on the 18th at Saranac Hall and received reports from the different companies. Several of the companies were still in their infancy, but their officers felt confident that they could have the requisite number of men within ten days. It was determined by the meeting that each company should immediately open muster-rolls. Capt. E. M. Gregory was chairman of the meeting, and Lieut. William Chapman secretary.

—The encampment of Col. J. K. Murphy's regiment, located four miles west of the Schuylkill, between Haddington and Hestonville, was visited daily about this time by large numbers of persons. A dress parade took place every morning and afternoon. The last company of Col. J. W. Geary's regiment was mustered in on the 18th, at Camp Coleman, Oxford.

—In the case of the ship "General Parkhill," Judge Cadwalader rendered a decision on the 19th that the owners of the vessel, Messrs. Stock & Patterson, could not appear as claimants, because they were residents of an insurgent State,—South Carolina,—and consequently had no standing in a prize-court. It was ordered, therefore, that the necessary steps be taken to condemn the vessel and sell it for the benefit of the government.

—The Cameron Dragoons, Col. M. Friedman, had, it was announced on the 22d of July, been accepted by the Secretary of War, and were going into camp as fast as the members were mustered in, on a lot opposite the depot of the Ridge Avenue Railway Company.

—Monday, July 22d, was a day of intense excitement, owing to the reception of news of the battle of Bull Run and the repulse of the Federal army under Gen. McDowell. An immense number of extras were sold, and the newspaper offices and the streets in their vicinity were crowded throughout the day and until late at night by people anxious to obtain the latest intelligence from the seat of war. The news had a depressing effect on the citizens generally, but stimulated recruiting. Squads were sent out by the recruiting officers, each headed by a drum and fife, and a number of volunteers fell into line at different points. Great activity also prevailed in forwarding troops and supplies to the front. At a meeting of the Councils Committee on the Defense and Safety of the City, held on the 22d, it was determined to order two batteries of Parrott guns from the Cold

Spring Foundry, near West Point, N. Y., for the use of the city. Regiments partially formed several weeks before filled up rapidly, and steps were taken to organize new ones should the government call for additional troops. [1861 Drs.

Joseph Heritage, T. S. Reed, John Gegan, Jr., John Sterling, D. Jameson, Jr., and William P. Henry, and Mr. and Mrs. Savery volunteered their services as surgeons and nurses about this time, and having been accepted, left at once for the seat of war. A member of the Sixty-ninth New York Regiment, who was in the engagement at Bull Run, was in Philadelphia on the 23d, and on making his appearance on Chestnut Street, was surrounded by a crowd, which soon became so large that he took refuge in a store.

—On the afternoon of the 23d, Col. Dare's regiment Pennsylvania Volunteers returned, their term of service—three months—having expired. Although no public announcement had been made of their expected arrival, a large crowd had collected at the depot, and when the men alighted from the cars they were greeted with cheers. Nearly every soldier brought with him some trophy from Harper's Ferry, and several had secession flags, which attracted no little attention. The men marched to the arsenal where they deposited their muskets, after which they were allowed twenty-four hours in which to see their relatives and friends. The regiment had been accepted for three years, fully two-thirds of the men having re-enlisted. Hildebrand's Gymnast Zouaves were added to the regiment to make up its complement, and the command was given to Lieut.-Col. Birney.

—The manufacture of wagons for the government had now become an important industry, over six hundred men being employed day and night in the two establishments which had the contract for furnishing them. About one thousand knapsacks were also turned out daily at one of these factories. Philadelphia was also largely interested in furnishing other supplies to the government.

—It was announced on the 24th of July that a number of members of the Philadelphia Rifle Club had decided to enroll themselves as a company of sharpshooters, to tender their services to the government. Their shooting-master was T. F. Kolb. Only such riflemen were accepted as could hit the target ten times in succession, at a distance of two hundred yards at rest within five inches of the centre, or off-hand within eight inches of the centre.

—Col. Francis E. Patterson's regiment, Pennsylvania Volunteers, reached the city on the 25th. They were received with a salute of thirty-four guns, and were escorted by the Gray Reserves, Col. P. C. Ellmaker, to Washington Square, where they were formally dismissed. The term of service for which the regiment had enlisted having expired, the command was reorganized and accepted by the War Department for three years.

—Gen. George Brinton McClellan, who had been appointed to the command of the Army of the Potomac to succeed Gen. McDowell after 1861] the latter's disastrous defeat at Bull Run, arrived in the city from Pittsburgh on the 25th of July. A large assemblage had collected at the Pennsylvania Railroad Depot, Eleventh and Market Streets, through which he and Mayor Henry, who had come to meet him and tender the hospitality of the city, had some difficulty in making their way to the carriage which awaited them. Gen. McClellan, Mayor Henry, and Capt. Desilver, of the Home Guards, occupied seats in the carriage, which on reaching Broad Street took its place in the line which had been formed by the Gray Reserves, who acted as an escort. The cortege proceeded down Chestnut Street to Third, down Third to Walnut, and up Walnut to the residence of Gen. McClellan's brother, Dr. John H. B. McClellan, on Walnut Street, near Eleventh, where a large crowd had collected. As the general stepped from the carriage he was greeted with enthusiastic cheers. A few minutes later, in reponse to loud cries from the assemblage, he appeared on a balcony and expressed his gratification at the warmth of his reception, which he said he knew was not intended so much for himself as to mark their appreciation of the services of the men who had fought so bravely in Western Virginia. Gen. McClellan left soon after for Washington. Gen. McClellan was the son of Dr. George McClellan, of Philadelphia, and was born at the southwest corner of Seventh and Walnut Streets on Dec. 3, 1826. Dr. McClellan was born in 1796, in Connecticut, and his wife was a Miss Brinton, of Philadelphia.

—In Select Council on the 25th, an ordinance was adopted appropriating a further sum of one hundred thousand dollars for the relief of families of volunteers, which, with the sums previously appropriated, made three hundred and twenty-five thousand dollars devoted to this purpose, of which \$58,881.22 had been expended. Resolutions eulogistic of Gen. McClellan and his soldiers in the engagement at Beverly, and proposing to purchase a sword with a suitable inscription, to be presented to the general, which had already been adopted by the Select Council, were concurred in by Common Council.

—The three months for which most of the regiments had volunteered having expired, large numbers of troops were now arriving almost daily on their way home. As the different regiments arrived at the foot of Washington Avenue, they were received by the Refreshment Committee and provided with food, etc. The Volunteers' Refreshment Saloon at Delaware Avenue and Washington Avenue, and the Cooper Shop Refreshment Saloon on Otsego Street below Washington Avenue, under the control of William M. Cooper, were in constant operation. The articles furnished were coffee, bread and butter, cheese, ham, sausages, and other substantials.

—A regiment named the McClellan Regiment, in honor of Gen. McClellan, was raised during the latter part of July, with the following officers: Colonel, Jacob Zeigler; Lieutenant-Colonel, Samuel C. Johnson; Major, John C. Johnson; Adjutant, Benjamin C. Brooker; Quartermaster, William Sharkey; Surgeon, H. B. Linton; Assistant Surgeon, Philip Leidy, Jr.

—The Sixty-ninth New York Regiment, which behaved so gallantly at the battle of Bull Run, arrived on the 26th, *en route* for New York. A large crowd gathered at the depot at Broad and Prime Streets, exhibited great enthusiasm, and when the regiment reached the wharf at the foot of Washington Street, the soldiers were treated with marked kindness by the committee in charge of the refreshment depot.

—On the 27th of July, Col. Geary's regiment left Oxford Park for Harper's Ferry. Four of the companies were organized in Philadelphia. The field officers were: Colonel, John W. Geary; Lieutenant-Colonel, Gabriel de Korponay; Major, Hector Tyn-dale; Adjutant, John Flynn; Surgeon, Henry Ernest Goodman; Assistant Surgeon, Samuel Logan; Chaplain, Charles W. Heisley; Quartermaster, Benjamin F. Lee; Sergeant-Major, Samuel D. McKee; Quartermaster-Sergeant, David B. Hilt; Commissary-Sergeant, John P. Nicholson; Regimental Postmaster, Thomas B. Hurst; Wagonmaster, George W. Keller.

—By the end of July most of the three months' volunteers had returned, and many of them had promptly re-enlisted. The Philadelphia Fire Zouave Regiment, Col. Baxter, and Col. D. B. Birney's regiment (formerly Col. Dare's) were organized almost immediately upon the return of the soldiers from the South. The Twenty-first Regiment, Col. Ballier, reached the city on the 29th, and the Scott Legion, Col. Gray, on the 30th. The Twenty-first halted in front of Gen. Patterson's residence, on Locust Street, between Thirteenth and Broad, and were addressed by the general, who warmly praised their conduct during the Valley campaign.

—A meeting of the friends of the National Guards Regiment, Col. Peter Lyle, was held on the 30th of July, to make arrangements for a reception of the command on its return to Philadelphia from Baltimore, Md., where it had been stationed for some time. George S. Adler presided, and A. J. Wester acted as secretary. It was determined to furnish an escort of Home Guards and citizens, and to provide a collation at the National Guards' Hall. George S. Adler was appointed chief marshal, with the following aids: John Fenlin, Jacob Crawford, Joseph Delavau, John Hill, G. Collins, and Isaac McBride. The National Guards reached the city on the night of the 31st of July. They were met at the depot by the First and Second Regiments of Infantry, Home Guards, Companies A, B, C, and D, German Rifles, and Company A, First Regiment of Cavalry, which acted as an escort. At the armory the returned soldiers were handsomely entertained.

—Prince Napoleon and suite arrived in Philadelphia on the 31st of July from New York *en route* for Washington. On the following day he visited the park and various public institutions.

—Maj.-Gen. Robert Patterson was serenaded on the night of July 31st at his residence, Thirteenth and Locust Streets. He was introduced to those present by Benjamin H. Brewster, who warmly eulogized his military services while in command of the Pennsylvania troops in Virginia. In replying, Gen. Patterson thanked the assemblage for the confidence in himself which their compliment expressed, and said the Pennsylvania troops had behaved with conspicuous skill and courage. Col. Francis E. Patterson, the general's son, also made a brief address. The Twenty-fourth Regiment, Pennsylvania Volunteers, Col. Owen, paraded on the 1st of August, and proceeded to the residence of Brig.-Gen. J. D. Miles, on Franklin Street, near Noble, where they halted, and Gen. Miles, appearing in full uniform, delivered an address welcoming them home. Col. Owen, in replying, said he could promise that the Twenty-fourth would enlist for the war.

—The brig "Herald," laden with tobacco and naval stores, was brought to the navy-yard on the 1st of August in charge of a prize-master, having been captured off Cape Hatteras by the United States frigate "St. Lawrence" while attempting to run the blockade.

—In response to a call signed by a number of citizens for a meeting of those opposed to the system of partisan nominations, which had previously been in vogue in the city, a large assemblage collected on the 1st of August at the Merchants' Exchange. William Welsh was called to the chair, and the following vice-presidents were selected: First District, John G. Davis; Second, S. H. Perkins; Third, H. J. Williams; Fourth, Benjamin Gerhard. Frederick Fraley and John B. Kenny were appointed secretaries. A series of resolutions, proposed by E. Spencer Miller, were adopted, in which it was declared that no reverses could shake the determination of those present to support the Federal government at any sacrifice, and that to weaken and divide this support by renewing party issues, which had become subordinate, was as dangerous as to obstruct the government by direct opposition. It was also determined that a committee should be appointed, consisting of two persons from each ward, who should make nominations for all the offices to be filled in the ensuing October.

—In the Common Council on the 1st of August an ordinance from Select Council appropriating an additional sum of two hundred thousand dollars out of the loan of one million dollars for the benefit of the families of volunteers was concurred in. A resolution from the same chamber providing for the appointment of a committee to memorialize the Federal government to make the Philadelphia navy-yard a first-class naval station was also agreed to.

—The United States steamer "Albatross," Capt. George A. Prentiss, arrived on the 2d of August, having in charge the schooner "Enchantress." The latter vessel had been captured on the 6th [1861] of July two hundred and sixty miles south-east of Sandy Hook by the privateer "Jeff Davis," which placed on board a prize crew composed of Walter W. Smith, of Savannah, Ga., prize-master; Eben Lane, of West Cambridge, Mass.; Thomas Quigley, of New York; Daniel Mullings, of Charleston, S. C.; and Edward Rochford, of Liverpool. The steamer "Albatross," however, overtook the "Enchantress" while on her way to Charleston and recaptured her. The "Enchantress" had a cargo of assorted goods suitable for the army. The prize crew were placed in irons and brought with the vessel to the navy-yard, whence they were taken to Moyamensing jail.

—The Twenty-ninth Regiment Pennsylvania Volunteers, known as the Jackson Regiment, and commanded by Col. John K. Murphy, left for Harper's Ferry on the 3d of August. On the same day the National Guards, Col. Lyle, were reviewed in front of the custom-house by the City Councils, and Theodore Cuyler, president of Select Council, as the representative of Mayor Henry, who was unavoidably absent. After the command had performed various evolutions Mr. Cuyler briefly welcomed them back to the city. Col. T. G. Morehead's regiment paraded on the afternoon of the same day.

—On the 5th of August, Mr. Chew, of Germantown, applied to Judge Ludlow for an injunction to prevent Senator Mason (of Mason and Slidell notoriety) from taking money out of the estate in which he was interested, located in Philadelphia County. In asking for the order, Mr. Chew said, "I apply to your Honor for an order to prevent James M. Mason from taking out of the jurisdiction of the court funds which the trustees have invested under the order of the Orphans' Court. Already a very large sum has been taken out of the State by that very remarkable traitor, and I have no prospect of ever getting retribution if the balance of the funds is taken away." Judge Ludlow suggested that a citation might issue, and notice could be given by publication.

—The field officers of the Third Regiment, Reserve Brigade, held an election on the 1st of August. C. M. Eakin was chosen colonel, John C. Paynter lieutenant-colonel, and T. Gordon Miller major. The officers of the Twenty-third Regiment, as announced on the 7th of August, were: Colonel, David B. Birney; Lieutenant-Colonel, Charles Wilhelm; Adjutant, John E. Collins; Surgeon, Samuel W. Gross; Sergeant-Major, J. Adams; Quartermaster-Sergeant, T. W. Jones; Commissary-Sergeant, W. Shipman.

—On the 6th of August the crew of the schooner "Protector," belonging to Philip Fitzpatrick, of Philadelphia, which was captured off Hatteras on the 28th of July by the Confederate privateer "Gordon,"

arrived in an open yawl-boat from Newbern, N. C. The "Protector" was commanded by Capt. Linna-kin, and the crew consisted of Thomas Ross, 1861] James Quomoe, and David Hart, of Philadelphia. After the capture they were taken to Newbern, placed in the yawl-boat, supplied with provisions, and told to make their way home as best they could.

—The steam gun-boat "Flag," Capt. Sartori, arrived at the navy-yard on the 7th of August from the Gulf of Mexico, having on board the officers and part of the crew of the Confederate privateer "Petrel," which was sunk by the frigate "St. Lawrence" off Charleston. The commander of the "Petrel" was Capt. William Perry, whose lieutenants were R. W. Harvey and Charles Campbell. The gunner was Auguste Peyresett. Eight of the crew were either killed by the fire of the "St. Lawrence" or drowned when the vessel sunk. The prisoners were taken to Moyamensing jail.

—A hearing in the case of the Confederate prize crew of the "Enchantress," charged with piracy, was held on the 7th of August before United States Commissioner Heazlett. Eben Lane was represented by F. Carroll Brewster, and the other four prisoners by N. Harrison. The hearing was continued on the 8th, when the prisoners were committed, without bail, to answer the charge of piracy at the next term of the United States Circuit Court.

—The Twelfth Regiment, Pennsylvania Reserve Corps, opened recruiting stations in Philadelphia about the 7th of August. The commander of the regiment was Col. John H. Taggart.

—On the 9th of August, Thomas J. Armstrong was executed for the murder of Robert Crawford on the night of the 21st of September, 1860. The crime was one of peculiar atrocity. Crawford was invited by Armstrong to take a ride in the latter's wagon, and while in the wagon was murdered and robbed, his body being afterward thrown upon the highway. Armstrong before his death made a confession implicating two other parties, who, however, were shown to be innocent.

—After the battle of Bull Run a letter to Gen. Winfield Scott was written and signed by the mayor and a number of leading citizens, expressing their unbounded confidence in his wisdom and courage.

—The Independent Rangers, Capt. William McMullen, reached the city on the 12th of August, from Sandy Hook, Md. A large number of friends of the members and others assembled at the Broad and Prime Streets Depot to witness their return, and a company of the Scott Legion Regiment, under command of Capt. Crossin, and one of Col. Patterson's regiment, under Capt. Bassett, were present as an escort. The procession halted in front of the residence of Gen. Patterson, who, accompanied by his son, Col. Patterson, came out upon the steps in full uniform and made a brief address of welcome.

—A further hearing of the cases of the crew of the privateer "Petrel" was had by United States Commissioner Heazlett on the 14th of August. N. Harrison and John P. O'Neil represented thirty-three of the prisoners, and Charles W. Brooke and George W. Arundel appeared respectively for two of the others. United States District Attorney Coffey was assisted by George H. Earle. The prisoners waived a hearing, and on the 17th the commissioner, after hearing the evidence of Capt. Sartori, commander of the United States steamer "Flag," committed them for trial.

—The First City Troop, Capt. James, was escorted to its armory on the 14th of August by the First City Troop, Home Guard, Capt. Bavington, the Seventeenth Regiment of Pennsylvania Volunteers, Col. Patterson, the Independent Rangers, Capt. McMullen, and a battalion of Gray Reserves under Col. Snowden. On the right of the troop were several of its members who had not been in active service and who were dressed in the holiday uniform of the command. The troop during their absence had been chiefly employed in Virginia, in the neighborhood of Harper's Ferry.

—The ship "General Parkhill," which was captured while running the blockade off Charleston and brought in as a prize, was sold on the 15th of August, at public auction, for seven thousand four hundred dollars to Workman & Co., of Philadelphia, for Holmboe & Co., of New York.

—Two United States gun-boats, in course of construction at the ship-yards of Jacob Birely and Hillman & Streaker, were announced on the 16th of August to be rapidly approaching completion, although work had been begun on them only about two months before. About the same time Matthews & Moore completed the casting of a large cannon at their works on Bush Hill, from Reading iron. The gun weighed about five tons, and projected a nine-inch shell.

—On the 17th of August it was stated that the following regiments were in process of formation: First Artillery, Col. Patterson; McClellan Regiment, Col. Ziegler; Thomas A. Scott Regiment, Col. Conroy; Keystone Regiment, Lieut.-Col. Badger; Washington Legion, Col. Harvey; Fire Zouave Regiment, Col. Baxter; Zouave Regiment, Col. Gosline; Scott Legion Regiment (no colonel then named); Twenty-fourth Regiment, Col. Owen; Pennsylvania Legion Regiment, Col. Koltes; Andrew Johnson Regiment, Col. Kirk; Twenty-third Regiment, Col. Birney; the Cameron Regiment; the Eighteenth Regiment, Col. Miller; Col. Gregory's regiment (Home Guard); Col. Morehead's regiment; Col. Fritz's regiment; Col. Chantry's regiment; Col. Lujane's regiment; Col. Rush's cavalry; Col. Chorman's Mounted Rifle Rangers; Col. Friedman's cavalry; Col. John Richter Jones' regiment; two German regiments and the Washington battalion, Col. Williams. Recruiting was also going on for Maryland and Delaware regi-

ments, and to fill up Col. Small's, Col. Baker's, and Col. Geary's regiments. There were several encampments within the city limits, two on the Wissahickon, one at Hestonville, one at Suffolk Park, one at Camac's woods, and several elsewhere. Col. Henry Bohlen's regiment, in process of forming, was located at Hestonville.

—Such was the magnitude of the operations at the Philadelphia navy-yard at this period that seventeen hundred mechanics and laborers were employed.

—An order from the War Department directing that troops, including those of regiments not fully organized, should be forwarded to Washington as soon as possible, created great activity and excitement during the latter part of August. Col. Edward D. Baker of the California Regiment came with authority to raise a brigade, and accepted Col. Baxter's Fire Zouaves, Col. Gosline's Zouaves, and Col. Owen's Irish Regiment. A movement was commenced at the same time to form a new artillery regiment based on the Commonwealth Artillery Company, Capt. Montgomery, which had been stationed at Fort Delaware. The Scott Legion was reorganized with Edwin R. Biles as colonel.

—Pierce Butler, a well-known citizen, was arrested on the 19th of August at his residence on Walnut Street, by order of the War Department, and sent to Fort Hamilton, N. Y. Mr. Butler was charged with having left for the South just after the attack on Fort Sumter, taking with him a number of secession cockades, pistols, etc., and it was claimed had returned to the city for the purpose of aiding the Confederates.

—In view of the urgent demand of the government for more troops, the Home Guards and Gray Reserves took into consideration the question whether they would offer themselves for active service of a temporary character. On the 21st of August, however, a dispatch was received from Hon. Simon Cameron, Secretary of War, stating that the department would not, in any event, call on the Home Guards or Gray Reserves for temporary service.

—Butterfield & Co., who were extensively engaged in furnishing arms to the general government and State of Pennsylvania, obtained patents for a breech-loading cannon and a breech-loading musket, which were regarded as great improvements on weapons of the same character then in use.

—The schooner "G. G. Baker," which had been captured by the United States steamer "South Carolina," and subsequently by the Confederate privateer "York," but afterward recaptured by the United States steamer "Union," arrived at the navy-yard on the 22d of August, in charge of Prize-master John White, of the United States frigate "Minnesota." The vessel was loaded with coffee, sugar, and rope.

—Thomas J. Carson, Walter W. Kelley, and William M. Pegram, who had been arrested in Harrisburg on suspicion of being Confederate spies, were on the 22d of August committed for a hearing.

—By direction of the President of the United States, United States District Attorney Coffey, on the 22d of August, gave directions to the United States marshal to seize all copies of [1861 the *New York Daily News*, *New York Day-Book*, *New York Journal of Commerce*, and *Philadelphia Christian Observer*, under an act of Congress authorizing the President to stop all transportation of aid and comfort to those in rebellion. The *Christian Observer* office was first visited, and the types seized. A force of officers stationed at Walnut Street wharf examined the bundles of newspapers upon the arrival of the mails from New York, and seized all copies of the newspapers mentioned.

—On the 22d of August the following permanent officers of the "No-Party" convention were elected: President, A. J. Derbyshire; Vice-Presidents, John Agnew and John Thompson; Secretaries, John Lambert and William McGlensy.

—The Councils Committee on the Safety and Protection of the City were induced by the result of the battle of Bull Run to take energetic measures for defense. Twelve Parrott rifled cannon (twelve- and twenty-pounders) were purchased, and twelve rifled pieces were also ordered to be cast at Phoenixville. A steel cannon, made in Paris, was presented to the city by George McHenry, and three more of the same pattern were purchased by private individuals. Application was also made to the general government to put the river and harbor defenses in complete order.

—The United States sloop-of-war "Tuscarora" was launched at the navy-yard on the 24th of August. The keel of the "Tuscarora" was laid on the 26th of June, and the vessel was built under the direction of Naval-Constructor Hoover. Her length between perpendiculars was one hundred and ninety-eight feet eight inches, and she was thirty-three feet beam, and fifteen feet hold. Her engines were built at the foundry of Merrick & Son. The "Tuscarora" was the first launched of six sloops provided for by Congress. At the launch, Miss Margaret Lardner, daughter of Commander Lardner, christened the vessel.

—Judge Ludlow, on the 24th of August, made an order in accordance with the prayer of Mr. Chew, in regard to the transfer of the funds of the Chew estate to James M. Mason, in Virginia, to be used in the interest of the rebels. The order in effect tied up the estate until the meeting of the Orphans' Court in September.

—The Chasseurs d'Afrique, a zouave corps, commanded by Capt. Charles H. T. Collis, left on the 25th of August for Fort Delaware, where it was exercised in skirmishing and artillery practice, preliminary to its departure for the seat of war.

—On the 25th of August, William Johnston, a nephew of the Confederate Gen. Johnston, and an officer in the Southern army, was arrested at the Pennsylvania Railroad Depot. He had been in Phila-

delphia, stopping at the house of a relative, about two weeks. A number of letters were found in his trunk directed to parties in the seceded States. He
1861] was held for trial. Samuel Eakin, arrested on the charge of being an agent for the Confederate States, was taken to Fort Lafayette on the 26th of August, by order of the War Department.

—The Confederate privateer “Sumter,” which had begun to attract general attention on account of the boldness of her operations, was built in Philadelphia, by Birely & Lynn, after models made by John W. Lynn, a member of the firm. Her machinery was constructed by Reany, Neafie & Co., of Philadelphia. The vessel was built originally for James Connell & Co., of New Orleans, to ply between that port and Havana. She was launched on the 18th of May, 1855, and was named the “Habana.” She was noted for her speed, having on one occasion made sixteen miles in fifty-eight minutes on the Delaware.

—Another prize, the schooner “Albion,” arrived at the Philadelphia navy-yard on the 31st of August, in charge of Prize-master Stephen S. Russell, of the United States ship “Seminole.” The “Albion” was captured off Charleston, S. C., while attempting to run the blockade. She was laden with sugar and coffee.

—On the 31st of August the remains of Gen. Lyon, who was killed at the battle of Wilson’s Creek, Mo., while gallantly leading his men, reached the city on the 1st of September from Pittsburgh *en route* for New York. They were in charge of H. A. Conant, of Gen. Lyon’s staff; Capts. Plummer and Edgar, of the United States army, and Lieut. Clark and eight privates of Col. McNeil’s regiment, Missouri Volunteers. At the depot, Eleventh and Market Streets, they were received by a company of the Home Guards, Capt. Hartings, who acted as a guard of honor. Col. Dare’s regiment was also present and formed part of the funeral cortege, which proceeded up Eleventh Street to Arch, down Arch to Fifth, and up Fifth to the Kensington Depot. Flags were displayed at half-mast in various portions of the city.

—At a meeting of the Councils Committee on the Safety and Protection of the City, held on the 31st of August, a resolution was adopted requesting the mayor to devise some plan by which the ranks of the Home Guard might be increased and made more efficient. A resolution was also adopted inviting delegates from all the steam fire-engine companies in the city to meet the committee for the purpose of participating in the formation of artillery companies for the protection of the city if needed.

—August Douglass, charged with attempting to induce soldiers to desert, was tried on the 4th of September before Judge Ludlow in the Quarter Sessions and acquitted.

—The one hundredth anniversary of the opening of St. Peter’s Protestant Episcopal Church was cele-

brated on the 4th of September in the presence of a large assemblage. Among the officiating clergy were Bishops Potter (of Pennsylvania), Delancey (of New York), and Odenheimer (of New Jersey). A sermon, reviewing the history of the church, was preached by Bishop Delancey.

—R. S. Perkins, chief armorer of the United States Arsenal at Bridesburg, and Robert Bolton, who was engaged in the manufacture of patent primers at Frankford, were arrested on the 4th of September on the charge of furnishing arms and munitions of war in the month of April, 1861, to persons then engaged in open rebellion against the United States; but were discharged for want of evidence showing guilty intention.

—The “Abbie Bradford,” a vessel which had been captured by the privateer “Sumter,” but had been recaptured by the United States vessel “Powhatan” off the mouth of the Mississippi, was brought to the city on the 4th of September in charge of Jacob Stevens, prize-master. All the “Sumter’s” men on board the “Abbie Bradford” were placed in irons on the “Powhatan,” with the exception of one named Evans, who was placed in Moyamensing prison.

—Work on the Chestnut Street bridge was commenced on the 4th of September by the city engineer and surveyor, who, with the contractors, arranged the lines of approach, and made the necessary preparations for the excavation of the abutments.

—A seizure of tobacco, the property of S. M. Bailey, of Richmond, Va., was made at the warehouse of J. R. Sank & Co., in Water Street, on the 5th of September. On the same day the collector of the port seized three schooners at the wharves which were owned in part by rebels,—the “Emma Amelia,” of Boston, Capt. Harding; the “Henry Cole,” Capt. Hazleton, and the “Eagle,” Capt. Taylor. The loyal owners were afterward permitted the use of the vessels on payment of the amounts held by Southern parties.

—In the newspapers of September 7th was published the reply to a letter addressed to Lieut.-Gen. Winfield Scott by Hon. Joseph R. Ingersoll and others, expressing their confidence in his military capacity and patriotism. In acknowledging the receipt of the letter, Gen. Scott wrote, “Twice within a short time rolls of my fellow-citizens of Philadelphia, including many personal friends, have overwhelmed me with testimonials of their distinguished approbation and esteem. The second of these addresses has reached me through your honored hands. Such, I feel, are the rewards which cheer and render happy the close of an old soldier’s life, now, by Divine goodness, much extended beyond the usual age of man.”

—Col. Francis E. Patterson was elected brigadier-general by the officers of the regiments of reserves on the 5th of September.

—The sword designed as a gift from the city of Philadelphia to Col. Robert Anderson for his defense

of Fort Sumter, was stated on the 9th to be nearly ready for delivery. It was of the Damascus pattern, with an eagle and "E Pluribus Unum" on the blade. The handle was set with four amethysts, surmounted with diamonds. The scabbard was of solid silver, plated with gold, and bore the inscription,—“The City of Philadelphia to Robert Anderson, U.S.A. May 22, 1861. A loyal city to a loyal soldier,—the hero of Fort Sumter.” The sword to be presented to Gen. McClellan was straight, and set with diamonds and pearls. On the handle was the figure of an American eagle attacking a serpent. The total cost of the two swords was about eleven hundred dollars.

—On the 16th of September one thousand Enfield rifles, purchased by the Committee of Councils on the Safety and Defense of the City, were distributed to a light infantry regiment, comprising, among other organizations, the Maennerchor Rifle Company, the Freeman's Rifle Company, and the Citizens' Rifle Company, forming part of the German Battalion.

—During the early part of September the work of strengthening the defenses at Fort Mifflin was commenced under the direction of Lieut. McCallister, of the United States engineer corps. The old wooden lining of the ramparts was removed and brick-work substituted. All the guns were dismounted, and the largest of them placed so as to defend the land approaches, while new ones of heavier calibre were substituted on the side commanding the river.

—In Select Council, on the 12th of September, Mr. Ginnods offered a series of resolutions, which were referred to the Committee on the Safety and Defense of the City, calling upon citizens for the purpose of preparing against a threatened Confederate invasion, to close their respective places of business at four o'clock P.M. daily, and recommending that all who were capable of bearing arms should assemble in their respective wards and precincts for such instruction in military drill as to be ready at a moment's warning to shoulder their muskets and meet the enemy. The resolutions also urged the citizens to press most zealously “the necessity of sustaining and building up the several bodies of troops dwelling in our midst for the safety and defense of our city.”

—A meeting of citizens favorable to the formation of a new regiment, to be known as the Commonwealth Regiment, was held on the 12th of September. Lieut. Robinson was called to the chair, and Capt. James E. Montgomery, of the Commonwealth Artillery, stated the object of the meeting. The proposed organization consisted of one thousand and forty-six infantry, together with two companies of light artillery. A series of resolutions were adopted approving the object of the meeting, and the selection of Capt. Gibson, United States army, as colonel.

—William H. Winder, of Philadelphia, brother of Gen. John H. Winder of the Confederate service, was arrested on the 11th, on the charge of treason, and sent to Fort Lafayette.

—During a performance of “The Tempest” at the Continental Theatre, Walnut Street above Eighth, on Saturday evening, September 14th, the dress of one of the ballet-girls, Hannah Gale, [1861 caught fire in one of the dressing-rooms. There were nineteen other young women in the room at the time, all of whom wore light, gauzy costumes. Many of these caught fire. The girls ran in every direction, screaming from pain and fright. Some rushed to the windows and jumped out into the street, while others ran along the landing and sprang down upon the stage, with which it communicated. The house in front was filled with spectators, who were suddenly startled by the appearance of one of the girls, Anna McBride, who, screaming and in flames, rushed before the foot-lights for assistance. She was immediately covered with cloth, torn from the stage, and the flames extinguished, but not before she had been fatally injured. The curtain was lowered hastily, and the scene hidden from the excited audience, many of whom, hearing the screams of the unfortunate girls and not knowing the extent of the mischief, rushed toward the exits. Mr. Wheatley, the manager, appeared before the curtain and stated that in consequence of the accident the play would not go on, and requested the audience to retire in good order. The request was complied with, and the theatre soon emptied without any one being injured. Six of the girls died soon after the accident, viz., Hannah Gale, Phoebe Forden, Adeona Gale, Mary Herman, Anna Devlin, and Anna McBride. Abbie Carr, Ruth and Zela Gale, Kate Harrison, and Margaret Conway were more or less seriously injured. Ruth Gale died on the 17th, Zela Gale and Abbie Carr on the 25th of September.

—The Fire Zouaves, Col. Baxter, left the city on the 16th. A stand of colors was presented to the regiment by the Fire Department. The regimental flag, of blue silk with the coat of arms of the United States on one side, and the coat of arms of Pennsylvania on the other, bore the inscription, “The Philadelphia Fire Zouaves by the Fire Department of the City of Philadelphia, Sept. 16, 1861.”

—Hon. Gideon Welles, Secretary of the United States Navy, visited the navy-yard on the 14th of September, and in company with Commander Lardner inspected the work-shops, ship-houses, vessels in course of construction or undergoing repairs, etc.

—The schooner “Mary Wood,” charged with blockade running, and captured by the squadron off Hatteras Inlet, was brought as a prize on the 16th of September.

—The seventy-fourth anniversary of the adoption of the Constitution of the United States was celebrated by an imposing demonstration on the 17th of September. Although the stores were not closed, the streets wore a holiday appearance, and the national colors floated from all the public buildings and many private residences. At sunrise a salute was fired from the navy-

yard, and later in the day a parade of the Home Guards and cadets took place. The line was formed on Twelfth Street, with the right resting on Callowhill, and moved up Callowhill to Fifteenth, down Fifteenth to Walnut, and down Walnut to the residence of the orator of the day, George M. Dallas, on Walnut near Tenth Street, whence Mr. Dallas was escorted to Independence Square. Seated in the carriage with Mr. Dallas was Theodore Cuyler, president of Select Council. Opposite the square the military came to a halt, and Mr. Dallas was escorted to the platform erected for the officers of the day, orator, etc. The platform was decorated with American flags, and across the front was displayed the inscription: "The Union and the Constitution must and shall be preserved." Although it was raining, an immense assemblage had congregated in the square. The following persons were selected as officers of the day: President, Alexander Henry, mayor of Philadelphia; Vice-Presidents, Samuel Breck, Henry J. Williams, John Graeff, Peter Williamson, John C. Farr, Thomas Dunlap, William Musser, Col. J. S. Riley, Daniel Paul, Peter P. Gaskill, Thomas Tasker, J. Edgar Thomson, Horace Binney, J. R. Ingersoll, John B. Myers, John C. Cresson, Caleb Cope, Joel B. Sutherland, John McCrea, Benjamin Rush, Col. John Thompson, Charles Macalester, William M. Meredith, Commodore Charles Stewart, Thomas A. Budd, Joseph Wayne, Sr., Franklin Peale, John G. Watmough, Charles S. Coxe, James Dundas, Simon Gratz, Thomas I. Potts, John Welsh, S. M. Felton; Secretaries, Benjamin Gerhard, George W. Budd, John Carter, William Rotch Wister, H. C. Primrose, Isaac Hazlehurst, William H. Merrick, John E. Addicks, Joseph T. Thomas, Charles Gilpin, Samuel C. Perkins, Samuel B. Miller, Alexander Whillden. The Junior Maennerchor Rifles, Freeman Rifles, and the male members of the Handel and Haydn Society, assisted by a full band under the direction of Professor Birgfeld, sung the ode, "'America,'—Our country, 'tis of thee," after which Rev. Reuben Jeffries, D.D., offered prayer. Mayor Henry then made a patriotic address, and after the singing of "Old Hundred," a series of resolutions, adopted by the City Council, providing for the celebration, and reaffirming the devotion of the people of Philadelphia to the Constitution, were read. Mr. Dallas then delivered his oration. The ceremonies concluded with the singing of the "Star-Spangled Banner." The anniversary was also celebrated by the James Page Library Company of Kensington with a display of fire-works and a salute of thirteen guns. An address was delivered at the hall of the company, the front of which was decorated with transparencies by Col. James Page.

—In Select Council, on the 19th of September, on motion of Mr. Fox, it was resolved that in accordance with the recommendation of the President of the United States, Thursday, the 26th, should be observed as a day of public humiliation, prayer, and fasting.

It was also determined that the usual meeting of Councils held on that day be dispensed with, and that the municipal offices be closed.

—The Ladies' Aid Society, it was announced on the 20th of September, had secured the voluntary services of ladies in Washington, and such facilities from the United States government as would enable them to distribute promptly and carefully such articles of food and clothing, not furnished by the government, as would promote the care and comfort of sick and wounded soldiers in the hospitals. The officers were Mrs. E. P. S. Jones, president; Mrs. John Harris, secretary; Mrs. Stephen Colwell, treasurer.

—The vote for brigadier-general of the Home Guard resulted as follows: A. J. Pleasonton, 1302; Henry Coffee, 292; C. P. Dare, 280.

—Sharp and Rankin's breech-loading fire-arms manufactory, situated on the west bank of the Schuylkill below the wire bridge, was busily engaged at this time in the manufacture of patent breech-loading rifles for the United States navy. Three different sizes of Sharp's four-barreled pocket-pistols were also made in large quantities. The manufacture of cavalry and infantry swords and sabre-bayonets was actively carried on at the Frankford factory of Sheble & Fisher, and a number of Philadelphia firms were engaged in the manufacture of projectiles for the War Department, cavalry-spurs, belt-plates, sword- and bayonet-scabbard mountings, tent-cloth, and other supplies for the army.

—In the latter part of September the City Councils Committee on the Safety and Defense of the City employed persons to make a topographical survey of the Susquehanna River with the view of erecting, if necessary, fortifications to prevent a Confederate invasion of eastern Pennsylvania. The engineering party commenced operations near the mouth of the Juniata, and completed their work before the close of the year. For the purpose of creating an additional corps for home defense, the same committee suggested to the steam fire-engine companies the feasibility of organizing themselves into an artillery corps. In accordance with this suggestion a meeting of delegates was held on the 25th of September, at the headquarters of the Home Guard, State-House row. Peter A. Keyser, of Northern Liberties Fire Company, No. 1, presided, and George F. Borie, of Decatur Fire Company of Frankford, acted as secretary. After a statement of Gen. Pleasonton, it was determined to postpone action until a future meeting. Various meetings were held from time to time, but nothing definite was done until the 11th of October, when it was determined "to recommend to the fire companies of this city to form from their own companies and members who may join them, an artillery regiment, to be composed of a company from each fire district, and that the several fire companies throughout the city be requested to report, through their delegates at

a meeting to be held on Wednesday evening next, how far they can aid in this endeavor." At the meeting held on the 16th, in accordance with this recommendation, a number of those present stated that they had been instructed by their companies to report that their horses would be placed at the disposal of the new regiment; and that although many of their men were already enlisted for active service, there still remained a few who were willing to join the regiment and render what service they could.

—Capt. T. F. Dupont, commandant at the Philadelphia navy-yard, having been ordered South, took leave of the workmen at the yard on the 23d of September. In bidding them farewell he congratulated them on having done a thing unprecedented in naval history, in constructing a sloop of war in fifty-eight days.

—James Haig, of Baltimore, F. Wyatt, clerk in an iron store in Water Street, and William Gilchrist, dealer in cutlery in Commerce Street, were arrested on the 23d of September, on the charge of aiding the Confederates, and furnishing them percussion-caps, primers, and other supplies. They were sent to Fort Lafayette.

—A number of changes in the list of officers of the Reserve Brigade were announced on the 24th of September. Maj. N. B. Kneass had been unanimously elected lieutenant-colonel of the First Regiment in place of Col. R. H. Rush, who had resigned for the purpose of entering into active service. Capt. Alfred Day was unanimously elected colonel of the Second Regiment, and Capt. N. Hicks Graham major. Col. C. M. Eakins, of the Third Regiment, appointed B. Andrews Knight adjutant of the Third; and Col. W. H. Yeaton, of the Fourth Regiment, appointed Charles C. Knight adjutant of the Fourth.

—Matthews & Moore succeeded in casting at their works at Bush Hill, on the 24th of September, an immense Dahlgren gun, weighing about ten thousand pounds, which was sent to Washington in the rough. Up to this time the firm had cast eight guns, the lightest weighing seven thousand pounds.

—The ship "Marathon," which arrived on the 23d of September, was seized by the custom-house authorities on the ground that two-thirds of the vessel was owned by residents of New Orleans. The prize-ship "Amelia," captured off Charleston on the 21st of June, was sold by the United States marshal on the 25th of September.

—William B. Wood, a veteran actor and manager, died on the night of September 24th, in the eighty-third year of his age. Toward the close of the eighteenth century he became a member of the company at the Chestnut Street Theatre, and shortly after the beginning of the present century, assumed the management in company with Mr. Warren. On the 2d of April, 1820, the theatre was destroyed by fire while the company was playing in Baltimore. A new theatre was erected and opened on the 2d of Decem-

ber, 1822, on which occasion Mr. Wood delivered the address. During the management of Messrs. Wood and Warren a number of the most celebrated English actors were introduced to the Philadelphia public, among them Cooper, Cooke, Kean, Macready, and Booth. As an actor Mr. Wood was very successful, and a great favorite with Philadelphians.

—Pierce Butler, James W. Wall, and George L. Browne were released from Fort Lafayette on the 24th of September, after Messrs. Wall and Browne had taken the oath to support the Constitution, and Mr. Butler had taken a pledge not to act hostilely to the United States, or visit South Carolina without a passport.

—On the 27th of September it was announced that there were then in the field the following regiments from Philadelphia: Twenty-third, Col. Birney; Twenty-fourth, Col. Owen; Twenty-sixth, Col. Small; Twenty-seventh, Col. Einstein; Twenty-eighth, Col. Geary; Twenty-ninth, Col. Murphy; Thirtieth, Col. Chantry; Thirty-first, Col. Williams; Thirty-second, Col. Lujeane; Fire Zouaves, Col. Baxter; California Regiment, Col. Baker; Forty-fifth, Col. Koltes. Besides these regiments of infantry, Philadelphia had contributed one full regiment of dragoons under Col. Friedman, the greater portion of Young's so-called Kentucky Cavalry Regiment, and the Lincoln Cavalry. The regiments of infantry commanded by Cols. Mann, Sickles, and March had each three or four companies raised in Philadelphia. Recruiting for the Excelsior Brigade of New York, commanded by Gen. Sickles, was very active in Philadelphia, but it was not definitely known how many of the men came from the latter city. Capt. C. H. T. Collis' company of Independent Zouaves, which left the city on the 25th of September, was also recruited in Philadelphia. In addition to the Philadelphia organizations actually in the field, a number of commands were in process of formation. Col. Lyle had enrolled between seven and eight hundred men, who were being drilled at Oxford. Col. McLean had nearly a full regiment encamped on the Schuylkill near the mouth of the Wissahickon. Col. Gosline's Zouave Regiment was full, but it was determined to increase the force to one thousand five hundred men. Col. Gregory's regiment, which was in camp, was rapidly filling up, and Col. Ballier's regiment, stationed at Girard Park, was nearly ready to leave for the seat of war. Col. Bohlen's command, at Hestonville, was also nearly full, and Col. Wallace, whose regiment was encamped on the Islington Lane, opposite the Odd-Fellows' Cemetery, was busy recruiting in Philadelphia. The Fifth Regiment, Baker's brigade, Col. Morehead, was encamped in West Philadelphia, awaiting orders to move southward; and Col. Jones' regiment was encamped at Roxborough. Col. Conroy was engaged in raising the Thomas A. Scott Regiment, and Col. Dunn a regiment to be connected

with the Irish Brigade. The Commonwealth Regiment, and three regiments of mounted men—Col.

Chorman's Mounted Rifle Rangers, and Cols.

1861] Rush's and Price's cavalry regiments—were also being organized. Baron Vegeſack, a Swedish nobleman, who had been commissioned by the War Department, was given command of the battery of flying artillery attached to Col. Birney's regiment, the Twenty-third Pennsylvania Volunteers.

—During the summer and fall of 1861, the government purchased a number of vessels at the shipyards, with the purpose of fitting them up as transports and gun-boats. Among them were two side-wheel iron steamers built by Neafe & Levy, a hull built by Simpson & Neill, which was converted into a gun-boat, another hull built by Williams & Son, and also converted into a gun-boat, three schooners fitted up for similar service, and the fine iron steamship "St. Mary," of about eleven hundred tons burden, built at Wilmington, Del.

—Thursday, September 26th, was generally observed as a day of fasting and prayer, in accordance with the recommendation of the President of the United States and a special resolution of the City Councils. Most of the places of business were closed, as well as the courts and public offices, and special services were held in the churches of all denominations.

—A stand of colors was presented to Col. Bohlen's regiment at the residence of the colonel, Walnut and Juniper Streets, on the 27th of September, by Hon. Joseph R. Chandler on behalf of Mrs. Sophia Bohlen. The colors were received by Lieut.-Col. Mahler, and after the ceremony the regiment started for Washington.

—A new department for the manufacture of army clothing having been established at the foot of Chestnut Street, Schuylkill, there was a rush of applicants for work on the 27th of September, there being at one time over five thousand women in front of or near the building. Such was the pressure of the crowd that a number of women fainted.

—On the 28th of September a stand of colors was presented to Col. Baxter's regiment of Fire Zouaves by their brother firemen, through I. Newton Brown. The ceremony took place in front of the La Pierre House. The colors were received on behalf of the regiment by Richard Ludlow, Jr.

—The mayor received notice on the 28th of September that two steel rifled cannon, made in Prussia and a gift from James Swaim, had arrived at New York. They were six-pounders, and the first of the kind exported from Prussia. The only condition attached to the gift was that they should always remain the property of the city of Philadelphia.

—In their final presentment, on the 28th of September, the grand jury of the Quarter Sessions stated that they had examined the charges of fraud in connection with the furnishing of clothing to the troops,

and were constrained to say that they "had no evidence of any fraud having been perpetrated upon this commonwealth in the supplies furnished to the troops, nor of any frauds on the part of those persons, official or unofficial, engaged in the management of the interests of the commonwealth." It was admitted that mistakes and irregularities had occurred, but it was believed that no frauds had been committed.

—On the 29th of September the news reached Philadelphia of a lamentable catastrophe that had befallen the Philadelphia regiments commanded by Cols. Baker, Baxter, Owen, and Friedman. During the advance of the Federal army on the Falls Church from Chain Bridge, Va., on the night of the 28th, Col. Owen's Philadelphia Irish Regiment, in the darkness of the night, mistook for Confederates Capt. Mott's battery, which was in the advance, sustained by Col. Baker's California Regiment (largely composed of Philadelphians), Col. Baxter's Philadelphia Fire Zouaves, and Col. Max Friedman's Philadelphia Cavalry, and fired a full volley into the approaching troops, killing and wounding a large number. The California Regiment, not knowing whence the firing came, returned it with disastrous effect. The horses attached to Mott's battery became unmanageable, and the tongues of the caissons were broken, owing to the narrowness of the road. Lieut. Bryan, having command of the first section, ordered the guns to be loaded with grape and canister, and soon had them in range to rake the supposed enemy, when word was sent him that a blunder had been committed, and that the attacking parties were friends. Of Capt. Mott's battery Timothy Ray was killed outright, and Corp. Bartlett and private Cilley were fatally wounded. Of Col. Baker's California Regiment the killed were Edwin Morris, of Company I; Joseph Pascoe and Joseph White, of Company H; and Alexander Philison, of Company M. A number were more or less seriously wounded. In Col. Baxter's regiment none were killed, but several were wounded. John Doran, John McGuire, and private Williams, Company I, First Pennsylvania Dragoons, were mortally wounded. Of Col. Owen's Irish Regiment, Sergt. Gillon, Company B, was killed, and Sergts. W. B. McCann and Charles Shields, of Company E, were wounded.

—In the newspapers of October 1st it was stated that Dr. William Frishmuth, of Philadelphia, who was already a member of the United States detective service, was about to organize a field *gendarmerie* (mounted) of two hundred picked men for the service of the United States government. In a few days the complement of men had been secured. About the same time the Light Cavalry Regiment of Col. Rush, encamped on Second Street above Nicetown Lane, was ready to take the field. The field and staff officers were, Colonel, Richard H. Rush; Lieutenant-Colonel, J. H. McArthur; Major, C. Ross Smith; Quartermaster, Thomas E. Maley; Adjutant,

F. C. Newhall; Surgeon, Dr. Moss; Assistant Surgeon, Dr. Ellis.

—The United States gun-boat "Itasca," built by Hillman & Streaker, at their ship-yards, Kensington, was launched on the 1st of October. She was one hundred and fifty tons burden, one hundred and sixty feet long, twenty-eight feet beam, and twelve feet hold, and was pierced for eleven guns. She was armed, however, with a large rifled cannon on the fore-castle deck, and a pivot gun amidships, together with four eleven-inch guns. The gun-boat "Wissahickon," a vessel of about the same size as the "Itasca," was launched on the following day from the yard of John W. Lynn, at the foot of Reed Street.

—Prizes made by United States vessels continued to arrive in port every few days. The schooner "Extra," captured in the Rappahannock by the gun-boat "Daylight," reached the city in charge of Prize-master L. C. Wood, on the 30th of September. On the same day the schooners "R. W. Tull" and "Clare" and the bark "Isaac R. Davis" were seized on the ground that they were owned either in whole or part by citizens of the rebellious States. On the 2d of October the schooner "Harmony," captured off Hatteras Inlet by the United States gun-boat "Gemsbock," and the bark "Macon," captured off the mouth of the Mississippi by the sloop-of-war "Brooklyn," were brought into port.

—A frame building, thirty by twenty feet, and one story high, designed for use as a military hospital, was erected during the month of October on the east side of Swanson Street, below Washington Avenue. The corner-stone was laid on the 2d of October with appropriate ceremonies. Ex-Governor Pollock presided, and made an address, in which he said that the enterprise had originated with the men and women who had conceived the idea of providing refreshments for the volunteers on their way to the seat of war. No less than ninety thousand soldiers had been fed at the saloon adjoining, but the originators of the refreshment saloon felt that they were not doing enough in feeding the soldiers, and had resolved to build a hospital for the sick and wounded.

—Early in October, Point Breeze Park was tendered to the city authorities for a parade-ground, and for the drilling of troops, including the artillery arm of the Home Guard organization.

—The prize-ship "Amelia," which was captured June 18th off Hatteras Inlet, was sold at auction on the 8th of October to Peter Wright & Sons for eleven thousand five hundred dollars. On the same day the schooner "Ocean Wave," of Washington, N. C., from the West Indies with sugar, salt, fruit, etc., which was captured off Hatteras Inlet, was brought to the navy-yard in charge of a prize-master.

—The annual election for judges of the District and Common Pleas Courts, city and county officers, members of Councils and ward officers was held on

the 8th of October and passed off quietly. There were three tickets in the field,—the Democratic, People's, and Union.

—Owing to alleged irregularities in taking [1861] the votes of Philadelphians who had enlisted in the army, and who were then in camp, the result was not ascertained until several weeks after the election, and not until after much litigation in the courts. The frauds said to have been perpetrated in counting the army vote were brought, about the same time, to the attention of the Supreme Court of Pennsylvania and the Common Pleas Court of Philadelphia. In the suit of Robert Ewing, Democratic candidate for sheriff, against Charles D. Knight, and others, asking for an injunction to restrain the prothonotary of the Court of Common Pleas from sending to the return judges of Philadelphia a fraudulent return purporting to give the votes of thirteen companies of the Thirty-ninth Regiment Pennsylvania Volunteers, the Supreme Court decided in favor of the petitioner and granted the injunction asked for. Judge Ludlow, of the Common Pleas Court, however, decided that his court had not the power to grant a similar petition for an injunction to prevent the counting of the same return and of one from certain companies of Col. McLean's regiment. At the same time he advised the prothonotary as a ministerial officer to see that the returns made to him were according to law, and if he had evidence before him establishing fraud to withhold the certificate. If there was any doubt in regard to the fraud, he was not to solve the doubt, but to certify the paper. On the 12th of November the prothonotary, Mr. Knight, certified to the return judges the votes cast by the soldiers, but, it being claimed that he had omitted certain returns about which there was no suspicion of fraud, an application was made to Judge Ludlow for a mandamus to compel him to certify them. The judge decided that the prothonotary was simply a ministerial officer through which the returns were sent to the judges, and that the latter had power only to count up the returns thus sent them. They could not decide upon the authenticity of a paper certified to them by the prothonotary. The effect of the prothonotary's action was to exclude the votes of all companies belonging to regiments which had been raised independently of the Governor's authority and directly under the authority of the War Department at Washington. The court ordered the prothonotary to send in the excluded returns. When the return judges met on the 13th, a writ of mandamus was served, commanding them to include in their count of the army votes certain returns which had been sent to them by the courts, but which had not been counted. The judges, however, refused to recognize or count the returns, and a writ of peremptory mandamus was applied for and granted by Judge Ludlow, to compel them to compute the votes certified to by the prothonotary, under penalty of attachment for contempt. On the

following day the court was informed that the return judges had determined to comply with the order. At a meeting of the board, held on the 17th of 1861] November, it was determined that the clerks should proceed to write down the votes in the following order: First, the city vote of Oct. 8, 1861; second, the volunteer vote first sent and certified to by the prothonotary; third, the volunteer vote sent in under the direction of Judge Ludlow. The returns thus tabulated were,—

	ARMY.		City.	Total.
	Under Protest.	Not Under Protest.		
<i>President Judge Common Pleas Court.</i>				
Oswald Thompson, People's candidate	1275	280	32,114	36,669

M. H. Dickinson, People's candidate...	236	47	6,635	6,918
Donovan's majority, 1230.				

The certificates were made out for the successful candidates, and to each certificate was attached a protest setting forth that on the 12th of November there were twenty-one certificates which the prothonotary sent into the board as legal returns, and subsequently the prothonotary, by direction of Judge Ludlow, sent seventy-nine other returns which were not certified to be copies of returns of volunteers in actual military service of the United States in conformity with the law, and which last-mentioned returns were received by the board under protest, and afterward computed by the board by compulsion in obedience to a writ of

a peremptory mandamus issued by said Hon. J. R. Ludlow. This protest was signed by the members of the People's party, the Democratic members signing a counter-protest in which they declared the protest to be an insult to Judge Ludlow and to the Court of Common Pleas.

—A new regiment of light infantry was organized during the early part of October by Col. John F. Staunton, and encamped at Camac's woods. Two companies belonging to the late regiment of Col. P. Conroy were attached, by order of Governor Curtin, to Col. Staunton's command.

—The Pennsylvania Zouaves, Col. John M. Gosline, left their camp at Hestonville on the 12th of October, and marched to Broad and Prime Streets, where they took the train for the South.

—The "James S. Chambers" was launched on the 11th of November, at the ship-yard of Charles Williams, at the foot of Queen Street. Her dimensions were one hundred and twenty-five feet in length, twenty-nine and a half feet beam, and twelve feet depth of hold, and her rig that of a three-masted schooner.

—In the United States Circuit Court, on the 14th of October, Assistant District Attorney Ashton announced that he had received an order from the Assistant Attorney-General of the United States to withdraw the suits against the *Jeffersonian* of West Chester, Pa., and the *Christian Observer*, two newspapers charged with publishing articles with intent to aid and abet the insurrection in the Southern States. Counsel for the owners of the papers suggested that the claim for restitution of the property should be allowed, and an order to that effect was granted by the court.

—On the 12th of October a flag was presented from a lady of Roxborough to the National Regiment, Col. J. Richter Jones, at Camp Roxborough. The presentation was made by Horatio Gates Jones, a brother of the colonel, and the flag was received on behalf of the regiment by Capt. Montgomery Martin.

—The United States gun-boat "Scioto" was launched at the ship-yard of Jacob Birely, Kensington, on the 15th of October, after which she was taken to the ship-yard of I. P. Morris & Co. to receive her machinery. She was one hundred and sixty feet long, twenty-eight feet beam, and twelve feet hold. Her armament was similar to that of the "Itasca."

—George W. Peterson, of the well-known publishing firm of T. B. Peterson & Brothers, died on the 16th of October.

—The sword voted by the City Councils to Col. Robert Anderson was presented to him privately at Washington on the 16th of October.

—During October the City Councils adopted resolutions of thanks for gifts of cannon to the city of Philadelphia, from James Swaim, of Philadelphia, and James McHenry, of London.

—Up to October 18th, the Committee of Councils on the Safety and Defense of the City had purchased one thousand Enfield rifles with sword bayonets, six hundred Prussian rifles and five hundred Prussian muskets, thirteen hundred patent breech-loading muskets with Maynard primers, two hundred and fifty sabres, three hundred pistols, five thousand infantry and artillery accoutrements, two hundred and ten sets of harness for artillery purposes, and carriages, caissons, forges, etc., for twelve pieces of cannon purchased by the committee. From the City Councils permission was obtained for the use of the market-house at Broad and Race Streets as an armory for the local military organizations.

—The corner-stone of the Burd Female Orphan Asylum of St. Stephen's Protestant Episcopal Church was laid on Sunday afternoon, October 18th. The services were conducted by Bishop Potter, of Pennsylvania, Bishop Hopkins, of Vermont, and Rev. H. W. Ducachet, of St. Stephen's. The site on which the buildings were afterward erected was a lot of ground situated on Market Street, in Delaware County, about three and a half miles from the Schuylkill. There were four buildings, connected by inclosed corridors, and all in the Gothic style of architecture. The material used was stone quarried on the ground. The entire front, including the main building, wings, and corridors, was two hundred and sixty-one feet. The depth of the wings, exclusive of the piazzas, was one hundred and one feet. The chapel connected with the asylum was capable of seating four hundred persons, and the dining-room two hundred.

—By the explosion of a steam-boiler on the 19th of October, at the engine-works of I. P. Morris & Co., at Richmond and York Streets, Patrick O'Neill and Thomas Hibbert were killed and John Parker seriously injured.

—William W. Smith, one of the Confederate prize-crew from the privateer "Jeff Davis," who was captured on board the schooner "Enchantress," was put on trial in the United States Circuit Court before Judges Grier and Cadwalader, on a charge of piracy, on the 22d of October, and was convicted.

—An election for assistant bishop of the Protestant Episcopal Diocese of Pennsylvania, in place of Right Rev. Samuel Bowman, D.D., deceased, was held at St. Andrew's Church on the 23d of October. The convention of the diocese which assembled for this purpose was opened with the usual service, after which Rev. Dr. Stevens, rector of St. Andrew's, delivered a eulogy of the dead bishop. A series of resolutions expressing the regret of the members at Bishop Bowman's sudden death and condoling with the family were adopted. The first ballot taken by the clerical delegates resulted as follows: Revs. James May, 53; A. C. Coxe, 29; William Bacon Stevens, 24; H. J. Morton, 27; M. A. DeWolfe Howe, 6; D. R. Goodwin, 4; G. E. Hare, 2; S. H. Weston, 2; D. W. C. Morris, 1; George Leeds, 1; Charles Mason, 1;

blank, 3; making a total of 153 votes cast; necessary to a choice, 77. On the third ballot, taken on the following day (October 24th), Dr. May having withdrawn, Rev. Dr. William Bacon Stevens [1861 received 85 votes and Rev. Dr. Leeds, 50; scattering, 14. Dr. Stevens was confirmed by the lay delegates by the following vote: for approval, 84; against, 37; divided, 2. Bishop Potter then declared Dr. Stevens elected assistant bishop.

—Col. James Page, Col. Philip S. White, John Thornley, and Jacob Seitzinger, a committee appointed for the purpose, visited Washington on the 23d of October, and presented a handsome flag and pair of pistols to Col. Williams, commanding the Thirty-first Pennsylvania Regiment.

—The body of Lieut. Joseph D. Williams, of Company A, California Regiment, who was killed at Ball's Bluff on the 21st of October, reached the city on the 24th, in charge of his brother, a guard detached from the company acting as escort. The remains were conveyed to the late residence of the deceased at Frankford, and were buried on the 27th at Cedar Hill Cemetery. During the same engagement Col. E. D. Baker, commander of the California Regiment, was killed, and Lieut.-Col. Wistar and Capt. Markoe, of Philadelphia, were wounded, the latter being taken prisoner. Charles C. Ferguson, of the same regiment, was mortally wounded, dying within a few hours. His remains reached Philadelphia on the 25th. A number of other Philadelphians were more or less seriously wounded. Capt. Wm. Otter was shot and drowned in endeavoring to escape by swimming the river.

—The United States steamer "Keystone State" arrived on the 25th of October, having in tow the blockade-runner "Salvor," a valuable steamer laden with contraband goods, and captured while on her way from Havana to Tampa Bay. Her cargo consisted of six hundred pistols, five hundred thousand percussion-caps, six hundred dozen felt hats, eight cases of shoes, four hundred thousand cigars, four hundred bags of coffee, cases of dry-goods, etc.

—On the 26th of October the bodies of A. J. Hooper, of Company A, and James Coggsweil, corporal of Company C, of the California Regiment, arrived. John Johnson and Henry Booth were also killed at Ball's Bluff.

—The following dispatch was received by telegraph from the mayor of San Francisco, Cal., by Mayor Henry on the 26th of October:

"TO THE MAYOR OF PHILADELPHIA:

"San Francisco to Philadelphia sends greeting, and congratulates her on the completion of the enterprise which connects the Pacific with the Atlantic. May the prosperity of both cities be increased thereby, and the projectors of this important work meet with honor and reward.

"H. S. TESCHMEER,
"Mayor of San Francisco, Cal."

The following reply was sent by Mayor Henry:

"OFFICE OF THE MAYOR OF THE CITY OF PHILADELPHIA,

"October 26, 1861.

"TO THE HON. H. S. TESCHMUE, Mayor of San Francisco :

"Philadelphia reciprocates the kindly greetings of San Francisco. May the Pacific Telegraph ever interchange between the two cities messages of loyalty and good-will.

"ALEXANDER HENRY,

"Mayor of Philadelphia."

—An application for a new trial for W. W. Smith, convicted of piracy, was filed in the United States Circuit Court on the 28th of October. On the same day, in the same court, Thomas Quigley, Edward Rockford, and Daniel Mullins were placed on trial on a bill charging them jointly with Smith and Lane with piracy, and were convicted.

—In the latter part of October, Merrick & Son received a contract from the United States government to build an iron-clad frigate of three thousand five hundred tons, the hull to be constructed by Cramp & Son, Kensington. The vessel was two hundred and forty feet long, fifty-eight feet beam, and thirty feet deep. The plates of iron with which she was protected were twenty feet long, eighteen inches wide, and four and a half inches thick. The spar-deck was of iron, and the guns were placed on the lower deck. The hull was of the most substantial character, the timbers being very heavy and placed close together. The machinery was constructed by Merrick & Son. Her armament consisted of sixteen rifled cannon of the largest size. This ship was afterwards known as the "New Ironsides."

—On the 30th of October, Craig's woolen-mills, at Twelfth Street and Washington Avenue, were destroyed by fire, involving a loss of one hundred thousand dollars. Several buildings in the vicinity were damaged.

—Eben Lane, one of the crew of the Confederate prize "Enchantress," was tried in the United States Circuit Court, before Judges Grier and Cadwalader, October 29th and 30th, and acquitted, on the ground that as navigator of the "Enchantress" he had endeavored to steer the vessel so that she would not reach a Southern port, in the hope that in the mean time she would fall in with a United States cruiser, which eventually happened. Lane alleged that at night he navigated the vessel north, and in the daytime south.

—The hospital of the Cooper-Shop Volunteer Refreshment Saloon, situated immediately north of the saloon, the entrance to which was on Otsego Street, below Washington, was dedicated on the 31st of October, in the presence of several hundred ladies and gentlemen, who had assembled in the large mission-room over the saloon. Rev. Mr. Perry, pastor of the Mission Church, presided, and a choir, under direction of Professor Warden, rendered a number of vocal selections. Addresses were made by Rev. Dr. John Chambers, Dr. Brainerd, Hon. William D. Kelley, and others. The hospital was a two-story frame structure.

—A number of the employés of the Philadelphia and Reading Railroad Company signed a paper in the latter part of October and early in November to the effect that they would devote every month a dollar or more of their wages in subscribing to the new government 7-30 loan, the interest accruing to be reinvested in the same way, the whole investment, principal and interest, to be sold as soon after the termination of the war as might be decided on, and the proceeds to be divided among the subscribers in proportion to the amounts and duration of their subscriptions. The president and treasurer of the road acted as trustees. On the 4th of November it was announced that five thousand four hundred dollars had already been subscribed through Jay Cooke, the government agent, by one thousand out of the fifteen hundred employés in the transportation department. In the roadway department five hundred had given notice of their intention to subscribe.

—When Capt. Perry and Lieut. Harvey, of the Confederate privateer "Petrel," were arraigned for trial in the United States Circuit Court on the 4th of November, Judge Grier said he could not understand why the regular court business should be interrupted any further with the trial of such cases. It seemed to him that as the rebellion had assumed the proportions of a civil war, humanity dictated that captives taken at sea should be treated like those taken on land. He could not understand why these men, captured at sea, should be hanged while other prisoners were held or discharged as prisoners of war. He was tired of it, and did not think he could give any more of his time, which was required elsewhere, to these trials.

—In view of the frauds alleged to have been committed in taking the votes of Philadelphia soldiers in camp at the October election, the Democratic convention of the Third Senatorial District, at a meeting held on the 5th of November, resolved that "we will not submit to our constitutional rights being trampled under foot by political villains who choose to make false returns of elections purporting to emanate from the army, frauds so glaring that if we submit thereto we do not deserve to be freemen; but we will not submit to such outrages, and we call upon the freemen of Philadelphia opposed to such frauds to rally, and meet in Independence Square on Friday evening, November 8th, and if we are trampled under foot, it will be at the precincts of Independence Hall, battling unto death for our rights." In accordance with this recommendation, an immense assemblage collected at Independence Square on the night of November 8th. Charles Ingersoll presided, and addressed the meeting. Speeches were also made by Hon. William H. Witte and John C. Bullitt, and a series of resolutions offered by E. R. Helmbold, in which the alleged frauds were specified and denounced, were adopted, after which the meeting adjourned.

—By an explosion of fulminating powder at the Bridesburg arsenal on the 5th of November, P. Coney and Joseph Nail were instantly killed and F. Bilhart was seriously injured.

—Up to November 7th the following Confederate prizes had been brought to the city: ship "General Parkhill," captured by the United States steamship "Niagara;" ship "Amelia," by gun-boat "Union;" brig "Herald," by frigate "St. Lawrence;" steamer "Salvor," by steamer "Keystone State;" schooner "Abbie Bradford," by frigate "Powhatan;" schooner "Fairwind," by frigate "Minnesota;" schooner "Prince Alfred," by steamship "Susquehanna;" schooner "Harmony," by gun-boat "Gemsbok;" schooner "Albion," by ship "Seminole;" bark "Maco," by sloop-of-war "Brooklyn;" schooner "G. G. Baker," by frigate "Minnesota;" schooner "San Juan," by gun-boat "Union;" schooners "Ocean Wave," "Susan J. Nevis," and "Harriet Ryan," by sloop-of-war "Pawnee;" schooner "Mary Wood," by gun-boat "Gemsbok;" schooner "Extra," by gun-boat "Daylight;" schooner "Specie," by sloop-of-war "Dale." The first prizes brought in, as heretofore stated, were the "Delaware Farmer," "Mary Willis," and "Emily Ann," which were released by Judge Cadwalader on the ground that they had not violated the blockade, and are, therefore, not included in the foregoing list.

—The remains of Col. E. D. Baker, who was killed at Ball's Bluff on the 21st of October, reached Philadelphia on the 7th of November, in charge of M. E. Flanagan, of San Francisco, W. H. Wallace, of Washington Territory, and E. M. Barnum, of Oregon. Preparations for their reception had been made by the civil and military authorities, and a large number of citizens had assembled at the depot, Col. Baker being well known and highly esteemed. As the train entered the depot the City Guards, Capt. Barney, formed in line upon the platform. The body was conveyed from the train to the hearse in waiting by eight members of the California Regiment, which Col. Baker had organized mainly in Philadelphia; Maj.-Gen. Patterson, Brig.-Gens. Patterson, Reilly, Miles, Cadwalader, and Pleasonton, and Col. Dare and Maj. C. W. Smith acting as honorary pall-bearers. The funeral procession passed over the prescribed route in the following order: one hundred policemen, band (playing a dirge), Second Regiment Home Guard, First Regiment Home Guard, a battalion of Col. Gregory's regiment, about a dozen officers and men who were in the engagement in which Col. Baker was killed, the hearse drawn by six black horses, officers of a number of volunteer companies, carriages containing the mayor and other representatives of the city government, the officers of the Gray Reserves on foot, and a platoon of policemen bringing up the rear. On reaching Independence Hall, which had been tendered for the purpose by special resolution of City Councils, the remains were placed

on a bier. The face was then uncovered, and citizens admitted to view it. The remains had been embalmed, and the face retained much of its natural appearance. A constant stream of [1861] people passed into the hall up to nine o'clock in the evening, when the doors were closed and the remains left in charge of a military guard. On the following morning the doors were reopened, and the remains were viewed by thousands during the day. At eleven o'clock both branches of the City Councils met and paid an official visit to the hall. On Saturday morning, November 9th, the body was taken to New York, accompanied by Capt. Barney, two corporals and two privates of the City Grays, and Lieut. Newkumet, of the Second Regiment of Home Guards, in addition to the committee which had come on from Washington.

—The Councils Committee on the Safety and Defense of the City determined early in November to put the battery, consisting of six brass cannon, into the hands of the artillery companies attached to the Home Guards. These companies were under the command of Capt. M. Hastings, C. Biddle, and J. M. Biddle, of Germantown.

—Hon. Joel B. Sutherland died at his residence, 1716 Pine Street, on the 15th of November, in the seventieth year of his age. He was educated for the medical profession, but gave up practice early in life and engaged in politics. After holding a seat in the State Legislature for several years he was elected to Congress as the Democratic candidate from the First District, and continued to represent that district until 1837. He also held the position of associate judge in the Court of Common Pleas, and for a short time was resident physician at the Lazaretto. He took an active part in the war of 1812, and subsequently interested himself in the effort to secure pensions for those who enlisted in the service of their country at that time. He was prominently identified with a number of local enterprises, and was one of the originators of the Lafayette Cemetery. During his career in Congress he published a work on parliamentary proceedings, which was almost universally used as a work of reference.

—The side-wheel steamer "Miami," intended for the service of the United States government, was launched at the navy-yard on the 17th of November. The "Miami" was two hundred and twenty feet in length, thirty-three feet beam, and twelve feet hold, with a rudder at each end to obviate the necessity of turning her, and was provided with a heavy battery, the object being to use her both as a transport and war vessel.

—On the 9th of November J. P. Benjamin, Acting Secretary of War of the Confederate States, issued an order to Brig.-Gen. Winder, who had charge of the Union prisoners at Richmond, instructing him to choose by lot from among the prisoners of war of the highest rank one who was to be confined in a cell

appropriated to convict felons, and who was to be treated in all respects as if he were such convict, and to be held for execution in the same manner as W. W. Smith, of the Confederate privateer "Jeff Davis," who had been convicted of piracy in Philadelphia, and was then in Moyamensing under conviction. On the 10th Gen. Winder made the selection, the prisoners drawing a ticket from a can. Col. Corcoran, of the Sixty-ninth New York Regiment, was selected as the hostage for Smith. Thirteen other prisoners of war, the highest in rank, were ordered by Mr. Benjamin to be selected by lot and kept in close confinement, to be treated afterward as the Confederate privateersmen then in prison in New York were treated. The list of thirteen drawn comprised the names of Cols. Lee, Coggsweil, Wilcox, Woodruff, and Wood; Lieut.-Cols. Bowman and Neff; Majs. Potter, Revere, and Vodges; and Cpts. Ricketts, McQuade, and Rockwood. Smith occupied a cell with his companion, Rockwood, on the second corridor in the "untried department" of the county prison, and was treated in all respects like the other prisoners in the same department. He was allowed to see any of his friends, and was permitted to receive any articles from them except such as the rules of the prison prohibited. In accordance with the custom in Pennsylvania he was treated as though he were an untried prisoner, although he had been convicted, because sentence had not been passed upon him.

—On the 21st of November City Councils passed an ordinance making a further appropriation of two hundred thousand dollars for the relief of families of volunteers then in the service of the United States. Up to the 16th the sum expended was two hundred and fifty-eight thousand nine hundred and forty-two dollars. The weekly expenditures amounted to about eleven thousand dollars, distributed among nearly eleven thousand persons.

—In the latter part of November five cavalry regiments were in process of formation in Philadelphia,—the Curtin Hussars, Col. Frismuth; the Irish Dragoons, Col. Gallagher; Col. R. Butler Price's regiment, and Col. Rush's regiment.

—At a meeting of the Board of Trade, held on the 25th, it was resolved that "the river and bay defenses are entirely inadequate and need to be immediately and largely increased;" that "it is the duty of the United States government to superintend and effect such an increase at such points as a competent corps of engineers may indicate with the least possible delay," and that "the ardent patriotism and efficient services of Pennsylvania in the work of suppressing the Southern Rebellion give her the right to demand from the national government adequate protection to her seaport, Philadelphia."

—On the 26th of November the question as to who should enter security as sheriff, and as clerk of the Orphans' Court, was decided by the Court of Common

Pleas in favor of Messrs. Ewing and Lawrence, Democratic candidates for the respective offices. Petitions contesting their election were filed on behalf of Messrs. Thompson and Stevenson, the opposition candidates.

—St. Paul's Catholic Church, Christian Street below Tenth, was destroyed by fire on the 26th of November. It was one of the largest and handsomest religious edifices in the city, and cost about seventy-five thousand dollars. Its erection was commenced in 1843, but was not finished until several years later. During the anti-Catholic riots of 1844 fears of its destruction were entertained, and a military company guarded it for several days.

—At a meeting of officers of the Home Guard, held on the 26th of November, the commander, Gen. A. J. Pleasonton, stated that about four thousand men had been enrolled as active members, and that the money expended on their account for parades, advertising, etc., amounted to only one dollar and forty-one cents per man. Being under the control of the city, and entirely independent of the State, the Home Guard had received no benefits from the latter. Both Gen. Pleasonton and Col. J. Ross Snowden advocated making an application to the City Councils for an appropriation for the maintenance of the Home Guard. In accordance with these suggestions a series of resolutions were adopted requesting that three hundred dollars be furnished each company for armory rent and expenses; that uniform coats, overcoats, and army hats be furnished the active members; that suitable halls be provided by the city for regimental and battalion drills; that a sum equal to the amount allowed by the State be paid to each company for expenditure for parade; and that measures be taken at the next session of the Legislature to change the name of the force to that of the City Guard of Philadelphia.

—A resolution from Select Council complimenting Capt. Charles Wilkes for his courage and determination in arresting Messrs. Mason and Slidell, the Confederate commissioners, was adopted by the Common Council on the 27th of November.

—At the annual meeting of the Central Republican Club of Philadelphia, held on the 27th of November, it was resolved that "whereas there has existed for some time a civil war within the jurisdiction of the United States, caused by the slave power," it was the deliberate opinion of the club that "the surest method to crush the Rebellion would be for Congress, at its next session, to pass a law embodying the policy of the Fremont proclamation, to wit: That the slaves of all persons taken in arms against the authority of the United States shall by law be declared free."

—Thanksgiving-day (November 28th) was observed this year by the usual services in the churches and by a parade of the Reserve Brigade, Gen. Francis E. Patterson, in the morning, and of Col. Rush's cavalry regiment in the afternoon. Company B, Capt.

Hastings, of the First Regiment of Artillery, also paraded in the morning with a battery of six pieces.

—Col. John G. Watmough died at his residence in Germantown on the 28th of November, at an advanced age. Col. Watmough took an active part in the war of 1812, and was wounded during the attack on Fort Erie. In 1830 he was elected a member of Congress, and subsequently was made high sheriff of Philadelphia. At one time he also held the position of surveyor of the port.

—Robert Ewing, the Democratic candidate, received his certificate as sheriff of Philadelphia from Governor Curtin on the 29th, and took charge of the office on the following day.

—The schooner "Fannie Lee," captured off Darien, Ga., arrived in charge of a prize-master on the 24th of November. Another prize, the British schooner "Mabel," was brought into port on the 1st of December. The "Mabel" had sailed from Havana for Savannah, Ga., with a cargo consisting of blankets, cloths, saddles and bridles, coffee, pistols, and cavalry swords.

—The sloop-of-war "Hartford," flag-ship of the East India Squadron, arrived from the Cape of Good Hope on the 4th of December. On the same day Lieuts. W. F. Glassel, A. M. Dubree, and Julian Myers, of the "Hartford," and D. A. Forest, of the sloop-of-war "John Adams," who had been transferred to the "Hartford," were arrested on the charge of disloyalty, in having refused to take the oath of allegiance, and sent to Fort Warren. Three of them were natives of Virginia and one of Georgia. On the 7th the United States steamer "Keystone State," Commander LeRoy, sailed under sealed orders, and the sloop-of-war "Tuscarora," Capt. A. M. Craven, left for New York to receive a portion of her armament.

—Early in December an organization known as the "Soldiers' Relief Association of the Episcopal Church" was formed, for the purpose of providing articles for the relief of sick soldiers not supplied by the government.

—The colored residents of the city about this time petitioned the managers of city passenger railways for the privilege of riding in the street-cars. They represented that they suffered great inconvenience and hardship in being excluded from the cars; that in all the principal Northern cities except Philadelphia the colored people were permitted to ride in them, and that they paid more taxes than the same class in any Northern city.

—Two interesting flag presentations occurred on the 6th and 7th of December. On the 6th the Philadelphia regiments commanded by Cols. Gregory, Rush, Lyle, Staunton, and Jones assembled in a field opposite the Odd-Fellows' Cemetery to receive from Governor Curtin the flags purchased with the State appropriation and the fund provided by the Society of the Cincinnati. A platform was erected for the

Governor and staff and members of the society and invited guests. Among the prominent military men present in uniform were Gen. Robert Patterson, Gen. George Cadwalader, Gen. Francis E. [1861] Patterson, and Gen. A. J. Pleasonton. The regiments to which the colors were presented were drawn up in the following order in front of the platform: Ninety-first Regiment, Col. Gregory; Sixty-seventh Regiment, Col. Staunton; Ninetieth Regiment, Col. Lyle; Fifty-eighth Regiment, Col. Jones; and Sixth Regiment Cavalry, Col. Rush. In order to receive the colors the colonels of the different regiments rode up in front of the platform, and were addressed by Governor Curtin, who then handed each the flag belonging to his command. Dr. McEuen, vice-president of the Society of the Cincinnati, also delivered an address. On the 7th a flag made by the sailors and marines of the United States vessel "Hartford" was presented to the city of Philadelphia at Independence Hall. The sailors and marines formed in line at the navy-yard and marched to the hall, bearing the flag spread out. Their spokesman, a sailor named Samuel H. Adams, presented the flag to Mayor Henry, accompanying the act with a brief and patriotic speech, which was responded to in suitable terms by the mayor.

—The new gun-boat "Itasca," Capt. C. H. B. Colwell, left the navy-yard December 7th. On the following day the steamer "Delaware," built at Wilmington, Del., and purchased by the government, sailed.

—On the 5th of December it was announced that the United States government had leased for hospital purposes the railroad depot at the southeast corner of Broad and Cherry Streets, the large manufactory corner of Twenty-second and Wood Streets, a building at Twenty-third and Lombard Streets, and Dunlap's carriage-factory, Fifth Street and York Avenue. These hospitals were fitted up under direction of Dr. John Neill, surgeon United States army, who had previously established a hospital at Moyamensing Hall, which at this time was in active operation.

—The regiment of cavalry or lancers commanded by Col. Richard H. Rush paraded on the 10th of December, preparatory to their departure for the seat of war. The men were armed with lances in addition to their pistols and sabres, each lance having a small red flag or pennon near the end, presented by lady friends of the regiment.

—Horn R. Kneass, a well-known member of the bar, died on the 12th of December. He had for many years been an active member of the Democratic party, and was twice nominated for district attorney. The first time he was declared elected, but the opposing candidate successfully contested the election. At one time Mr. Kneass held the office of Grand Master of the Independent Order of Odd-Fellows in Pennsylvania, and also Grand Sire of the order throughout the Union.

—December 14th it was announced that Christ Church Hospital, on Forty-eighth Street below Cumberland, which was commenced in 1856, had 1861] been entirely finished. The grounds attached to the building covered an area of one hundred and eighteen acres. The edifice was of solid gray stone, covered by a heavy slate roof and surmounted by handsome towers and steeples.

—Capt. Wilkes, of Mason and Slidell fame, arrived here on the 12th of December. Seated nearly opposite Capt. Wilkes at the super-table in the Continental Hotel on the following evening was Hon. Charles J. Faulkner, of Virginia, ex-minister to France, who had just been released from Fort Warren, where he had been confined as a prisoner-of-war. Mr. Faulkner during his stay in the city visited Moyamensing prison, in order to examine into the condition of the privateersmen imprisoned there. He afterward stated that the prisoners had expressed themselves as perfectly satisfied with the treatment they had received.

—William Sharkey, of the crew of the Confederate privateer "Petrel," was released in two thousand dollars bail about December 15th on account of the delicate state of his health. He was quite young, and claimed to have been impressed into the service.

—In the latter part of December the construction of the iron submarine battery presented to the United States government by E. A. Stevens, of Hoboken, was completed. The battery had originally been the iron steamer "Quinnebaug," but after Mr. Stevens' offer had been accepted by the government the vessel was brought to the ship-yard of Neafie & Levy, where her engines were overhauled and new boilers placed in her. At Bordentown, N. J., to which place she was taken from Neafie & Levy's yard, bulwarks of white cedar were added, two feet thick outside the hull and one foot thick inside, extending three feet ten inches above the deck and four feet below. The bulwarks were covered with plates of wrought iron, and the bow of the vessel was protected by a mass of timber and iron four feet thick and four feet above deck, placed at such an angle that a ball, if it struck this part of the vessel, would glance off without doing material damage. By means of water-tight compartments, into which water could be introduced, the vessel could be submerged until there was seventeen inches of water over the deck, so that nothing was visible to the enemy but the outline of the hull, marked by the bulwarks unsubmerged and the single gun which constituted the vessel's only armament. This gun, a one-hundred-pounder of the Parrott patent, was placed in the centre of the vessel upon a dais, surrounded by a high combing to prevent the water from reaching it. The gun-carriage, which was the design of Mr. Stevens, was so arranged that the gun recoiled on a centre-piece, upon which was placed gutta-percha sufficiently heavy to receive the whole

force of the concussion, permitting the gun to move only a trifling distance. The gun was loaded by men standing in the hold; the muzzle being lowered to the combing and the ammunition put in and rammed home. The gun was then elevated and fired by the man on deck. The vessel had two engines, each working independently and each giving power to a screw-propeller, so that by reversing one engine and moving the other ahead the vessel was turned round almost within her own length.

—Up to December 23d the following war-vessels had been built at Philadelphia since the commencement of hostilities: at the navy-yard the sloop-of-war "Miami" and "Tuscarora," finished, and the "Juniata," nearly ready for launching; at private ship-yards the gunboats "Wissahickon" (built by John W. Lynn), "Scioto" (built by Jacob Birely), and the "Itasca" (built by Hillman & Streaker), a bark built by Charles Williams, purchased by the government, and fitted out as a gun-boat, and the "Stars and Stripes," built by Simpson & Neill, and transformed into the gun-boat "Kittanning." The keel of the sloop-of-war "Monongahela" had also been laid at the navy-yard.

—In reply to a letter from Mayor Henry inquiring what provision could be made by the State authorities for strengthening the defenses of the city, Hon. William M. Meredith, Attorney-General of Pennsylvania, stated that besides the arms which in the course of the previous summer had been distributed among the border counties, and those with which portions of the State's quota of volunteers had been supplied, the State had still about nineteen thousand muskets and rifles, and it was thought that probably some ten thousand more could be collected. Five thousand of these, he added, would be promptly furnished to volunteer organizations formed in Philadelphia on a basis approved by the Governor. Of artillery the State had still fifty-seven pieces, varying from twenty-eight-pounders to six-pounders, of which as many as might be needed would be sent to the city. A sufficient supply of fixed ammunition could be furnished from the arsenal at Harrisburg. With regard to the defense of the maritime and harbor approaches of the city, he stated that it was the intention of the Governor to visit Washington to urge an increase of the appropriation by Congress, and an extension of the plan for such defenses. On the 27th of December, Mayor Henry received a letter from Attorney-General Meredith stating that Governor Curtin had obtained a promise from Gen. Totten, at the head of the Engineer Department at Washington, that one hundred and thirty-five large guns and twenty flanking twenty-four-pound howitzers would be mounted on Fort Delaware and forty-seven large guns on Fort Mifflin.

—The market-house and hall at Seventeenth and Poplar Streets was completed in the latter part of December. The building had a front of fifty-four feet on Poplar Street, and a depth of ninety-three

feet to Seventeenth Street. The lower story was used as a market, and the upper story as a hall.

—On the 27th of December, Col. Mulligan, of the Missouri Irish Brigade, who had distinguished himself at the battle of Lexington, Mo., on the 12th of September, delivered a lecture at National Hall describing that engagement, for the benefit of St. John's Orphan Asylum. He was enthusiastically received.

—The banks of Philadelphia, in common with those of New York and Boston, suspended specie payments on the 30th of December.

1862.—Right Rev. William Bacon Stevens, D.D., was consecrated assistant bishop of the Protestant Episcopal Diocese of Pennsylvania on the 2d of January, at St. Andrew's Church. The sermon was preached by Bishop Clark, of Rhode Island, and the bishop-elect was presented to the presiding bishop by the bishop of Pennsylvania, Right Rev. Alonzo Potter, D.D., and the bishop of New York, Right Rev. Horatio Potter, D.D.

—On the 6th of January the drug-store of G. W. Lewis, 45 South Fourth Street, and the establishment of William Mann, stationer and blank-book manufacturer, were damaged by fire to the extent of seventy-five thousand dollars.

—Gen. James Shields arrived on the 6th of January with three companies of regular troops from the Pacific coast. He supped at the Cooper-Shop Refreshment Saloon, and at the invitation of the managers inspected their hospital.

—The new City Councils, which met on the 6th of January, organized by electing Theodore Cuyler president of Select, and Wilson Kerr president of Common, Council. In the latter body two sets of officers were elected at first, the Democrats choosing Wilson Kerr, and the People's party J. A. Freeman, as president. The double election resulted from a disagreement as to the result of the election for councilmen in the Nineteenth Ward. The members of the People's party had the certificates of election, but the Democratic members claimed the seats as having been legally elected, with the fraudulent army vote thrown out. A proposition was finally adopted by which the claimants from the Nineteenth Ward withdrew and allowed the organization to be perfected by the election of the Democratic nominees, with the understanding that the question as to who were entitled to the seats should be referred to a committee for its decision; the claimants decided against reserving the right to contest their claim under the act of Assembly. This committee subsequently reported in favor of the Democratic claimants, who were admitted.

—Two bomb-boats for the United States service, the "George Maughan" and "Adolph Hugel," were fitted out at the navy-yard, and received their mortars and stores early in January.

—At a meeting of the survivors of the war of 1812, held on the 8th of January, William T. Elder pre-

siding, Col. Childs presented the heading of a muster-roll of a company of volunteers to be formed out of the surviving soldiers of that war. It was stated that a number of signatures had been obtained, and several members of the association expressed their willingness to shoulder a musket and march wherever their country needed their services.

—In a report of the work accomplished by the Union Volunteer Refreshment Committee, which was published on the 14th of January, it was stated that meals had been furnished to over one hundred thousand soldiers, and that five hundred sick and wounded had been cared for. The report was signed by Arad Barrows, chairman, and J. B. Wade, secretary.

—The train from Baltimore that reached Philadelphia at noon on the 15th of January brought about two hundred and thirty released prisoners, captured by the Confederates at Bull Run. The men were met at the depot by a committee from the two volunteer refreshment saloons, to which they were escorted, and where they were entertained.

—Owing to a reduction of wages ordered by Congress, the ship-carpenters and other mechanics at the navy-yard struck on the 16th of January, but resumed work on the 22d.

—The United States gun-boat "Rhode Island," S. D. Trenchard, lieutenant-commander, which sailed from New York on the 5th of December on a cruise to the Gulf of Mexico, arrived at the navy-yard on the 17th of January. The "Rhode Island" had captured, off Galveston, the Confederate schooner "Venus," the crew of which she had on board, together with her passengers. A number of United States naval officers came on the "Rhode Island" as passengers, having been transferred from other vessels. A number of invalids—soldiers and sailors—were sent home on the "Rhode Island" in care of Dr. W. Lamont Wheeler, United States navy.

—The Philadelphia Associates of the Sanitary Commission, about the middle of January, adopted a series of resolutions urging the reorganization of the Army Medical Department, so that in addition to the proper regulation of a well-selected corps of surgeons, the military rank of the superior medical officers might be elevated and an adequate staff of hospital and camp inspectors of suitable standing and authority provided. Senator Wilson's bill, then before Congress, was indorsed as being a move in the right direction, and a committee was appointed, consisting of Morton McMichael, J. I. Clark Hare, Dr. John H. McClellan, Dr. F. Gurney Smith, John Welsh, and Dr. Alfred Stillé, to proceed to Washington with a copy of the resolutions and submit them to the proper authorities.

—The Fifty-eighth Regiment Pennsylvania Volunteers, Col. J. R. Jones, was filled up to the standard by consolidating with it the regiment commanded by Col. Curtis. The other Philadelphia regiments, or-

ganized by Cols. Gregory, Lyle, Staunton, and Price, were filled up with troops from other commands by order of Governor Curtin.

1862] —The sloop-of-war "Hartford" sailed for the Gulf of Mexico on the 19th of January, under the command of Capt. R. Wainwright, as the flag-ship of Commodore Farragut's squadron.

—On the 23d of January it was announced that a reward of five hundred dollars would be paid by Mayor Henry for the discovery of the persons implicated in the murder of John Connelly, who was fatally stabbed on the night of January 8th at the corner of Twenty-fourth and Biddle Streets. On the 12th of February, John Malloy was arrested on the charge of being concerned in the murder.

—The Count of Paris, one of the Orleans princes, who was serving on the staff of Gen. McClellan, visited the city on Sunday, January 26th, in company with Hon. William H. Seward, Secretary of State, and remained several days. During his stay he visited the grave of Benjamin Franklin, in Christ Church burying-ground.

—The first train passed over the new bridge of the Pennsylvania Railroad Company at Gray's Ferry, and down to Washington Street wharf, on the 27th of January.

—The United States steamer "Miami" sailed on her trial trip on the 29th of January. The vessel carried a heavy armament, one of her guns being an eighty-pound rifled cannon and another an eleven-inch-shell gun. Her broadside battery consisted of four twenty-four-pound howitzers. The commander of the "Miami" was Lieutenant-Commander A. D. Harrall.

—William Gilchrist, who was arrested in September, 1861, on the charge of having sold munitions of war to the South and sent to Fort Lafayette, and afterward to Fort Warren, and upon his release by order of the government rearrested in Boston and committed for trial, was before Judge Cadwalader on the 29th of January on a writ of *habeas corpus*. Gilchrist was remanded to stand his trial at the following term of court.

—In his annual message to City Councils, submitted on the 30th of January, Mayor Henry stated that the sum of \$138,506.36 had been expended during the year for the purchase of arms, ammunition, and other requisites of military service, and that the entire disbursement from the relief fund amounted to \$356,612.78. With regard to the finances of the city, the mayor stated that at the beginning of the year 1861 the loans of the city were readily sold at a small premium, but as national disorders became more imminent their market value depreciated, particularly when forced into competition with a United States loan yielding seven and three-tenths per cent. interest. An ordinance approved June 8th gave authority to borrow \$1,000,000 to make provision for the defense of the city, and for the relief of the families of vol-

unteers, without the usual limitation to a par value, and of such loan \$498,500 was sold as needed at the average rate of ninety-two and one-tenth per cent., producing \$459,690 net avails. A further loan of \$42,500 was enacted by ordinance of May 3d, to be borrowed at not less than par, and by ordinance of December 14th, a loan of \$1,200,000 was created; \$117,000 thereof for the construction of Chestnut Street bridge, and the remainder for the payment of deficiencies without restriction of price.

—In a report to Mayor Henry in January, Gen. A. J. Pleasonton, commander of the Home Guard, stated that the organization then numbered some four thousand men, comprising three regiments of infantry of the line, two battalions of rifles, three companies of artillery, and one squadron of cavalry. With regard to the artillery arm of the service Gen. Pleasonton said, "Two batteries of Parrott's rifled cannon, each of six guns, have been purchased by the committee, one battery being of ten-pounders, the other of twenty-pounders. Both these batteries can take the field at once. There are also two cast-steel Prussian rifled guns, which were presented to the city by Mr. James Swaim, gun-carriages and caissons for which have been bought by the committee. James McHenry, of Liverpool, also generously presented to the city a cast-steel rifled gun of the Blakely pattern, the carriage and caisson for which Henry Simons patriotically tendered as a gift to the city."

—The United States sloop-of-war "St. Louis," Capt. Matthias C. Marin, went into commission on the 31st of January, and left the navy-yard for Fort Mifflin, where she took on her powder, preparatory to sailing for the Mediterranean, there to cruise for the protection of American shipping.

—Governor Curtin, Hon. Simon Cameron, and Senator Cowan arrived on the night of Friday, January 31st, and took quarters at the Continental Hotel. On the following evening Governor Curtin was present by invitation at the Commercial rooms to meet a number of merchants and leading business men, who had assembled there to receive him. There were no formal ceremonies, but the Governor was introduced to those persons with whom he was not previously acquainted, and, in response to a toast proposed by the president, William B. Hart, made a brief speech, chiefly in reference to the existing Rebellion and the means which Pennsylvania had adopted to aid in its suppression. Addresses were also delivered by Charles Gibbons, Thomas Smith, Morton McMichael, Charles Gilpin, William J. Wainwright, Henry D. Moore, Craig Biddle, William S. Smith, Thomas Webster, William Devine, Dr. H. G. Smith, Col. Chambers, and others. All the speakers bore the strongest testimony to the zeal, diligence, ability, and success with which the Governor had discharged his duties.

—On the 3d of February, United States Marshal Millward received orders from the Secretary of State

for the removal of the crews of the privateers "Petrel" and "Jeff Davis" from Moyamensing prison to Fort Lafayette, where they were to be treated as prisoners of war. George M. Wharton, counsel for the prisoners, sued out a writ of *habeas corpus*, and they were taken before Judge Cadwalader, who asked whether any of them objected to the transfer. All of them answered that they did not object, and nothing further was done under the writ of *habeas corpus*. On the 5th they were taken to Fort Lafayette. There were thirty-eight in all, three less than were captured. One of them, a young foreigner named Francis Alba, died during his imprisonment, another, William Sharkey, was in the hospital, and a third, Eben Lane, had been released.

—On the 5th of February about two hundred and fifty sick soldiers arrived from the South, and were taken to the government hospital at Broad and Cherry Streets, previously the depot of the Reading Railroad Company. The hospital was capable of accommodating five hundred patients.

—The lager-beer brewery of John Lips, in the rear of Seventeenth and Buttonwood Streets, was damaged by fire on the 5th of February to the extent of seventy thousand dollars.

—The United States steamer "Suwanee," one of the transports of the Burnside expedition, arrived from Fortress Monroe on the 8th of February, bringing the bodies of Col. Joseph W. Allen and Surgeon F. S. Weller, of the Ninth New Jersey Regiment, who were drowned in the storm off Hatteras. The vessel was badly damaged in the storm.

—J. Murray Rush, son of Richard Rush, and a prominent member of the bar, died on the 7th of February. Before the passage of the law providing for the election of district attorneys Mr. Rush held the position of assistant under Attorney-General Kane, and discharged its duties with marked ability. He was in his forty-ninth year.

—The fitting up of the different military hospitals was completed early in February. The surgeons and their staffs were: General Hospital, Broad Street,—Surgeon in Charge, Dr. John Neill; Assistant Surgeons, Drs. Yarrow, Woodhouse, Harrison Allen, and H. M. Bellows; Medical Cadets, George W. Shields, E. R. Corson, J. W. Corson, James Tyson, and W. R. D. Blackwood; Hospital Stewards, John Patterson and William H. Evans.

General Hospital, Fifth Street,—Surgeon in Charge, Dr. Meredith Clymer; Assistant Surgeons, Dr. R. J. Duglison, Dr. William M. Breed; Medical Cadets, J. A. McArthur, C. M. King; Hospital Stewards, Lea Nichols and Frederick Brown.

General Hospital, Christian Street,—Surgeon in Charge, Dr. John J. Reese; Medical Cadets, R. Kelly, Edward Brooks; Hospital Steward, Benjamin Hallowell.

The medical cadets were students of medicine, who were provided with quarters and rations, and were required to assist in dressing wounds, etc.

—On the 8th of February a delegation from the City Councils visited Washington, and, accompanied by Gen. Pleasanton and Hon. William D. Kelley, waited upon Hon. Edwin M. Stanton, [1862 Secretary of War, in relation to the comparatively defenseless condition of Delaware Bay and River. The Secretary stated that the subject had already received the attention of the War Department, and urged the delegation to address themselves to the task of arousing the capitalists of their city and State to the importance of upholding the credit of the government, with the assurance that every dollar placed at the disposal of the War Department would be invested in arms and ammunition for the defense of the Delaware and the Union.

—The company organized by the veterans of the war of 1812 was known as the Pennsylvania Veterans. The first meeting of the company was held on the 11th of February, at the armory of the Philadelphia Grays. Col. John S. Warner presided, and Charles Lombard acted as secretary. A committee was appointed to draft by-laws for the regulation of the company. There were then seventy-six names on the roll.

—A sword to be presented to Maj.-Gen. N. P. Banks was manufactured by Lambert & Mast. The scabbard, of silver, heavily plated with gold, bore the inscription, "Presented to Major-General Banks by Col. J. K. Murphy, Major M. Scott, Captain L. C. Kinsler, of the 29th Regiment, Pennsylvania Volunteers." The hilt was of solid silver, and bore the initials "N. P. B."

—Early on the morning of February 17th news was received of the surrender of Fort Donelson. Extras were issued, and great excitement prevailed throughout the city. In the Court of Quarter Sessions Judge Allison had the news read by Mr. Dare, the court crier, remarking that he felt justified in interrupting the regular proceedings, as every loyal man would be glad to know that the Union arms were victorious. The announcement was greeted with cheers by those present. In the District Court also Judge Hare directed that the news be announced, and a similar scene of enthusiasm followed. On the 19th salutes in honor of the victory were fired at the navy-yard and at Broad and Spring Garden Streets.

—The Bridesburg arsenal was damaged by fire to the extent of about five thousand dollars on the 18th of February.

—The One Hundred and Twelfth Pennsylvania Regiment, Col. Charles Angeroth, was filled up early in February, and was awaiting marching orders at its camp, near Camden, N. J.

—Washington's birthday was celebrated this year with unusual spirit and *éclat*. The morning opened with the ringing of bells and discharges of artillery, which continued at intervals until sunset. At eleven o'clock the members of City Councils proceeded to Independence Hall, where Governor Curtin and

members of the Legislature were in waiting. On arriving at the hall, Mr. Cuyler, president of Select Council, delivered an address to the Governor and members of the Legislature, welcoming them to the historic spot. Lewis W. Hall, Speaker of the Senate, responded, after which the Governor and suite and the members of the Legislature and City Councils were escorted to a platform erected in front of the Academy of Music, from which they witnessed the military review. The line of the First Division, Pennsylvania Militia, was formed on Broad Street, the right resting on Walnut, and the volunteer regiments recruited for active service were assigned the right of this position. When the whole column was formed it extended from Market Street to Prime, a distance of more than a mile. The volunteer regiments (recently recruited) in line were Col. Price's cavalry, Col. Angeroth's Heavy Artillery, and Cols. Lyle's, Staunton's, and Stainbrook's infantry regiments. The First Division proper comprised the First Brigade, Gen. Cadwalader; Second Brigade, Lieut.-Col. Dennis Heenan commanding; Third Brigade, Capt. H. Rogers commanding; Reserve Brigade, Brig.-Gen. Francis Patterson; Home Guards, Brig.-Gen. A. J. Pleasanton; and the First, Second, and Third Regiments infantry of the line, together with various minor organizations. The park of artillery secured by the city by purchase and gift attracted much attention. There were fourteen guns in the line. As the troops filed past the platform on which Governor Curtin was seated they honored him with the usual marching salute. Maj.-Gen. Robert Patterson, who was the chief in command, was frequently cheered along the route. After the review the Governor, members of the Legislature, Mayor Henry, members of the Councils, and invited guests entered the Academy of Music and took seats upon the stage, after which the building was thrown open to the public. Mayor Henry opened the proceedings with the announcement that for the first time in the history of the nation the President of the United States had issued a special proclamation, inviting the people to meet together for the purpose of observing the birthday of the father of his country, and of listening to the reading of his Farewell Address. Prayer was then offered by Right Rev. Alonzo Potter, D.D., bishop of the Protestant Episcopal Diocese of Pennsylvania, after which Washington's Farewell Address was read by Professor Allen, and the audience dispersed. At six o'clock the Governor and members of the Legislature were entertained at dinner at the Continental Hotel by the City Councils. Theodore Cuyler presided, and among the toasts were,—“The Memory of Washington;” “The President of the United States,” which, on motion of Gen. Patterson, was greeted with nine cheers; “The Governor of the State of Pennsylvania,” responded to by Governor Curtin, who stated that Philadelphia had already

furnished twenty-seven thousand three hundred and fifty men in addition to the eight thousand well-equipped troops whom he had reviewed some hours before; “Gen. George B. McClellan, the pride of our city and our State, the master-spirit of the campaign,” a sentiment that was received with nine hearty cheers; and “The army of the United States,” responded to by Gen. Robert Patterson. Gen. Kelly, of the army of Western Virginia, was called upon at this point, and made a brief address, after which Mr. Cuyler proposed “General Kelly,—may his honorable wound soon be healed,” a toast which was drank amid much enthusiasm. Mr. Cuyler now broke in upon the regular order of toasts to say that they had among them a representative of loyal Virginia,—Mr. Frost. The latter, being called for, expressed his gratification at a compliment intended not for him personally, but for the loyal men of whom he claimed to be a representative. The other toasts with the names of those who responded were: “The Navy of the United States,” Senator McClure; “Pennsylvania,—the Keystone of the Federal Union,” Mr. Clymer, of Reading; “The Union,—traitors cannot destroy,—patriots will ever uphold it,” Hon. William H. Witte; “The Constitution,—the great guarantee of our liberties; it shall ever be maintained inviolate so long as the sons of Pennsylvania have an arm or a dollar,” Judge Woodward; “The Legislature of Pennsylvania,” Hon. John Cessna; “The volunteer soldiers of Pennsylvania;” “The press,” and “Woman,—to her arms only do we surrender.”

In addition to the observance of the day by the city authorities and military, the survivors of the war of 1812 met at Independence Hall, Maj. B. H. Springer presiding, and adopted resolutions referring to the anniversary and the victories which had recently crowned the army of the Union, after which the veterans proceeded to the Continental Hotel and paid their respects to Governor Curtin. At night the newspaper offices and many stores and private houses were brilliantly illuminated.

—On Monday, February 24th, the schooner “Alexander,” of Port Richmond, sank during a storm in the Patapsco River and two sons of Capt. Shelhorn, aged fourteen and sixteen, were frozen in the rigging. The captain and Joseph H. Shropshire, one of the crew, were also badly frozen.

—A number of Philadelphians on Western gun-boats participated in the attack upon Fort Donelson. A letter received in Philadelphia on the 25th of February from Benjamin S. Edgar, Jr., one of the crew of the gun-boat “Carondelet,” stated that himself and three or four other townsmen were at a gun that burst, and that Solomon Elwell, a young man named McBride, William Rorey, and himself were more or less injured. The only Philadelphians killed on the “Carondelet” were William Duff and J. G. Leacock, both of whom had their heads crushed by the same ball which took off the arm of another comrade

named McFadden. The remains of Duff and Leacock, with those of Charles W. Baker, also one of the crew of the gun-boat "St. Louis," were buried near Fort Donelson.

—The One Hundred and Twelfth Regiment Pennsylvania Volunteers (heavy artillery), under the command of Col. Angerth, which had been encamped for some months near Camden, struck tents on the 25th and crossed the Delaware on the way to the seat of war.

—On the 27th of February a large meeting of ladies was held at the hall of the German Library, Seventh Street above Chestnut, for the purpose of forming an association in aid of the German Hospital. The society, which was designated "The Ladies' Aid for the German Hospital of Philadelphia," was organized by the election of the following officers: President, Mrs. Dr. Henry Tiedemann; Vice-President, Mrs. Charles Wilhelm; Secretary, Mrs. Oswald Seidenstricker; Treasurer, Mrs. I. Kohn.

—By an explosion in the Japan varnish manufactory of James L. Wright in the rear of Sixth Street, between Meetler and Diamond, on the 27th of February, Mr. Wright was killed, and Adam Herbott seriously injured.

—In 1740 five hundred acres of land in Bucks County were bequeathed by James Logan to the Philadelphia Library. In accordance with the terms of his will, it was leased at the rate of about twenty-two cents an acre for a term of one hundred and twenty-one years. The will provided further that, at the end of that period, the land should be valued by disinterested persons, and the interest calculated at six per cent., and that the rental for another term of one hundred and twenty-one years should be determined by adding the amount thus obtained to the rate previously paid. Charles H. Muirheid and David Landreth were appointed by the Library Company, and Benjamin S. Rich and William T. Rogers by the land-holders a committee to determine the rental, but up to March 1st several trials had been made without result. One of the tracts lying near New Hope contained about three hundred acres, the other tract at Paxson's Corner, Bucks Co., about two hundred acres.

—A number of members of the California and other regiments, who had been confined at Richmond, Va., arrived in the city on the 1st of March, and were enthusiastically greeted by relatives and friends.

—A meeting was held at National Hall on the evening of March 3d, to take into consideration the condition of the colored people at Beaufort, S. C., who were suffering for food and clothing. Bishop Potter presided, and made a brief address, urging immediate action for their relief and instruction. Addresses were also delivered by Rev. Dr. Stephen H. Tyng and Professor Lindsay, who had recently visited Port Royal, and who related his experiences at the South. Resolutions were adopted recognizing on the

score of humanity the claims which had been presented, and declaring that those present would co-operate with the government and with all benevolent people in efforts to provide for [1862 the wants, and to promote the welfare, of the colored people. A committee was appointed to receive contributions of clothing, etc., consisting of Stephen Colwell, Philip P. Randolph, James L. Claghorn, Rev. Thomas Brainerd, James A. Wright, Mordecai L. Dawson, Benjamin Coates, J. M. McKim, Rev. Dr. Newton, Ellis Yarnall, E. W. Clark, Rev. J. Wheaton Smith, Charles Rhoades, J. Huntington Jones, and Francis R. Cope.

—Commodore Samuel Mercer, United States navy, died in Philadelphia on the 16th of March, in the sixty-fourth year of his age.

—Remington Ackley and Charles Hamell were killed on the 8th of March by the explosion of a bomb-shell at Parson & Smith's Hotel, Camden, N. J. The shell had been sent North by a member of a New Jersey regiment, who stated that it had been thrown into the camp of the regiment by the rebels on the Potomac, and that the load had been withdrawn. Just before the explosion Mr. Ackley placed a lighted paper in the shell, which burst, killing himself and his companion, and demolishing the walls of the room and the furniture.

—The United States frigate "St. Lawrence," Capt. H. Y. Purviance, which had been damaged in the naval engagement between the "Merrimac" and the Union fleet off Newport News on the 8th of March, arrived at the navy-yard on the 14th for repairs.

—On the 18th of March a meeting of the respective committees on Federal relations of the Legislatures of Pennsylvania and New Jersey, with Governors Curtin and Olden, was held at the Continental Hotel, for the purpose of taking into consideration the subject of the defense of the Delaware Bay and River. Governor Curtin presided and S. Tuttle acted as secretary. Mayor Henry, Gen. Pleasanton, and the committee of Councils on the defense of the city were present. After several addresses, it was resolved that the Legislatures of Pennsylvania and New Jersey and the executive of Delaware should urgently memorialize Congress and the President to immediately provide suitable and sufficient defenses for Delaware Bay and the harbor of Philadelphia, and that, if necessary to induce and enable the government of the United States to enter upon that work immediately, Congress be requested to authorize a special loan for that purpose, the States of Pennsylvania, New Jersey, and Delaware to take up the loan among them.

—During the annual session of the Methodist Episcopal Conference of Philadelphia, which commenced at the Union Church, Fourth Street, below Arch, on the 19th of March, the question as to whether the members sustaining superannuated relations were loyal to the Union was raised by Rev. William Bishop, and debated at length. It was finally deter-

mined to refer the subject to a committee to be appointed by the bishop.

—The United States steamer "Rhode Island" arrived at the navy-yard on the 19th of March, with a large number of Confederate prisoners from prizes and from the privateer "Beauregard," who were taken to Fort Lafayette. On the following day the United States sloop-of-war "Juniata" was launched at the yard, Miss Turner, daughter of the commandant, performing the ceremony of "christening." The dimensions of the "Juniata" were,—length, two hundred and five feet; beam, thirty-eight feet; depth of hold, sixteen feet.

—On the 26th of March the remains of Col. John S. Slocum, Maj. S. Ballou, and Capt. Levi Tower, of the Second Rhode Island Regiment, who were killed at Bull Run, reached the city, *en route* for Providence, R. I. They had been buried on the field, but were exhumed under the personal direction of Governor Sprague, of Rhode Island, and members of the Second Rhode Island Regiment. They were met at the depot by Col. Staunton's regiment and escorted to Independence Hall, where they remained until the following day, when they were taken East.

—At the meeting of the Methodist Episcopal Conference, on the 28th of March, it was resolved, "That we not only declare our loyalty to the Constitution and government of these United States in the presence of Almighty God and these witnesses, but that we declare our willingness to swear or affirm the same whenever it shall be required by those who have the rule over us."

—On the 28th of March a party of ninety-one "contrabands," or negroes, freed by Union troops, arrived in Philadelphia from Eastern Virginia. They were furnished with breakfast by the Refreshment Committee, after which they were provided with temporary homes.

—An explosion in the cartridge manufactory of Professor Samuel Jackson, at Tenth and Reed Streets, on the 29th of March, resulted in the death of sixteen persons, and the more or less serious wounding of a number of others. Edwin Jackson, son of the proprietor, Yarnall Bailey, and Benjamin Whitecar were instantly killed, and the following persons died from their injuries: John H. Mooney, John Logue, Lovinia Norritt, Richard J. Hueston, Horace L. Sinnexson, Washington Black, John McDonald, Edwin Shaw, Allen Knowles, Lewis Brown, Ann McKernan, Rebecca Emerick, Ellen Lynch.

—Matthew H. Haggerty, who had been connected with the *Public Ledger* for six or seven years before his death, died on the 29th of March. Mr. Haggerty was a native of Ireland. Under President Taylor he was an officer of the customs, and was connected for some time with the *Episcopal Recorder*. He was also publisher of the *West Philadelphian*.

—The killed and wounded of the Pennsylvania regiments in the battle of Winchester were brought

to the city, April 2d, the Legislature having made an appropriation for that object. The bodies of the ten killed were embalmed in this city, and were then sent to their relatives in the interior of the State. The wounded, numbering fifty, were conveyed to St. Joseph's Hospital.

—The United States steamer "Bienville," Commander Charles Steedman, arrived at the navy-yard on the evening of April 4th, having on board the remains of Lieut. T. A. Budd and acting master L. W. Mather, who were killed at Mosquito Inlet March 23d. They were in command of the steamers "Penguin" and "Mary Andrew," and were instructed to establish an inside blockade. Exceeding their instructions, they exposed themselves to the fire of the Confederates, and, together with three of their men, were instantly killed. Both officers, though not residents, were generally known in the city. The "Bienville" remained at the navy-yard for repairs, having been damaged while ashore at Fernandina. She sailed again for Port Royal on the 9th.

—The grand jury in their final presentment at the close of the February term of the Quarter Sessions, on Saturday, April 5th, stated, in reference to the frauds committed in counting the vote of the army, that "they fear the law is powerless to punish such offenses or to reach and punish the offenders. . . . The grand inquest, in view of these practices, are so well satisfied of the impossibility of conducting elections among soldiers in camp with fairness and impartiality, that they are forced to call public attention to the law providing for such elections as fraught with danger to the best interests of the citizens, and highly injurious to public liberty.

"The elective franchise is too sacred a right, and its establishment cost our fathers too much to be thus disgraced and violated; and the best interest of society, in the deliberate opinion of the grand inquest, require that this law permitting elections in camps, far away from the participation and the supervision of the citizens, should be erased from the statute-book."

Judge Allison, referring to the matter set forth in their presentment, gave his reasons for sustaining the demurrer to the bill of indictment against a defendant for illegal voting on the ground of the unconstitutionality of the law, and expressed the hope that the Legislature would repeal it.

—A salute of one hundred guns was fired by a detachment of Company C, of the Reserve Brigade, at Broad and Locust Streets, in celebration of the Union victory at Corinth, Miss.

—The steam-engine and hose-carriage of the Hibernia Fire Company was taken on the 17th to Fortress Monroe, accompanied by Messrs. Peter Anderson, William Dixon, David A. Nagle, William J. Power, Richard Water, Henry Arenfeldt, John Bock, and James McShane, as a board of engineers to superintend the workings of the engine.

—On the 17th of April the Rev. W. G. Brownlow ("Parson Brownlow") arrived. The following morning he was escorted from the Continental Hotel to Independence Hall by a committee of Councils, where he was welcomed by Mr. Trego, and in response made a long and patriotic address to several thousand people who had assembled to see him.

—Religious services were held for the first time in the Cathedral of St. Peter and St. Paul, on Easter Sunday, April 21st. The building was not yet completed, nor had it been consecrated, and consequently mass was not said. The services, however, were of the most impressive character. It was estimated that at least five thousand people were inside the building, while as many more were unable to gain access. The Right Rev. Bishop Wood was the celebrant, assisted by the Rev. Dr. O'Hara. Deacons of Honor, Rev. F. Barbelin, of St. Joseph's, and Rev. F. Strobel, of St. Mary's Churches; Deacons of Vespers, Rev. J. F. Brannagan and Rev. Mr. Kiernan; Masters of Ceremonies, Mr. Hennessey and Mr. O'Neil. After several addresses Bishop Wood bestowed the Papal benediction on those present.

—Lieut.-Col. W. Brooks, Second Artillery, was assigned to Philadelphia as military commander in the latter part of April.

—The body of Lieut. Orlando B. Wagner, who had been killed in a reconnaissance before Yorktown, arrived from Fortress Monroe, April 25th. His funeral took place on the 28th, and was largely attended.

—William H. Crump, long identified with newspaper work on the *Inquirer*, died at Camden, N. J., April 27th.

—A submarine iron propellor, built by Neafie & Levy, was launched at their works May 1st, and towed thence to the navy-yard. She was sixty-five feet long, six feet deep, and five feet broad, nearly cylindrical in form, but sharp at either extremity. Twelve propellers or paddles projected from each side, and she was intended to be hermetically closed, then sunk below the surface by water-ballast. By means of the paddles she could then be propelled in any direction. Mr. Villeroy was the inventor and designer.

—The remains of Maj.-Gen. Charles F. Smith, of Philadelphia, who died at Savannah, arrived in this city May 3d, and were received by a committee of Councils and the Girard Home Guards, who escorted them from the depot to Independence Hall. The funeral took place on Tuesday, the 6th, and was attended by all the regular military in the city.

—The iron-clad frigate "New Ironsides," the third model iron-clad that the Navy Department had ordered, was launched from the yard of its builders, Messrs. Cramp & Sons, on May 10th. This was the first large iron vessel that the firm had built. She was two hundred and forty-five feet long, fifty-seven feet six inches breadth of beam, and twenty-five feet depth of hold. In spite of her heavy armor she

was calculated to draw but fifteen feet of water. Her sides, above water, were at an angle of about forty degrees, in order to deflect projectiles, and she was armed with a powerful ram com- [1862 posed of her armor-sheathing prolonged from the bow. The launch was witnessed by thousands of people, every available point being crowded with spectators. The ceremony of "christening" was performed by the venerable Commodore Charles Stewart ("Old Ironsides"), assisted by Commodores Marston and Montgomery, Capts. Turner and Fairfax, and Chief Engineers Wood, Danby, Stewart, and Newell.

—On Monday, May 11th, the schooner "E. W. Pratt," loaded with coal-oil, accidentally took fire while lying at Lombard Street wharf. For a while the blazing oil threatened a general conflagration, but with the exception of damaging the ship "Gray Eagle," it was confined to the "Pratt." Freeman T. Robins, steward of the "Pratt," was drowned while attempting to escape the flames. The prize steamer "Bienville," loaded with gunpowder, lay adjoining the "Pratt," but fortunately escaped damage.

—On the 13th the propeller "Whilden" arrived at Philadelphia with one hundred and seventy-five sick and wounded soldiers from Fortress Monroe. The soldiers were in charge of Surgeon-General Henry H. Smith, assisted by a delegation of Philadelphia surgeons. Under their care they were conveyed to St. Joseph's Hospital.

—Hon. Charles Jared Ingersoll, one of the most prominent members of the Philadelphia bar, died May 14th, in the eightieth year of his age. He had represented the city in Congress in 1812, was United States district attorney under President Madison, and was nominated minister to France by President Polk. Owing to political reasons this last appointment was not confirmed. He was well known in the literary circles of Philadelphia.

—City Councils, at a meeting May 15th, passed an ordinance leasing to the Pennsylvania Railroad the City Railroad on Market Street, from the bridge to Broad Street, for thirty years, at an annual rental of one thousand dollars.

—The transport steamer "John Brooks," Capt. Layfield, arrived May 20th, with seventy-six wounded soldiers and sixty prisoners. The prisoners were lodged in Fort Delaware, and the sick and wounded soldiers removed to the United States Hospital at Broad and Cherry Streets.

—A detachment of six hundred and forty sick and wounded soldiers were brought to the city May 21st, from Yorktown, Newport News, and Williamsburg. The men were conveyed to the hospitals at Broad and Cherry and Christian Streets. On the following day two hundred and fifty more passed through Philadelphia to New York, the hospital accommodations being exhausted.

—The well-known comedian John Drew died suddenly May 21st, at his residence. Mr. Drew was born

in Dublin, Ireland, Sept. 3, 1827. He appeared at the Bowery Theatre, New York, in 1845, as *Doctor O'Toole*. On the 27th of July, 1850, he married Mrs. Mossop, who made her appearance when a child under her maiden name, Louisa Lane. Mr. Drew opened at the Chestnut Street Theatre, Aug. 28, 1852, as *Trapanti* in "She Would and She Would Not." He became a great favorite. With William Wheatley he became lessee of the Arch Street Theatre in August, 1853. Two years afterward he went to England. He first appeared in San Francisco in December, 1858. He was in Australia in the succeeding year; came back to the United States in 1862; made his last appearance on the stage May 9, 1862.

—The funeral of Col. J. P. Vanleer, of the Sixth New Jersey Regiment, took place May 22d, with military honors.

—Judge Woodward, of the Supreme Court of Pennsylvania, rendered a decision on an appeal declaring the law allowing the vote of soldiers in camp to be counted at their homes to be unconstitutional. The results of the election for two officers, that of the clerk of Orphans' Court and that of the sheriff, were affected by this decision, and steps were taken to have the contest in both cases reopened. In the case of Lawrence against Stevenson, candidates for the clerk of Orphans' Court, the judge decided, after a long debate, that they still had jurisdiction, and on June 9th rendered a decision excluding the army vote, and giving the office to Mr. Stevenson.

—On receipt of the news of the retreat of Gen. Banks from the Shenandoah Valley, Governor Curtin issued an order on May 26th to all military organizations of the State to hold themselves prepared to move to Washington at once. This order produced great excitement, especially among the military and their relatives. The Committee of Defense and Protection passed a resolution on the following day offering the Home Guard, fully equipped, to the service of the State, and another authorizing the purchase of horses for the artillery. The National Guard and the State Fencibles both filled up their ranks and prepared to leave the city on the receipt of orders. The alarm, however, subsided with Jackson's retreat and McClellan's successes.

—The Protestant Episcopal Convention of the Diocese of Pennsylvania was opened May 27th in St. Andrew's Church, Bishop Potter presiding.

—The prize steamer "Cambria" arrived at the navy-yard June 1st. She was a fine iron propeller, and was laden with Enfield rifles and other valuable war material. She had been captured by the United States ship "Huron" off Charleston.

—Augustus De Kalb Tarr, a well-known member of the Philadelphia bar, died June 1st, aged fifty-four years.

—On the 4th of June the "Whillden" again arrived from Fortress Monroe with one hundred and sixty-six Pennsylvania soldiers wounded at the battles on the

Chickahominy. The detachment was in charge of a delegation of Philadelphia surgeons. Two dead bodies, those of Lieut. William B. Kenny and of Private Washington Agar, were also brought upon the steamer. Four days later the transport "R. S. Spaulding" arrived with three hundred and thirty-four wounded soldiers from the battle of Fair Oaks.

—One of the most peculiar and boldest attempts at jail delivery recorded in Philadelphia history occurred June 3d. United States Marshal Millward received a letter purporting to come from the War Department at Washington, and written on the official paper of that department, signed by the Assistant Secretary of War, directing him to prepare an application for a pardon, and have it signed by the proper officials, for Col. J. Buchanan Cross, a well-known forger then in the penitentiary, as the department had urgent need of Cross in a military capacity. He was directed to perform this duty secretly and expeditiously, and then personally present the application to Governor Curtin, who would be directed how to act. Governor Curtin received a similar letter, and on the marshal's presentation of the application a pardon was immediately issued and delivered to the marshal. No suspicion was entertained of the genuineness of either letter, but on account of the urgent character and apparent gravity of the necessity for Cross, the marshal did not deliver the pardon to him, but took personal charge of him, and guarded him carefully until they reached the war-office at Washington. Here it was quickly ascertained that both letters were forgeries, and that neither the Secretary of War nor his assistant had ever heard of Cross. It was believed that he himself had forged the letters in the penitentiary. How he had obtained the official paper remained a mystery. Cross, with the boldest effrontery, finally admitted that the letters were forgeries, but protested against being returned, on the ground that the pardon was genuine.

—Mayor Weightman, of Boston, on behalf of the city of Boston, presented a sword to Capt. Wilkes, of Mason-Slidell fame, at the Continental Hotel.

—On the same date the various State hospitals were formally transferred to the United States. This change was effected to simplify the routine of admissions, and did not affect those in charge of the hospitals. Dunlap's carriage-factory, at Fifth and Buttonwood Streets, was used as a United States army hospital for sick and wounded soldiers from Feb. 16, 1862, to Jan. 31, 1863.

—The steamship "Norman," long of the Boston line of steamers, was launched June 11th.

—The thirteenth annual meeting of the Pennsylvania State Medical Association was held at the Pennsylvania University June 11th. Dr. E. Wallace, of Reading, was president.

—The United States transport "Louisiana" arrived from Fortress Monroe June 12th, with three hundred and sixty-four sick and wounded soldiers.

—"Parson" Brownlow was given a reception by a number of prominent citizens at the Academy of Music on the 12th. Mr. Brownlow made a characteristic speech.

—A special meeting of Councils was called by the mayor, on June 17th, to consider the advisability of the purchase of League Island by the city, and of presenting it to the government for the purpose of a navy-yard. The island was offered to the city by the Pennsylvania Company for Insuring Lives and Granting Annuities and a private individual for the sum of three hundred and ten thousand dollars. After considerable debate an ordinance was passed, directing the mayor and a committee of both branches of the Councils to accept the offer. Another ordinance was then passed, directing the mayor to make a conveyance and grant of League Island to the government, on condition that it should be accepted for the location of a navy-yard.

—The apparatus of the Hibernia Fire Company, which had been in service for three months at Fortress Monroe by the order of the Secretary of War, returned June 24th, and the engineers who had accompanied it were given a reception by the other members of the company.

—Dr. Owen Stillé, surgeon of the Twenty-third Pennsylvania Regiment, died at Fortress Monroe June 22d. Alderman Hugh Clark died June 20th.

—Four hundred Confederate prisoners passed through the city June 25th *en route* for Fort Delaware.

—The funeral of Col. Ellet, commander of the rams on the Mississippi, occurred June 27th. The Keystone Artillerists acted as body-guards.

—On June 28th the transport steamers "State of Maine" and "Whillden" arrived with about six hundred sick and wounded soldiers from White House Landing. They were distributed among the various military hospitals.

—On the 2d of July the President, by the advice of the Governors of eighteen of the States (of which Governor Curtin, of Pennsylvania, was one), issued another call for three hundred thousand men. Much excitement was, however, caused by the proclamation. Recruiting began at once and continued through the summer. The news of the six days' fight before Richmond was not received until July 3d, and the account was so meagre as to cause considerable anxiety and excitement.

—Large numbers of Pennsylvania troops were wounded in the six days' fighting before Richmond. The first hospital boat to arrive in Philadelphia with the wounded was the "Daniel Webster," which reached the city July 7th, with about two hundred and fifty wounded, under the charge of assistant-surgeons A. G. B. Hinkle and H. C. Eckstein.

—The new United States sloop-of-war "Monongahela" was launched July 10th at the navy-yard, in the presence of a large number of spectators. She

was christened by Miss Emily Virginia Hoover. The "Monongahela" was two hundred and twenty-five feet long, thirty-eight feet beam, and seventeen feet two inches depth of hold. She was [1862 about fifteen hundred tons burden, and was pierced to carry six guns.

—On the 10th another detachment of two hundred and fifty-four wounded and invalid soldiers were brought on the propeller "John Brooks," under the charge of Dr. Lloyd W. Hixon. Five deaths occurred on the passage. The following day sixteen members of the Weccacoe Fire Company, volunteers in Baxter's Fire Zouaves, arrived, and were taken to the Cooper-Shop Hospital.

—Hon. John Foulkrod, for many years State representative and senator, died at Frankford July 11th, of apoplexy.

—Governor Curtin issued a proclamation on July 21st, apportioning the quota of companies to be raised in each county of the State. The quota of Philadelphia was placed at fifty companies of one hundred men each. The new regiments were to enlist for nine months, those joining old regiments to serve one year.

—A meeting of citizens was held at the Board of Trade room July 24th to take into consideration the best means of assisting the State government in providing the contingent of troops from Pennsylvania. Mayor Henry presided. The greatest enthusiasm was manifested, and on a call for subscriptions to a fund to be used as a bounty to volunteers, forty-three thousand one hundred dollars was at once subscribed. A general mass-meeting to further the object was ordered to be called at Independence Square on the 26th. On the same day City Councils appropriated five hundred thousand dollars to a bounty-fund; the Pennsylvania Railroad subscribed fifty thousand dollars; the Reading Railroad, twenty-five thousand dollars; and the Philadelphia, Wilmington and Baltimore Railroad, three thousand dollars. By the following day the total private subscriptions had reached one hundred and fifty-eight thousand eight hundred dollars. On Saturday one of the largest mass-meetings that had ever been held in the city took place in Independence Square. Three stands were erected from which speeches were delivered. Mayor Henry presided over the mass-meeting and made an address, appealing to the citizens to strengthen the hands of the government by their services or money. Resolutions were adopted, demanding that the war should be prosecuted with all the power and means the executive could command, thanking the President for recent exercises of authority, approving the call for troops, repelling foreign intervention, and finally ratifying the proceedings at the meeting at the Board of Trade. Hon. William D. Kelley, Ex-Governor Pollock, Daniel Dougherty, J. Wheaton Smith, Capt. E. W. Powers, Rev. J. Walker Jackson, George H. Stuart, Edward C. Knight, Rev. J. W.

Jackson, Hon. Isaac Hazlehurst, Col. Small, James Chauncey, Dr. Morwitz, Hon. E. W. Davis, Rev. Mr. Oliver, William B. Mann, John W. Forney, 1862] Washington L. Bladen, and others made addresses. Additional subscriptions to the amount of about fifty thousand dollars were obtained. The effect on recruiting was very marked, the recruiting stations being filled with volunteers. The members of the Corn Exchange subscribed ten thousand dollars toward fitting out a special regiment to be known as the Corn Exchange Regiment.

—The transport steamer "Spaulding" arrived July 25th with two hundred and forty-three sick and wounded soldiers from City Point.

—The following day the transport "State of Maine" arrived with one hundred and twenty-five more wounded soldiers. She had disembarked two hundred and twenty-five invalids at the United States hospital at Chester. She was followed by the "Commodore" and the "Daniel Webster" bringing about four hundred more. The hospitals in Philadelphia were at this time taxed to their utmost capacity.

—Rev. Erastus De Wolfe, rector of St. Barnabas' Protestant Episcopal Church, died, August 4th, from the effects of exposure in camp.

—The three new turbine-wheels at the Fairmount Water-Works were set in motion for the first time in the early part of August.

—The United States transport "C. Vanderbilt" arrived, August 7th, with four hundred and fifty sick and wounded soldiers. The weather was extremely hot, and no less than thirty deaths occurred on the passage.

—War meetings continued to be held in various parts of the city and suburbs to encourage enlistments. One of the most enthusiastic was that of the Germans to fill up the regiments under Gen. Sigel, and a regiment of "Sigel Sharpshooters" was raised in the city and accepted by the government.

—The proclamation of the President for the first draft was issued Aug. 4, 1862. On the 8th of August proclamation was issued that no citizen of the United States liable to military duty should go abroad before the draft was made. In Pennsylvania the draft was made in the fall months of the same year. There was no draft in the city, in consequence of the raising of a bounty-fund. The men from the interior of the State commenced arriving at Camp Philadelphia, near Haddington, October 27th. The act of March 3, 1863, called the Conscription Law, authorized the enrollment of all male able-bodied citizens and all aliens who had declared their intentions, and who were between the ages of eighteen and forty-five years. If negroes were at that time, in any of the States, recognized citizens, they were liable to enrollment and conscription, if of the proper age. On the 10th of February, 1864, Congress put an end to all doubt on this subject by passing an amendment to the law, which declared that all able-bodied male colored persons

between twenty and forty-five years of age should be liable to enrollment for service. The recruiting of persons of African descent as soldiers was authorized by act of Congress of July 8, 1862, and two regiments of them were ready in the fall of that year in Massachusetts. In Pennsylvania black regiments were recruited many months before the close of the war, and colored men were recruited by the United States government for the regular army in 1862-63, in Maryland, in Missouri, and in Tennessee. In December, 1863, there were over fifty thousand colored soldiers in the United States service, and before the end of 1864 there were over one hundred and fifty thousand in the service, beside what were among the State troops. The Fifteenth Amendment of the Constitution of the United States was not adopted until 1870, five years after the war was closed. The draft under the Conscription Act of March 3, 1863, began in the Fourth Congressional District July 15, 1863; draft in the First and Second Wards, Feb. 23, 1865; Third, Fourth, and Seventh Wards, February 24th; Fifth and Eighth Wards, February 25th; Sixth and Ninth Wards, February 27th; and Twenty-fifth Ward, March 22, 1865.

—On August 10th four transport steamers arrived, having on board over thirteen hundred sick soldiers. The majority of the men were suffering from camp fevers, dysenteries, and other diseases incident to camp life.

—The effort to evade the draft which was threatened unless Philadelphia's quota was furnished caused a curious scene at the sailing of the ship "Zerah" for Londonderry August 12th. The provost marshal and his guard, assisted by a squad of policemen, took possession of the wharf and vessel before the passengers embarked. No person was allowed to sail unless he was provided with a passport, and a large number of intended runaways were turned back.

—On the 12th three more hospital-ships, the "S. B. Spaulding," the "Elm City," and "St. Mark's," arrived with about eleven hundred more invalid soldiers from Harrison's Landing and Fortress Monroe. They were distributed among the various hospitals and in temporary quarters in every section of the city.

—The Norristown Railroad bridge over the Wissahickon Creek was destroyed by fire August 12th. The mill of Andrew Robinson, occupied by John Dobson, was also totally destroyed.

—The transport "Kennebec" arrived August 13th, with two hundred and eighty sick and wounded. Eight deaths occurred on the voyage.

—A championship sculling match took place on what is now known as the national course on the Schuylkill August 13th, between Joshua Ward and James Hammill. Hammill won by thirty yards. On the following day Hammill again won.

—The transport "Commodore" arrived on the 18th, with about two hundred invalid soldiers. Four deaths occurred on board.

—Brig-Gen. Corcoran, of the Irish Brigade, on his return from the South, where he had been held prisoner, was given a reception in every city from Washington north. Delegations of the City Councils met the general at Baltimore, and accompanied him to the city. The reception was most enthusiastic. He was met at the depot, and escorted to Independence Hall by the One Hundred and Fourteenth, the One Hundred and Sixteenth, and the One Hundred and Seventeenth Regiments, the Fenian Brotherhood, the Pike and Hurling Club, the Hibernia Society, and other organizations, together with members of City Councils and prominent citizens. He was welcomed at the Cooper-Shop Refreshment Saloon by Dr. Andrew Nebinger, and again at Independence Hall by Mayor Henry. The general responded in a patriotic speech. In the evening he was serenaded.

—On the following day another exchanged prisoner, Col. John K. Murphy, reached the city, and though his arrival was unexpected, a spontaneous reception was given to him no less enthusiastic than that to Gen. Corcoran.

—Rear-Admiral George C. Read, commandant of the Naval Asylum, died at that institution August 22d, aged seventy-five years.

—A grand mass-meeting of the Democratic party was held at Independence Square August 22d, Peter McCall presiding. The gathering was one of the largest ever seen in Philadelphia. The meeting was addressed by Francis W. Hughes, Peter McCall, William H. Witte, Charles Ingersoll, Joseph A. Clay, and John Bell Robinson. The resolutions adopted denounced secession and abolition doctrines as equally subversive of the Constitution; denounced, likewise, the suppression of freedom of speech by the government and the abolition of the *habeas corpus* law in the loyal States as in violation of the Constitution; urged the prosecution of the war for the suppression of the Rebellion, and tendered the thanks of the party to the prominent generals and numerous members of the party in the ranks.

—On August 23d and 24th the Thirty-fifth Massachusetts, and the One Hundred and Eleventh and the One Hundred and Seventeenth New York Regiments passed through the city, in addition to numerous squads designed to fill the ranks of old regiments in the field.

—The day following the Democratic mass-meeting one of the speakers, Charles Ingersoll, was arrested by the provost marshal, on the affidavit of Edward Willard, for uttering treasonable language. The language as set forth in the affidavit was as follows:

"The despotisms of the Old World can furnish no parallel to the corruptions of the administration of Abraham Lincoln. They can imprison us as they like for the exercise of the right of free speech, as in the case of a citizen of the Twelfth Ward; but what does that amount to if they have to feed, clothe,

and lodge us; and in these hard times that is quite a consideration." Mr. Ingersoll was released on one thousand dollars bail to appear before the United States marshal.

[1862

—The funeral services of Rear-Admiral Read took place August 26th, in the United States Naval Asylum. The ships in the harbor had their flags at half-mast, and minute-guns were fired at noon by the "Princeton." The pall-bearers were,—Rear-Admirals Charles Stewart and Lavalette, Commodores Inman and Nicholson, and Gens. Montgomery, Crossman, Cadwalader, and Patterson.

—The Democratic nominating convention met August 26th, 27th, and 28th, and nominated a full city ticket, Daniel M. Fox being the candidate for mayor. On the 26th Amos Briggs declined the nomination of the Republican party for the mayoralty.

—Charles Ingersoll, after a preliminary examination before the marshal, was committed to the charge of Deputy Marshal Schuyler, who, however, was directed to accompany him wherever he chose to go. Mr. Ingersoll immediately prayed for a writ of *habeas corpus* in the United States District Court, which was granted forthwith. The marshal's deputy asked for delay, which was finally granted, the writ being made returnable on the following day. During the night of the 28th Mr. Ingersoll's mother died. By mutual consent it was agreed to defer the hearing until Monday following. On that day the writ of *habeas corpus* was obeyed. Mr. Ingersoll being produced, the marshal announced the receipt of orders from the Secretary of War ordering Mr. Ingersoll's release. As the plaintiff was thus at liberty, the marshal's return to the writ was accepted, and the proceedings ceased.

—The National Union party, without reference to the Republicans, nominated a full party ticket, headed in the city by Alexander Henry for mayor.

—On the 29th of August the deputy marshals, engaged in making the enrollment of citizens liable to the draft, were attacked by a crowd of men and women on Milton Street above Eleventh. The marshals succeeded, after some difficulty, in arresting one man, Patrick Blue. A file of soldiers was detailed to guard the street and disperse the mob.

—At a meeting of the Republican convention, which had adjourned after nominating Amos Briggs for mayor to await the action of the National Union party, a speech was made by Dr. Gregg, strongly condemning the action of Judge Briggs in declining the nomination of the party. A resolution was passed denouncing the action of the National Union party in refusing to co-operate with the Republicans, and especially a resolution passed by the former appointing a committee to wait upon the President to ask him to remove every employé of the United States who did not support the National Union ticket. No action was taken on the proposition to nominate a third ticket.

—The movement and battles at Manassas Junction and the second battle of Bull Run caused a great deal of anxiety and excitement, the strict censorship exercised by the government over dispatches to the papers causing a paucity and delay in the announcement of news, and giving rise to numerous rumors and surmises. On the 1st of September the excitement culminated when the *Tribune* published a "special dispatch" announcing that Gen. Banks' army was cut to pieces, and that the President had removed Gen. McClellan and denounced him as a traitor. The city was in an uproar, which was pacified by a complete and circumstantial contradiction of the rumor, and the suppression of the *Tribune* by order of the government.

—Col. Prevost's and Col. Tippen's regiments left on the 1st of September, and Col. Ellmaker's followed on the same night. The Twenty-second New York Regiment, returning homeward, met the One Hundred and Twenty-first New York on their way south at the Cooper-Shop Refreshment Saloon on the same day.

—On September 2d and 3d, Col. Heenan's regiment left for the seat of war. Before its departure a handsome sword was presented to Col. Heenan by some admiring friends.

—During September 3d about seventeen hundred sick and wounded soldiers arrived, and were distributed to the various hospitals. It was impossible to obtain sufficient accommodations for them all in the regular hospitals, and the National Guards' Hall, on Race Street, and the Weccacoe Engine-house, were temporarily fitted up for their accommodation. Four hundred had been left at the Chester General Hospital. The remains of Col. John A. Kolter arrived the same day. His body was escorted to Independence Hall, and thence to the grave, on Friday, by a guard of honor of the Seventy-third Regiment and a battalion of rifles.

—The enrollment of the city having been completed, it was announced that there were 99,701 men capable of bearing arms, of which 19,228 had already enlisted, which was much less than the actual number.

—The Twelfth New Jersey, One Hundred and Thirty-fifth New York, Thirty-ninth Massachusetts, and the One Hundred and Twenty-third New York Regiments passed through the city September 7th, beside numerous detachments, making in all about five thousand men. They were all entertained at the Volunteer Union and Cooper-Shop Refreshment Saloons.

—Independence Square was converted September 8th into a grand recruiting camp. The interdiction placed by the United States marshal on travel, by demanding passports from all travelers, was removed by orders from Washington September 6th.

—Governor Curtin appointed commissioners to supervise the draft, under the provisions of the draft law, on September 8th.

—A double collision occurred September 9th on

the Philadelphia, Wilmington and Baltimore Railroad, near Baltimore, by which three soldiers were killed and about twenty injured.

—The invasion of Maryland and Pennsylvania by the Confederate troops created great excitement. Councils passed resolutions on the 11th to further enlistments, and to place the Home Guard on a better basis. On the same night the mayor issued an urgent appeal for volunteers, in obedience to a telegram from the Governor, stating that the Confederate army was already on the move for Harrisburg and Philadelphia, and begging for all available troops to be forwarded at once to Harrisburg. The mayor called for minute-men to assemble on Friday for the defense of the State. He also called a special meeting of Councils to consider the emergency. A terrible storm raged over the city on Friday, but it did not deter the assembling of the people. Great numbers of workingmen and others offered themselves in bodies, as did likewise the various militia organizations. The employes of the Baldwin Locomotive Works, two hundred in number, offered themselves at once, as did those of Morris & Tasker, and other large establishments. Councils passed a resolution giving to the mayor and a committee of defense and protection full power to defend the city as might seem best to them, and appropriating five hundred thousand dollars for that purpose, to be drawn by the mayor as necessity required. Later in the day the news was more reassuring, which somewhat allayed the excitement.

—Nearly five hundred more wounded men arrived in the city on the 11th of September, but as there was not sufficient hospital accommodation here they passed on to New York.

—In consequence of the storm, serious floods occurred in the Schuylkill and Delaware Rivers and in several of the creeks, especially Cohocksink and Frankford. The Cohocksink Creek culvert burst during the height of the storm, destroying a large amount of property, flooding the neighborhood, and drowning five persons.

—The official enrollment figures were published September 14th, and showed a total liable to military service of 106,806 persons. Of these were in Pennsylvania regiments, 17,670; navy and marine, 1744; and in regiments of other States, 1489 men. According to the records of the War Department these figures were incorrect, 29,194 having been on the War Department rolls. This left but 4220 to fill the quota of the city.

—Throughout Friday, Saturday, Sunday, and Monday troops were moved to Harrisburg as rapidly as possible. By the 16th, four days after the call, it was estimated that fifty thousand men were encamped near that city. The howitzer battery at the navy-yard and the city battery of ten brass guns were also taken to Harrisburg. By the 16th the news of the defeat and retreat of Lee restored confidence.

Alex Henry

—The Hibernia Fire Engine was again called on by the Secretary of War to proceed to Washington to perform duty there. The apparatus, under the charge of William Dickson, chief engineer, and seven members of the company, left the city on the 17th.

—The Twelfth New York and the Eighty-seventh Ohio Regiments, which had been captured and paroled by the Confederates at Harper's Ferry, passed through Philadelphia on their homeward journey.

—News of the dangers and of the safety of the various Philadelphia organizations, alternately excited and relieved the city for several days after the battle of Antietam. The Corn Exchange Regiment suffered most severely, Col. Prevost being wounded and about two hundred and thirty men of the regiment killed or wounded. Col. Neill, Twenty-third Pennsylvania Volunteers, Col. Anderson, United States army, and Lieut.-Col. Hector Tyndale were among the wounded, and arrived in Philadelphia on the 22d. The militia who had gone to Harrisburg on the call of the Governor began to return on the 22d, their services not being required.

—A quarrel among some of the troops *en route* for Washington occurred September 23d on Washington Avenue, resulting in the wounding of some twenty soldiers. The provost marshal made some arrests and restored order.

—The President had issued a proclamation on the 24th of September, depriving persons arrested by military authority for treason of the protection of the *habeas corpus* law. The case of Isaac C. Thomas, arrested in Bucks County by the United States marshal, charged with discouraging enlistments, was brought before Judge Cadwalader on a petition for a writ of *habeas corpus*. The writ was granted and obeyed, but the marshal proposed to quash the indictment on merely proving the arrest under the President's proclamation. Judge Cadwalader, however, admitted the prisoner to bail and continued the case, in order to consider the question and give an opinion on the three points,—

1st. Has the marshal of the district any official authority to make a military arrest by virtue of his office as marshal?

2d. Has he any authority to make such an arrest as the agent of the Secretary of War in a place where the courts of the United States are open, and the course of justice unimpeded, or in a place where actual hostilities are not being waged, nor in actual military occupation?

3d. Has the President the power to suspend the writ of *habeas corpus* without legislative authority as to cases of persons arrested by an alleged military authority in a place where the courts of justice are unobstructed, or not in military occupation, or where actual hostilities are not pending?

On the 30th, before the judge had delivered any opinion on these points, the marshal announced that he had received orders to discharge the prisoner;

and so, without conceding that one under a military arrest by him for treason can be relieved of that arrest by a writ of *habeas corpus*, the proceedings ceased, and the case was dismissed. [1862

—Between four hundred and five hundred wounded soldiers arrived from the battle-field of Antietam, September 26th, and were taken to the military hospitals. An accident to a train containing a number of Philadelphia soldiers occurred on the Cumberland Valley Railroad near Harrisburg on the same day, causing seven deaths and injuring about forty men.

—The United States revenue-stamp law went into effect on the 1st of October. The supply proved insufficient for the demand, and much dissatisfaction resulted, especially as there was more or less doubt as to the special applicability of the law to certain cases.

—About two hundred and sixty wounded soldiers arrived from Hagerstown and Antietam on the 1st.

—The election on October 14th was very quiet and orderly, and resulted in a victory in the city for the National Union party. Mayor Henry had five thousand and eighty-eight majority, the remainder of the city ticket about three thousand majority. In the State the Democrats were successful, electing their State candidates by about five thousand majority.

Alexander Henry, who was distinguished during the war for his cool, careful, wise, and strong management of city affairs, was born in Philadelphia April 14, 1823. He was a son of John Henry, and a grandson of Alexander Henry, who, in his time, was a most prominent and honored citizen. Mr. Henry received an academical and collegiate education. He graduated with distinguished honors from Princeton, his preliminary training having been derived from local schools. After leaving college he began the study of law, and was admitted to the Philadelphia bar April 13, 1844. He speedily established a remunerative law practice, and in 1856 and 1857 represented the Seventh Ward in Councils. In 1858, nominated as the standard-bearer of the People's party, composed of Whigs and Republicans, Mr. Henry became a candidate for the mayoralty. Richard Vaux was the Democratic nominee. The election, as we have seen, in May, 1858, resulted in a victory for Mr. Henry, the vote being: Henry, 33,772; Vaux, 29,039. In 1860 he was again elected, defeating John Robbins, Jr., by the following vote: Henry, 36,658; Robbins, 35,776. In 1863 he defeated Daniel M. Fox, the vote being,—Henry, 37,249; Fox, 32,161. In 1866 he declined a renomination, taking the ground that it was wrong for one man to serve in such a position too many terms, and Morton McMichael succeeded him.

During the civil war, as we have seen, he managed the city affairs with consummate ability, and under his administration the efficiency of the police force was raised to a high standard, and the reserve corps, which had been organized under his prede-

cessor, Mayor Vaux, was made an effective arm of the service.

Mr. Henry at various times held the following additional public and semi-public positions. He was trustee of the University of Pennsylvania, member of the Park Commission, director of the Fidelity Insurance, Trust, and Safe Deposit Company, and of the Philadelphia Saving-Fund Society, and inspector of the Eastern Penitentiary, which latter office he had held at the time of his decease twenty-eight consecutive years.

As a member of the State Board of Centennial Supervisors, he was an active factor in the preparatory work of the great International Exhibition as chairman of the Executive Committee; and on May 29, 1874, upon the resignation of ex-Governor Bigler, to take a seat in the Centennial Board of Finance, Mr. Henry became president of the Board of Supervisors. In this latter position he labored with great vigor and efficiency, materially aiding to secure the distinguishing success which characterized the magnificent exposition, particularly so far as Pennsylvania's exhibits and interests were concerned.

The most recent mention of Mr. Henry's name in connection with a political office occurred during the memorable struggle for the United States senatorship, which terminated in the election of John I. Mitchell. Upon several occasions Mr. Henry received a number of complimentary votes.

About four years ago, Mr. Henry's son and only child died, and the shock greatly impaired the father's health. In the spring of 1883 he visited Europe, and remained there until late in the succeeding fall. He returned from abroad much benefited in health. On Nov. 28, 1883, however, within a month from the date of his return from his European trip, he became ill, and died early in the morning of December 6th, the immediate cause of death being typhoid pneumonia.

As a mark of respect to the memory of the deceased the flags on Independence Hall, the mayor's office, and a number of business establishments were placed at half-mast. Mayor King addressed a message to Councils, notifying them of the death of ex-Mayor Henry, and expressing his high appreciation of the character of the deceased. Resolutions of respect were passed by both chambers, and a joint committee was appointed to make arrangements for attending the funeral. The obsequies took place on the following Saturday at the late residence of the deceased, in Germantown, the interment being made in Laurel Hill Cemetery.

Mr. Henry was a man of sterling character, commanding the respect of his fellow-citizens, and the hearty affection of his numerous friends. In early life he was married to a daughter of Comegys Paul, who survives her husband.

—Rev. William Metcalfe, said to be the oldest ordained resident minister in Philadelphia, died October 16th.

—In the contested election case of Thompson *vs.* Ewing, for the office of sheriff, the judge delivered an opinion October 18th, giving the office to Mr. Thompson. Mr. Ewing obtained a writ of *certiorari* in the Supreme Court, and in the mean time retained his office. In accordance with the decision of the lower court, Governor Curtin issued a commission to John Thompson, which was read, October 22d, in the Court of Quarter Sessions, and Mr. Thompson took the oath of office the same day. Mr. Ewing declined to give him possession of the sheriff's office until the case should have been decided by the Supreme Court, and applied to that court for an injunction to restrain Mr. Thompson from taking possession. The judges not having time to hear the case, the proceedings ceased by mutual consent to allow the case to be heard on the writ of *certiorari*.

—A new military hospital, capable of accommodating about one hundred and fifty patients, was opened at Twelfth and Buttonwood Streets on October 22d. A flag-raising was held, and the hospital was dedicated with appropriate ceremonies.

—Camp Philadelphia, near Haddonfield, was selected as the mustering ground for the drafted men of Pennsylvania's quota, and on October 25th one hundred and fifty men from Bucks County went into camp there. The camp comprised thirty acres, which was afterward increased to seventy, and was very beautifully situated. By the end of the month there were nearly seven thousand men in camp, Col. McClure's regiment of volunteers being encamped on a portion of the ground. The camp was a favorite resort for Philadelphians.

—The Democrats held a jubilee in Independence Square over their recent victories in Pennsylvania, Ohio, and Indiana on October 30th. Charles J. Ingersoll was present, and addresses were made by Francis Hughes, Robert E. Monaghan, of Chester, and John O'Byrne and Samuel J. Randall, of Philadelphia.

—The commissioners for supervising the draft held a meeting on the 2d of November, at which it was decided that under the law Philadelphia's quota had been filled by voluntary enlistments, and that consequently no draft was necessary at this time. This result was received with much satisfaction by every one.

—On November 7th, Commodore Pendergrast, commandant of the navy-yard, died, aged sixty-two. He had been in the United States navy nearly fifty years. His funeral occurred on the 10th, and was attended by all the officers of the navy in port and a company of marines. The pall-bearers were Commander Ramman, Maj. Zeilin, and Capts. Adams, Ingle, and Rolando.

—The announcement, on the 9th of November, of the removal of Gen. George B. McClellan from the command of the Army of the Potomac created great excitement, which in the evening centred at the

Continental Hotel, where it was expected the general would arrive. It caused almost universal dissatisfaction even among those who had been considered his opponents. Newspaper comments at the time were cautious, on account of the strict censorship exercised by the government. On successive days large crowds gathered about the railroad stations when it was rumored that he was to arrive in Philadelphia, but on both days met with disappointment. Resolutions complimentary to his services were passed by Councils, and by a meeting of non-commissioned officers and privates of veteran regiments in Philadelphia.

—The fly-wheel of the large engine at the rolling-mill of William Rowland & Co., on Frankford Creek, burst November 10th, wrecking the building and killing Samuel Hamilton, an employé.

—By general agreement among the various street railways the fare was raised to six cents. It had previously been five, but the cost of materials required by them had so increased, on account of the war, as to justify this increase in fare.

—Rear-Admiral Elie A. F. Lavalette died November 18th, in his seventy-third year. He had joined the United States navy in 1812, and had consequently been in active service over fifty years. His funeral took place on the 22d.

—Brig.-Gen. Frank E. Patterson, son of Maj.-Gen. Patterson, died in camp at Fairfax Court-House November 21st, and his body was removed to Philadelphia. He was a brave and accomplished officer, had served with the United States army in the Mexican war, and was one of the first to take to Washington the regiment he then commanded. His funeral took place on the 26th, and was attended by the First Regiment Infantry Reserve Brigade, two companies of the One Hundred and Fifty-seventh Regiment Pennsylvania Volunteers, the Washington Grays, a battery of two guns, Home Guard Artillery, the First City Troop, and convalescent soldiers. Many officers of the army and navy also accompanied the funeral.

—The Supreme Court of Pennsylvania quashed the writ of *certiorari*, and dissolved the injunction in the case of Thompson vs. Ewing for sheriff of Philadelphia on November 25th, thus affirming the decision of the lower court, and giving the office to Mr. Thompson.

—The One Hundred and Seventy-fourth Pennsylvania Regiment, Col. John Nyce, left Camp Philadelphia for Washington November 27th. It was followed by the One Hundred and Seventy-fifth and the One Hundred and Seventy-sixth on the following day.

—Capt. Benjamin Snell, the oldest shipmaster in Philadelphia, died November 29th, in his eighty-sixth year.

—On December 5th the wall of the North Broad Street Presbyterian Church fell while masons were at

work upon it, killing Jeremiah Burke, and injuring Thomas Mackney.

—The Corn Exchange Association held a [1862 meeting on December 8th, to devise measures to raise funds to relieve the suffering poor of Lancashire and other manufacturing districts of England. The destitution there was frightful, on account of the shutting down of the cotton-mills, caused by the American war. A subscription-list, which was started, received fourteen thousand dollars before the meeting adjourned. It was concluded to send, in conjunction with the cities of Boston and New York, a ship-load of provisions to be distributed among the poor.

—The United States sloop-of-war "Shenandoah" was launched at the navy-yard December 8th. She was two hundred and forty-three and one-half feet over all, thirty-eight feet four inches beam, and seventeen feet depth of hold.

—On three successive days, December 12th, 13th, and 14th, a total of fifteen hundred sick and wounded soldiers arrived.

—The strict government censorship over the news caused so little to be known concerning the battle of Fredericksburg that the wildest rumors circulated on December 14th. The excitement was intense as the news became gradually known of that disastrous battle. Col. Dennis Heenan, Lieut.-Col. St. Clair, A. Mulholland, and Lieut. S. G. Willauer, of the One Hundred and Sixteenth Regiment, who had all been wounded in the battle, arrived on the 16th, and brought partial tidings of the Philadelphia soldiers. Five hundred and twenty-five sick and wounded arrived on that day, followed by a large number on the 18th, and eight hundred and fifty on the 20th. As the Philadelphia hospitals were now crowded, all but thirty of this last detachment continued their journey to New York.

—The steamer "Niagara," with five companies of the Fiftieth Massachusetts Regiment, forming a portion of the so-called "Banks expedition," arrived in Philadelphia December 16th. The officers stated that the steamer which had been purchased by the government was in a totally unseaworthy condition. In spite of perfectly calm weather, it was so leaky that they put into the Delaware breakwater, where a slight breeze damaged her upper works and compelled her to come to Philadelphia. Her timbers were entirely rotten, and her upper works excessively frail. The United States inspector condemned her on the following day, and the men were given temporary quarters at the Cooper-Shop Refreshment Saloon.

—On December 23d over three hundred wounded soldiers arrived. On the following day one of the new monitors, which had been built at Wilmington, arrived at the navy-yard to take in stores; and her appearance caused much curiosity.

—On the 30th of December, James Coxe, for nineteen years president of the Lehigh Navigation Company, died.

—Schofield's large woolen-mill, on Willow below Thirteenth Street, was destroyed by fire on the last day of the year, causing a loss of eighteen thousand dollars. Mrs. McCauley was burned to death.

1863] —On the organization of Councils, Jan.

5th, both political parties claimed a majority. In Select Councils the Democrats, with the assistance of Mr. Brightly, elected the president, Mr. Lynd (Brightly's candidate), and officers after a prolonged dead-lock. In Common Council each political party organized, both claiming a quorum, and electing officers. Both these bodies sent messengers to the mayor, but he refused to recognize either of them on the ground that some of the seats in each of these bodies were contested, and that omitting these neither of them had a quorum of members. It is unnecessary to attempt to unravel the legal complication to which this action of the Councils gave rise. For several days both parties met at the same hour, and a ridiculous farce of two presidents and two bodies, both claiming to pass resolutions and appoint committees, was indulged in. By the decision of the court the matter was finally adjusted, and Mr. Kerr (Democrat) elected president.

—An explosion occurred at the Bridesburg arsenal, on January 7th, by which eleven men were seriously burned.

—The body of Maj. Thomas Hawkworth of the Sixty-eighth Regiment, who died on the 6th from the effects of wounds received at Fredericksburg, lay in state at Independence Hall. He was buried on the 11th with military honors.

—On January 10th Col. C. Buchanan Cross, whose bold attempt to escape from the penitentiary has already been described, applied to the courts for a discharge on the ground that the Governor's pardon was legal, although issued on fraudulent grounds, and that therefore his detention was illegal. The pardon, however, had never been delivered, and was recalled by the Governor. The court held the matter under advisement, but finally refused the application.

—A bold robbery of five thousand dollars in gold was perpetrated by a beggar at the office of Jay Cooke & Co., bankers, on the 19th of January. The thief was captured the same day, and all but one hundred and sixty dollars recovered.

—The new Chestnut Street Theatre, on Chestnut Street near Twelfth, was opened for the first time on the evening of January 26th. Edwin Forrest played "Virginius," with McCullough as "Icilius." The house was crowded, the manager having received over eight thousand dollars in premiums for reserved seats.

—On January 28th the provost-general caused the arrest of Albert D. Boileau, publisher and editor of the *Evening Journal*, and took him to Fort McHenry, Baltimore, where he was confined. The provost guard seized the office, and the afternoon edition of the paper was suppressed. On the following day Judge

Ludlow charged the grand jury concerning the "abduction," directing them to make inquiry as to the cause and legality of the arrest. The grand jury summoned the provost, Gen. Montgomery, and his marshals, who made the arrest, and other witnesses. On January 30th they made a special presentment detailing all the particulars of the affair. By this it appeared that the *Evening Journal* had been suppressed and its editor arrested by command of Maj.-Gen. Schenck, transmitted to Provost-Gen. Montgomery, and executed by Howard Livingstone, and to Gen. Montgomery and Lieut. Michael Coster, of the provost guard, on account of an editorial headed "Davis' Message." This editorial, it was alleged, was highly eulogistic of the Confederate President's message to the Confederate Congress as well as of Davis himself, and drew unfavorable comparisons to President Lincoln. Judge Ludlow directed the district attorney to examine the presentment and frame such bills of indictment as he might find necessary to prevent infraction of the laws of Pennsylvania and of the Constitution of the United States. On the following day Judge Allison, in charging the grand jury of the February term, reviewed Judge Ludlow's actions, which he described as surpassing his powers. He did not touch upon the merits of the original charge, but held that Judge Ludlow had no power to charge the grand jury to examine into a matter not brought before its notice by a regular channel. He therefore directed the grand jury to ignore all bills of indictment concerning the case. On the 1st of February, however, Mr. Boileau wrote an apologetic letter promising to conduct his paper more moderately in the future, and was thereupon released.

—Hon. Hopewell Hepburn, for many years associate judge of the District Court at Pittsburgh, died February 14th. After retiring from the bench he practiced law up to the time of his death.

—Washington's birthday was celebrated on Monday, February 23d, with appropriate ceremonies. The new post-office building, on Chestnut Street below Fifth, was opened on that day for public inspection, and taken possession of by the post-office authorities. There were present Postmaster-General Blair, Governor Curtin, Mayor Henry, Justices Strong, Read, and Thompson, members of the Corn Exchange, and others. A. J. Cattell, of the Corn Exchange, presided. Mr. Blair made an address on receiving the building, and was answered by Mr. Cattell, who returned the thanks of the city to the Post-Office Department for the improvement. Late in the afternoon a banquet was given at the Girard House. The post-office was opened for the transaction of business on the 27th, and was the first owned by the United States in the city, the department having previously rented apartments in the Exchange building and elsewhere. It was a brick building faced with marble, and continued in use until 1884, when

the building at Ninth and Chestnut being finished, it was taken possession of.

—On the 27th of February Dr. R. Bournonville, a native of Lyons, France, but for thirty-five years a resident and practitioner of the city, died at an advanced age.

—Congressmen Vallandigham and Pendleton, of Ohio, arrived March 6th, and were serenaded at the Girard House. Mr. Vallandigham attempted to deliver a speech in support of his opinions concerning arbitration and peace, but was very frequently interrupted by the mixed political character of his audience.

—On the 7th an important seizure of contraband goods was made by the chief of police, at the Adams Express Company's office.

—The National Union Club of Philadelphia was organized March 11th, and the event was made the occasion of a grand Union festival. Governor Curtin presided, and many prominent men were present. Addresses were made by Governor Curtin, Senator Doolittle, of Wisconsin, H. B. Wright, B. H. Brewster, and Governor Andrew Johnson, of Tennessee.

—On March 14th, Charles J. Ingersoll delivered the first of a series of lectures on politics before the Democratic Club, on the subject of "State Rights."

—A boiler in the forge-shop of the boiler-works of Richard Norris & Sons exploded March 16th, killing William Rodgers, the engineer.

—The chief of police, Benjamin Franklin, sent to Fort Delaware W. Crawford, on the 1st of April, charged with attempting to smuggle contraband goods into the rebellious States. Four cases were captured at the Adams Express office filled with contraband articles.

—A "signal-train" of six cars, fitted up with the newest telegraphic instruments and apparatus for signaling, which had been built in Philadelphia, was dispatched to Gen. Rosecrans on the 8th.

—On the 9th of April, Philip Huber, Augustus F. Illig, Gabriel Filbert, and Harrison Oxensider were brought before the United States Commissioner on complaint of William Y. Lyons, charged with belonging to a secret organization for the purpose of opposing the government of the United States. All the parties were well known in and about Reading, Pa., where the alleged meeting was said to have occurred. The testimony elicited was very doubtful as to the intent of the organization, and after a prolonged examination all but Huber were released. The trial excited a great deal of bitter feeling and much excitement.

—The new Ericsson monitor built at Chester made her trial trip the following day, and returned for her stores.

—A fire at Allison & Murphy's car-factory, at Nineteenth and Market Streets, May 2d, resulted in a loss of one hundred thousand dollars.

—Mr. Cyrus W. Field arrived, and addressed a

meeting of prominent citizens at the Board of Trade rooms, May 11th, on the feasibility and advantages of an Atlantic cable. He was listened to with much interest, and a committee appointed to aid the project. [1863

—The United States transport steamer "Wyalusing" was launched from Cramp's ship-yard May 12th. On the 16th the United States gun-boat "Pontiac" was launched at the yard of Birely, Hillman & Co.

—On the 1st of June the Democrats held a mass-meeting in Independence Square to protest against the violation of the Constitution witnessed by the arrest and court-martialing of Mr. Vallandigham, of Ohio, on the charge of "implied treason." The assembly is reported as one of the largest ever seen in that inclosure. Ellis Lewis was elected chairman. The speeches were very bitter, and the resolutions denounced the arrest as a violation of the Constitution. They declared, however, the proper and legal remedy to be in an appeal to the ballot-box, and deprecated any violence or appeal to force of arms as likely to do more harm than good. Col. Charles J. Biddle declared the arrest to be on a charge, the trial by a tribunal, and the verdict of a character never before known to the laws of the United States. Among the speakers were ex-Governor William Bigler, Col. Charles J. Biddle, Peter McCall, George W. Biddle, and Charles Buckwalter. The meeting was undisturbed, but some slight disturbance occurred after it adjourned.

—Col. J. Richter Jones, Fifty-eighth Pennsylvania Regiment, was buried June 3d, after lying in state in Independence Hall, with appropriate military ceremonies. The First Regiment Reserve Brigade, Companies A, C, and D of the First Regiment Artillery, the Philadelphia Home Guard, the Provost Guard, the Invalid Corps, and a squadron of Connecticut Cavalry served as an escort.

—On June 3d the great grain-elevator of the Pennsylvania Railroad Company at the foot of Washington Avenue was put in operation for the first time.

—F. M. Drexel, the founder of the great banking-house, was run over June 5th by the cars on the Reading Railroad, and died the same day.

—What was described as the longest train of passenger cars that ever entered the city arrived June 9th with two thousand four hundred Confederate prisoners; seven hundred and sixty-six more arrived on the 14th under proper guard. The prisoners were conveyed to Fort Delaware by steamer.

—The Democrats of Ohio had nominated Vallandigham for Governor in the ensuing election, and this news, which was published on the 12th, created much excitement in Philadelphia, as it was regarded by some as a direct assault upon the United States government which had sentenced him to exile, and by others as a courageous vindication of the rights of free speech to which he was held to be a martyr. The *Public Ledger*, commenting on this "martyr-

dom," says, "It was a great political blunder such as a military man might commit heedlessly, but into which a shrewd politician ought not
1863] to have fallen; to raise a new popular issue when the administration had possession of the popular feeling, and one so repugnant to the feeling of a free people as the suppression, by military authority, of free speech and trial by jury for offenses against the civil law." The issue was fortunately shifted to the support or opposition to the general government in the prosecution of the war. Vallandigham was badly defeated, and thus a most unfortunate complication which might have involved the whole country was prevented from interfering with the question of the day.

—The news that Lee was advancing into Maryland arrived simultaneously with the proclamation of President Lincoln calling for one hundred thousand men, and apportioning fifty thousand as Pennsylvania's quota, and created intense excitement. Governor Curtin issued a proclamation June 15th calling for fifty thousand volunteers for six months, which was afterward modified to a call for volunteers for the emergency. A special meeting of Councils was called, and they immediately passed a resolution granting five hundred thousand dollars to be used by the mayor, with the assistance of the Committee of Defense and Protection, to defend the State, and asking the Governor to proclaim martial law. The mayor issued a proclamation calling upon business men to close their places of business, and with their employes to connect themselves with the various military organizations. At three P.M., on the receipt of urgent telegrams from Governor Curtin, the State-House bell rang out a general alarm. In a very few minutes Chestnut Street was packed with an excited crowd, centring at the State-House. The courts were adjourned, business places deserted, and every one crowded to the State-House. Such a scene of apprehension and alarm was never before witnessed in the city. An impromptu meeting was at once organized, and from a table on the State-House pavement the crowd were addressed and the situation explained to them by Col. Small, William B. Mann, Col. Neff, and others. Minute-men were called for, and the transportation to Harrisburg of those willing to go was commenced at once and continued through the night. News was received during the progress of the meeting that two of the New Jersey regiments, which had just returned home, had re-enlisted for the emergency and were on their way. At eight P.M. the Seventh New York Regiment arrived from New York on their way to Harrisburg. The excitement on the following day was unabated, and the news was scarcely less alarming. By the 18th the excitement had in a measure subsided, but the recruiting of minute-men continued. From that time until the battle of Gettysburg it is impossible to describe the state of anxiety that existed. The fact that the Confederates were on Pennsylvania

soil and actually threatening the State capital, that the Army of the Potomac was far away in Virginia, that neither natural ramparts nor any considerable or veteran forces existed between the Confederates and our city, conspired to produce a feeling of depression and alarm scarcely to be conceived. The optimist, who hoped that the Confederate advance was not so serious as it was made to appear, was confronted everywhere with tangible signs of the gravity of the situation. One of the curious sights which confounded the hopeful man was the appearance of a tremendous concentration of the rolling-stock of the Pennsylvania Railroad, which was hurried from the West to Philadelphia as rapidly as possible.

In the mean time the passage of troops homeward from the seat of war continued. Some effort was made to detain them, but it succeeded only in a few cases. The Fifteenth New York and the Thirtieth and Thirty-first New Jersey passed through on the 17th, the Sixty-ninth, Seventy-eighth, and Fifty-second New York on the 23d, the Sixth and the Thirteenth New York on the 24th, and the Fifty-fifth New York on the 25th. Two regiments, the Twenty-second and Twenty-third New Jersey, and the Seventh New York went at once to Harrisburg.

As the Confederate approach became more and more imminent, the mayor issued a proclamation on the 29th of June for all citizens not able to leave the city to enroll themselves for home defense. The famous "fortifications," which served so long not for the defense but for the ridicule of the city, were commenced on the northern and western approaches. Maj.-Gen. N. J. T. Dana was appointed to take charge of the defenses and to organize the Home Guard. By the 1st of July all the principal places of business were closed, and the preparation for the defense and protection of the city was the only business of the hour. Governor Curtin arrived on the 1st to stimulate the citizens to renewed exertion, and made perhaps the most stirring appeal uttered during the war from the balcony of the Continental Hotel. His entreaty was not unsuccessful, as over five thousand men enlisted for the emergency on that day.

The rumors of the great battle of Gettysburg began slowly to arrive, and their contradictory and uncertain character roused excitement and alarm to a pitch never before seen. The 4th of July passed in gloomy uncertainty, the wildest rumors prevailing. Of course there could be no public celebration of that usually joyous anniversary. Only enrollment and enlistment continued, and now and then a fresh bulletin from the very unreliable "reliable correspondent" from the seat of war. Indeed, these bulletins were most depressing, for they began to tell now of the particulars of Reynolds' repulse on the first day of the battle. But on the 5th of July the news of the retreat of Lee's army was made certain by the official dispatches of Gen. Meade, and by the arrival of many of the wounded from the battlefield. The relief from the suspense now gave rise

to feelings of thankfulness mingled with great anxiety for the safety of the Philadelphia soldiers engaged in that great struggle. On the 5th Maj.-Gen. W. S. Hancock arrived, having been wounded in the leg, and with him five hundred wounded soldiers. They were followed on the 6th by another detachment of five hundred, and the wounded continued to arrive daily in great numbers for nearly a week. On the 9th over two thousand arrived, and on the 12th eight hundred more.

On the 7th came the news of the fall of Vicksburg, and caused a revival of the excitement and joy. At two o'clock the State-House bell rang out merrily, cannon were fired, and the steam whistles and hose-carriage bells combined to express the people's joy at this additional victory. An immense crowd surged before Independence Hall cheering and rejoicing. The remainder of the day was given up to holiday rejoicing. The *Public Ledger* of the 8th says, "Never since the commencement of the Rebellion were the people of Philadelphia so excited and filled with joy as yesterday on the receipt of Admiral Porter's official announcement of the surrender of Vicksburg. The news following so soon on the brilliant victory of Gen. Meade electrified everybody. In addition to the spontaneous celebration at the State-House, at two o'clock, when the bells were rung and the cannon fired, there were exhibitions of the joy of the people all over the city, the news having spread with wonderful rapidity." At five o'clock occurred a most interesting ceremony. About five hundred members of the Union League assembled at their headquarters, and, headed by Birgfeld's band, marched to Independence Square. A large crowd were soon attracted, and the Rev. Dr. Boardman invoked the blessing of Almighty God, and recognized His hand in the recent glorious victories. Charles Gibbons followed with a patriotic address. At the conclusion of Mr. Gibbons' speech the band, which had been stationed in the steeple, gave "Old Hundred," and the enormous crowd joined in singing it, producing a most impressive effect. Rev. Kingston Goddard dismissed the people with a benediction. In the evening a number of establishments were illuminated.

—On the 9th the President issued a proclamation for a draft of three hundred thousand men to serve for three years. On the 15th the draft, under the President's proclamation, commenced in the Fourteenth Ward. A great deal of interest was excited, but there was no trouble of any kind. The drawing was made in the open air at Broad and Spring Garden Streets, and was finished in about three hours. The draft continued daily, until August 5th, in the various wards of the city, and was never interrupted by the slightest disturbance. Occasionally incidents would occur to cause considerable merriment, as when, as occurred in one case, the drawer unfolded his own name.

—The emergency troops from New Jersey and New

York commenced to pass through the city for their homes on July 16th. Some had been called on by the government to suppress the draft riots in New York City on July 11th. These with [1863 Philadelphia troops and others from Washington whose terms of service had expired, filled the city with soldiers for several days. On the 18th the Forty-sixth Pennsylvania, the Tenth New Jersey, and the One Hundred and Sixty-ninth Pennsylvania arrived. On the 19th the Forty-sixth and Forty-seventh, and the Twenty-second New York, and the Fifty-first Massachusetts, and Fourteenth Vermont Regiments passed through. On the 20th the Forty-third and Forty-sixth Massachusetts and the Sixth New York, and on the 22d the Sixty-ninth New York followed them.

—Col. William B. Thomas' regiment, with the Gray Reserves and the Blue Reserves, which had all enlisted for the emergency, returned to the city on the 27th, and were enthusiastically received. Stands of regimental and national colors were presented to each of the last-named regiments in Independence Square, with appropriate addresses and ceremonies.

—On August 1st the One Hundred and Seventy-fifth Pennsylvania, the Fifth Wisconsin, the Twentieth Indiana, and the One Hundred and Seventy-fourth Pennsylvania arrived, and all but the last regiment passed through for their homes. It was impossible to procure railroad accommodation for the last regiment, and it remained at the Volunteer Refreshment Saloon until the following day.

—The Cathedral of St. Peter and St. Paul was opened for public inspection on August 6th, and Bishop Wood made an address to the visitors, numbering about two thousand. The cathedral was unfinished, but it presented a most imposing appearance.

—On the 9th of August, William Wright, for many years a member of the firm of Wright & Hunter, and the president of the West Philadelphia Passenger Railway, died.

—The Keystone Battery returned to the city on the 14th, followed a week later by the Second Keystone Battery.

—A collision occurred at Frankford road and York Street between a train on the Philadelphia and Trenton Railroad and a Second Street Railway car on the 9th, by which A. J. Clay was killed and several persons injured.

—The German Volksfest was held at Washington Retreat on August 24th, and was the largest for many years.

—On August 27th a conflict occurred between some of the conscripts at Camp Philadelphia and some of the neighboring farmers, on whose lands they had been trespassing. One of the farmers, William Baines, was shot and instantly killed.

—In a suit brought to claim exemption from the draft, Judge Cadwalader, in the United States Dis-

strict Court, affirmed on September 9th the constitutionality of the conscription act.

—A destructive fire broke out in the store-
1863] houses at the navy-yard on the 13th, which destroyed one hundred thousand dollars of government property.

—The President had issued a proclamation suspending the operation of the *habeas corpus* law in the case of all drafted men. In a case brought before the United States District Court, on September 18th, Judge Cadwalader affirmed its constitutionality, and its application to all drafted men, even though not yet summoned by the provost marshal.

—Francis J. Grund, a well-known journalist and politician, died suddenly on the evening of September 29th. Mr. Grund had been the editor of the *Age*, a Democratic paper, but on account of not agreeing with the publishers in politics, resigned. Mr. Grund was a highly educated man, was our representative in Havre and Antwerp for many years, and was universally respected.

—The rebel ram "Atlanta" and her captor, the steam-frigate "Powhatan," Capt. Steadman, arrived at the navy-yard October 2d.

—The State election held in October was for State senator, representatives, mayor and city officers, and councilmen. The contest was altogether on national issues, and was marked by some curious features. Bishop Hopkins, of Vermont, had in 1861 issued an address in favor of the right of slavery. This document was circulated in pamphlet form as a "campaign document" by the Democrats, and called forth a protest signed by Bishop Potter, of Pennsylvania, and about thirty Philadelphia clergymen. This in turn called forth a response from Bishop Hopkins, and all were utilized by the respective party leaders.

—On the 10th of October, Governor Curtin arrived, and was escorted by about fifteen hundred horsemen and two thousand foot of the Union League from the railroad depot to Independence Square, where he made an address. After the meeting the League made a torchlight procession, ending in a display of fire-works at Penn Square.

—The election on the 13th was comparatively quiet, although there were many arrests. The city gave a larger majority than ever to all the Union candidates except in a few wards, the majorities ranging from 6000 to 7200. The Unionists had a majority in both branches of Councils, and elected the State senator and thirteen out of the seventeen representatives.

—Dummy-engines commenced to run for the first time on November 7th from Berks Street to Frankford. They proved very satisfactory.

—On November 11th the Supreme Court rendered a decision in the case of three drafted men, who had prayed for an injunction to prevent the provost marshal and the draft commissioners from taking them to the army, on the ground that the conscription act

was unconstitutional. The decision was rendered on four points, and affirmed,—

1st. That the power of Congress to raise and support armies does not include the power to draft the militia of the States.

2d. That the power of Congress to call out the militia cannot be exercised in the form of this enactment.

3d. That a citizen of Pennsylvania cannot be subjected to the rules and articles of war until he is in actual military service.

4th. That he is not placed in such actual service when his name has been drawn from the wheel and ten days' notice thereof has been served upon him.

Chief Justice Woodward's decision continues: "The Constitution of the United States defines how the militia is to be called forth to repress insurrection and to repel invasion, and requires that they shall be officered by the respective States. The act of Congress does not call forth the militia under the above provision, but drafts them into the military service of the United States. . . . When a State is called upon for its quota of militia it may determine by lot who of the whole number of enrolled militia shall answer the call, and thus State drafts are quite regular, but a Congressional draft to *suppress insurrection* is an innovation that has no warrant in the history or text of the Constitution. Either such a law or the Constitution must be set aside. They cannot stand together."

Justices Woodward, Lowrie, and Thompson affirmed the decision, Justices Read and Strong dissenting. It was expected that the case would be appealed to the Supreme Court of the United States, but such was not its termination.

—November 19th was observed as a fast-day on account of the dedication of the National Cemetery at Gettysburg. The flags were half-masted throughout the city, and very many citizens were present at the ceremonies.

—Thanksgiving-day was celebrated with more than usual joy on account of the fall of Chattanooga, which was announced on that day.

—The President's message, which was received on the 10th, occasioned a good deal of comment, especially the clause referring to the manner of reconstruction to be allowed in the rebellious States.

—The Twenty-ninth Regiment Pennsylvania Volunteers returned home December 23d on thirty days' furlough, having re-enlisted for three years. Their reception was most enthusiastic. They were escorted to the National Guards' Hall and given a collation before being dismissed.

—On the same day the western end of Gray's Ferry bridge was destroyed by fire. The loss was about five thousand dollars.

—On December 30th, Townsend Sharpless, a well-known and much-respected member of the Society of Friends, died, aged seventy-one years. He was the

founder of the firm of Sharpless & Sons, and a director of the Apprentices' Library Company.

1864.—The Sixty-seventh New York Regiment arrived on its way home on the 5th of January, and was escorted to the Refreshment Saloon by the Twenty-ninth Pennsylvania Regiment, Col. McLean, and Birgfeld's band. On the 8th the Ninety-first Pennsylvania, which had re-enlisted and returned on furlough, arrived. The military of the city served as escort, and the reception was very hearty. They were followed by Col. Geary's old regiment, the Twenty-eighth, which had also re-enlisted, on the 10th. Owing to a misunderstanding, no formal reception was given them, but an immense crowd welcomed them home.

—On the 12th of January, Gen. Meade, who was on a visit to the city, was serenaded, and responded in a brief speech. Admiral Dupont, who was with him, refused to speak, saying he was a man of action rather than words.

—A destructive fire occurred on January 14th, which totally destroyed the New Market drug-mill, belonging to N. S. Thomas, at Germantown road and New Market Street. The loss was over fifty thousand dollars.

—A meeting of merchants and manufacturers was held on January 15th to consider the subject of a transatlantic steamship line between Philadelphia and Liverpool. The Pennsylvania Railroad promised to give wharfage and accommodations free if five hundred thousand dollars were subscribed to the project, and to enter into a mutual arrangement with the steamship company in regard to carrying passengers and freight. A resolution was adopted accepting the proposition of the railroad company, and to appoint a committee to solicit subscriptions to the desired amount. One hundred and one thousand dollars was subscribed on the spot.

—On Dec. 30, 1863, a motion had been made before the Supreme Court to dissolve the injunction placed by the court on the draft commissioners in November. The draft commissioners were represented by Judge Knox, who argued for the constitutionality of the conscription act. In the mean time Justice Lowrie had resigned, and his place was filled by Justice Agnew. On January 16th the court rendered its decision dissolving the injunction and affirming the constitutionality of the law. Each of the judges delivered an opinion, Justices Strong, Agnew, and Read in the affirmative, Justices Woodward and Thompson dissenting. Judge Agnew, reviewing the constitutionality of the law, held "that these United States are a nation and sovereign in the powers granted them. They possess all the functions of a nation in the law-making, executing, and judging powers. A nation carries with it the inherent power to carry on war. The power to declare war necessarily carries with it the power to carry it on, and this implies the means. The right to the means carries [with it] all

the means in the possession of the nation. But the power to carry on war and to call the requisite force into service inherently carries with it the power to coerce or draft. A nation with- [1864] out the power to draw forces into the field, in fact, would not possess the power to carry on war. The power of war without the essential means is really no power,—it is a solecism. Voluntary enlistment is founded on a contract. A power to command differs essentially from a power to contract. The former flows from authority, the latter from assent. The power to command implies a duty to obey, but the essential element of a contract is freedom of assent or dissent. It is clear, therefore, that the power to make war without the power to command troops into the field is impotent; in point of fact, [it] is no governmental power, because it lacks the authority to execute itself."

Chief Justice Woodward, in his decision, reiterated his views as to the unconstitutionality of the law as given in his previous decision, and also reviewed the legal points in reopening a case without further testimony before a court which had already adjudicated concerning it.

—The Eighth Regiment Colored Volunteers left the city January 16th for the seat of war.

—The Seventy-fifth Regiment returned from the West on the 24th, and was given a reception at the Turner Hall, on Third Street. It was followed on the 26th by the Seventy-third Regiment, which had re-enlisted. At the reception given them at Turner Hall they were formally welcomed by Dr. Uhler, of Select Council. The Curtin Light Guards, One Hundred and Ninth Pennsylvania Regiment, returned on the 30th, and on the 4th of February the Ninety-eighth Regiment, Col. John F. Ballier, reached the city. Both these regiments had re-enlisted, and had returned to recruit. Col. Ballier's regiment was composed of Germans, and their reception in the Northern Liberties was very enthusiastic.

—On the 1st of February, President Lincoln issued a proclamation increasing the draft ordered in July to five hundred thousand men. By this order Philadelphia's quota was over thirteen thousand. Vigorous efforts were made by citizens in the various wards to raise this number by volunteering, and with considerable success.

—A public reception was given to Maj.-Gen. Meade by the Councils of the city on February 9th. He was welcomed by Mayor Henry in a suitable address, to which the general briefly responded. Many thousands pressed to see him, but his health being still delicate, it was necessary to bring the ceremonies to a conclusion.

George Gordon Meade, descended from an old Philadelphia family, was, by his military education, almost a stranger in Philadelphia until after the civil war had demonstrated his remarkable ability in the line of his profession. His father, Richard W. Meade,

was American consul and navy agent at Cadiz, in Spain, and there George was born on Dec. 31, 1815.

After the return of his parents to Philadelphia, he was sent to a school in Georgetown,

1864: D. C., then taught by Hon. S. P. Chase, afterward chief justice of the United States. He was afterward a student at Mount Airy military academy near Philadelphia, and in 1831 entered the United States Military Academy at West Point, where he graduated on July 1, 1835. He entered the army as brevet second lieutenant in the Third Artillery, and served in the Seminole war in Florida. He was promoted to a full lieutenant at the end of a year. During the service his health became seriously impaired, and on Oct. 26, 1836, he resigned his commission in the army. After his recovery he went into the civil service of the government as engineer, surveying the Mississippi Delta, the Texas boundary, and the northeastern boundary of the United States, in 1837 and 1838. On May 19, 1842, he re-entered the army as second lieutenant of topographical engineers, and was employed in the great survey from Lake Superior to the Gulf of Mexico. When the Mexican war broke out he was on the staff of Gen. Taylor, in Texas, and participated in the earlier battles of that war, and distinguished himself in the actions of Palo Alto, Resaca de la Palma, and Monterey. He afterward served on the staff of Gen. Scott. For his gallant services at Monterey the government promoted him to the brevet rank of first lieutenant, dating from Sept. 23, 1846, and upon his return home the citizens of Philadelphia presented him with a fine sword. After the war he was engaged as an engineer on several public works, always using much skill and judgment. On Aug. 4, 1851, he was made first lieutenant, and May 19, 1856, promoted captain for fourteen years' continuous service.

At the time hostilities commenced Capt. Meade was in charge of the surveys of the Great Lakes, with headquarters at Detroit, Mich., and was immediately ordered to Washington. On August 31, 1861, he was commissioned a brigadier-general of volunteers, and took command of the Second Brigade of the Pennsylvania Reserve Volunteer Corps. His life then became one of incessant activity and most

valuable service until the end of the war. In the battles of the Virginia Peninsula, in June, 1862, he was conspicuous, and was severely wounded at Glendale, June 30th. At the terrible battle of Antietam, on September 17th, he commanded Gen. Hooker's corps of the Army of the Potomac. On November 29th of that year he was commissioned a major-general of volunteers. He was active in the campaign in Virginia late in the year, and in the battles at Fredericksburg and Chancellorsville he commanded the Fifth Corps. At Frederick, Md., on the 28th of June, 1863, when the Union army was falling back before the advance of Gen. Lee, he was placed at the head of the Army of the Potomac, and three days thereafter the great battle of Gettysburg opened, which

he gained, and turned the tide of war in favor of the Union. On June 18, 1862, he was promoted to major of the United States army, and on July 3, 1863, to brigadier-general, and on Aug. 18, 1864, to major-general.

He continued in command of the Army of the Potomac after April, 1864, under direction of Gen. Grant as commander-in-chief of the armies, until the close of the war, showing great skill and courage in the battles from the sanguinary one in the Wilderness until the surrender of Gen. Lee, April 9, 1865.

After the close of the war he was assigned to the command of the Military Division of the Atlantic; but in 1868 he was transferred to that of the Third Military District, comprising Georgia, Florida, and Ala-

bama. In the following year he returned to the command of the Atlantic Division, with headquarters at Philadelphia. He then lived in a house on Delancey Place, presented to his wife—a daughter of Hon. John Sergeant—by his fellow-citizens, in grateful recognition of his eminent ability and services devoted to the welfare of his country.

For several years before his death, which occurred on Wednesday evening, Nov. 6, 1872, he was an efficient commissioner of Fairmount Park. The funeral took place at St. Mark's Protestant Episcopal Church on Monday, the 11th of November. The public and private honors paid to the remains of the deceased were most conspicuous. General-in-chief William T. Sherman officially announced his

Gen. G. Meade

death to the army, and directed Gen. McDowell to make arrangements for his funeral at the public expense, consulting Mrs. Meade in everything, "whose wishes," Sherman said, "shall be sacred." All business in the city was suspended. There was an immense military and civic procession. The President of the United States, with several of his cabinet ministers, were present, so also was the Governor of Pennsylvania and his staff, the mayor and Councils of the city, and a very large number of army officers and distinguished citizens. The pall-bearers were Lieut.-Gen. Sheridan, Maj.-Gens. Humphreys, Parke, and Wright, of the army, and Rear-Admirals Turner and Lardner, and Commodores Scott and Mullaney, of the navy. The pastor of General Meade (Rev. Dr. Hoffman) officiated. Bishops Whipple, Odenheimer, and Stevens, and about twenty local clergymen were present, and a funeral dirge was played by bands of musicians. The body was deposited in Laurel Hill Cemetery.

—The captured rebel ram "Atlanta," which had arrived October 2d, having been fitted up at the navy-yard, sailed February 11th as the United States gun-boat "Atlanta."

—On the 12th the Ninety-ninth Regiment, Col. Leidy, and the Eighty-eighth, Col. Wagner, arrived, and were given a cordial welcome.

—The Committee on Naval Affairs of the House of Representatives visited League Island and Chester on the 13th, to examine the relative advantages of sites for a naval station for the building of iron-clads. The committee were entertained at a banquet in the evening.

—The furlough of the Ninety-first Regiment having expired, they left the city on the 16th.

—George A. Coffey, United States district attorney, died on February 20th. Mr. Coffey was a native of Indiana, had studied for the ministry, but had taken up law later in life. He had been district attorney for about two years.

—Washington's birthday was celebrated with more than usual enthusiasm. A parade was made by all the military of the city, including the Blue and the Gray Reserves and other Home Guard organizations, the veteran troops home on furlough, the invalid corps, and the newly-recruited soldiers. The parade was reviewed by Maj.-Gen. Hancock and his staff. On the same day the veterans of 1812 held their usual reunion.

—On the following day the One Hundred and Eighty-third Regiment, Col. McLean, left for the war.

—Maj.-Gen. Hancock, having recovered from his wound, was given a public reception by Councils in Independence Hall. The general was welcomed by Mayor Henry, and made a brief reply.

—On the 14th, Frederick Brown, druggist, died. He had been established at the corner of Fifth and Chestnut Streets for more than forty years.

—The time-honored custom of ringing the State-House bell for alarms of fire was abolished by Mayor Henry on the 1st of March.

—About one thousand rebel prisoners, on [1864] their way from Camp Chase, Ohio, to Fort Delaware, passed through the city on March 2d.

—The Sixty-ninth Regiment, having re-enlisted for the war, returned home on March 7th, on furlough, to recruit their ranks. Only about one hundred and fifty men remained in the regiment, which had served for three years through most of the battles in Virginia. The regiment was entertained in the Refreshment Saloon, and afterward dismissed at Independence Square. The Twelfth Pennsylvania Cavalry, which had also re-enlisted, returned on the 10th. They were welcomed home by Mr. Hoffman, of the committee of Select Council, and entertained at the Refreshment Saloon. They were followed on the 13th by the Fifty-sixth Pennsylvania Regiment, which had been recruited from all over the State. The Fifty-sixth made its headquarters in this city, and was given a reception on the day after its arrival, before the departure of the various companies to their homes. This regiment also re-enlisted.

—The Supreme Court rendered, on March 14th, two decisions in two cases where money was sought to be recovered from the city for services ordered by departments of the city government which had been issued without the order or sanction of Councils. The court decided in both cases that the expenditures were illegal, and that Councils, and Councils alone, had the right to legally appropriate the city's money, and that consequently the city was not liable for those debts.

—On the 15th the President issued a proclamation for a draft of two hundred thousand men as soon after April 15th as possible. An uncertainty existed as to the extent of Philadelphia's quota under this call, but recruiting was stimulated in the hopes of avoiding it.

—Several hundred Confederate officers passed through the city from Camp Chase, Ohio, to Fort Delaware on the 17th. They formed a marked contrast to the squalid condition of the captive privates as usually seen.

—The gun-boat "Yankee," five hundred tons burden, was launched at the navy-yard March 19th. She was one hundred and eighty feet long, twenty-nine feet beam, and twelve feet depth of hold.

—The furlough of the Seventy-third Pennsylvania Regiment having expired, it left the city in detachments on the 19th.

—On the same day Dr. Franklin Bache, the learned author of the "United States Dispensatory," and one of the oldest physicians in the city, died. Dr. Bache was a descendant of Benjamin Franklin. He had occupied for many years the chair of Chemistry in the Jefferson Medical College, had been president of the American Philosophical Society, and was con-

nected with many of the learned and charitable societies of Philadelphia and other cities.

—In a few days after Dr. Bache's death, **1864**] on March 24th, Dr. John Redman Coxe, also a famous and aged physician, died, aged ninety-one years. He had been port physician, physician to the Pennsylvania Hospital, and professor of chemistry in the University of Pennsylvania. Dr. Coxe's name is illustrious as having been one of the first to introduce vaccination into this country. Perhaps "Coxe's Hive Syrup," so familiar to domestic medicine, has done more to make his name remembered than his scientific achievements.

—About five hundred rebel prisoners passed through the city on March 21st, from Indianapolis, Ind., for Fort Delaware. On the journey some of the prisoners attempted to escape by cutting through the floor of the car. The guard fired upon them, dangerously wounding one.

—The Twenty-fifth Ohio Regiment passed through the city, on March 21st, for the seat of war, followed by the Fifty-sixth Massachusetts, on the 22d, and the Twenty-fourth Maine on the 23d. While the Massachusetts regiment was being entertained at the Refreshment Saloon, some of the men obtained liquor from a neighboring tavern. The colonel of the regiment thereupon raided the tavern, destroyed the stock of liquor, and carried the proprietor, Henry Brown, and his bar-tender, in irons to Baltimore. They were there released by the provost marshal and allowed to return home.

—The Sixty-seventh Regiment, Col. Staunton, returned from the war on April 5th, and were given a reception at the Refreshment Saloon.

—A boiler exploded at Merrick & Son's foundry, at Fifth and Federal Streets, on the 6th, killing Daniel McLaughlin, the engineer, Patrick Brennan, fireman, John Webb, John Dougherty, James McGowen, Jahel Wisner, Edward Bannen, and Alexander Ferris, and wounding thirteen others. The boiler was a new one, built at the foundry.

—The monitor "Saugus," Capt. Calhoun, arrived on the same day from Wilmington, Del., where she had been built, and came to the navy-yard to receive her stores.

—The Twelfth Pennsylvania Cavalry, Col. L. B. Pierce, and the Forty-third United States Colored Regiment, both left the city on the 18th.

—The candle- and oil-factory of Grant & Co., at Twenty-third and Hamilton Streets, was destroyed by fire on the 20th. Loss seventy-five thousand dollars.

—A committee of Councils, appointed to visit Washington to ascertain the proper quota of men due by Philadelphia under the last drafts of the President, made a report on the 21st, by which it appeared that while some of the wards had more than filled their quota, others were slightly deficient. The committee recommended that the wards be requested to transfer the excess to the deficient wards, so that the

entire city might avoid the draft. This arrangement being accepted by the government, it was adopted by all except the Twenty-fifth Ward in the Fifth Congressional District, where a draft for three hundred men was held on June 1st. The Fifth Congressional District included a portion of Bucks County as well as the Twenty-fifth Ward.

—On April 23d the Thirty-second Colored Regiment, the Fourth and Eighth Regular Infantry, the Fourteenth Heavy Artillery, and a company of the Invalid Corps passed through the city, and were entertained at the Cooper-Shop Refreshment Saloon.

—A terrific boiler explosion occurred at the chandelier and gas-fitting establishment of Cornelius & Baker at Eighth and Cherry Streets, which literally demolished the boiler-house, damaged several buildings, and killed Thomas H. Albertson, William Bartholomew, Albert Shaffner, John Fry, Samuel Davis, George Scanlan, and John Porter, and wounded several others. Porter was at work at Eleventh and Cherry, but was struck by a portion of the boiler, about twelve feet in length. Another huge piece was hurled to Filbert above Eighth, where it crushed through the roof of a stable of the William Penn tavern, falling into the cellar, killing a horse and wounding a man in its passage.

—The following day the Ninety-seventh Regiment, Col. Guss, and the Sixty-seventh, Col. Staunton, left the city for the army. The news of the terrific struggle of the Wilderness began to arrive, and aroused intense excitement from the large number of our troops who were with Grant, and from the terrible loss of life involved. Dispatches were slow and indefinite until Grant's famous dispatch that he "intended to fight it out on that line if it took all summer," and giving fuller accounts of his operations. The wounded began to arrive on the 11th, when five hundred were received at the hospitals. On the 15th one thousand arrived, and on the 18th nine hundred and seventy-eight more.

—The city was somewhat agitated by the bold forgery published in the *New York World* on the 18th, purporting to be a call by the President for four hundred thousand men, but the denial of its authenticity was so prompt that it had the intended effect but partially. The provost guard took possession of the office of the Independent Telegraph Company on Chestnut Street above Fourth.

—The funeral of Lieut.-Col. Thomas Kelly, of the Sixty-ninth Pennsylvania Regiment, took place from the Cathedral Chapel on May 19th, Bishop Wood officiating. A firing party was composed of the provost guard.

—Wounded soldiers continued to arrive in great numbers from the battle-fields: on the 20th about one thousand, on the 27th six hundred, on the 29th five hundred, and on the 31st one thousand and five, making, including small detachments, nearly five thousand men during the month of May.

—On the 29th the sixty citizens of Fredericksburg, held as hostages for the soldiers betrayed into the Confederate hands by the mayor of that city, arrived in the city and were conveyed to Fort Delaware.

—On the 31st of May the Twenty-seventh Regiment returned from the war, and were escorted from the depot by a cavalcade of German citizens.

—The great central fair of the Sanitary Commission of the States of New Jersey, Pennsylvania, and Delaware was opened on the 7th of June with appropriate ceremonies. The project of a fair similar to those held in other cities had been on foot for about six months, and the arrangements were very elaborate and the contributions correspondingly generous. Many of the large establishments in the city set aside "one day's receipts" as a contribution, as did all the street railway companies and many private individuals. By this means the commission was able to build an enormous temporary building covering Logan Square. This space was arranged in corridors corresponding to the four streets and the walks in the square, on the sides of which were arranged booths, picture-galleries, etc. In the interior space was arranged a smoking divan, a horticultural exhibition, a refreshment saloon, and a brewery, and every portion was tastefully and appropriately decorated. The main avenue through the centre of the square, from Eighteenth to Nineteenth Streets, was covered by arches in a gothic form, and was known as Union Avenue. From it branched corridors to the other portions of the buildings. The contributions embraced every variety of object, either of curiosity, use, or artistic value, and included both articles for sale and merely for exhibition. The gross receipts were turned into the fund of the Sanitary Commission for the use of the sick and wounded of the army and navy.

The fair was opened on the 7th of June. President Lincoln was unable to be present at the opening ceremonies, and deputed Bishop Simpson to act for him. A large stand was erected at the western extremity of Union Avenue for the speakers and the committees of the commission. There were present Governor Packer, of New Jersey, Governor Cannon, of Delaware, and Governor Curtin, of Pennsylvania, Chief Justice Woodward, and Justices Strong, Read, and Thompson, representing the State judiciary, Maj.-Gen. Cadwalader and staff, representing the army, and Admiral Dupont, representing the navy, as well as Mayor Henry, members of Councils, and many prominent men.

Mayor Henry presided, and, on taking the chair, said, "We enter to-day upon the realization of the zealous efforts which humanity and patriotism have alike invited, and as we stand upon the threshold of an enterprise rarely equaled in extent, never sur-

passed in the grandeur of its purpose, we may rejoice at the rich promise of its success, while we are yet mindful of the sad urgency that called it forth. Gratitude and sympathy have before [1864] them full scope for their most generous and untiring exertions. No claims more sacred, no appeals more powerful were ever addressed to a loyal people than come to us this hour from the maimed and suffering defenders of our Union. The gigantic contest that is now being waged between loyalty and rebellion is as pre-eminent in magnitude as are the rivers and plains that behold its deadly strife.

"No military resources, however well directed, can adequately provide relief for the thousands of brave men who have sunk under the fatigue and privation of the march, or have been stricken down upon the many fields of battle. In this emergency the noble, heaven-prompted associations of the Sanitary and Christian Commissions offer to you wide channels through which the oil and wine of soothing kindness

SANITARY FAIR BUILDINGS.

and of strengthening cheer may flow from the plenty of your homes to the need of the sick or wounded soldiers. Of these organizations the Sanitary Commission is the chosen dispenser of the liberal offerings which the people of our own and of two sister States have brought hither in this holy cause. Enlarged views, refined taste, and unflagging energies have originated, planned, and matured this grand undertaking. All that may delight the senses and gladden the heart has been gathered into this spacious temple, dedicated to loyal benevolence, or has been stored in its numerous courts. The eye will wander with pleasure over each attractive scene and brilliant group, the ear will drink in the surging melody of the joyous voices with which these arches will reverberate while yet each passing moment may add new claimants of your benefactions from among the heroes who even now are assailing treason in those last strongholds which, by God's blessing and man's valor, shall witness the death-throes of the Rebellion."

Bishop Stevens followed with a prayer. The build-

ings were then formally transferred by John C. Cresson, of the committee of arrangements, to the executive committee. Mr. Cuyler, on behalf of the executive committee, accepted the buildings, and presented them to Bishop Simpson as the representative of President Lincoln. Bishop Simpson then made a short address apologizing for the President's absence as unavoidable, and accepting the buildings on his behalf to be dedicated in the name of the people to the use of the sick and wounded of the Union army and navy. Addresses were also made by the Governors of Pennsylvania, New Jersey, and Delaware, and the exercises concluded by the entire audience singing the "Star-Spangled Banner." A large flag was at this moment raised upon the central flag-staff, and was saluted with thirteen guns. An accident caused by the breaking of a platform slightly marred the exercises.

President Lincoln and his wife visited the fair on June 16th, on which day the crowd was so great that it was almost impossible for him to pass through the various departments. He was entertained by the committee, and responded to a toast in his usual felicitous manner.

The fair was the great object of attraction for not only Philadelphia but all the surrounding country from its opening until its close, on June 28th. It realized for the commission over one million eighty thousand dollars. After it closed the remaining articles were sold at auction, which drew large crowds, until finally on July 6th, at midnight, the auctioneer sold the last article, an oil painting of the famous "Sanitary Fair."

The main building was five hundred and forty feet long and sixty feet wide, with an elevation from the floor to the point of the arch of fifty feet. The architect of this building was Strickland Kneass, the builders Messrs. Burton & Quigley. The other buildings were erected by B. H. Shedaker, under the direction of John Welsh, chairman of the executive committee, and J. C. Cresson, chairman of committee of general arrangements. Henry E. Wrigley was the architect for several of the buildings. The aggregate length of the fair-buildings was six thousand five hundred feet, or more than a mile, and one million five hundred thousand feet of lumber was used in their construction. The work was completed within forty working days.

The following is a summary of the receipts and expenditures of the Philadelphia agency of the United States Sanitary Commission to Jan. 1, 1866:

The total amount in cash contributed to the treasury of the Philadelphia agency, including the proceeds of the Great Central Fair.....	\$1,186,545.14
The total amount in cash contributed to the Relief Committee of the Women's Pennsylvania Branch, including \$2,551.50 received from the treasurer of the Philadelphia agency, and \$1,681.31 received by them from contractors for work done.....	29,744.00
Total amount of cash received by the Philadelphia agency.	\$1,216,289.14

Cash value of hospital supplies, clothing, etc., received by the Philadelphia agency.....	\$306,088.01
Cash value of four hundred tons of coal, received by the Relief Committee of the Women's Pennsylvania Branch.	3,000.00
Estimated value of volunteer labor, and railroad and other facilities rendered free of charge.....	40,000.00
Total contributions of all kinds to the Philadelphia agency..	\$1,565,377.15

This sum was distributed as follows:

For the support of the work of the Sanitary Commission in Philadelphia and its vicinity, including cash remaining in the hands of the treasurer of the Philadelphia agency.	\$303,554.63
For the general work of the Sanitary Commission.....	1,261,822.52
	\$1,565,377.15

—The Twenty-sixth Regiment arrived from the war on the 6th of June, and was received by a committee of Councils and the Home Guard, and entertained at the Refreshment Saloon. On the following day the First, Second, and Ninth Regiments Pennsylvania Reserves returned after three years' service. They were received by a tremendous crowd and were escorted from the depot by a committee of Councils, the Invalid Corps, One Hundred and Eighty-sixth Pennsylvania Reserves, discharged officers and men of the division, the Hibernia, Moyamensing, and Northern Liberties Engine Fire Companies, and ambulances for the disabled. The reception was very enthusiastic, fire and church bells being rung and cannon fired along the route of the procession. They were followed on the 8th by the Third and Fourth Regiments of the same division, but, owing to a misunderstanding, these received no general celebration.

—About one hundred and thirty-five men, all that were left of the Seventy-first Regiment Pennsylvania Volunteers, formerly known as the First California Regiment, arrived in the city June 16th. The regiment, which was raised in the city, left for the seat of war fifteen hundred strong, but five hundred were afterwards transferred to another regiment.

—Governor Curtin called for twelve thousand volunteers on the 5th of July, as it was supposed a new invasion was contemplated by the Confederates. He asked for one hundred days' men, and as the emergency became more urgent he increased the number necessary to twenty-four thousand. Liberal volunteering began at once.

—The excitement concerning the Confederate raid through Maryland increased steadily, though it never reached the proportions it did the previous year. On the 11th a party of guerrillas penetrated nearly to Havre de Grace, and cut the telegraph wires and tore up the Baltimore railroad, severing all communication with Washington. As it was now uncertain what might follow, Mayor Henry issued an urgent call for minute-men. In response an enormous war-meeting was held on the 12th in Independence Square. Judge Knox served as chairman, and the meeting was addressed by Judge Kelley, Frederick Fraley, J. M. Scovel (of New Jersey), and Col. Montgomery (of Vicksburg). A large number immediately enrolled themselves. The Confederates soon retired and the excitement subsided.

—The President's proclamation for five hundred thousand men was issued July 18th. Philadelphia's quota under the call was estimated to be thirteen thousand seven hundred and seventy-eight, of which about four thousand had already enlisted voluntarily.

—An accident caused by the falling of a portion of the building used as the Female Insane Department of the Blockley Almshouse resulted in the death of fifteen of the inmates and the wounding of twenty more, on July 20th. The coroner's inquest developed the fact that some workmen, about sixteen years before the accident, in putting in boilers for heating, had cut away the brick piers supporting the chimneys, which was the cause of the disaster.

—A disastrous fire at Second and Huntingdon Streets destroyed the wagon-works of Henry Simons on July 22d, with a loss of two hundred and fifty thousand dollars.

—The re-enlisted Twentieth Regiment, under command of Col. W. B. Thomas, left for Washington July 23d, being the first regiment to leave under the one hundred days' call. The regiment was drawn up opposite the custom-house previous to its departure, and was addressed by Professor Saunders. Col. Thomas responded in a brief speech, and afterward the regiment was entertained at the Refreshment Saloon.

—The destruction of Chambersburg, Pa., by Confederate raiders at this time, aroused great feeling in the city.

—The Fifth Union League Regiment (National Guards), Col. Harmanus Neff, left Philadelphia July 28th. Previous to their departure they made a street parade, and were presented by the Union League with a stand of colors. The presentation was made by Col. Cressman on behalf of the League, and Col. Neff made an appropriate response.

—A special election was held August 2d for the purpose of confirming three amendments to the State Constitution. They were,—

1st. Whenever any of the qualified electors of this commonwealth shall be in actual military service, under a requisition from the President of the United States, or by authority of the commonwealth, such electors may exercise the right of suffrage in all elections by citizens, under such regulations as are or shall be presented by law, as fully as if they were present at the usual place of voting.

2d. No bill shall be passed by the Legislature containing more than one subject, which shall be clearly expressed in the title, except appropriation bills.

3d. No bill shall be passed by the Legislature granting any power or privilege in any case where the authority to grant such power or privileges has been, or may hereafter be, conferred upon the courts of this commonwealth.

The election was exceedingly quiet, little or no interest being excited. The vote on the two last was

almost unanimous, and the first received a majority of 17,281 in the city.

—John Grigg, a well-known merchant, [1864 died August 2d, of apoplexy. He founded the firm of Grigg, Elliott & Co., booksellers, which became by his retirement, in 1850, the present well-known firm of J. B. Lippincott & Co.

—On August 3d a public meeting was held at the Board of Trade rooms, to devise means of relief for the suffering people of Chambersburg. A. G. Cattell was chairman, and introduced the Rev. Mr. Warner, who stated that eighteen hundred persons were homeless, and of these fourteen hundred were utterly destitute, their entire property having been destroyed. Mr. Shriver, of Chambersburg, John W. Forney, and O. W. Davis also addressed the meeting. A committee was appointed to procure subscriptions.

—Governor Curtin, upon receiving intelligence of another rebel raid, issued a call for thirty thousand militia on August 5th, but they were never ordered into service.

—Baxter's Philadelphia Fire Zouaves returned August 12th, after three years' service, and were given a magnificent reception by the firemen. The streets along the route of the parade were crowded with people. The regiment numbered only two hundred and ten men, although it left the city at the breaking out of the war fifteen hundred strong. It was received at the depot by members of Councils, who escorted it to the Refreshment Saloon. In the afternoon they paraded with the volunteer firemen, making one of the largest turnouts ever witnessed in the city. As the procession passed St. Peter's Church the chimes played "Auld Lang Syne." At Independence Hall they were formally welcomed by Dr. Uhler, of Select Council.

—A portion of the Third Pennsylvania Cavalry returned after three years' service, August 14th. The remainder of the regiment had re-enlisted.

—Col. Benjamin Chew, a veteran of the war of 1812, died at the old Chew house at Germantown, August 18th.

—The Twenty-third Regiment Pennsylvania Volunteers returned to the city August 25th. This regiment, known as Birney's Zouaves, was a very strong and popular regiment, and was given a reception by the committee of Councils and the military. They made a street parade to the National Guards' Hall, where they were formally welcomed and dismissed. By an unfortunate accident, James McGinnis, private, was killed just as the train was entering the city.

—The One Hundred and Sixth Regiment Pennsylvania Volunteers returned August 29th, and was received by a committee of Councils, who escorted it to the Refreshment Saloon. Here it was received by Col. Baxter's Fire Zouaves and the Henry Guards. It made a street parade to National Guards' Hall, where it was formally welcomed by Mr. F. A. Wolbert and Col. Small.

—The proceedings of the Democratic national convention in Chicago aroused great interest in the city.

It was generally believed before the convention met that Gen. McClellan would be the Democratic nominee for President, and his nomination was received with great satisfaction in the city of his birth.

—A national salute was fired in the First Ward on September 5th, on the receipt of the news of the fall of Atlanta. The President issued a proclamation on the same day announcing the victories, ordering a national thanksgiving on Sunday, September 11th, and requesting the thanks of the nation to Farragut, Canby, Granger, and Gen. Sherman and his army.

—The reception of the Eighty-second Regiment Pennsylvania Volunteers, Col. Bassett, was held September 7th. The escort consisted of the committee of Councils, the Twenty-third Regiment, the Henry Guards, and the South Penn Hose Company. They made a street parade to National Guards' Hall, where they were welcomed and the regiment dismissed.

—The National Union party held a mass-meeting in Independence Square, September 10th, to ratify the nomination of Lincoln and Johnson. Hon. Simon Cameron presided.

—Two trains arrived September 12th containing nine hundred and ninety-seven wounded soldiers, who were distributed to the Germantown, Chestnut Hill, and Nicetown hospitals.

—The Democrats held their ratification meeting September 17th in Independence Square. Four stands were erected, and speeches were made from each. The meeting closed with a display of fire-works.

—The Sixth Union League Regiment, Col. H. G. Sickel, left for Baltimore September 18th.

—On September 22d the Two Hundred and Third Pennsylvania Regiment, known as Birney's Sharpshooters, commanded by Col. John W. Moore, left Camp Cadwalader for the seat of war.

—The National Union party made a torchlight procession September 24th, ending with a display of fire-works at Independence Square.

—On September 24th a series of iron rafters, which were being placed in position at the Philadelphia and Erie Railroad Depot, Sixteenth and Market Streets, fell before they had been properly secured. Two men, William Young and John Kane, were killed, and five others injured.

—The One Hundred and Ninety-ninth Pennsylvania Regiment, Col. Lechler, which had been recruited in the interior of the State, left Camp Cadwalader for the front September 31st.

—The Italian frigate "Principe Umberto" arrived at the navy-yard October 3d, and was received with a national salute. She carried fifty-two guns, and her crew numbered six hundred men, including eighty-four midshipmen.

—The Philadelphia and Erie Railroad was formally opened on October 4th.

—On October 5th, Commodore Stribling, commandant of the navy-yard, left this port on the steamer "Neptune," to assume command of the East Gulf Squadron as rear-admiral. The United States steamer "R. R. Cuyler" sailed on the same day.

—The Keystone Battery returned from Chambersburg on October 7th, having filled their one hundred days' service under the State call.

—The National Union party held a grand torchlight procession and mass-meeting at Independence Square, Mayor Henry presiding. As the procession reached the square there was a grand display of fire-works.

—The State and county elections were held on October 11th, and resulted in this city in a sweeping victory for the National Union party. The importance of the election hinged on its influence on the Presidential election held a month later. The citizen vote (as distinguished from the soldiers' vote) resulted as follows:

Congressional.

1st Dist.,	Randall (Dem.),	maj. 2167	over	Butler (Nat. U.).
2d "	O'Neill (Nat. U.),	" 4169	"	Biley (Democrat).
3d "	Myers "	" 1105	"	Buckwalter "
4th "	Kelley "	" 3279	"	Northrop "
5th "	Thayer "	" 955	"	Rose (Dem.), in city portion.

County.

State Senator,	C. M. Donovan,	Democrat,	Third District.
Representatives,	National Union,	16;	Democratic, 2.
Sheriff,	Howell (Nat. U.),	majority	7726.
Register of Wills,	F. M. Adams (Nat. U.),	majority	7571.
Clerk of Orphans' Court,	Merrick "	"	7572.
Receiver of Taxes,	C. O'Neill "	"	7610.
City Commissioner,	T. Dixon "	"	7148.

In Select Councils the National Union party elected 10 members, the Democratic party 2.

In Common Councils, National Union 18, Democratic 7, and Independent 1.

It required several days to receive and count the army vote, but it was finally announced October 29th. The general result was not affected. The city majorities were increased, and varied from 8946 for sheriff to 8313 for city commissioner. State Senator Donovan's majority was reduced by the army vote to 257. There were only changes in the vote for representatives.

—On October 13th the United States frigate "Chatanooga" was launched from the ship-yard of Messrs. Cramp & Sons. This was the largest vessel built at Philadelphia up to this time, measuring three hundred and thirty-six feet over all, forty-four feet breadth of beam, and twenty-one feet depth of hold. She was christened by Miss Turner, daughter of Commodore Turner.

—Maj.-Gen. David B. Birney died in Philadelphia October 18th. Gen. Birney was born in the city, and previous to the breaking out of the war practiced law. He had been connected with the militia during this time, and immediately on the breaking out of the war volunteered in the Twenty-third Regiment, of which he was elected lieutenant-colonel.

Returning at the end of his term of service he raised the regiment known as Birney's Zouaves, one of the largest that ever left for the seat of war. He was soon given more important command, serving with marked distinction in the Army of the Potomac, in which, for some time, he commanded the Tenth Corps. He returned on sick-leave, and, after remaining only one week, died at his home. Councils passed appropriate resolutions of regret, and placed Independence Hall at the disposal of the family for a public funeral. The funeral was conducted, however, from his own house. Detachments of the One Hundred and Eighty-sixth and One Hundred and Eighty-seventh Regiments Pennsylvania Volunteers, two corps of the Gray Reserves, and a company of marines, with the First City Troop, served as the military escort. Besides these a large delegation of the recently returned Twenty-third Regiment and many officers of the army, including the general's personal staff, attended the funeral.

—The largest torchlight procession probably ever seen in the city up to this time was made by the members of the Democratic party on October 29th. The number of men in line was unknown, but it is said it was six to seven miles long. A slight disturbance in the course of the parade occurred at Sixth and Chestnut Streets, in which an old man, James Campbell, was knocked down. In falling he received a concussion of the brain, from the effects of which he died in a few minutes.

—Seven companies of Col. Thomas' regiment returned on the 30th of October. Their coming was unexpected, and there was no escort. The remainder of the regiment returned on the following day with Col. Neff's Union League regiment and made a street parade. Both regiments were composed of one hundred days' men.

—The emancipation of the slaves of Maryland was celebrated November 1st by the Committee on Recruiting Colored Troops, and two salutes were fired. The committee exhibited, in front of their rooms on Chestnut Street, a very large transparency containing appropriate designs and mottoes. In the evening a meeting was held at which addresses were made by Judge Kelley, Mr. Trimble, of Tennessee, and others. Appropriate services were also held at all the colored churches.

—The Presidential election occurred on the 8th of November. The vote of the State showed an increase in the total number of votes cast, and a corresponding increase in the Union majority. In the city 9508 majority was given for the Lincoln electors, while the majority for Howell (sheriff) in October was 7726. The total citizens' vote was 93,602. The soldiers' vote brought Lincoln's majority up to 11,762.

—The Cathedral of St. Peter and St. Paul were solemnly blessed according to the ritual of the Catholic Church on November 20th. The ceremony was dignified by the presence of three archbishops, twelve

bishops, and several hundred clergymen, besides about five thousand spectators. After the usual ceremonies high mass was celebrated by Bishop Wood, and a sermon was preached by Archbishop [1864 Spaulding, from Ephesians v. 25-28.

—In the latter part of November a scheme was discovered to defraud the United States by carrying away and disposing of stores consigned to the navy-yard. Arrests were numerous, and great excitement was caused by the apparent completeness of the scheme and the prominence of some of the parties implicated. But few convictions were ever secured, many of the accused escaping on technical grounds and for want of evidence.

—Sixteen officers and twenty-six privates of the Ninetieth Regiment (National Guards) returned to the city November 30th, their term of service having expired. The remainder of the regiment had re-enlisted in the field. The returning men were received by a committee of Councils, the Henry Guards, the old members of the National Guard, the Southwark Hose, Franklin Engine, and Diligent Hose Companies, and escorted to National Guards' Hall, where they were dismissed.

—Capt. Winslow, of the "Kearsarge," was given a public reception at the Commercial rooms on December 13th, in honor of his victory over the "Alabama." In the evening he was given a dinner at the Continental Hotel by the Board of Trade. Morton McMichael presided, and many prominent men were present, including Maj.-Gen. Cadwalader, Gen. Cameron, and Cols. Olcott and Morgan.

George Cadwalader died Feb. 3, 1879, aged seventy-two years. He was a grandson of John Cadwalader of the Revolution, the second son of Maj.-Gen. Thomas Cadwalader of the war of 1812, and brother of Judge John Cadwalader of the United States District Court, who died Jan. 26, 1879. He was born in Philadelphia in 1806. He graduated at the University of Pennsylvania in 1823, and assisted his father in the management of the Penn family estates in Philadelphia and Pennsylvania. Subsequently he became the agent of those estates, and was in no other business for many years. He inherited the military tastes of his family, and at the age of eighteen years joined the First Troop of Philadelphia City Cavalry. This was in 1824. In 1832 he was elected captain of the corps of Philadelphia Grays. In this position he attracted much attention by the thorough discipline in which he held that company. Being a man of wealth, he spent much money in promoting the equipment, drill, and efficiency of the corps. The Grays, under his auspices, were organized as a company of flying artillery. The drill and exercises of this company usually took place on the west side of the Schuylkill, on the hills beyond Harding's Upper Ferry Tavern, upon a large field, which has since been cut up and built upon, and is at this time one of the finest portions of West Phila-

delphia. The company was exercised with six or eight light artillery pieces, each of which, together with its caisson, was drawn by four horses, **1864]** so that the company, upon parade, made a very formidable appearance. The officers and men became very proficient in unlimbering, loading and firing, advancing and retreating, with great quickness, and the drills of the Grays were usually witnessed by a large number of spectators. In 1842, Capt. Cadwalader was elected brigadier-general of the First Brigade, First Division,¹ and held that rank until after the commencement of the war of the Rebellion, still retaining for some years the captaincy of the Philadelphia Grays, to which he devoted much time. During the riots of 1844 Gen. Cadwalader was second in command of the volunteers whose services were necessary to put down those outbreaks. He was conspicuous at Kensington, and at the riots at Second and Queen Streets, Southwark. The merit of his services on that occasion was a matter of strong criticism and difference of opinion at the time. A number of citizens, who believed that his skill and gallantry were of value, subscribed a sufficient amount to procure an elegant silver vase, which was presented to him as a testimonial of approval of his conduct during those disturbances. The memorial was over two feet in height, decorated with military emblems, and a suitable inscription, with the motto, "The defense of the laws is the hero's highest glory." At the breaking out of the Mexican war Gen. Cadwalader was appointed brigadier-general of the regular army, his commission bearing the date of March 1, 1847. He commanded

a brigade composed of the Eleventh and Fourteenth Infantry and a company of voltiguers, of which Charles J. Biddle was captain. He served under Gen. Scott, in Mexico, in the battles of Contreras, Churubusco, Molino del Rey, Chapultepec, San Cosme, and city of Mexico, and was brevetted major-general for gallant service at the battle of Chapultepec. In November, 1847, he was made military governor of the city and valley of Toluca. On his return from Mexico he was received at Philadelphia with a grand parade, and was presented with a sword by the city. At the conclusion of the war the United States government conferred upon him the full rank of major-general, dating from the battle of Chapultepec, Sept. 13, 1847. After his return to Philadelphia, in 1848, he was elected president of the Mutual Assurance (Green Tree) Company, which position he held until the time of his death. At the outbreak of the war of the Rebellion he was appointed major-general of the Pennsylvania troops, and accompanied the State volunteers to Baltimore, and commanded at Annapolis. He was in the Shenandoah Valley campaign under Maj.-Gen. Robert Patterson. On the 25th of April, 1862, he was commissioned by the United States government major-general of volunteers, and commanded the Second and Sixth Divisions of the Army of West Tennessee, in garrison at Corinth, Miss. At the close of the war he was honorably mustered out of service, and engaged in civil pursuits. In 1874 he was chosen president of the Society of Mexican Veterans, and was for some years commander of the Loyal Legion of the United States. Gen. Cadwalader's mother was Mary Biddle, daughter of Col. Clement Biddle of the Revolution, and his wife was a daughter of Dr. James Mease, of Philadelphia, a physician and writer upon historical, medical, and scientific subjects. She was a sister of Pierce Butler, who married Fanny Kemble, the actress, and of Col. John Butler. These sons of Dr. Mease had their names altered to Butler by act of Assembly, in compliment to their mother, a daughter of Pierce Butler, who was a patriot of the Revolution and United States senator from South Carolina. Mrs. Cadwalader survives Gen. Cadwalader, but they had no children.

—The Swedish frigate "Vanadis" arrived off the navy-yard December 18th, and was received with a salute from the "Princeton." She was a steam-frigate of about two thousand tons, and carried twenty-two guns.

—On December 20th the President issued the final call for three hundred thousand men, to be filled by draft, Feb. 15, 1865, if not provided for by voluntary enlistments. Under this call Philadelphia's quota was announced by the adjutant-general to be eleven thousand four hundred and eighty-six. The city's overplus on the previous draft and new enlistments amounted to nearly two thousand, leaving about nine thousand to be provided for by draft.

¹ By act of Assembly, 1793, the city and county of Philadelphia were constituted the First Division, with two brigades. The following were major-generals of the First Division: 1793, James Irvine; 1794, Walter Stewart; 1796, Thomas Proctor; 1800, Thomas Mifflin; 1800, Thomas Proctor; 1802, John Shee; 1807, John Barker; July, 1808, Isaac Worell; 1824, Thomas Cadwalader; 1833, Robert Patterson; 1867, Charles M. Prevost; 1875, John P. Bankson; 1877, Russell Thayer, Robert M. Brinton. Brigadier-generals of the First Brigade were as follows: 1793, Thomas Proctor; 1796, William Macpherson; 1799, Francis Gurney; 1802, John Shee; 1803, John Barker; 1807, Michael Bright; 1812, Robert Wharton; 1814, George Bartram, Thomas Cadwalader; 1824, Robert Patterson; 1828, Andrew M. Prevost; 1842, George Cadwalader; 1865, John P. Bankson; 1875, Henry P. Muirheid; 1876, Robert M. Brinton, Russell Thayer; 1877, E. Wallace Matthews. Second Brigade (County Brigade) brigadiers: 1793, Jacob Morgan; 1802, Isaac Worrall; 1807, Michael Leib; —, William Duncan; 1814, Thomas Snyder; 1821, Samuel Castor; —, John D. Goodwin; 1842, Thomas W. Duffield, Augustus L. Roumfort; —, John Bennett; 1856, William F. Small, John Tyler, Jr.; —, John D. Miles; —, J. William Hofmann; —, Russell Thayer; 1877, Edward DeC. Loud. Third Brigade brigadiers: Horatio Hubbell, elected 1842; John Sidney Jones, William M. Reilly, De Witt C. Baxter. Fourth Brigade, William B. Thomas; Fifth Brigade, Louis Wagner; Reserve Brigade, Frank E. Patterson; Home Guard Brigade, Augustus J. Pleasonton. The First and the Second Brigades were dissolved by the National Guards act of Aug. 28, 1878. By order of Governor Hoyt, July 9, 1881, the five brigades in the State were reduced to three brigades, and the First Brigade was composed of Philadelphia, Chester, Montgomery, and part of Schuylkill Counties, Major-General (commanding the National Guard of Pennsylvania), John F. Harttraft; Brigadier-Generals (1881), First Brigade, George E. Snowden; Second Brigade, James A. Beaver; Third Brigade, Joseph K. Siegfried.

—A great deal of excitement was caused December 30th by the announcement of a heavy robbery in the custom-house. About eighty or ninety thousand dollars in gold and currency was abstracted.

—On the last day of the year, George M. Dallas, ex-Vice-President of the United States, died at his residence, aged seventy-two years. A meeting of the members of the bar was held January 3d, Chief Justice Woodward presiding, when addresses eulogistic of Mr. Dallas were delivered by Joseph R. Ingersoll, David Paul Brown, George M. Wharton, and Charles Ingersoll. Appropriate resolutions were adopted.

His funeral took place January 4th. In accordance with his request, it was as simple as possible. His body was taken to St. Peter's Church, Third and Pine Streets, where it was interred with the usual service of the Episcopal Church. The pall-bearers were William H. Seward, Secretary of State, George W. Woodward, chief justice of Pennsylvania, Joseph R. Ingersoll, John Cadwalader, Alexander Henry, Col. James Page, J. Pemberton Hutchinson, and Henry J. Williams.

George Mifflin Dallas, second son of Alexander James Dallas, was born July 10, 1792. His father was a noted lawyer and Secretary of the Treasury under President Madison. The son was educated at Princeton College, and after graduation commenced the study of law in his father's office. He volunteered in the war of 1812, but was allowed to resign to accompany Albert Gallatin to the mission to Russia, which resulted in the peace and treaty of Ghent. Dallas, however, returned to the United States before this occurred, bearing private dispatches to the President. In 1814 he again settled down to the study and practice of law in Philadelphia. He soon took a prominent part in politics, and became successively district attorney and mayor of the city, United States district attorney, and United States senator. At the close of his senatorial term he was appointed attorney-general of Pennsylvania, but resigned to become minister to Russia. Recalled, at his own request, in 1839, he was elected, in 1844, Vice-President of the United States. As Speaker of the Senate, he gave the casting vote in favor of the low tariff of 1846, explaining his action in an excellent review of the whole question of protection. During Buchanan's administration he was minister to England, returning to his native city on the breaking out of the civil war.

1865.—Four memorable "New Year's gifts" marked the liberality of citizens. On January 2d (which was celebrated as New Year's day) the Philadelphia Board of Underwriters presented a magnificent gold watch to Capt. John A. Winslow in recognition of his services in sinking the Confederate privateer "Alabama." On the same day a committee of private citizens presented to Mrs. Gen. U. S. Grant the furnished house No. 2009 Chestnut Street for her residence. The house was newly built, and was elegantly

and completely furnished. A few days later, January 6th, a house was presented to the widow of Maj.-Gen. Birney, on Kingsessing Avenue, in West Philadelphia. [1865]

Differing from these in its object, but redounding still more to the credit of the community, was the meeting held January 10th, to devise means of relieving the sufferers from the war at Savannah, Ga. Subscriptions were secured without difficulty, and a ship-load of provisions was sent to their relief.

—An explosion of fire-works in a small factory in West Philadelphia occurred January 25th, causing the death of Philip Flyhouse, a recently-discharged wounded soldier, John McCue, Joseph Kane, and Edward Colwell, and destroying the entire building.

—On the 2d of February the fare in the street-cars was further increased to seven cents. The admission of colored persons to ride in the cars was being agitated, and the passenger railway companies, in deference to the demand, put the question to the vote of its patrons. This proceeding was not acceptable to the agitators, and proved a farce. The great majority of the riders refused to vote at all. One railroad reported that only three hundred out of over four thousand votes were in the affirmative. The Fifth and Sixth Street line abolished the order, but at the end of four weeks' trial reported that the admission of colored people caused such a serious pecuniary loss that they were compelled to refuse them thereafter. To accommodate them, however, one out of every four cars was set apart for colored people, but they very generally declined to accept the privilege.

—One of the most frightful conflagrations ever known in the city occurred February 1st in an oil warehouse of Messrs. Blackburn & Co., at Ninth Street and Washington Avenue. There were over fifteen hundred barrels of petroleum stored in the warehouse, and the bursting barrels scattered the burning oil far and wide. In a very few minutes the streets in the vicinity were a sheet of living flame surrounding dwelling-houses, setting them on fire and cutting off the escape of the inmates. Fifty-one houses were destroyed, and at least eight or ten lives were lost.

—In accordance with the President's proclamation the draft commenced February 23d in the First and Second Wards. It was continued day after day until the Eleventh Ward was finished, on February 28th. At this point, on the personal application of Professor Saunders and other prominent citizens, it was stopped until an opportunity could be allowed for the wards to fill their quota by enlistments. An arrangement was made to provide a certain quota each week, and by means of liberal bounties offered by the city and wards the quota was provided and the draft prevented. A draft took place on the 22d of March in the Twenty-fifth Ward, just before the fall of Richmond, and was the last held in the city.

—Several of the volunteer fire companies attended

the second inauguration of President Lincoln. They returned to Philadelphia on the 6th of March, and were received by a number of companies, and 1865] together made a large street parade.

—An accident occurred on the Philadelphia and Trenton Railroad, near Bristol, on the 7th of March. An express train filled with a large number of Union soldiers, released from Libby prison, ran into a damaged train standing on the track. Five men were killed and forty-eight seriously wounded.

—The Seventh Union League Regiment and the Two Hundred and Thirteenth Pennsylvania Volunteers left on March 11th for the seat of war.

—"The 3d of April, 1865, will for all coming time," says the *Public Ledger*, "be a memorable day in the local history of Philadelphia. The hopes and fears of four years were set at rest by the brief announcement at eleven o'clock, 'Richmond is ours.' Doubt and apprehension pervaded every mind early in the morning. The fact that our soldiers had been fighting for three days and had succeeded in securing substantial tokens of victory was satisfactory in part, but there was still a lingering fear that a blunder might yet occur to send the troops once more back to their intrenchments. Four years of war have taught even the most sanguine of the friends of the cause to moderate their transports over army intelligence, and there was a general disposition to be sure before giving vent to any public demonstration of rejoicing. When at last the official bulletin announced the probable evacuation of Richmond, men gathered in groups about the newspaper offices, anxious to hear the next dispatch confirmatory of the intelligence. In less than an hour came Gen. Weitzel's dispatch announcing his entry into Richmond. Then all doubt vanished, the long pent-up enthusiasm of the people burst forth, and cheer after cheer went up from Third Street, to be sent along the line of Chestnut Street far up toward the public offices. Men in their joy clasped strangers by the hand and congratulated them on the consummation of Grant's strategy. Those who were acquainted met each other and indulged in the most extravagant expressions of joy. Traveling up the street, the news soon reached the courts. Judge Allison, in the Common Pleas, had public announcement made of the fact, and the people, forgetting the court and its officers, gave hearty cheers. Judge Allison himself felt the impossibility of transacting business amid such excitement, and at once adjourned the court. In the other courts the news was received speedily, and soon the judges were left without juries, witnesses, and attorneys, and an early adjournment was a necessity.

"The spread of the news could be plainly mapped out by the display of bunting. From the State-House steeple the city could be seen gayly dressed out with American flags, as the local telegraph soon transmitted the news to every station-house, to be again spread by the people of each section of the

city. At twelve o'clock Mayor Henry received a dispatch from Secretary Stanton confirming the news, and immediately the mayor gave orders that the bell in the steeple should ring out the joyful intelligence. Men in the belfry were anxiously waiting for this signal, and soon a merry peal was rung out. The State-House bell was answered from almost every bell in the city,—Moyamensing Hall, Fairmount Engine, Spring Garden Hall, and Germantown Hall, with others, assisted to spread the news.

"The State-House bell had no sooner commenced ringing than an immense concourse of people gathered in front of Independence Hall. Those who witnessed the excitement attendant on the announcement of the capture of Vicksburg can form some idea of the scene, but the crowd and the demonstrations of joy at this time exceeded any former occasion. Cheer after cheer went up from the people on the sidewalks. The ringing of the bell was to them a confirmation of the news that had been circulating on the streets, and no man could then doubt that Grant had been successful. Ladies gathered at the windows of the American Hotel and the buildings in the neighborhood, and took part in the general rejoicings by waving handkerchiefs and small flags.

"The buildings opposite the State-House were gayly dressed with bunting, one store having hundreds of small flags streaming from the numerous windows. All the row-offices brought out their flags, and the officers hurriedly sent for additional bunting in order to make a fine display. In front of the sheriff's office an excited officer appeared with a dinner-bell, and with mock gravity announced to the multitude a sale of the Southern Confederacy. Subsequently a placard at the same office announced that four cents per pound would be paid for Confederate bonds. These were but a few of the exhibitions of good feeling and general satisfaction over the news. As in the Vicksburg excitement, the ringing of the State-House bell soon brought the firemen to Independence Square. Curiously enough, the first hose-carriage on the spot was the 'America,' quickly followed by the 'Columbia.' It appeared as if the entire department had turned out to take part in the demonstration.

"The springing of the bells, the blowing of the steam-whistles, the clangor of the State-House bell, the cheers of the men, with the occasional booming of a cannon heard above the din, made up a scene to be remembered for a lifetime. For over two hours there was no intermission in the enthusiasm. After exhausting themselves in the demonstrations in front of the State-House, it was suggested that the firemen form in procession and pass over the city. Col. Neff aided to give this direction to the crowd, and a procession was soon formed by members of the companies and passed over a portion of the city.

"While the great demonstration was centred in front of Independence Hall, the citizens elsewhere

were not unmindful of the great event. Cannon of all sizes were brought out to the sidewalks, and salutes fired throughout the day. The *Evening Bulletin* proprietors had a cannon placed on top of their building, and salutes were fired until late in the afternoon. A large crowd of the citizens of the Second Ward formed in procession about two o'clock and, headed by fife and drum, marched up Third to Chestnut Street, and from Chestnut through a number of the principal streets, cheering and making other demonstrations of satisfaction. The firemen kept up the bell-ringing and whistle-blowing while on their way back to their respective houses, and in this way aided to increase the excitement.

"The people generally appeared to have made the day a holiday. Shops and stores were deserted, and little business was transacted anywhere."

The navy-yard was closed, and the employés, two thousand five hundred in number, formed in procession, headed by the Marine Band, and marched over a large portion of the city. The Corn Exchange and Board of Brokers adjourned almost immediately, and the feeling at the Gold Exchange was intense.

The excitement in the evening had in no whit abated. The multitudes of people about the newspaper offices increased rather than diminished, and extra editions were sold by tens of thousands. Crowds thronged Chestnut Street until late at night. In different parts of the city bonfires were made, and the night was an admixture of New Year's eve, Christmas eve, and Fourth of July combined.

Sufficient time was not allowed to get up a general illumination, but there were very brilliant displays in various parts of the city. All the engine and hose-houses were brilliantly illuminated and decorated with flags.

—A meeting was held at the Merchants' Exchange under a call of Mr. George H. Stuart, chairman of the United States Christian Commission, to raise funds for the immediate relief of the wounded in the battles before Richmond, in the afternoon of the same day. The meeting was addressed by Rev. Dr. Patterson, who had just returned from the front, and who described the situation before Richmond, and made an eloquent appeal for help. Addresses were also made by Mr. Cattell, George H. Stuart, and others. Subscriptions to a very large amount were received, and an open air meeting brought a large additional amount of smaller contributions.

—The Union League celebrated the fall of Richmond by solemn ceremonies on April 4th, in front of Independence Hall. Addresses were made by Charles Gibbons and Rev. Dr. Brainerd. Prayer was offered by Rev. Phillips Brooks, and after the immense audience had sung the Doxology, the ceremonies closed with a benediction by Rev. Mr. Thomas.

—On April 7th nearly one thousand sick and wounded soldiers arrived from Washington. On the following day the Eighth Union League Regiment

left for the front. The regiment had been waiting orders several days.

—The Catholic Cathedral of St. Peter and St. Paul was opened permanently on Palm Sunday, April 9th. [1865]

—The news of the surrender of Lee's army was received in the city about nine o'clock Sunday, April 9, and created great excitement and joy wherever it became known. Immediately after the receipt of the official gazette a copy was sent to Fifth and Chestnut Streets, and by means of the local telegraph the news was at once sent all over the city. Dispatches were also sent to the churches within convenient reach, and the glad tidings announced from the pulpit. At the hotels, the Union League house, and the National Union Club house the news created intense excitement, and at once the crowds started for the newspaper offices to learn further intelligence. As the news spread over the city the citizens turned out *en masse* and congratulated each other upon the near approach of peace. In front of the State-House the scene of the previous Monday was repeated. The firemen came out with their apparatus, and by the ringing of bells and the blowing of steam-whistles increased the excitement. Most of the companies went over their districts spreading the news, and wherever a crowd was congregated the tidings were received with cheers.

The uproar continued until after midnight, and increased with each hour. An extra issued from one of the newspapers was eagerly bought from the news-boys at ten cents a copy, as each individual desired to read for himself the dispatch announcing the victory. Impromptu illuminations were gotten up in various parts of the city, and altogether the night was one never to be forgotten in Philadelphia. Men, women, and children came upon the sidewalks and took part in the grand demonstration. Every street was thronged with people on the way to Chestnut Street, and Chestnut Street itself never contained a greater crowd of pedestrians than it did at this time. By midnight the roar of cannon was added to the other demonstrations of joy, and it seemed as if every individual in Philadelphia felt called upon to add his voice to the general rejoicings. Gens. Grant and Meade were remembered everywhere, and the mention of their names was sufficient to bring forth cheer after cheer. Bonfires were lighted in various parts of the city, and long after midnight there was no appearance of a diminution in the vigor of the demonstration. The celebration continued on Monday, and business in great measure was suspended. In some places impromptu meetings were held to give utterance to the great joy that must have vent by speech. Cannons and pistols were fired, and a salute of two hundred guns was thundered forth by order of the Union League.

The Corn Exchange Association organized a patriotic meeting, and at the Board of Brokers it was al-

most impossible for business to be transacted. The courts adjourned on account of the excitement.

—The news of the assassination of President Lincoln followed closely upon the news of the success of the Union arms. The news was announced on the morning of April 15th, and created a consternation well remembered, but impossible to describe. The sudden revulsion of feeling, the horrible and treacherous character of the crime, and its total unexpectedness aroused the most mixed feelings of fear, horror, indignation, grief, and rage. A popular outbreak was feared, but none occurred. The various courts were adjourned, as were all the public offices. Spontaneously the work commenced of shrouding buildings of all kinds—theatres, hotels, stores, factories, and dwelling-houses—in black. It was a matter of surprise how rapidly this was done. The streets wore an unusual appearance of woe and regret. Councils passed appropriate resolutions ordering the State-House to be draped in mourning, postponing the illumination ordered for Monday night, and pledging the loyalty of the city to Vice-President Johnson as the legal successor of President Lincoln. Appropriate services were also held in every church in the city on Sunday.

On Monday meetings were held by the members of the bar, the Union League, the Board of Trade, the Board of Surveys, and various other organizations, at all of which appropriate resolutions were passed and addresses made.

The mayor issued a proclamation requesting business men to close their places of business on the 19th and attend their respective churches, where appropriate religious services would be held.

On April 19th the funeral services of President Lincoln began in Washington. Philadelphia was draped in mourning, and the day was one of fasting and prayer. The universal feeling was simply that of sorrow. The excitement had in great measure subsided, as it was seen that the plot included only a few individuals. All business was suspended, even the street-cars being stopped for a period of two hours. Appropriate services were held in all the churches, which were everywhere crowded. Salutes were fired by both the army and the navy at sunrise and sunset.

On Saturday, the 22d of April, the remains of President Lincoln arrived in the city. The ceremonies of their reception were grand, solemn, and impressive. The mournful spectacle was witnessed by a greater concourse of people than ever before assembled in the streets. The preparations had commenced as soon as it was known that the remains would pass through this city, and were most elaborate. Not a house in Philadelphia but was draped in mourning, until the gloom of the city was intense. Business of all kinds was suspended, and the highways were packed with people. On Broad Street the crowd was the greatest, but the adjacent streets were also fairly packed.

Away from the point of excitement the day was as quiet as a Sunday except as some organization marched on its way to join the procession. At half-past four the deep booming of the minute-guns announced the approach of the train with the remains of the dead President. Soon the answering toll of the State-House bell and the sound of the various church bells gave notice to all that the body of the President had entered the city. Christ Church, St. Peter's, and St. Stephen's chimed their bells, producing a most mournful effect.

The remains were accompanied by a few relatives and family friends, a guard of honor, a Congressional committee, a delegation from the State of Illinois, and the Governors of Pennsylvania, Ohio, Indiana, Illinois, and Iowa, with their respective staffs.

The funeral was accompanied by the military of the city under Maj.-Gen. Cadwalader, and with the visiting delegations they escorted the hearse. They were followed by a civic procession several miles in length, and including all the United States, State, city and foreign officials, veteran and invalid soldiers, firemen, and almost all the social and beneficial societies of the city. The body was escorted from the Baltimore Depot at Broad and Prime Streets, to Independence Hall, where it lay in state in the room where the Declaration of Independence was signed. At ten o'clock, everything being in readiness, the hall was thrown open to such persons as had tickets issued by the committee of arrangements. The hall was closed at midnight, though there was no cessation in the vast crowd of applicants. At half-past four on the following morning there was a vast crowd assembled, although the doors were not opened until six o'clock. The crowd constantly increased from that time until in the afternoon, when a military guard had to be summoned to clear Chestnut Street from Fourth to Eighth Street to relieve the tremendous pressure. When the doors were closed at midnight there was yet a line of applicants several squares long. It was estimated by counting that eighty-five thousand persons passed through the hall in the eighteen hours during which it was opened.

At fifteen minutes of three, on April 24th, the remains were removed from the State-House and escorted to the Kensington Depot by the military and firemen.

Meetings were held on the same day by the Methodists at the Union Methodist Church, and by the pupils of the Boys' High School, and Girls' High and Normal Schools, at their respective buildings, to express their feelings on the assassination of the President.

On the same day the President, Andrew Johnson, issued his proclamation, designating May 25th as a day of mourning for the late President. He afterwards changed the date to the 1st of June.

—The Two Hundred and Fifteenth Regiment Pennsylvania Volunteers, known as the Ninth Union

League, left the city on the 26th for the South. This was the last regiment to leave Philadelphia for the war, recruiting having been stopped. It was commanded by Col. Francis Wistar.

—The new Municipal Hospital, at Lamb Tavern road and Hart Lane, in the Twenty-eighth Ward, was formally opened April 27th. Dr. John B. Biddle, president of the commission, delivered the opening address, in which he reviewed the history of the city hospitals, and gave a description of the present one. Dr. McCrea, president of the Board of Health, accepted the building on behalf of the citizens of Philadelphia, and an address was also made by Dr. Wilson Jewell, chairman of the Sanitary Commission.

—An attack was made April 27th on Edward Ingersoll, a well-known citizen, on account of some offensive language used by him in a speech delivered in New York. Mr. Ingersoll defended himself first with a cane, and finally drew a pistol. He was then arrested and taken to the Spring Garden Hall, where he was confined on charge of assault and battery. An excited crowd gathered about the hall, and threats of lynching were frequent. His brother, Charles Ingersoll, arrived for the purpose of giving bail, but a further charge of treason having been preferred, bail was refused. On leaving the hall, Charles Ingersoll was assaulted by the crowd and much bruised, but not seriously injured. Edward Ingersoll was quietly removed from the hall to Moyamensing prison to prevent any further breach of the peace.

—A telegram was received on April 30th from Washington, stating that a plot had been discovered to burn the city on that night. The statement created great excitement, but every precaution was taken to prevent its execution. Nothing of a suspicious character was noticed, but precautions were continued several days.

—The Twenty-fourth Regiment United States Colored Troops left Camp William Penn May 3d for Washington.

—The transport steamer "Benjamin Deford" brought three hundred and fifty-one wounded soldiers from Gen. Sheridan's army on May 8th. On the same day the army hospitals at Broad and Cherry, South Street, Filbert Street, Germantown, Turner's Lane, Haddington, Beverly, and Pittsburgh were finally closed, and their remaining patients transferred to other hospitals.

—The Sixty-second New York, the first of the returning regiments from the seat of war, passed through the city May 10th.

—A hurricane passed over the city May 11th, and did considerable damage, wrecking houses and unroofing buildings. Several persons were injured, but no lives were lost.

—The new building of the Union League, at Broad and Sansom Streets, was opened on the same date without formal ceremonies.

—The Lincoln Monument Association was organized

May 22d, with Alexander Henry as chairman.

—At the convention of the Protestant Episcopal Church the division of the diocese was finally agreed to on May 26th. [1865]

—The Pennsylvania troops began to arrive immediately after the general review at Washington. The Two Hundred and First and Two Hundred and Second arrived on May 27th, and proceeded one to Mauch Chunk and the other to Fort Delaware. On May 31st the first of the Philadelphia troops arrived home. It was the One Hundred and Fourteenth Regiment, known as Collis' Zouaves, and was given a hearty welcome. The men were entertained at the Refreshment Saloon, and, after a street parade, encamped at Camp Cadwalader.

—Thursday, June 1st, was observed as a national fast day, and as a day of national mourning for President Lincoln. No business was done, and the churches held appropriate services.

—A general reception and welcome of Philadelphia troops was held June 10th, Gen. Meade commanding. The troops were reviewed by Governor Curtin and Mayor Henry, proceeding to the Volunteer Refreshment Saloon, where the men were dismissed. The review was held at a grand stand erected at Penn Square, and there were present many prominent army and navy officers. The welcome was somewhat impaired by an unexpected rain, which fell almost in torrents for several hours. Besides the soldiers, the city firemen paraded, a delegation being present from each company. Maj.-Gen. Meade and his staff, escorted by the First City Troop, led the column, and was received with unbounded enthusiasm. Following the general were a number of retired officers of the city and State, mounted, and a detachment of the Sixth Pennsylvania Cavalry, and other cavalry regiments.

There were in line the One Hundred and Fourteenth Regiment (Collis' Zouaves), commanded by Brevet Brig.-Gen. C. H. T. Collis; the One Hundred and Sixteenth, Col. St. Clair A. Mulholland; the One Hundred and Eighteenth (Corn Exchange), Brevet Brig.-Gen. Gwyn; the One Hundred and Twenty-first, Brevet Col. West Funk; the One Hundred and Ninety-eighth (the Sixth Union League), Brevet Brig.-Gen. H. G. Sickel, and detachments of the Second Pennsylvania Artillery, the One Hundred and Eighty-second, the Eighty-sixth, the Ninety-first, the Ninety-eighth, and the Ninety-ninth Infantry Regiments.

—The steamship "Bosphorus," the first of a line of steamers intended to run between Philadelphia, Boston, and Liverpool, arrived on the same day.

—On the same day Gen. Grant was given a formal reception at the Union League house. His reception was very enthusiastic, and the general was nearly three hours engaged in shaking hands with his visitors.

—A writ of *habeas corpus* having been issued by the Supreme Court in a civil suit against Col. Frink, the provost marshal, the sheriff announced on 1865] June 30th that the marshal resisted the order of the court, and refused to appear to answer the writ. He stated to the sheriff's deputy that he was acting under orders from the Secretary of War. On the following day Col. Frink answered the writ, and produced the applicant in court, having reconsidered his refusal. Chief Justice Thompson held him as being in contempt of court, and refused to recognize his reconsideration until he had purged himself of the contempt. After some discussion the explanation of the sheriff was received, and his return to the writ accepted.

—The Ninety-eighth Pennsylvania Regiment, formerly commanded by Brig.-Gen. John F. Ballier, arrived July 1st, and was given a hearty welcome by the German population. It was followed on the 3d by the Ninety-ninth Regiment, Col. Biles, and the Eighty-eighth, Col. Wagner.

—The Fourth of July was enthusiastically celebrated. Owing to the desire for economy the city did not indulge in any costly celebration, but private individuals and organizations made up for the neglect of the city authorities by increased zeal. The Union League had an especially enjoyable celebration at the Academy of Music. In the evening the League gave a fine display of fire-works at Penn Square.

—The last of the prize vessels of the war arrived July 13th. They were the tug-boats "Fisher," the stern-wheel steamer "Cotton Plant," and the steam-boats "Egypt Mills" and "Halifax." They had been captured in the Roanoke River several months before.

—A tremendous rain-storm passed over the northern part of the city July 16th, causing a freshet along the Wissahickon and Schuylkill. Three bridges were swept away, and all the others more or less damaged. The damage was also considerable along the Schuylkill.

—A large sale of government vessels took place at the navy-yard August 10th. Eight steamers, eight tugs, five schooners, a brig, and a bark were sold.

—The Right Rev. Alonzo Potter, bishop of the Diocese of Pennsylvania, of the Protestant Episcopal Church, was buried from Christ Church August 12th. The services were extremely solemn and affecting. The committee of the Diocese of California, in which diocese the bishop had died, presented a letter of condolence on their loss of the bishop, and were publicly thanked by Bishop Stevens for their care and kind words. The burial service of the church was conducted by the Rev. Mr. Washburne and Rev. Mr. Atkins. Rev. Dr. Howe and Bishop Lee each made addresses on the life and character of the deceased bishop. Among the congregation were his brother, Bishop Potter, of New York, and very many of the clergy of the diocese.

—Throughout the months of June and July the passage of troops continued through the city returning from Washington after the grand review. It is estimated that three hundred regiments or portions thereof were entertained at the Refreshment Saloons. The strain upon these institutions was severe, and they were open night and day to accommodate these visitors. Toward the close of July the stragglers of the grand army remained, and from that time until their close the saloons were relieved very considerably.

—The Cooper-Shop and Volunteer Refreshment Saloons, having fulfilled their mission, were formally closed August 28th, after four years and three months service. The event was made the occasion of a grand demonstration at the Academy of Music. This great building was crowded to its utmost capacity by an audience that included every prominent citizen of the city. Ex-Governor Pollock presided, and on assuming the chair gave a short history of the work of the two saloons. One million two hundred meals were served in the two saloons in the course of the war. Hon. Henry D. Moore and Hon. James M. Scovel also made addresses complimenting the committee on the close of their successful labors. The buildings were kept open for transient soldiers until December 1st, when they were finally closed, and on the 21st of the same month they were sold at auction.

—An extensive fire at the drug and paint establishment of French, Richards & Co., at Tenth and Market Streets, on October 3d, destroyed the entire building, involving a loss of about three hundred thousand dollars.

—The General Convention of the Protestant Episcopal Church was held in Philadelphia, commencing its sessions October 4th, and ending on the 24th of the same month.

—On October 5th the steam-frigate "Neshaminy" was launched at the navy-yard in the presence of an immense crowd. She was christened by Miss Hull, the daughter of Commandant Hull.

—At the election held October 10th the Union party carried nearly every office by majorities of from 5000 to 9000. The majorities were as follows:

Auditor-General, Hartranft	(U.),	maj. 8812	over Davis	(Dem.).
Surveyor-General, Campbell	" "	8826	" Linton	"
Mayor, McMichael	" "	5869	" Fox	"
City Treasurer, Bumm	" "	7866	" Johnson	"
City Commissioner, Weaver	(Dem.),	1301	" Given	(U.).
District Attorney, Mann	(U.),	9710	" Brown	(Dem.).
Prothon. C't Com. Pleas, Wolbert	" "	7215	" Reilly	"
City Controller, Lyndall	" "	8651	" Vogdes	"
City Solicitor, Brewster	" "	8242	" Biddle	"

In Select Council the Union party elected all seven candidates, and in Common Council the fifteen members. State Senators Ridgway and Connell, both Union, were elected, and the only Democrats elected were three assemblymen out of eighteen representatives.

—One of the finest displays of the kind ever wit-

nessed was the parade of the firemen October 16th. The day was by common consent made a holiday, and the city was dressed with flags; visitors were attracted from every portion of the adjacent country, and from New York and Baltimore, to view the procession. Beside volunteer firemen of Philadelphia, numerous companies from New York, Boston, Buffalo, Newark, Albany, Jersey City, Lebanon, Allentown, Camden, Reading, Harrisburg, Washington, and other cities participated. The procession occupied more than two hours in passing a given point, and was a complete success in every way.

—The Freedman's Aid Commission was organized October 11th, and the Pennsylvania branch of the American Union Commission on the 17th. Both organizations had for their object the improvement of the condition of the South.

—A fair was held at the Academy of Music commencing October 23d, to aid the Soldiers' and Sailors' Home. The parquet was floored over, and space thus secured for the exhibition of goods. The inauguration ceremonies were conducted by Maj.-Gen. Meade, president of the fair, Lieut.-Gen. Grant, Admiral Farragut, and an executive committee, including the most distinguished officers and civilians. As Gen. Meade, Gen. Grant, and Admiral Farragut appeared together, the entire audience, which filled the balconies, rose and saluted them with long-continued applause. Bishop Simpson opened the proceedings with prayer, and was followed by Gen. Meade, who made a short appeal to the charity of Philadelphia in aid of the thousands of destitute soldiers and sailors wounded in the war. Gen. Grant and Admiral Farragut were introduced to the audience, and Hon. William D. Kelley, George H. Stuart, and others made addresses.

The fair proved a great success, and at its close, November 4th, the gross receipts were stated at \$100,369.60, and the net proceeds at \$88,354.60.

—The Tunisian embassy, consisting of Gen. Othman Hashen, special ambassador from his Highness, the Bey of Tunis, Col. Ramiro Gaita, aide-de-camp to the general, and Chevalier Antoine Conti, secretary and interpreter, accompanied by Amos Perry, Esq., United States consul to Tunis, passed through Philadelphia, and examined the principal objects of interest, October 24th and 25th.

—The funeral of Col. Ulric Dahlgren, son of Admiral Dahlgren, who was shot in a raid before Richmond, took place November 1st. Col. Dahlgren was a student of law when the war broke out, but immediately joined the army in the Ordnance Department at Washington, D. C. In 1863 he commanded a raid on the city of Richmond, with the alleged design of seizing Jefferson Davis. His command penetrated the outlines of Richmond, but Dahlgren was killed by the local militia.

The funeral took place from Independence Hall, and after lying in state the body was escorted to the grave by three companies of marines, the First City

Troop, and a battalion of the Seventh Regiment Seventh Army Corps.

—On October 30th, Maj. Weaver, the [1865 Democratic candidate for city commissioner, filed a petition in Common Pleas Court asking that the certificate granted to John Given be revoked on account of fraudulent returns in the soldiers' vote, and alleging that he [Weaver] had a legitimate majority of 1301 votes. The petition was signed by members of both political parties. After a long contest Maj. Weaver received the position.

—Washington L. Lane, for many years managing editor of the *Public Ledger*, died November 14th, in his fifty-second year. He had been connected with the *Ledger* for twenty-eight years.

—A boiler explosion at the Penn Treaty Iron-Works resulted in the death of Patrick Finnegan and injuring three others.

—J. A. Van Amburgh, the famous wild beast tamer, died in Philadelphia November 29th. Van Amburgh had spent his entire life in the collection and exhibition of wild animals, and was remarkably successful.

—The monitor "Tunxis" was launched from the yard of Messrs. Cramp & Sons November 30th.

—The President's message, received December 6th, excited very general interest in Philadelphia. His policy toward the South, as indicated in the message, was very generally approved.

—The *Public Ledger* of June 10th, said, "As our citizens will feel a great interest to-day in the Philadelphia regiments furnished during the war, we present the following list. *It is not unlikely that a few of them may be omitted*, as the difficulty of tracing them up is very great. In a large majority of cases the regiments named were recruited (entirely) from our own citizens. In some cases, however, they were partly recruited here and partly from the interior of the State. Of the colonels that have commanded them at different times, at least fourteen were killed in battle, and two died 'with their harness on' in the service. Eighteen of them reached the grade of brigadier-general, and two became major-generals. *Many of them, however, who did not receive promotion were much better entitled to it than some of those who were accorded their star.*¹

THREE MONTHS' MEN.—(April and May, 1861.)

17th P. V., Col. F. E. Patterson.
18th P. V., Col. William D. Lewis, Jr.
19th P. V., Col. Peter Lyle.
20th P. V., Col. William H. Gray.
21st P. V., Col. John F. Ballier.
22d P. V., Col. T. G. Morehead.
23d P. V., Col. Charles P. Dare.
24th P. V., Col. J. T. Owen.

THREE YEARS' MEN.

23d, Col. D. B. Birney (Birney's Zouaves), subsequently Cols. Thomas A. Neill and John Ely.
26th P. V., Col. William F. Small, subsequently Col. B. C. Tilghman.
27th P. V., Col. A. Buschbeck.

¹ Many of these officers afterward received brevets of major-general and brigadier-general.

28th P. V., Col. John W. Geary, subsequently Cols. Korponay and Ahl.
 29th P. V., Col. John K. Murphy, subsequently Col. William Richards, Jr.
 31st P. V. (2d Pa. Reserves), Col. William B. Mann, subsequently Col. McCandless.
 32d P. V. (3d Reserves), Col. H. G. Sickel.
 33d P. V. (4th Reserves), Col. R. G. March, subsequently Col. A. L. Magilton and Col. Woolworth, the latter killed in Grant's Chickahominy campaign.
 41st P. V. (12th Reserves), Col. John H. Taggart, subsequently Col. M. D. Hardin.
 44th P. V. (1st Cavalry Reserves), Col. George D. Bayard, killed at Fredericksburg, subsequently Cols. Owen Jones and J. P. Taylor.
 58th, Col. J. Richter Jones, killed near Newbern, N. C.
 59th (2d Cavalry), Col. R. Butler Price, subsequently Col. J. B. Brinton.
 60th (3d Cavalry), Col. W. W. Averill, subsequently Col. J. B. McIntosh and Col. E. S. Jones.
 61st P. V., Col. O. H. Rippey, killed at Fair Oaks, subsequently Col. George C. Spear, killed at Chancellorsville, and Col. George F. Smith.
 67th, Col. John F. Staunton.
 68th (Scott Legion), Col. A. H. Tippen.
 69th, Col. J. T. Owen, subsequently Col. Dennis O'Kane.
 70th (6th Cavalry, Rush's Lancers), Col. R. H. Rush, subsequently Col. Charles R. Smith.
 71st (California Regiment), Col. E. D. Baker, killed at Ball's Bluff, subsequently Cols. I. J. Wistar and Richard Penn Smith.
 72d (Fire Zouaves), Col. D. W. C. Baxter.
 73d, Col. John W. Koltes, killed in battle Aug. 22, 1862. The regiment was afterward commanded by Cols. Muhleck and Moore.
 74th, Col. Alexander Schimmelpfenig.
 75th, Col. Henry Bohlen, killed near Rappahannock Aug. 22, 1862. The regiment was afterward commanded by Cols. Schapp and Mahler.
 88th, Col. George P. McLean, subsequently Col. George M. Gila.
 89th (8th Cavalry), Col. E. G. Chorman, subsequently Cols. D. M. Gregg and P. Huey.
 90th, Col. Peter Lyle.
 91st, Col. E. M. Gregory.
 95th, Col. John M. Gosline, killed at the battle of Gaines' Mills, subsequently Col. G. V. Town, killed at the second battle of Fredericksburg.
 98th, Col. John F. Ballier.
 99th, Col. Thomas W. Sweeney, subsequently Cols. A. S. Leidy and E. R. Biles.
 106th, Col. T. G. Morehead.
 109th (11th Cavalry), Col. Josiah Harlan, subsequently Col. S. P. Spear.
 — Col. H. J. Stainrook, killed at Chancellorsville. This regiment was subsequently commanded by Col. Ralston.
 110th, Col. W. D. Lewis, Jr., subsequently Col. James Crowther, killed at Chancellorsville, and Col. Rogers.
 112th, Col. Charles Angeroth, subsequently Col. A. A. Gibson, Col. James L. Anderson, killed near Petersburg, and Col. McClure.
 113th, Col. William Frishmuth, subsequently Cols. Pierce and Reno.
 114th, Col. Charles H. T. Collis.
 115th, Col. Robert E. Patterson, subsequently Col. F. A. Lancaster, killed at Chancellorsville.
 116th, Col. Dennis Heenan, subsequently Col. St. Clair Mulholland.
 117th (13th Cavalry), Col. James A. Gallaher, subsequently Col. M. Kerwin.
 118th, Col. Charles M. Prevost, subsequently Col. James Gwyn.
 119th, Col. Peter C. Ellmaker, subsequently Col. Gideon Clark and Maj. William C. Gray.
 121st, Col. Chapman Biddle, subsequently Col. A. Biddle.
 149th, Col. Roy Stone.
 150th, Col. L. Wistar.
 180th (19th Cavalry), Col. Alexander Cummings, subsequently Lieut.-Col. J. C. Hess.
 183d, Col. George P. McLean, subsequently Col. John F. McCullough, killed in Grant's Virginia campaign, and Cols. James C. Lynch and G. F. Egbert.
 198th, Col. H. G. Sickel (one year).
 213th, Col. John A. Gorgas (one year).
 214th, Col. David B. McKibben (one year).
 215th, Col. Frank Wistar (one year).

"To the above should be added the eight or ten regiments of colored troops recruited in the city, the designations of which are unfortunately not to be found in our State Reports. The first five regiments of Philadelphia colored troops are numbered the Third, Sixth, Eighth, Twenty-third, and Twenty-fifth United States. We have not included the regiments of militia and the independent companies and batteries which volunteered during the several invasions of the State. These organizations, as well as we can recall them, are as follows:

30th Pennsylvania Militia, Col. William B. Thomas.
 31st Pennsylvania Militia, Col. John Newkumet.
 40th Pennsylvania Militia, Col. Alfred Day.
 47th Pennsylvania Militia, Col. J. P. Wickersham.
 49th Pennsylvania Militia, Col. Alexander Murphy.
 51st Pennsylvania Militia, Col. O. Hopkinson.
 52d Pennsylvania Militia, Col. Wm. A. Gray.
 59th Pennsylvania Militia, Col. George P. McLean.
 60th Pennsylvania Militia, Col. William F. Small.
 — Col. N. B. Kneass.
 City Troop, Capt. Samuel J. Randall.
 Battery, Capt. E. Spencer Miller.
 Battery, Capt. Landis.
 Battery, Capt. Hastings (one year).
 Company of Police, Capt. John Spear.
 Independent Company, Capt. William B. Mann."

During the summer of 1865 the great armies were disbanded, and the victors and vanquished returned to their homes to resume the work of peace. On Dec. 1, 1865, President Johnson annulled the suspension of the writ of *habeas corpus*, and on April 2, 1866, he announced by proclamation that the rebellion had ceased. On July 4, 1866, Pennsylvania closed her record made during the progress of the great rebellion.¹ "Her flags," says the *Public Ledger*, "carried thousands of miles by her sons, and always borne side by side with the foremost in the strife, were on that day returned to the State, to remain as glorious memorials of Pennsylvania's devotion to the Union. These flags, with their inscriptions alone, tell the history of the part enacted by the State during five years of war, and it was therefore fitting that when returned to the commonwealth they should be accompanied by all the solemnity which such a record deserves. The Legislature at an early day determined that this should be the case, and the appointment of a committee to arrange for the presentation was the first step in the movement which culminated in the grand spectacle witnessed in Philadelphia on that occasion. The fact was announced throughout the State, and no event ever created more excitement among the citizens of Pennsylvania than did this, and crowds came from every direction to take part in the pageant or to

¹ New York State sent into the army, during the war, 455,468 men; terms of all reduced to three years' service, 380,980. The population of New York in 1860 was 3,851,563; proportion of whole number of soldiers to population, 1 in 8.45; proportion of three years' service, 1 in 10.12. Pennsylvania sent into service 366,323 soldiers; terms reduced to three years' service, 267,558; population in 1860, 2,906,115; proportion of whole number of soldiers to population, 1 in 7.92; proportion to three years' soldiers, 1 in 10.08. Pennsylvania, therefore, furnished more soldiers, in proportion to her population, than New York.

witness it. Every train reaching Philadelphia, commencing as early as Sunday evening and continuing as late as Wednesday morning, was filled to its utmost capacity. Pittsburgh, Harrisburg, Lancaster, Pottsville, and other large and small towns sent their quota to swell the throng. The people of other States were not less curious, and hundreds came from New York, Baltimore, Wilmington, and Trenton, and towns at a less distance. Hotels were all filled, and storekeepers did a thriving business in providing for the wants of the strangers. The soldiers, too, came from every direction. They came once more, and for the last time, to march with the flags they had so often rallied around on the battle-field.

"The day was everything the most exacting could desire.

"At daybreak the national salutes announced the advent of the Fourth of July, and citizens prepared to give the finishing touches to decorations commenced previously. Everywhere the display of bunting was profuse. The national colors were thrown to the breeze from flagstaffs and windows, or were used to decorate the fronts of houses, and the result was that on all the main thoroughfares, and especially on the streets on the route of the parade, the 'red, white, and blue' were the predominating colors, and gave to the city a gala appearance such as has rarely heretofore been witnessed. It was truly a flag-jubilee, and every individual seemed to consider it his individual duty to assist to the full extent of his power in making the day one long to be remembered. The number of magnificent displays at private dwellings exceeded any previous attempt in this city, while the larger stores on Chestnut and Arch Streets made displays of corresponding magnificence. . . .

"At ten o'clock the procession moved, headed by a detachment of police mounted, in the following order:

"Henry Guards, Capt. Spear.
Maj.-Gen. W. S. Hancock and Staff.
Detachment of City Troop, mounted.
Headquarters flag, marked 2d Army Corps.

First Division.

Gen. J. S. Negley and Staff.
Headquarters flag, marked 2d Army Corps.
Mounted and dismounted officers, under command of Gen. E. L. Dana.
Logan Guards of Lewistown, Col. Selheimer.
Washington Artillery of Pottsville, Capt. James Wren.
National Light Artillery of Pottsville, Capt. E. McDonnell.
Allen Infantry of Allentown, Lieut. J. T. Will.
Ringgold Light Artillery of Reading.

Second Division.

Maj.-Gen. Patterson and Staff.
23d Regiment, Col. Glenn; 26th Regiment, Gen. Bodine; 28th Regiment, Gen. Flynn; 29th Regiment, Col. J. K. Murphy; 72d Regiment; 71st Regiment; 73d Regiment; 90th Regiment, Gen. Peter Lyle; 98th Regiment, Gen. Ballier; 99th Regiment, Col. Peter Fritz; 69th Regiment; 95th Regiment; 118th Regiment, Col. O'Neill; 119th Regiment, Col. G. Clark; Pennsylvania Reserves; and 81st, 82d, 84th, 87th, and 91st Regiments.

Third Division.

Gen. Charles T. Campbell and Staff.
101st Regiment, 104th, 114th, 118th, 119th, 121st, 159th, 157th, 152d, Veteran Artillery Corps, with cannon, and 195th Regiment.

Fourth Division.

Maj.-Gen. D. McM. Gregg and Staff.
Headquarters flag of the Second Brigade.
Gen. Leiper and Staff.
6th Regiment Cavalry, Maj. B. H. Herkness; 3d Pennsylvania Cavalry, Maj. Charles Treichel; 2d Pennsylvania Cavalry, Col. W. W. Saunders; 8th Pennsylvania Cavalry, Maj. W. A. Come; 5th Pennsylvania Cavalry, Col. Klientz; 13th Pennsylvania Cavalry, Lieut.-Col. J. H. Dewees; 15th Pennsylvania Cavalry, Col. C. M. Betts.
Color Guard, armed with sabres.
Maj.-Gen. George G. Meade and Staff.
Battle-flag of the commander of the Army of the Potomac.
Escort of cavalymen, under the command of Col. Dewees.
Invalid officers in carriages.
The Scott Legion, 168th Pennsylvania Regiment, Col. A. H. Tippen.

Fifth Division.

Maj.-Gen. John W. Geary and Staff.
The White Star Division colors and Color Guards, who did not parade as regiments or detachments.
United States Marines, Maj. Thomas S. Field.

Sixth Division.

Maj.-Gen. S. W. Crawford and Staff.
Hon. Andrew G. Curtin, Governor of Pennsylvania, and Staff, preceded by an orderly carrying the State flag.
The Soldiers' Orphans—Guard of Honor.

Seventh Division.

Maj.-Gen. John R. Brooks and Staff.
Gray Reserves, Col. C. M. Prevost.

"The reception of the flags took place at Independence Square, and was very impressive. After this ceremony Gen. Henry White, chairman of the committee of arrangements, made a brief address. After prayer by Rev. Dr. Brainerd, Gen. Meade advanced with the colors of the Eighty-second Regiment in his hand, and in a formal address delivered them to Governor Curtin. Governor Curtin then made a brief reply and received the flags on behalf of the State. The meeting then adjourned with a benediction by Bishop Simpson."

The Christian Commission.—Philadelphia, lying in the immediate pathway of the troops from the North to Washington, was not slow in showing her interest in their welfare. The first recorded public movement in the city for the relief of the soldiers is to be found in the following letter, which was read by Rev. Dr. W. J. R. Taylor, then pastor of the Third Reformed Dutch Church of Philadelphia, to his congregation on Sunday, April 21, 1861:

"PHILADELPHIA, April 20, 1861.

"REV. MR. TAYLOR:

"Dear Sir,—It is understood that a hospital will be forthwith opened in this city for the reception of the sick and wounded of our army, and it is proposed that the ladies of the several churches should meet next week to make arrangements for the preparation of bedding, bandages, lint, etc. To perfect such arrangements and secure concert of action, it is requested that in each church one or more ladies should be appointed to attend a general meeting, at such time and place as shall be made known through the papers.

"This work of charity has received the hearty approval of many ladies, but was proposed too late for a notice in the evening papers, and as the suddenness of the emergency forbids the delay of another week, the notice from the pulpit, if not the best, is now the only practicable plan. You are therefore respectfully requested to call such a meeting of the ladies of our church.

"Very respectfully,

"MRS. ISRAEL BISSELL, MISS ELIZA AUGSTIN, MRS. S. CALHOUN,
per E. M. HARRIS, 1116 Pine Street."

The call was cordially responded to the next morning by a number of ladies, who met in the lecture-room of the church. The meetings were continued for several weeks, until the Ladies' Aid Society, which made its headquarters at Dr. Boardman's church, absorbed this and the local church efforts in its broad charities. The Philadelphia Ladies' Aid Society was one of the first in the field, and managed its affairs with great success. Over twenty-four thousand dollars in cash were raised and expended, beside large supplies of stores, averaging in value over twenty thousand dollars each year. The labors of its secretary, Mrs. Dr. John Harris, and her associates in the armies in the East and the West, are deserving of all praise.

On April 22d, John Patterson visited the army to minister to the soldiers, probably the first in the field for this benevolent purpose. The Philadelphia Young Men's Christian Association soon after organized an army committee for local work. Auxiliary associations of women were formed in all of the Northern States, and when wounded and sick soldiers appealed for relief, a few weeks later, a general system for the purpose was so well organized that all demands were at first promptly met.

The Young Men's Christian Commission of Philadelphia reorganized their army committee on July 4, 1861, with P. B. Simons as chairman. The committee did a large local work, and became a valuable auxiliary of the Christian Commission. On Oct. 28, 1861, George H. Stuart, chairman, John Wanamaker, corresponding secretary, James Grant, John W. Sexton, and George Cookman, of the Young Men's Christian Association of Philadelphia, issued a call for a convention to be held at the rooms of the Young Men's Christian Association of New York, on November 14th, "for the purpose of systematizing and extending the Christian efforts of the various associations among the soldiers of the army." At the time appointed the convention met, with delegates from various cities, and the following from Philadelphia: George H. Stuart, Rev. S. J. Baird, D.D., John Wanamaker, and A. M. Burton. Upon the organization of the convention George H. Stuart was elected president, and John Wanamaker was appointed on the business committee. After a session of two days the Christian Commission was organized, with George H. Stuart and John P. Crozer as members from Philadelphia. At the first meeting of the Commission George H. Stuart was elected permanent chairman, and B. F. Maniere secretary and treasurer. As soon as the Commission was organized it received the official indorsement of the government at Washington. The headquarters of the Commission were first established at No. 2½ Wall Street, New York, but in September, 1862, they were removed to the office and store of the chairman, 13 Bank Street, Philadelphia. At the same time Jay Cooke was appointed on the Commission, in place of B. F. Maniere, resigned, and Joseph Patterson, of

Philadelphia, was made treasurer. During the war the Commission show a total of receipts and values of \$6,291,107.68. In the first year the receipts amounted to \$231,000; in the second year they were \$916,837; in the third year they were \$2,882,347; from January to May, 1865, one-third of a year of active campaign, they were \$2,228,105, which rate, continued twelve months, would have given for the last year \$6,684,315. The total cash received from Philadelphia for the uses of the Commission was \$860,306.85, being nearly three times as large as the receipts from any city in the country.

Geo. H. Stuart

On Dec. 1, 1865, the executive committee passed a resolution to terminate the labors by the United States Christian Commission and close its offices on Jan. 1, 1866. The executive committee again met Jan. 11, 1866, and arrangements were made for holding a final anniversary of the Commission, in Washington, on February 11th. Before terminating its existence the committee appointed George H. Stuart, Joseph Patterson, Stephen Colwell, John P. Crozer, and Matthew Simpson, D.D., trustees, "to receive and hold the funds now in the treasury and all that may hereafter be given to the Commission," etc. Mr. Crozer died on the 11th of March, 1866, and on the 13th Horatio Gates Jones was chosen to fill the vacancy, and also elected secretary of the board.

The final meeting of the executive committee took place in the E Street Baptist Church, on Feb. 10, 1866. After some preliminary business was transacted, the following complimentary resolution was voted to the chairman, and in the evening the Commission finally adjourned:

"The executive committee feel it a duty and a pleasure to place on record their high appreciation of the able and faithful service of their chairman, George H. Stuart. His liberality in furnishing office and store room, and at times the services of his clerks, was of great value, especially in the early days of the Commission. His business talent and skill enabled us to purchase cheaply and well, and to keep all the accounts of our extensive and diversified operations in the most thorough manner. His unbounded enthusiasm was communicated not only to us,

but to all who came near him, and enlisted the sympathies and aid of thousands in our work, while his personal intercourse with us, in all our long and trying deliberations, has been delightful. As we separate, our prayers go up to our Father in heaven that his days may be many, useful, and happy."¹

The Cooper-Shop Volunteer Refreshment Saloon took its name from the cooper-shop of Messrs. Cooper & Pearce, which stood about fifty yards south of Washington Avenue on Otsego Street. It was a two-story brick building, with a front of thirty-two feet on Otsego Street, with a depth of one hundred and fifty feet. Before the war it was used for the manufacture of shooks for the West Indies sugar trade. At the instigation of William M. Cooper and his partner, H. W. Pearce, it was fitted up as a volunteer refreshment saloon, and during the war distributed refreshments to over six hundred thousand

topher Jacoby, James Tosing, E. S. Cooper, Joseph Coward, J. T. Packer, Andrew Nebinger, and Robert Nebinger. The names of the ladies who originated the saloon should also be preserved in Philadelphia history. They are as follows: Mrs. William M. Cooper, Mrs. Grace Nickels, Mrs. Sarah Ewing, Mrs. Elizabeth Vausdale, Miss Catharine Vausdale, Mrs. Jane Coward, Mrs. Susan Turner, Mrs. Sarah Mellen, Mrs. Catherine Alexander, Mrs. Mary Plant, Mrs. Mary Grover, Miss Clara T. Cooper, Miss Mary Ann Haines, and Mrs. Capt. Watson.

The first body of troops fed at the saloon was the Eighth New York Regiment, numbering seven hundred and eighty men, commanded by Col. Blenker, while on its way to Washington on May 27, 1861; the last regiment fed was the One Hundred and Fourth

COOPER-SHOP VOLUNTEER REFRESHMENT SALOON.

soldiers passing through the city to and from the seat of war. The saloon was opened in May, 1861, under the management of Messrs. William M. Cooper, H. W. Pearce, A. M. Simpson, W. R. S. Cooper, Jacob Plant, Walter R. Mellon, A. S. Simpson, C. V. Fort, William Morrison, Samuel W. Nickels, Philip Fitzpatrick, T. H. Rice, William M. Maull, John Grigg, R. H. Ransley, L. B. M. Dolby, Capt. A. H. Cain, William H. Dennis, Capt. R. H. Hoffner, L. W. Thornton, Joseph E. Sass, T. L. Coward, E. J. Herity, C. L. Wilson, and Rev. Joseph Perry. The following were afterward added by election: R. G. Simpson, Isaac Plant, James Toomey, H. H. Webb, William Sprowle, Henry Dubosq, G. R. Birch, Chris-

Pennsylvania, Col. Kephart, numbering seven hundred and forty-eight men, on Aug. 28, 1865.

The managers of the Cooper-Shop Refreshment Saloon also established a hospital for those soldiers who were sick or wounded, and who were unable to leave Philadelphia, and who required rest, or nursing and medical attendance, to restore them to health and duty. The hospital was under the charge of Dr. Andrew Nebinger, assisted by his brother, Dr. George W. Nebinger, and Miss Anna M. Ross. After the death of Miss Ross, Mrs. Abigail Horner became the lady principal of the "Cooper-Shop Hospital."

On May 17, 1863, the Cooper-Shop Refreshment Saloon Committee received as a donation from Robert P. King, president of the Mount Moriah Cemetery, a large burial-lot for interment of the remains of such patients as might die in the hospital.

¹ Annals of the United States Christian Commission, by Rev. Lemuel Moss.

At various times the following ladies assisted in the management of the hospital: Mrs. J. Floyd, Mrs. J. Perry, Mrs. R. P. King, Mrs. E. Roberts, Mrs. William M. Cooper, and Mrs. P. Fitzpatrick.

To provide a home for disabled soldiers the Cooper-Shop Soldiers' Home was chartered by the Court of Common Pleas for the county of Philadelphia on Feb. 15, 1862. The following gentlemen were constituted by the charter the first board of managers: William M. Cooper, Cornelius V. Fort, William M. Maull, Adam M. Simpson, Arthur S. Simpson, Henry W. Pearce, William H. Dennis, J. B. M. Dolby, R. H. Rausley, Philip Fitzpatrick, B. Frank Palmer, E. S. Hall, W. R. S. Cooper, R. G. Simpson, William Sprole, and H. R. Warriner.

The following members of the committee of the Cooper-Shop Refreshment Saloon were also members of the corporation: Thomas Smith, C. W. Nickels, Dr. A. Nebinger, L. W. Thornton, Capt. A. H. Cain, Capt. R. H. Hoffner, H. H. Webb, E. J. Heraty, Jacob Plant, James Coward, Jr., Tyler L. Coward, W. R. Mellen, Isaac Plant, Henry Dubosq, George R. Birch, Thomas H. Rice, J. P. Dettra, George Lefer, James T. Packer, William Morrison, James Toomey, Edward Whetstone, Robert P. King, William Struthers, Joseph Perry, Evan Randolph, George D. Hoffner, Charles Spencer, Charles C. Wilson, H. A. Wetherill, Thomas M. Coleman, J. D. Watson, Charles Ide, J. Gates, James Sullender, C. L. Pascal, Joseph E. Sass, John L. Neill, John Grigg, Capt. A. D. Davis, S. Morris Waln, Daniel Smith, Samuel Welsh, William Bucknell, George F. Lewis, John T. Lewis, J. P. Crozer, E. Wallace, M.D., Caleb Cope, M. L. Hollowell, Thomas Sparks, Jr., G. K. Ziegler, and Joseph Jeanes.

The first meeting of the managers was held on June 5, 1862, but they could not obtain a suitable building until September, 1863, when they took possession of one that had been used for hospital purposes, at the northwest corner of Race and Crown Streets. After necessary repairs the home was opened on Dec. 22, 1863, with appropriate ceremonies. By an act of the Legislature the Cooper-Shop Soldiers' Home was afterward merged into "The Soldiers' Home of Philadelphia."

The Union Volunteer Refreshment Saloon was originally organized in May, 1861, as the Volunteer Refreshment Saloon. A boat-house was secured at Washington and Delaware Avenues, and on June 1st a lease was obtained and the building appropriately fitted up for a soldiers' refreshment saloon. To accommodate the sick a hospital was opened, and placed under the charge of Dr. Eliab Ward, who gave his services throughout the war free of charge. Nearly eleven thousand sick and wounded in the progress of the war were nursed and received medical attendance at this hospital, and nearly twice that number had their wounds dressed, and over forty thousand had a night's lodging. The necessities of the association soon out-

grew the building first taken, and additions were made until a space ninety-five by one hundred feet was covered, the Philadelphia, Wilmington and Baltimore Railroad leasing the ground and refusing any compensation. In its enlarged dimensions twelve hundred men could be supplied at once, and fifteen thousand have been received in a single day. An accurate record was kept of all its operations, and the books show that over 800,000 soldiers were received, and 1,025,000 meals were furnished, the entire amount of money expended being \$98,204.34, and material estimated at \$30,000, an aggregate of \$128,204.34, all of which was received by voluntary contributions. The following were the officers of this noble charity: Chairman, Arad Barrows; Recording Secretary, J. B. Wade; Treasurer, B. S. Brown; Steward, J. T. Williams; Physician, E. Ward; Corresponding Secretary and General Financial Agent, Samuel B. Fales.¹

Committee of Gentlemen, Arad Barrows, Barzilla S. Brown, Joseph B. Wade, Isaac B. Smith, Sr., Erasmus W. Cooper, Job T. Williams, John W. Hicks, George Flomerfelt, John Krider, Sr., Isaac B. Smith, Jr., Charles B. Grieves, James McGlathery, John B. Smith, Curtis Myers, Dr. Eliab Ward, Christian Powell, W. S. Mason, Charles S. Clampitt, D. L. Flanagan, Richard Sharp, James Cassel, Samuel B. Fales, Robert R. Corson, and John T. Wilson.

Committee of Ladies, Mesdames Mary Grover, Hannah Smith, Priscilla Grover, Margaret Boyer, Eliza J. Smith, Annah Elkinton, Ellen B. Barrows, Mary L. Field, Ellen J. Lowry, Mary D. Wade, Eliza Plummer, Mary A. Cassedy, Mary Lee, Emily Mason, Mary Green, Eliza Helmbold, Elizabeth Horton, Sarah Femington, Kate B. Anderson, and Hannah F. Bailey, and Misses Sarah Holland, Catherine Bailey, Amanda Lee, Anna Grover, Martha B. Krieger, Annie Field, and Mary Grover.

Southwark, where the Cooper-Shop Volunteer Refreshment Saloon and the Union Refreshment Saloon were founded, has been divided into parties as to which was the first established. They both opened almost simultaneously at the same time by a natural impulse, in which the women of Southwark are entitled to the greatest distinction. They saw the soldiers landing at Washington Street wharf in the early days of the war hot, dusty, tired, thirsty, and hungry, with no supplies of their own, and without the means even of obtaining a drink of water. They rushed to

¹ Soon after the close of the war the United States offered to give to the friends of Mr. Fales one of the columns of the Bank of Pennsylvania to place on the battle-field at Gettysburg. It was to have a tablet in bronze, with an inscription of the services of Mr. Fales as the founder of the Union Refreshment Saloon; but Mr. Fales, who always avoided publicity, objected, and so the project was not carried into effect. The government did, however, give to the saloon the column, and it is now in possession of E. D. Baker Post, No. 8, G. A. R., which intends to erect it over the graves of their comrades in Glenwood Cemetery. Mr. Fales, who was a man of large means and scholarly tastes, gave his almost exclusive attention for over four and a half years to this work.

their own homes, and from their family supplies—not over-abundant—brought forth food, coffee, and other comforts, and proceeded at once to cook and prepare repasts. What they did was approved by their fathers, husbands, and brothers, and the regular organization of associations to manage the refreshment saloons followed.

CHAPTER XXVII.

PHILADELPHIA AFTER THE CIVIL WAR.

WE purpose, in this chapter, to give a brief sketch of the history of the city during the period succeeding the war down to the present time. Events crowd so thickly upon us in those years, and most of them, by the recency of their occurrence, are fixed so firmly in the memory of Philadelphians, that it is necessary to dwell upon those only which are of particular interest as a matter of historical record. Our narrative, therefore, for this period, will be concise and lacking in the detail which, in the earlier and less familiar years, was indispensable to a thorough knowledge of the city's affairs, its progress, and its public men. Pains have been taken, however, to omit reference to no event which had an important bearing on our municipal development, or which, at the time of its happening, created a feeling of interest among our population.

The year 1866 was one of intense excitement politically. The tendency of the Johnson Republicans, or Conservatives, as they styled themselves, to coalesce with the Democrats was the cause of no small concern to the Republican leaders who supported the reconstruction acts of Congress. The followers of President Johnson, by their skillful use of the Federal patronage at their command, did much to strengthen his policy among the politicians. Nor were they at all slow in appealing directly to the people through popular methods of campaigning that attracted widespread attention. The celebrated "arm-in-arm convention," which met on the 14th of August, with delegates from every portion of the country, served not a little to intensify the agitation that was then prevailing throughout the Union. With Gen. John A. Dix as its temporary chairman, and Senator Doolittle as permanent chairman, it remained in session for three days in a peculiarly constructed building on Girard Avenue, between Nineteenth and Twentieth, known as the "Wigwam." The epithet by which this convention was long afterward known, arose from the fact that ex-Governor James L. Orr, of South Carolina, and Gen. Couch, of Massachusetts, on the first day of its meeting, walked down the aisle to their seats with their arms interlocked. Such was the bitterness of feeling which this gathering of Unionists and ex-Confederates excited that it was necessary

to keep an artillery company under arms in order to prevent its sessions from being broken up by a riot. Two weeks afterward President Johnson himself arrived in the city, accompanied by Secretary Seward, Gen. Grant, and other distinguished men. This was a portion of the famous tour which, in the nomenclature of national politics, was described as "swinging around the circle." Mr. Johnson was received by a great procession of the militia and firemen. He made an earnest speech from the balcony of the Continental Hotel.

The Republicans who were opposed to the President, in order to counteract the effect of these demonstrations, had called a convention of Southern loyalists, which met at National Hall on the 3d of September, and also a convention of Northern loyalists at the Union League House. James Speed, of Kentucky, presided over the former, and Andrew G. Curtin over the latter. The result of these gatherings was to heaten the political campaign of the autumn to a high degree of intensity. In the election John W. Geary, the Republican candidate for Governor, obtained over Heister Clymer, Democrat, a majority of more than 5000 votes. Joshua T. Owen, who headed the local ticket, was elected recorder of deeds by 1329 majority, and Mr. James McManes, who had not yet become so powerful in the politics of the community as he was in no long time destined to be, was chosen prothonotary of the District Court by a majority which was only a little less than that of Gen. Geary.

The coldest day ever known in Philadelphia was the 7th of January, 1866, when the thermometer at the Merchants' Exchange fell as low as eighteen degrees below zero. The Delaware River was frozen over, but the temperature soon began to moderate, and the ice gave but little of the trouble that was caused in the terrible winter of 1856.

The murder of Miss Mary L. Watt, on Queen Street, Germantown, by Christian Berger, on the 6th of January, together with the discovery of the dead body of Berger in his cell while he was awaiting the death sentence, and the brutal killing of Mrs. Elizabeth Miller, at her house on Buttonwood Street, by Gottlieb Williams—a crime for which Williams was hanged on the 4th of June of the following year—created much excitement. But the feeling caused by these deeds was as nothing when compared with the horror of the community on learning that Christopher Deering and his family had been slain on the 10th of April in their house on Jones' Lane in the "Neck." This was the most terrible murder that had ever been perpetrated in Philadelphia. Deering, his wife, four children, Elizabeth Dorlan, and Cornelius Carey were the victims of a hired man, Anton Probst. It was not until the 12th of April that Probst was accidentally captured, and public feeling ran high against him. There was a great funeral procession which followed the bodies of the

murdered family from the undertaker's, at Thirteenth and Chestnut Streets, to St. Mary's Cemetery on Passyunk Avenue. Probst was speedily convicted. He made a confession, stating that the monstrous crime was all his own work, and on the 8th of June he was hanged at Moyamensing prison by Sheriff Howell.

The attempts which were made by the Fenian Brotherhood in the United States to invade Canada had not a few sympathizers in Philadelphia. They demonstrated their friendly feeling by a mass-meeting at Sansom Street Hall, on the 22d of January, 1866, at which well-known members of the Fenian order from all portions of the country were present. Several months later, James Stephens, the head centre of the brotherhood, paid a visit to Philadelphia, and delivered an address at National Hall. For the next two or three years such meetings were frequent. Perhaps the most notable demonstration made by the Fenian societies during this period of agitation was the public funeral procession, on the 8th of January, 1867, when five thousand men followed hearses on which were displayed the names of Allen, Larkin, and O'Brien, who had been hanged by the English government.

A fire, which destroyed a million dollars' worth of property at the dry-goods house of James, Kent, Santee & Co., on Third Street, above Race, occurred on the 26th of February, 1866. Another disastrous conflagration of this year was the destruction of the Tacony Print-Works of A. S. Lippincott, by incendiaries, on the 12th of July, causing a loss of upward of a million dollars. On the 4th of August the old Moyamensing Hall, on Christian Street, above Ninth, was set on fire and partially destroyed.

The last-named fire grew out of the alarm which an epidemic of Asiatic cholera had excited. The disease was first discovered in the city about the 1st of July, and rapidly spread. When the authorities wished to use Moyamensing Hall as a hospital, the turbulent population in the neighborhood threatened to burn it down, and they carried their threat into execution. The city was not rid of the dread disease until the 28th of November, when the Board of Health made a declaration to that effect. The number of victims to the pestilence was eight hundred and ninety-nine.

On the 23d of June, 1866, Chestnut Street bridge, on which work had first been begun Sept. 19, 1861, was opened by Mayor McMichael, City Councils, and the chief engineer, Strickland Kneass.

An extraordinary event was the killing of George Ellar in the Quarter Sessions court-room on the 20th of February, 1867. Nearly a year before Ellar had committed an outrageous assault on a daughter, aged twelve years, of Thomas Leis. The father, maddened not less by the nature of the offense than by the law's long delay in punishing the perpetrator, drew a pistol on Ellar when he was finally put on trial before Judge Ludlow, and killed him almost instantly. Public

sympathy was strongly on the side of the avenger, and a month later he was acquitted on the ground of insanity.

A terrible disaster took place on the 6th of June, 1867, when a boiler in the steam saw-mill of Geasy & Ward exploded with tremendous force. The mill, which was located on the south side of Sansom Street, above Tenth, was almost totally demolished and made level with the pavement. Twenty-two dead bodies were taken out of the ruins, and pieces of the boiler were found as far distant as Eleventh and Chestnut Streets. On the night of the 19th of June the New American Theatre, on Walnut Street above Eighth, conducted by Robert Fox, was destroyed by fire. A performance called "The Demon Dance" was going on when the flames were discovered; but everybody in the theatre succeeded in escaping. After the fire had been raging a short time the front wall fell out into Walnut Street and ten men were killed. The theatre was rebuilt during the summer, and was opened again on the 19th of September.

The prosperity which had attended the *Public Ledger* under George W. Childs' management, after his purchase of it from William M. Swain, was such that its old quarters at Third and Chestnut Streets became too restricted for its business. At the southwest corner of Sixth and Chestnut Streets, during 1866-67, he established one of the finest and largest newspaper buildings in the United States. It was opened on the 20th of June, and Mr. Childs signalized the occasion by a memorable banquet at the Continental Hotel, which was attended by six hundred distinguished citizens. On the following 4th of July he gave to the newsboys in the new building one of the first of the dinners which afterward became one of the most pleasant of the regular features of Philadelphia Fourth of July celebrations.

What has since been frequently spoken of as "the great hail-storm" occurred on the afternoon of the 27th of September, when a gale suddenly broke over the city, accompanied by a fall of hailstones, some of which were three inches in diameter and a quarter of a pound in weight. It was estimated that more than half a million panes of glass were shattered in the storm. On the 8th of May, 1870, there was another fall of hail almost as equally violent and destructive.

The Philadelphia Democracy, in October, 1867, were greatly elated at the victory which they won in the city. Their whole local ticket, which was headed by Peter Lyle for sheriff, was elected by an average majority of four thousand votes. Judge Ludlow, who was voted for by many Republicans on the principle that partisanship should not enter into the choice of members of the judiciary,—a doctrine which then was not regarded with so much favor as it was a little later on,—was re-elected by a majority of five thousand five hundred and sixty. There was much brawling in the course of this campaign, but there was no event of important interest.

In the summer of 1868 the confusion into which a great city may be thrown by an unexpected interference of the workings of some of the improvements of modern civilization was illustrated by a strike which was started by the firemen, stokers, and other employés at the gas-works. On the night of the 17th of July the city was in total darkness. The possible dangers of such a state of affairs were too many for the citizens to allow the city to be unlighted by gas for another night, and on the following day the demands of the strikers were promptly complied with.

On the night of the 12th of June, 1868, Timothy Heenan, a brother of the well-known pugilist, John C. Heenan, was shot down and killed while in the company of a party of Democratic politicians, at Fifth and Spruce Streets. Gerald Eaton was convicted of having committed the crime, and soon afterward he was sentenced to be hanged on the 8th of April, 1869, together with George S. Twitchell, Jr. Twitchell had been convicted of the murder of his mother-in-law, Mrs. Mary E. Hill, at the northeast corner of Tenth and Pine Streets. The crime, which was perpetrated on the 22d of October, 1868, was involved in mystery, and occasioned wide-spread comment. On the strength of circumstantial evidence Twitchell was convicted on New-Year's Day, 1869. He was to have been hanged on the same scaffold with Eaton, but having swallowed poison, he was found dead in his cell on the morning of the day fixed for the execution. Eaton suffered death, and when his remains were delivered to his friends, they endeavored to restore life by means of electrical appliances. Prior to his suicide Twitchell had made a "confession," in which he tried to fix the blame of Mrs. Hill's murder upon Mrs. Twitchell, who had already been found not guilty. The progress of these trials was attended with an excitement which has not since been manifested here to such a degree in any case of murder.

The Presidential campaign of 1868 was characterized by several great public demonstrations. Chief among these was the reception given on the 1st of October to the "Boys in Blue," forerunners of the Grand Army of the Republic. They held a convention in National Hall, and in the evening Independence Square was the scene of an outpouring of the people to welcome the great soldiers, Burnside, Sickles, Kilpatrick, and other noted commanders. On the afternoon of the following day there was a long parade of soldiers and sailors, under the marshalship of Gen. Joshua T. Owen, and at night there was a torchlight parade, which included also many political campaign clubs. The object of these meetings and parades was to influence voters in favor of the Republican candidates at the impending October election, and of Grant and Colfax at the November election. A counter demonstration, under the auspices of the Democrats, was the reception given to Gen. George B. McClellan, on the 8th of October. It was a most imposing affair. A great

day procession was marshaled by Gen. William McCandless. Gen. McClellan reviewed the procession from the balcony of the Continental Hotel, and made a speech to the multitude which thronged the streets. On the 30th of October, Horatio Seymour, the Democratic candidate for President, was welcomed by the Democrats at the Academy of Music. They had in October carried their ticket in the city by very small majorities, Daniel M. Fox, the candidate for mayor, running ahead of most of his associate candidates. The State, however, had gone Republican, and when the city, in November, gave the Grant electoral ticket five thousand eight hundred and fifteen majority, the Presidential battle had already been virtually decided.

The result of the October elections as to the city ticket was not accepted by the Republicans, however, as conclusive. Charges of gross fraud were made, and during the greater portion of the year 1869 contests for the positions of city solicitor, district attorney, and judge of the District Court were carried on. Thomas Greenbank, who had been returned as judge, was obliged to vacate his seat in favor of M. Russell Thayer, and on the 18th of October Furman Sheppard retired from the district-attorneyship in order to make way for Charles Gibbons, who, upon a legal contest and examination, was subsequently displaced in turn by Mr. Sheppard.

The officers of the United States government met with much opposition during 1869 in their efforts to collect the whiskey taxes. In order to compel the submission of the owners of distilleries in the Port Richmond district, it was necessary on one occasion to secure the services of a force of marines and "raid" those establishments. The liquor men displayed much hostility toward the revenue officers all through the summer, and it finally culminated in a deadly attack on James J. Brooks, a faithful government detective, and afterward chief of the Secret Service at Washington. Brooks was at the point of death for several weeks, and the feeling of the public against the "Whiskey Ring," which, it was believed, had hired ruffians to assassinate him, was very strong. About a month after the assault Hugh Mara, Neil McLaughlin, and James Dougherty were arrested in New York. On the 20th of November Dougherty and Mara were convicted, and were sentenced to an imprisonment of a little less than seven years each.

The Mercantile Library Company on the 15th of July, 1869, removed from their building at Fifth and Library Streets to the spacious Franklin market-house, which had been erected in 1860, on Tenth Street above Chestnut, at the time of the anti-shed agitation, and which had not proved altogether a profitable investment. It was easily converted into a fine library building, and has been occupied as such ever since.

The election of 1869 was preceded by a short but sharp campaign, the contest between John W. Geary

and Asa Packer for Governor attracting the most attention. The Republicans in Philadelphia gave Geary a majority of 4400, and elected their city ticket by majorities which did not greatly vary from that figure.

Among the principal local events of this year were the dedication, on the 1st of March, of the new hall of the Commercial Exchange Association, at Second and Gothic Streets; the robbery, on the 4th of April, of a million dollars in bonds belonging to the Beneficial Savings-Fund at Twelfth and Chestnut Streets; a meeting, at the Academy of Music on the 30th of April, of sympathizers with the Cuban insurgents; the parade of Odd-Fellows, on the 26th of April, commemorating the semi-centennial anniversary of the order in the United States; a dedication of a monument to Washington and Lafayette in Monument Cemetery on the 29th of May, one of the first of "Decoration Days;" the destruction by fire, on the 4th of August, of Wm. C. Patterson's bonded warehouse, at Front and Pine Streets, with a loss of two millions of dollars; the scarcity of Schuylkill water in August, and the use of steam fire-engines to pump water into Fairmount basin; the laying of the corner-stone of the Humboldt monument, in Fairmount Park, on the 13th of September; the dedication of the Washington monument in front of the State-House on the 5th of July; the great picnic of the public school children in the Park on the 8th of September; and the funeral, on the 10th of November, of Admiral Charles Stewart, whose body lay in state in Independence Hall. The public school picnic was repeated in the autumns of 1871 and 1872.

In February, 1870, the colored people held a mass-meeting, at which it was determined to celebrate the adoption of the Fifteenth Amendment to the Constitution of the United States. On the 26th of April of the same year they made an imposing demonstration of their joy at the new privileges which the national government had conferred upon them. At the Union League House, Charles Gibbons presented the representatives of their civic societies with a banner, which was received by Octavius V. Catto. It was carried in a lengthy procession, of which Thomas Charnock was the chief marshal. In the evening there was a mass-meeting at Horticultural Hall, presided over by David C. Bowser, and at which addresses were made by Frederick Douglass, Galusha A. Grow, Robert Purvis, Jacob C. White, Jr., Louis Wagner, and Gen. Harry White. A short time afterward, on the 5th of May, the remaining members of the old Pennsylvania Anti-Slavery Society came together, and declaring that their work had been done, formally disbanded.

There was a fine parade of firemen on the 22d of February, 1870, to celebrate the dedication of a monument to the memory of David M. Lyle, who as chief of the Volunteer Fire Department had been exceedingly popular. Lyle, who died on the 23d of Novem-

ber, 1867, had been buried in Old Oaks Cemetery with distinguished military and civic honors. The parade of February, 1870, was under the marshalship of William F. McCully, who had been active in enlisting the attention of the volunteer firemen to the project of a Lyle monument, and Charles W. Brooke delivered the oration.

In the election of 1870 the Republicans were victorious, their local ticket headed by William R. Leeds for sheriff receiving a majority of 6907 votes, and William M. Bunn for register of wills a majority of 4349. At the same time a vote was taken on the question of a preference for Penn Squares or Washington Square as the site for public buildings. The former location was voted for by 51,623 citizens, and the latter by 32,825. This proved to be the virtual conclusion of an agitation between the advocates of the respective sites, which had been kept up for many years, and which, during 1870, had been attended with much bitterness.

The rowdyism which was conspicuous in political campaigns for some time after the war was illustrated on the 13th of October, 1870, when, at a meeting of the judges of election returns, a crowd of roughs burst open the door of the apartment in which they were in session. In the course of the affray Alexander Crawford, one of the judges, shot down John C. Nolen, a Democratic politician, who died of his wound three days afterward. An attempt was made to connect William B. Mann with an assassination plot, and he was even brought before Judge Allison by his political opponents. A coroner's jury found, however, that Crawford had acted entirely in self-defense.

The trial of John Hanlon, who, on the 6th of September, 1868, had outraged and murdered Mary Mohrmann, seven years old, attracted great attention in November, 1870. The public mind was aroused to a high pitch of indignation over this crime, and there was general satisfaction when Hanlon was executed, on the 1st of February, 1871.

The Volunteer Fire Department prepared to go out of existence in the winter of 1870-71, during which time the commissioners of the municipal (then called the "paid") fire department held their first sessions. On the 15th of March, 1871, the new department was formally put in service by Jacob Laidenslager, the first president of the commission; but some of the volunteer companies could not refrain from turbulent efforts to prevent the establishment of the reform. It was not very long before the city adapted itself to this change in the fire service. The first chief engineer of the Paid Fire Department was William H. Johnson.

The progress of the Franco-Prussian war had been watched with intense interest by the large German population of the city. When the news had been received, on the 3d of September, 1870, of the overthrow of McMahon's army at Sedan there was intense excitement among them, which vented itself, two

nights afterward, in a torchlight parade. But it was not until the ascendancy of the German arms had been established and peace declared that they allowed their feelings of joy to break forth. Hardly a man, woman, or child of German extraction seemed to have failed to interest himself in the celebration which took place on the 15th of May. The day was virtually a holiday. A procession nine miles long passed through the principal streets of the city, marshaled by Gen. John F. Ballier. It was one of the half-dozen particularly noteworthy parades that have taken place in Philadelphia since the close of the war of the Rebellion. The representation of trades and industries was a memorable one. The decorations on edifices of a public character were numerous and elaborate. There was a great gathering of German citizens at Penn Square, which was presided over by Gen. Robert Patterson, and at which Dr. Godfrey Kellner delivered the oration. The next day there were festivities at the new park of the Philadelphia Rifle Club. The whole affair was indeed one of the most enthusiastic, most interesting, and most successful of public demonstrations ever known in this city.

The year 1871 was one of numerous disturbances, murderous assaults, and other infractions of the peace. This was due largely to the inferior and undisciplined character of the police force during the three years that followed Mr. Fox's election as mayor. Political excitement, occasioned in the lower sections of the city particularly by the recent enfranchisement of the colored citizens, was responsible for much of this disorder. On the night before the election in October, Jacob Gordon, a colored man, was killed at Eighth and Bainbridge Streets. The next day a riot broke out in the Fourth and Fifth Wards. Its force was directed chiefly against the negroes. Nearly a score of them were wounded, and among those who were shot down and killed were Isaiah Chase and Professor Octavius V. Catto, in the neighborhood of Eighth and South Streets. During the progress of the election in the Fifth Ward, the mayor was obliged to call upon the military to be in readiness to assist him. The shooting of Catto awakened a bitterness of feeling in his race which was not allayed for years afterward. Its immediate effect was exhibited at a mass-meeting in National Hall, over which Henry C. Carey presided, and which warmly denounced the atrocious outrage. The funeral of Professor Catto, who was also a militia officer, was followed by a large procession of military and civic organizations.

In the election of October, 1871, the Republicans elected their whole ticket by majorities which greatly varied. The State candidates were elected by 11,000 majority; William S. Stokley over James S. Biddle, for mayor, by 9080; William B. Mann, for district attorney, by 2027; James T. Mitchell, for judge, by 10,361; Charles H. T. Collis, for city solicitor, by 9902; and J. G. L. Brown, for coroner, by 15,601.

The visit of the Grand Duke Alexis to Philadelphia caused a flutter chiefly in official circles and in fashionable society. The young Russian, on the 4th of December, was entertained at a breakfast in Belmont Mansion, Fairmount, at which Gen. Meade presided. Later in the day he was received in Independence Hall, and in the evening a ball was given in his honor at the Academy of Music.

Before the close of the year 1871, half a million dollars had been collected in a few weeks for the relief of the sufferers in the Chicago fire. At the citizens' meeting held in Mayor Fox's office, on the 11th of October, just after the receipt of news of that tremendous catastrophe, one hundred thousand dollars were raised on the spot, and collections were soon afterwards taken up in all the churches.

Considerable interest was taken by the Masonic fraternity in the dedication of a monument in Mount Moriah Cemetery, on the 24th of June, 1871, to the memory of William B. Schnider, long a well-known Tyler of the Grand Lodge of Masons in Pennsylvania. On the 22d of September the Lincoln monument in Fairmount Park was unveiled in the presence of a great crowd. There was a fine military parade, and Col. William McMichael delivered an oration.

The Presidential campaign of 1872 was opened in this city on the 5th of June at the Academy of Music. The nomination of Gen. Grant, which was unanimously effected on the following day, had been so generally anticipated that comparatively little excitement attended the sessions of the convention. Morton McMichael, of this city, was temporary chairman, and Thomas Settle, of North Carolina, permanent chairman. The only subject of contention was the nomination for Vice-President, which was finally given to Senator Henry Wilson, of Massachusetts, after a warm fight on behalf of Schuyler Colfax. On the 22d of August, what was known as a "Convention of Labor Reformers," representing a large number of organizations, met at the Washington House and nominated Charles O'Connor, of New York, for President, and Eli Saulsbury, of Delaware, for Vice-President, a movement which had but little effect on national politics.

A practical plan of benevolence which contributed much to the relief of the sufferings of the poor was started in the summer of 1872, under the name of the "Children's Free Excursions." During July and August fourteen excursions to Rockland, in Fairmount Park, and one to Pennsgrove, New Jersey, took place under the auspices of good-hearted men and women. Nearly thirty thousand poor people, of whom the greater number were young children, participated in these pleasure trips, and it was generally acknowledged that the lives of many infants were saved by this excellent charity, which cost altogether less than ten thousand dollars, excluding the donations that were not in cash. After several years these excursions became neglected by the charitable,

but they were instrumental in directing the attention of the rich to other forms of summer benevolence toward the poor, such as seaside sanitariums, the "country week," etc. The interest that was felt in this scheme of philanthropy arose from alarm at the awful bill of mortality which was caused by the intense heat in the summer of 1872. Thus, in July seven hundred and forty-six deaths were reported for one week, the greatest number ever known in the city for the same period of time.

The formation of the "American Steamship Company" was expected to be of great service in building up a foreign trade for Philadelphia. It was, therefore, with no little pride that the mercantile and business interests hailed the launching of the steamship "Pennsylvania," at Cramp's ship-yard, on the 15th of August, the "Ohio" on the 30th of October, and the "Indiana" on the 25th of March, 1873. On the 5th of May the "Pennsylvania" made her trial trip, and on the 22d of May she sailed for Liverpool, making the voyage, after an accident, in fourteen days. On the 7th of June the "Illinois" was launched at Cramp's, and in the early part of 1874 all four of these fine steamers were sailing under the American flag. For ten years the supporters of this enterprise endeavored to keep it up as a distinctly American organization. They soon found, however, that they were not sustained as they should be, and in 1883 they abandoned their first-class passenger traffic altogether.

The formation of a Citizens' Municipal Reform Association in 1872 was the precursor of the "Committee of One Hundred," a voluntary organization for "the purification of politics" established in a later year. But at that time the name of reform was more apt to be derided than applauded. The demand for some concessions to the better sentiments of voters was recognized by the Republican local leaders in their adoption of the "Crawford County System" of making nominations by a direct vote of the Republicans at the primary elections, without the agency of conventions. This method was first tried on the 25th of June, when thirty-nine thousand votes were returned, but it was found to be as productive of improper practices as the old system. After being in use for a year or two it was discarded.

The political campaign of 1872 was fiercely contested. The most eminent orators of both parties from all portions of the country appeared in Philadelphia in the course of the summer and autumn. The popular feeling was, as usual, that the verdict of Pennsylvania would decide the Presidential election, and particular pains were therefore taken on behalf of Gen. Hartranft, the Republican candidate for Governor, whose nomination had at first threatened Republican disaffection. The majority in Philadelphia for him was returned at upward of twenty thousand. A citizens' reform ticket for local officers polled only about three thousand votes. The Demo-

cratic-Liberal party was much discouraged at these results, and in November it polled only 23,410 votes for Greeley and Brown, against 68,856 for Grant and Wilson.

Toward the last of October a disease known as the epizooty made its appearance among the horses, and during the next four weeks there was hardly one of these animals that was not affected by it to some degree. Travel on some of the passenger railways was entirely suspended, and men and boys, during the month of November, had to make themselves useful in drawing carts and wagons through the streets. The Fifth and Sixth Streets Railway Company endeavored to accommodate its passengers by running steam "dummies."

The burial of Gen. George G. Meade at Laurel Hill, on the 11th of November, was the occasion of much public mourning. Gen. Meade was the one conspicuous Philadelphian who stood out above all other Philadelphians in the civil war, and in the years after the Rebellion he was an object of admiration to the people of the city. His death was regarded as a genuine public loss, and his funeral was attended with most impressive ceremonies. The procession contained many of the greatest soldiers and civilians in the country, chief among whom was President Grant. A week later, at the Academy of Music, there were solemn services in honor of the memory of the dead soldier.

The members of the convention to revise the Constitution of Pennsylvania, who had been elected at the October election of 1872, held their first session in Philadelphia on the 7th of January, 1873, in the Sixth Presbyterian Church building, on Spruce Street below Sixth, which had been specially fitted up for their use. Here they continued the work of framing a new Constitution until the 3d of November succeeding, when, a draft having been adopted, it was determined to submit it to a popular vote on the 16th of December. At the election on that day the majority in this city for the instrument was 34,120, only 24,994 votes being cast against it.

The great financial panic of 1873 was precipitated upon the country from Philadelphia, where the banking-houses of Jay Cooke & Co. and E. W. Clarke & Co. closed their doors on the 18th of September. The usual symptoms of fear and agitation spread through the community with wonderful rapidity. Before the day was over "runs" were made on the banks. The heaviest pressure was upon the Fidelity Safe Deposit and Trust Company and the Union Banking Company. The latter organization on the 20th was unable to meet the demands made upon it. It began the long list of failures which made the next three or four years so dark to trade and industry. Not among the least of the financial disasters which followed was the failure of the Franklin Savings-Fund, in which many thousands of the poorer people of Philadelphia were interested, and which was ad-

judged by the United States District Court on the 6th of February, 1874, to be bankrupt.

The new Masonic Temple, at Broad and Filbert Streets, was dedicated by many and peculiar ceremonies during the last week of September, 1873. Eminent members of the Masonic fraternity from all parts of the country were present. On the 25th of September there was a tournament of Knights Templar at the Academy of Music and Horticultural Hall. On the next day eleven thousand Masons walked in procession in honor of the dedication of their magnificent building. The Grand Chapter of Pennsylvania dedicated Renaissance Hall to the uses of Royal Arch Masonry on the 28th, and ten days afterward two thousand three hundred Knights Templar participated in the dedication of the asylum by the Grand Commandery.

On the 31st of January, 1874, the House of Correction, built near Holmesburg, was opened. One hundred and thirty-six of the inmates of the Almshouse were immediately removed to the new institution.

A case which attracted attention in 1874 all over the English-speaking world was the abduction of Charles Brewster Ross, on the 1st of July of that year. The lad, who was four years old, was enticed into a carriage by two men. They also carried off his brother Walter a short distance, and then allowed him to go home. The younger of the boys was never afterward heard of. His father, Christian K. Ross, immediately started upon a search which he kept up with great activity for several years, and which he did not entirely relax until within a very recent period. Almost every appliance that human ingenuity could devise for the solution of such a mystery was carried into execution. All over the United States the police of the various cities were notified of the abduction, and many men who were not professional investigators of crime became amateur detectives in this case. Innumerable clues were discovered, but they all proved to be fruitless of results to Mr. Ross, except in restoring very many other lost children to parents from whom they had strayed or had been stolen. On the 14th of December, William Mosher and Joseph Douglass, the men who had stolen the child, were killed while attempting to rob the house of Judge Van Brunt, at Bay Ridge, L. I., and the hope was revived that the boy would be found somewhere in the vicinity of New York. But the secret of his whereabouts seems to have perished with the death of the kidnappers. In the following year William A. Westervelt was arrested on the charge of being a party to the conspiracy, and on the 9th of October was sentenced to an imprisonment of seven years.

The corner-stone of the new Public Buildings on Penn Square was laid on the 4th of July, 1874, according to the rites of the Masonic fraternity, by representatives of the Grand Lodge of Pennsylvania. Benjamin Harris Brewster delivered the oration.

It was about this time that the study of Revolutionary history and the desire to commemorate the leading events of the colonial era began to be manifest. Everybody in Philadelphia was full of enthusiasm over the centennial idea. For two or three years there had been many public meetings of the citizens who were interested in the project of the exhibition that was to be consummated in 1876, and many delegations from Congress, the State Legislatures, and the principal cities had visited the city on behalf of it. The celebrations of historical events were intended to increase the popularity of the centennial project. First among them was the Boston Tea Party at the Academy of Music and Horticultural Hall on the 17th of December, 1873. The centennial commemoration on the 5th of September, 1874, of the meeting of the First Continental Congress in Carpenters' Hall, was signalized by the delivery of an oration by Henry Armitt Brown. On the 19th of October following nineteen delegates from the Philadelphia Baptist Association held a memorial service at the same place in honor of the nineteen Baptists who, in 1774, petitioned Congress to grant universal religious liberty. The centennial anniversary of the formation of the First City Troop was celebrated November 15th, 16th, 17th; on the first day by religious services in St. Peter's and St. Clement's Protestant Episcopal churches; on the second by the dedication of the new armory of the Troop, and on the third by a parade of militia, which was reviewed by Governor Hartranft, of Pennsylvania, and Governor Parker, of New Jersey.

A notable exhibition, which did much to prepare Philadelphians for the part they were to play in the World's Exposition, was that of the Franklin Institute, which was held in the autumn of 1874, at the old freight depot of the Pennsylvania Railroad Company, Thirteenth and Market Streets. There was a fine display of local arts and industries, which, between the 6th of October and the 12th of November, was visited by nearly three hundred thousand people.

Among the many local improvements that were effected in 1874, in anticipation, to a large extent, of the centennial year, was the opening of the new bridge over the Schuylkill at Girard Avenue on the 4th of July. This handsome structure is one hundred feet wide, and was believed at the time to be the widest bridge in the world. It cost a little less than a million and a half of dollars, and for some years afterward charges of corruption, which was alleged to have attended the work, were freely discussed.

It was in the winter and spring of 1874 that a number of Philadelphia ladies, in imitation of the praying bands that had caused much excitement in Ohio, organized a "Women's Crusade" on the liquor saloons. They visited several saloons, prayed, sang hymns on the sidewalks, and remonstrated with the keepers of the establishments. But none of them closed their doors, and in a short time the agitation died out.

The first of the municipal or February elections, under the new Constitution, was held on the 17th of February, 1874. The campaign was waged between the Republicans on the one side, and the Democrats and Independent Reformers on the other. William S. Stokley, the Republican candidate, was re-elected mayor by 60,128 votes to 49,133 for A. K. McClure, Independent; and C. H. T. Collis, Republican, was elected city solicitor, and Thomas J. Smith, Republican, receiver of taxes, by majorities somewhat larger. It was also in this year that the "fall election" was changed from October to November. The progress of the reform sentiment among the Republican voters was noticeable in the election of Furman Sheppard and Kingston Goddard, both Democrats, as district attorney and coroner, respectively, while the Republican State ticket had a majority in the city of 13,000 votes.

On the 20th of January, 1875, Frederick Heidenblut was hanged at Moyamensing prison for the murder of Godfrey Kuhnle, a baker, on the 31st of December, 1873. Kuhnle kept a baker-shop on Frankford road, below Girard Avenue, and Heidenblut was in his employment.

The establishment of *The Times* daily newspaper on the 13th of March, 1875, under the editorial direction of A. K. McClure, was an event which had more influence on the development of Philadelphia journalism than anything else that had taken place in that department of industry since J. W. Forney's establishment of *The Press*, in 1857. The general tone of the newspapers of the city up to 1875 had been quiet, cautious, reticent, and conservative. The new journal, however, was bold and incisive in its utterances, aggressive in its policy, and enterprising in the collection of news. Before the year was out its influence was second only to that of the *Ledger*, and it had become widely known as an authority on Pennsylvania politics. It may be said to have communicated a new spirit and vigor to almost every other daily newspaper, and to have enlarged very materially the field of the local press.

There was a great religious revival in Philadelphia during the winter of 1875-76, caused by the visit of the famous evangelists, Messrs. Moody and Sankey. The old freight depot at the southwest corner of Thirteenth and Market Streets was converted into a spacious auditorium for their use, and the first meeting in it was held on the 21st of November, 1875, when nearly twelve thousand persons were present, and many were unable to get into the building. Every day and night until the 28th of January, of the following year, these meetings were continued, and they had the effect of increasing the membership of the Philadelphia churches by many thousands of converts. It was estimated that this revival in the old depot was attended by nearly one million people. Soon after the final meeting Mr. John Wanamaker, who had taken a lively interest in these religious ser-

vices, made preparations to change the building into a grand bazaar or emporium, which has since become one of the city's peculiar institutions.

The Market Street bridge was destroyed by fire on the evening of Nov. 20, 1875. In less than thirty-four days afterward, railway-cars and freight-trains were running across a substantial new bridge. This remarkable achievement was the work of the Pennsylvania Railroad Company. A few days after the fire that company caused a light temporary bridge to be thrown across the river for the accommodation of its traffic, and it then made a proposition to Councils to replace the old one, which proposition was accepted by the passage of an ordinance to that effect on the 2d of December. The celerity with which this bridge was finished, in twenty-one days, was not less praised at the time than the return by the company to the city of several thousand dollars of the money which Councils had appropriated, the cost being a little more than fifty-six thousand dollars. The experience which the municipality had recently acquired in the building of bridges at South Street and Girard Avenue caused this feat to be commented upon with general surprise as well as with gratification.

The remains of Henry Wilson, Vice-President of the United States, who died in Washington on the 22d of November, 1875, were brought to Philadelphia, and were carried to Independence Hall by a torchlight procession on the night of the 26th. There they lay in state on the following day and were viewed by thousands of citizens. On the same day the body was escorted to the Germantown Junction of the New York Railroad by the city authorities and a cortege of military and civic organizations.

The centennial year, 1876, was a period of unprecedented activity in Philadelphia. It gave an immense impetus to the progress and development of many of its industries, and widely extended its building operations. The whole population seemed to have its interest unanimously enlisted in the great exhibition. The year was ushered in with unbounded enthusiasm by vast multitudes of people who filled the principal streets and gathered near Independence Hall to hear the State-House bell ring in the advent of the centennial year. The illuminations, bell-ringing, cannon-firing, whistle-blowing, hurrahing, and many other forms of spontaneous joy made this night a memorable one in the city's history. The winter proved to be an unusually mild one. No snow fell until the month of February. There was but little interruption in consequence to the progress of the work on the Centennial Buildings at Lansdowne, and some people of both a religious and patriotic turn of mind thought they saw in this a Providential dispensation.

During the previous three years the proposed centennial celebration had been the subject of uppermost interest in the minds of Philadelphians. About the year 1870 the idea of an industrial exhibition first began to be actively discussed in the press. It was

THE CENTENNIAL MAIN EXHIBITION BUILDING.

on the 9th of March that Daniel J. Morrell, a representative from Pennsylvania, introduced in Congress a bill which provided for the holding of an exhibition in this city, but which had been so transformed by amendments that when it passed, almost a year later, all the provisions for the practical execution of the law had been cut out of it. In the meantime a special committee on the celebration of the centennial anniversary had been appointed in City Councils, with John L. Shoemaker as chairman, and it was due much to his zealous and untiring labor that no little of the popular interest in the undertaking was aroused. The visits of delegations from several of the State Legislatures also did much to attract attention to the enterprise.

On the 4th of March, 1872, the Centennial Commission, representing the various States and Territories, as provided by the act of Congress, convened in this city at Independence Hall, and at a later session it was agreed, on the 24th of May, that the exhibition should be opened on the 19th of April, 1876, and continued until the 19th of October of the same year, a resolution which, in the winter of 1875, it was found necessary to change, as to the dates, to May 10th and November 10th. A committee of three hundred was also organized in the same year to raise subscriptions. On Washington's birthday, 1873, an enthusiastic meeting in behalf of the proposed exhibition was held at the Academy of Music. Senator Simon Cameron presided, and it was reported, amid tremendous applause, that \$1,784,320 had been subscribed. On the 27th of March the Pennsylvania Legislature provided for an appropriation of one million dollars, and on the 4th of July the Fairmount Park Commission formally conveyed to the Centennial Commission and to the Centennial Board of Finance, which, with John Welsh at its head, comprised the men who really pushed the project through to a successful consummation, four hundred and fifty acres of land at Lansdowne. Secretary Robeson, on behalf of the national government, read President Grant's proclamation commending the exposition to the people of the United States and of foreign nations.

John Welsh, the president of the Centennial Board of Finance, and for over half a century one of Philadelphia's leading merchants, was born on Nov. 9, 1805. His ancestry were early British and Swedish settlers in America. Having received a preparatory education, he entered college, but left before he graduated and began his commercial career in a mercantile house of high standing, in which he afterward became a partner. Subsequently he entered into partnership with his two brothers, Samuel and William Welsh, and for over half a century the house of S. & W. Welsh has maintained a very high character.

While actively engaged in business, Mr. Welsh has not been unmindful of his duties to the public, and has served them in many important positions of honor and trust. He has been a member of the Select

Council two years, president of the North Pennsylvania Railroad one year, commissioner of the sinking fund of the city twenty years, president of the Board of Trade fifteen years, president of the Merchants' Fund fifteen years, trustee of the University of Pennsylvania twenty years, and commissioner of Fairmount Park sixteen years. Besides holding these distinguished positions, Mr. Welsh served with marked ability as chairman of the executive committee having in charge the management of the Great Central Sanitary Fair, held at Logan Square in 1864, which realized over one million dollars for the relief of the soldiers and sailors of the Union. As the success of this great charity was largely due to the labors of Mr. Welsh, at the close of the fair he was presented with ten magnificently bound volumes of *souvenirs* of the enterprise. In the first volume is inscribed the following tribute: "These memorials of the Great Central Fair, and of our country's indebtedness to her heroic defenders, are presented to John Welsh by his fellow-laborers and associates, in token of the zeal, urbanity, and devotion with which he presided over it from its inception to its successful termination."

When the Centennial Board of Finance was created by act of Congress, passed June 1, 1872, Mr. Welsh was chosen its president, and until the successful close of the great exposition, in the fall of 1876, he contributed largely to its success. As an evidence of the directors' appreciation of his services, on July 4, 1876, they presented him with a magnificent gold medal, and, as a further testimonial of his worth, his fellow-citizens contributed a fund of fifty thousand dollars to endow the "John Welsh Centennial Professorship of History and English Literature" in the Pennsylvania University. This pleasant event took place at the University on Feb. 22, 1877, where addresses were made by ex-Mayor Morton McMichael, Governor John F. Hartranft, Provost Charles J. Stillé, and Mr. Welsh.

As a recognition of Mr. Welsh's distinguished public services, on Oct. 30, 1877, President Hayes appointed him envoy extraordinary and minister plenipotentiary of the United States at the court of St. James. Before his departure for England, on Nov. 28, 1877, Mr. Welsh was given a banquet at the Aldine Hotel as a testimonial of the esteem of his fellow-citizens and as an evidence of their appreciation of the high honor conferred upon a representative Philadelphia merchant. A large number of the most distinguished men of this city were present, and complimentary speeches were made by Hon. Morton McMichael, Joseph Patterson, Daniel J. Morrell, Frederick Fraley, Professor William Pepper, M.D., Hon. Craig Biddle, John W. Forney, and Daniel Dougherty.

Mr. Welsh sailed from New York for Liverpool two days later, amid great demonstrations of popular esteem, having previously been presented with congratulatory addresses from various public bodies in

Ino. Welsh

Philadelphia and New York. Upon his arrival in Liverpool, the American minister was welcomed with numerous manifestations of cordiality, particularly from the leading commercial bodies of that maritime centre. Among many congratulatory addresses was one by a prominent free-trade advocate, who said he trusted the American envoy would aid in securing a reduction in the duties levied by the United States government upon certain commodities, with a view to a wider commercial reciprocity between Great Britain and America. The impromptu, but felicitous, reply of the plenipotentiary, who spoke as a representative of the protection spirit of the American government, brought down the house, and the comments of the Liverpool press on the following morning had a tendency to materially increase the popularity of the American minister. Mr. Welsh's diplomatic service was characterized by the occurrence of no extraordinary international emergencies, and few perplexing problems in diplomacy. Such questions as did arise, however, were met and arranged with complete satisfaction to the American government. The courtesy and urbanity with which Mr. Welsh discharged all social duties incident to his occupancy of the mission received the encomiums of all citizens of the United States who visited England. A London correspondent of an American journal, under date of Jan. 9, 1879, wrote the following concerning the home-life of Mr. Welsh: "There is an easy grace and hospitality ever pervading No. 37 Queen's Gate. The 'Star-Spangled Banner,' from the citizens of Brotherly Love, always hangs simply beside the Union Jack on the walls of Mr. Welsh, and is his only heraldic design, to which I might add,—

"His coat of arms, a spotless life,
An honest heart his crest;
Quartered therewith was innocence,
And thus his motto ran,—
'A conscience void of all offense,
Before both God and man.'"

On May 10, 1879, Minister Welsh acquainted President Hayes with his purpose to resign the English mission and return home. In reply, President Hayes addressed him a very complimentary private letter, urging him to reconsider his determination. Mr. Welsh had, however, definitely resolved to return to America, which resolution he carried into effect in August. The *London Daily News*, under date of July 28, 1879, thus refers to the approaching departure of the American minister: "Our readers will learn with regret that Mr. Welsh, the United States minister here, has resigned his office, and will probably sail for America on or about the 20th of August. Domestic bereavements have, we believe, led to Mr. Welsh's approaching retirement. Mr. Welsh will carry away with him the cordial regard and respect of all in England with whom he has been brought into social and official relations." An editorial in the *London Times*, a few days later, was even stronger in its terms.

Mr. Welsh has had, at various times, many honors conferred upon him, besides those incidental to official place. Among such have been the following: The degree of LL.D., by the University of Pennsylvania, and also by the Washington and Lee University of Virginia; Knight Commander of the order of St. Olaf, by the king of Sweden and Norway; Commander of the order of the Rising Sun, by the emperor of Japan; Grand Officer of the order of Nizan Iftakan, by the Bey of Tunis; and Chevalier d'Honneur ordre de Melusine, by her Royal Highness Marie de Lusignan, Princess of Cyprus, Jerusalem, and Armenia.

Mr. Welsh has contrived to find time, although apparently overwhelmed with a multiplicity of business and official cares, to devote considerable attention to literary pursuits, preparing and delivering many monographs and addresses upon various economic and other subjects.

On the 30th of April, 1829, he married Miss Rebecca B. Miller, a daughter of Alexander J. Miller, by whom he had two children, both daughters, of whom one is now living. Mr. Welsh's first wife having died in 1832, he married, on the 6th of February, 1838, Mary Lowber, a daughter of Edward Lowber, by whom he has had nine children, six sons and three daughters, of whom seven are now living.

In August forty-three plans were submitted to the Centennial Commission for the erection of buildings, and in November a sub-committee reported in favor of a pavilion as embodied in the plan of H. A. and J. P. Sims. It was to be a building two thousand and forty feet long, six hundred and eighty feet wide, and covering forty-four acres, but this plan, together with others that were then adopted, was subsequently very much modified. At the same time there was much opposition to the enterprise throughout the country, and where there was no active opposition there was either jealousy or apathy. It was found that, outside of Pennsylvania and New Jersey, material aid was exceedingly scanty, and the leading men of Philadelphia soon came to the conclusion that they must bear the burden on their own shoulders. On the 16th of March, 1874, there was a meeting in Independence Square, at which it was resolved that the construction of the building should begin without delay, and that the citizens were ready to pledge themselves for another million dollars in addition to what had already been secured. This earnest declaration had much effect in stimulating the Board of Finance and the Centennial Commission to renewed exertions, and on the 1st of July it was formally announced that a contract for the erection of the main buildings had been entered into with Richard J. Dobbins. On the 4th of July ground was broken at Lansdowne, and the vast series of building operations which, in a little more than a year, completely changed the aspect of the whole region around George's Hill, began with great vigor.

A year later the enthusiasm of the people broke out in one of the most impressive Fourth of July celebrations for many years. Fully two hundred thousand persons congregated in Fairmount Park. In the morning Gen. Hawley, of the Centennial Commission, reviewed a parade of the First Division of the National Guard of the State at Belmont Mansion; then the site of the statue of Religious Liberty, to be erected by the Jewish order of B'nai Berith, was dedicated with addresses by the Rev. George Jacobs, Rev. M. Jastrow, Lewis Ellinger, of New York, and Lewis Abrahams, of Washington. The colossal figure of Columbia, on Memorial Hall, was next unveiled by

Charles S. Keyser; ground was broken for the Catholic Total Abstinence fountain by Dr. Michael O'Hara, addresses being made by John H. Campbell, Joseph R. Chandler, Rev. James O'Reilly, Rev. Patrick Byrne, and James W. O'Brien. This memorable day closed with a review of the Schuylkill navy, balloon ascensions, and a display of fire-works.

In order to show the leading men in the national government what had been done, and to secure their support of a bill making an appropriation to the Board of Finance, President Grant, members of his cabinet, and a large number of senators and representatives in Congress were brought to Philadelphia to in-

MEMORIAL HALL.

Mayor Stokley. At the same time there was a concert in Machinery Hall by public-school children in the presence of twenty-five thousand spectators. At noon the site of the monument to Christopher Columbus was dedicated by Italians, with addresses by Mr. Viti, the vice-consul, John A. Clark, Chevalier Secchi de Casali, and Father Isoleri. Simultaneous with the ceremony was the breaking of ground for Agricultural Hall by Mayor Stokley, the exercises including the reading of the Declaration of Independence by Amasa McCoy, of Chicago, and the delivery of an oration by Frederick M. Watt, the United States Commissioner of Agriculture. In the afternoon the site of the Humboldt monument was dedicated, with addresses by Dr. Godfrey Kneller and

spect the Centennial buildings on the 18th of December, and were entertained at a banquet in Horticultural Hall. On the 11th of February, 1876, after no little opposition, a bill passed Congress appropriating one million five hundred thousand dollars.¹ During the

¹ An appropriation was the meaning of the act, it was supposed; but after the exhibition was closed claim was made on behalf of the United States that the transaction was only a loan. The United States Court at Philadelphia decided that it was a gift. But the Supreme Court of the United States reversed the judgment, and the entire sum, one million five hundred thousand dollars, was paid into the national treasury, so that except what the Federal departments appropriated for their own special displays, the exhibition did not cost the government a cent. The whole burden was placed on the people, to the extent of a partial individual loss upon all subscriptions to the stock of the Centennial Board of Finance.

winter goods from foreign exhibitors arrived in large quantities. Much attention was attracted to the French ship "Labrador," which was four hundred and twenty feet long and five thousand tons in burden, the largest vessel that had ever come up the Delaware, and the Turks, Japanese, Spaniards, and other foreign artificers who began to put in an appearance were objects of great curiosity at this time. On the 1st of April, by order of Mayor Stokley, a special census was taken by the police, and it showed that the city then contained eight hundred and seventeen thousand four hundred and forty-eight inhabitants.

At this time about one hundred and eighty buildings had been erected within the Centennial inclosure. Outside of it and all through the northwestern part of West Philadelphia many hotels, taverns, stores, and dwellings had been put up in anticipation of the multitudes that were to come. Within the Centennial inclosure, many of the States of the Union, foreign governments, and enterprising individuals had built edifices generally remarkable for their uniqueness. The five great buildings, however, were the Main Exhibition Building, Machinery Hall, Memorial Hall, Agricultural Hall, and Horticultural Hall, all erected under the auspices of the Centennial Commission and the Board of Finance. The Main Building was in the form of a parallelogram, extending along Elm Avenue for a distance of eighteen hundred and seventy-six feet, and was four hundred and

MACHINERY HALL.

sixty-four feet in width. The larger portion of the structure was one story in height, the interior altitude being about seventy feet. The framework was of iron,

and rested upon foundations consisting of six hundred and seventy-two stone piers. The main promenades through the nave and central transept were thirty feet in width, and the smaller ones were half this size.

Notwithstanding the vast extent of this splendid building, there was a lightness and gracefulness about its architecture and its embellishments which made it exceedingly attractive to look upon, an effect that was enhanced by the great quantity of glass which entered into its construction. Machinery Hall, which was located directly west of the Main Building, extended along Elm Avenue for a distance of fourteen hundred and two feet, and was three hundred and sixty feet wide, covering about fourteen acres. The interior height to the top of the ventilators over the main avenues was seventy feet, and over the side aisles about forty feet. The promenades in the avenues were fifteen feet in width, in the transept twenty-five feet, and in the aisles ten feet. Its general effect was in a modified degree not unlike that of the Main Building. North of the latter building, and facing it, was Memorial Hall, which was also known as the Art Gallery. It was built of granite, glass, and iron, and was designed to be an enduring memorial of the great exhibition,—in length, three hundred and fifty feet; in width, two hundred and ten feet; and in height, fifty-nine feet. It is surmounted by a dome, on which at one time rested a figure of Columbia one hundred and fifty feet above the ground. The cost of the building was upwards of two millions of dollars, and was borne by the State of Pennsylvania and the city of Philadelphia.

Agricultural Hall, which was located in the north-western portion of the grounds, was built of glass and wood, and was five hundred and forty by eight hundred and twenty feet, and seventy-five feet in height. Horticultural Hall, which was also designed to be a permanent memorial, is a handsome building of the Moorish style of architecture in the twelfth century. No structure on the grounds was perhaps more ornate. It is three hundred and eighty-three feet long, one hundred and ninety-three feet wide, and seventy-two feet high, costing two hundred and fifty-three thousand dollars. Approached by long flights of blue marble steps, and surrounded by a beautiful terrace, Horticultural Hall has ever since been justly an object of pride to Philadelphians. All these buildings in the course of the centennial season were temporarily enlarged by the construction of annexes. No more interesting picture of human activity has ever been witnessed than that which was furnished in these great halls and in the one hundred and ninety buildings of all kinds that clustered around them. To-day only Horticultural Hall and Memorial Hall remain as evidences of those busy scenes, and the knots of pleasure-seekers who roam over the grassy grounds in the summer-time seldom stop to think of the great events that took place there in the summer of 1876.

The opening of the exhibition, on the 10th of May, was marked by simple but appropriate exercises. A crowd which numbered perhaps one hundred and fifty thousand people gathered within the open space between Memorial Hall and the Main Building. The great stand on Memorial Terrace was filled with distinguished men and women, prominent among whom were the Emperor and Empress of Brazil. Four thousand soldiers of the local militia escorted President Grant to the grounds. The ceremonies began by the performance of Richard Wagner's "Grand Centennial March" by Theodore Thomas' Orchestra. Bishop Matthew Simpson delivered the prayer, and a chorus of a thousand voices sang Whittier's "Centennial Hymn." John Welsh formally transferred the buildings, on behalf of the Board of Finance, to the Centennial Commission, and Sidney Lanier's hymn, on the "Meditation of Columbia," was next sung. But nothing on that day provoked more rapturous applause and admiration than the singing of the solo stanza by Myron W. Whitney, whose noble voice rolled over the crowd to its outer edges with grand effect. After an address by General Hawley, President Grant, in a short speech, declared the Exhibition open. A long procession of eminent citizens and visitors then passed over to the Main Building, and thence to Machinery Hall, where the mammoth Corliss engine was set in motion by President Grant.

Between the opening of the exhibition and the 4th of July, and indeed all through the summer, barely a day passed when there was not a parade, a national or an international convention, or some other kind of public ceremony; but on the 4th of July the enthusiasm of the people was unbounded. On the 1st of July there was a congress of authors in Independence Hall, and the centennial anniversary of Richard Henry Lee's resolution of independence was celebrated in the square by music, anthems, and addresses by John William Wallace, William V. McKean, and Leverett Saltonstall, of Massachusetts. On Monday, the 3d, there was a parade by the Grand Army of the Republic, and at night there was a torchlight parade of representatives of trades and industries, social and political clubs, and foreign visitors. It was remarked by judicious observers that "only the vast populations of London and Paris, when moved by some universal impulse and by the strongest feelings, could have presented such a spectacle." Miles and miles of the principal streets were densely packed with people. It was estimated that on Chestnut and Broad Streets there were three hundred thousand people. When the State-House bell struck twelve, and the new century of independence had begun, the whole town seemed to have broken out in one mighty shout. People walked the streets or slept on the steps all night long. The great procession, too great to be managed well, broke up in confusion in the early hours of the morning. The jubilee was continued the next day, chiefly in Independence Square, under a broiling sun.

There Thomas W. Ferry, president of the United States Senate, presided over a crowd which filled every portion of the square. An oration was delivered by William M. Evarts, of New York, and an original poem read by Bayard Taylor. A feature of the ceremonies was the performance of a Brazilian hymn in compliment to Dom Pedro, of Brazil. There was an imposing military parade made up of volunteers

from all parts of the Union; the Humboldt monument and the Catholic fountain were dedicated, and after the display of fire-works in Fairmount Park, the people of Philadelphia were thoroughly exhausted with their two days of almost unparalleled rejoicing.

The summer was a remarkable one for the prolonged spell of heat, which set in about the 17th of June and continued until about the 20th of July, during which

HORTICULTURAL HALL.

The close of the exhibition on the 10th of November, a gloomy day, when the city was excited over the result of the Presidential electoral struggle in the South, was accomplished with comparative quiet in the presence of about ten thousand people. Addresses were made by Gen. Hawley, John Welsh, A. T. Goshorn, and Daniel J. Morrell; and President Grant, declaring the exhibition closed, gave the signal by which all the machinery in Machinery Hall was instantly made motionless.

The Presidential campaign of 1876 also contributed much to the general animation which prevailed in Philadelphia during the centennial year. On two occasions, the 4th of July and the 26th of October ("Ohio Day" at the exhibition), R. B. Hayes, the Republican candidate for President, visited the city, and on the 21st of September (New York Day) Samuel J. Tilden, the Democratic candidate, was honored with

period there was hardly a day when the thermometer fell below ninety degrees, while on the 9th of July it reached the altitude of one hundred and two degrees in the shade. The effect of this terrific and long-continued heat was to prevent for some time the large attendance that had been expected at the exhibition, and it was not until the end of August that the

number of visitors became great. During the first three months it had averaged only about 25,000 a day, but in September it suddenly rose to 60,000, in October to 88,000, and in November to 99,000. The most notable day of the entire period was Pennsylvania Day, September 28th, when 275,000 people surged through the grounds. The total number of cash admissions during the entire period of the exhibition was 8,004,274, from whom was derived \$3,813,693. The total admissions of all kinds were 9,910,966.

a reception. The local campaign was chiefly noteworthy in the fact that Judges Allison and Pierce, both Republicans, were renominated by both the Democratic and Republican parties, and in the exceedingly vigorous opposition which was urged against W. E. Rowan, the Republican candidate for sheriff. The Hayes electors received a majority of upwards of 15,000, and the rest of the Republican candidates, except one, were successful by majorities which varied but little from that figure. The exception was in the case of the election of the Democratic candidate for sheriff by more than 6000 majority. Three months later there was a coalition between Democrats and many Republican citizens of independent tendencies, the chief object of which was to prevent the re-election of Mr. Stokley as mayor and to install Joseph L. Caven in that office. This effort was unsuccessful, Mr. Stokley being returned as elected by a majority of 2866, the highest majority on the rest of the Republican ticket being about 5000 more.

Mr. Stokley's claim to public support was largely based on the vigor and efficiency with which he suppressed disturbances and protected property. His capacity in this respect was put to a severe test in July, 1877, when the great labor revolt that sprung from the troubles between railroad companies and their employés all over the country broke out in Philadelphia. There had been some difficulty between the Reading Railroad Company and their employés in April of this year, resulting in a strike, but it had been adjusted without resorting to violence. When, however, the strike of the employés of the Pennsylvania Railroad at Pittsburgh developed into a riotous outbreak, on the 19th of July, the same elements of discontent in this city were kindled into activity. Before any signs of actual disorder had manifested themselves, the First Division of the National Guard had promptly left the city, in response to the call for troops to put down the disturbances at Pittsburgh. They were commanded by Maj.-Gen. Brinton and Brig.-Gens. Loud and Matthews. In Pittsburgh they came into conflict with the strikers, and five of the troops were killed and fifteen wounded. The following day, Sunday, the 22d, was one of intense anxiety and wild rumors in Philadelphia. The fear was general that a bloody riot was impending. Mayor Stokley issued a proclamation declaring that he would put down disorder at all hazards, and soon afterward made his headquarters, night and day, at the Pennsylvania Railroad Depot in West Philadelphia, which was strongly guarded by policemen.

The thousands of idlers, tramps, and strikers who infested chiefly the western and the northeastern sections of the city were not long in waiting for an opportunity to perpetrate mischief. On Monday, the 23d, an oil train was set on fire on the West Chester siding near the almshouse. The long black column of smoke which ascended from the flames was visible

in many portions of the city, and served to intensify the public alarm. The cunning purpose of the incendiaries was to draw the police from the depot of the Pennsylvania Railroad, and, in their absence, to make an assault upon it. It failed, however, to deceive the authorities, and the police were sent forward the same evening to clear the railroad track in West Philadelphia of the mobs. This they accomplished by an unmerciful use of their clubs, but without the loss of life. The sharpness and vigilance with which this work was done, at what proved to be the turning-point of the troubles, undoubtedly saved the city from such terrible scenes as had been enacted at Pittsburgh.

The next morning public confidence was restored not alone by the dispersion of the mobs, but by the announcement of the arrival of four hundred marines from Baltimore, and a detachment of regular United States troops under the command of Maj.-Gen. Hancock. Excitement ran high, however, during the remainder of the week, and the news of the anarchy that was spreading in the West raised the hopes of the strikers on various days. An attempt to hold a "workingman's meeting" at Kelly's Hall, on Christian Street, was suppressed by the police on the 24th, and a similar demonstration at Beach and Laurel Streets was put down the next day. On the 26th hostilities between a mob and the police broke out at Fourth and Berks Streets, and one person was killed, and many others were injured. During this time the movement of freight on all the railroads entering the city was almost entirely suspended, and passenger travel was irregular and dangerous, but by the end of July the apprehension of any further difficulty had nearly disappeared. There was some temporary agitation on the 5th of August, when the Philadelphia militia, who were on their way home from Pittsburgh, were ordered, at Harrisburg, to proceed to Scranton, to quell disturbances in the coal regions. The return of most of the troops, on the 5th of August, was the occasion of much rejoicing. It was not until the 20th of September that Col. Bonnaffon's "veteran regiment," after a service of nearly two months, came back to the city. The effect of this military experience among the young men of the local militia was greatly to stimulate their enthusiasm, and the remarkable efficiency at the present time of the National Guard in Philadelphia may be traced back to the rough and practical initiation which its members received in 1877 into the duties of a soldier's life.

On the 15th of May, 1877, ex-President Grant started upon his memorable trip around the world. He sailed from this port in the steamship "Indiana." His departure attracted much attention, and on the day previous he had held a public reception in Independence Hall. He was accompanied down the river on the steamboat "Twilight" by a crowd of distinguished citizens, among whom were Gen. Sherman,

Senator Zachariah Chandler, Senator Simon Cameron, ex-Secretary of the Navy George M. Robeson, and many other Republican leaders of eminence. His circuit around the world was accomplished two years and seven months later, when he arrived in Philadelphia on the 16th of December, 1879, from the West on the Pennsylvania Railroad at the Germantown Junction, where a great procession was in waiting. All business was suspended by general consent. The decorations along the route of the parade were unprecedented in number, variety, and costliness. The procession, under the marshalship of Col. A. Loudon Snowden, took up nearly half the day in passing a given point, and it was supposed that hardly less than forty thousand men were in line. For several days and nights the ex-President had hardly any time that he could call his own; receptions, entertainments, banquets, and other methods of welcome and hospitality being kept up in rapid succession.

A crime in which citizens of Philadelphia were involved, and which caused no little excitement in the city, was the killing of John M. Armstrong, in Camden, on the 24th of January, 1878, by Benjamin Hunter. He had followed his victim across the river at night and waylaid him on the streets. His purpose was to obtain money on policies of insurance which he had taken out on Armstrong's life. The peculiar motive for the crime as well as the dastardly manner in which it had been perpetrated, and the good character which Hunter had previously borne as a citizen, filled the public mind with interest in the fate of the murderer. In July of the same year, after an able defense by ex-Secretary of the Navy George M. Robeson, Hunter was found guilty. He was hanged in the Camden court-house on the 10th of January, 1879, and those who saw the execution—the abject cravenness of the condemned man, his ghastly horror, and the frightful bungling of the hangman—had occasion to remember it as one of the most horrible inflictions of the death penalty ever witnessed.

During the four years succeeding the close of the Centennial Exhibition many efforts were made, by what was known as the Permanent Exhibition Company, to maintain a collection of industrial exhibits in the Main Building, but the enterprise languished. The Philadelphia merchants and manufacturers, as a rule, were indifferent to the undertaking, and the splendid building could attract crowds only at conventions, parades, receptions, and 4th of July celebrations. In 1881 all further efforts to revive popular interest in it were abandoned, and in August of the same year the great edifice was sold at auction for ninety-seven thousand dollars, and in a few months had entirely disappeared.

The electric light, which many private corporations and business firms had already brought into buildings, but which Councils did not consider the city to be in a financial position to introduce for illuminating the streets, came into use through the

agency of the Brush Electric Light Company, which, in 1882, offered to light Chestnut Street for one year free of cost, and which, on December 3d, brilliantly lit up that thoroughfare with forty-nine of its lamps.

A very important movement which subsequently attracted widespread attention, and which has since been a most influential factor in the public life of Philadelphia, was the organization, in December, 1880, of the Committee of One Hundred. The tendency of a majority of the citizens to support the candidates of the Republican party had for years been strongly manifest, but in 1877 the symptoms of an independent feeling among many of that class of citizens, which had displayed themselves so markedly in the election of a sheriff in 1876, began to develop themselves with much vigor. This was particularly the case in the autumn of 1877, when Mr. Robert E. Pattison, a young lawyer, but little known, was elected city controller on the Democratic ticket by a small majority. His administration of the affairs of that office, which had hitherto been looked upon by most citizens as of secondary importance, was instrumental during the next three years in revealing not a few abuses that had grown up in the various departments of the city government. About the same time much attention was also given to the election of Councilmen, and although in 1878, 1879, and 1880, the majority of the voters still indicated their adherence to the Republican organization as a national party, there was a perceptible relaxation of party discipline. A striking instance of this disregard of such obligations was the re-election of Mr. Pattison as controller in November, 1880, by a large majority, at a time when the Republican Presidential ticket was overwhelmingly successful in the city. At this juncture there were two leading causes of much public discontent,—the making of nominations by what was styled "Bossism," the management of the city's Gas Trust, and the collection of taxes, together with allegations of many other evils of minor significance. The cry began to be raised with great vigor that local affairs should be reformed, and that local offices should be administered regardless of partisanship.

On the 15th of November, 1880, a few days after the election of President Garfield, E. Dunbar Lockwood, a leading manufacturer, called a meeting of citizens, at which Amos R. Little presided. That gentleman was directed to appoint a committee of one hundred business men, in which task he was assisted by Joel J. Bailly, Joshua L. Bailly, Rudolph Blankenburg, James A. Wright, and Francis B. Reeves. The following citizens were selected: George N. Allen, William Allen, J. T. Audenreid, William Arrott, Charles B. Adamson, Joel J. Bailly, Alexander Brown, William B. Bement, William Brockie, Charles B. Adamson, Joshua L. Bailly, H. W. Bartol, Henry C. Butcher, John T. Bailey, James Bonbright, Charles H. Biles, Rudolph Blankenburg, George L. Buzby, David Branson, Robert R. Corson, E. R. Cope, B. B.

Comegys, John F. Craig, George V. Cresson, Matthew H. Crawford, Charles J. Cohen, H. T. Coates, Lemuel Coffin, Samuel Croft, Edward H. Coates, A. A. Catsnach, Thomas T. Child, James Dobson, A. J. Drexel, William P. Ellison, George H. Earle, Oliver Evans, George W. Farr, Clayton French, John Field, W. W. Frazier, Jr., Philip C. Garrett, Jabez Gates, R. H. Griffith, D. R. Garrison, James Grabson, John E. Graeff, Henry C. Gibson, Thomas Hart, F. Oden Horstmann, Thomas S. Harrison, Samuel Hecht, R. E. Hastings, Theodore Justice, Nathaniel E. Janney, William H. Jenks, Eben C. Jayne, Charles O. Knight, Godfrey Keebler, Edward Longstreth, Henry C. Lee, Henry Lewis, Amos R. Little, E. D. Lockwood, J. Frederick Loebble, Louis C. Madeira, Thomas G. Morton, James S. Mason, Theodore Megargee, George D. McCressy, John McLaughlin, Aquila Nebeker, Morris Newberger, H. M. Oliver, T. Morris Perot, James Peters, Joseph Parrish, H. W. Pitkin, Thomas Potter, Jr., Charles Roberts, Charles H. Rogers, Francis B. Reeves, Charles Spencer, David Scull, Jr., William Sellers, B. H. Shoemaker, F. R. Shelton, James Speer, Seville Schofield, Samuel G. Scott, J. C. Strawbridge, Alexander Simpson, Jr., Oswald Seidensticker, William Henry Trotter, A. C. Thomas, John P. Verree, Charles Wheeler, George Whiting, George Watson, John Wanamaker, Edward S. Wheeler, John C. Watt, Ellis D. Williams, James A. Wright, William Wood, Henry Winsor, Alexander Whilldin, E. R. Wood, and Christopher Wetherill. The entire committee was composed of Republican citizens, but nearly all of them were business men, and few had held office, or had participated in political affairs. On the 3d of December, Philip C. Garrett, a retired merchant, was elected chairman of the committee, and John Wanamaker's resolution for the appointment of committees on finance, public meetings, and organizations, etc., was immediately passed.

On the 20th of December the committee named John Hunter as its candidate for tax receiver, Joseph L. Caven for city solicitor, and William S. Stokley for mayor, and adopted a rigid declaration of principles on the subject of reform, which Mr. Stokley declined to sign. The result was the substitution, a few weeks later, of Samuel G. King, a Democratic select councilman, in place of Mr. Stokley on the ticket, and a partial coalition with the Democratic party. The movements of the new committee aroused the liveliest interest during the winter of 1880-81. Its members labored day and night with great ardor. They were derided as novices in politics, but all over the country the extraordinary spectacle of these one hundred merchants, manufacturers, and traders combating trained politicians was commented on as an event of uncommon significance. The regular Republicans in the mean time had nominated Mr. Stokley for mayor, George G. Pierie for receiver of taxes, and William Nelson West for city solicitor, while the Democrats, not a few of whom were at first averse to

an alliance with the committee, had named Mr. King for mayor, Mr. Hunter for receiver of taxes, and Edward J. Worrell for city solicitor. This last-named office, however, was not contested for by the committee, who confined their efforts on the city ticket on behalf of Messrs. King and Hunter.*

The campaign was fought with intense bitterness and with much slander. It was decided on the 15th of February by the election of Mr. King as mayor, with 5787 majority, and Mr. Hunter as tax receiver, with 26,586 majority. W. N. West, the Republican candidate who was not opposed by the reform leaders, obtained upward of 20,000 majority. From that time the power of the committee in municipal affairs became pronounced, and it has since done much to change the condition of public life in matters which are of such a nature that they are too recent in their occurrence to be narrated either with a perfect understanding of their ultimate bearing on the city's progress, or without the risk of making invidious references to persons.

It is for this reason that other events of temporary interest which have happened since the year 1880, but which really have no permanent significance, have not been considered worthy of description as a matter of historical record, or which, having such significance, have been described in special articles on the subjects to which they relate.

How much the people of Philadelphia cherish with patriotic pride the memory of the founder of the city was attested in the joyous demonstrations with which they celebrated, in October, 1882, the two hundredth anniversary of the settlement of the city. Never did any community manifest so earnest a spirit of gratitude and reverence for the work of the men who had brought it into being. The name of William Penn, it was plain, had doubly impressed itself upon the popular heart. Traduced and misrepresented as he had been in his lifetime, and dying almost forgotten by the commonwealth which he had founded, his fame after a lapse of two centuries was found to be securely fixed in the hearts of the teeming population that had grown out of his feeble enterprise.

How the great event should be commemorated was a frequent subject of discussion during the year 1882. An industrial exhibition was favored by many, but it was believed, on mature consideration, that the Centennial Exposition had been too recent to cause such a method of celebration to be regarded with interest. It was finally decided that several days should be given up to parades, entertainments, meetings, and other forms of popular demonstration. This purpose was admirably carried out by an organization of the leading citizens known as the Bi-Centennial Association. Under the general management of Alexander P. Colesberry, an executive committee of this association assumed the responsibility of perfecting the details of the celebration. The 22d of October (Sunday) was set aside as a day of special religious services in

the churches. On Monday the celebration was inaugurated at Chester, the modern representatives of William Penn and his party landing at the foot of Penn Street, where they were received by "Lieut. Markham and a group of Quakers, Swedes, and Indians, appropriately dressed in the costume of the date of Penn's actual arrival." The characters represented were assumed by members of the Chester Dramatic Association, among whom were Messrs. John Hare, William P. Lodomus, William H. Schurman, J. A. Martin, Arthur Martin, H. Greenwood, and J. F. Wright. Governor Hoyt delivered an address, and in the afternoon a parade took place, the procession being made up of six divisions, comprising the Red Men, the firemen, the beneficial and temperance societies, the military, the industries, and the butchers. The chief marshal was Col. W. C. Gray, and the line occupied an hour in passing a given point. At midnight of Monday two hundred strokes of the great bell in the State-House were sounded, and the German singing societies, which had previously made a torchlight parade through the city, sang several patriotic airs to the accompaniment of the bands. Maj. Louis J. Ladner was chief marshal, and had about a thousand men under his command.

Tuesday, October 23d, was "landing day" in Philadelphia. The decorations were even more general than during the Centennial, and the city was excited with enthusiasm, to which the presence of fully a half-million of strangers contributed in a large degree. Shortly after nine o'clock in the morning the "Welcome" (a representation of the vessel in which Penn crossed the ocean to America in 1682) came up the Delaware. She was received with a salute from the North Atlantic squadron of the United States navy, comprising the ships "Tennessee" (flag-ship), "Kearsarge," "Enterprise," "Atlantic," "Yantic," "Vandalia," and monitor "Montauk." A marine procession was formed under the command of Commodore James M. Ferguson, and the line of vessels escorting the "Welcome" steamed to the foot of Dock Street, the point where it is said Penn had landed two hundred years previously. William Penn was represented by Mr. Vanhorn, a local costumer, and his suite was composed of Thomas Holmes, surveyor-general, represented by William Courtright; Capt. Markham, Deputy-Governor, represented by J. C. Johnson; Lasse Cock, the Swedish interpreter, represented by Thomas Walton; the Indians representing the Delaware Iroquois and Mengue tribes, headed by Tamanend, sachem of the Delawares, represented by William J. Hanger, and sachem represented by Charles J. Hanger. Succeeding these were the Germans, Swedes, and Friends, all in the correct costumes of the seventeenth century. They were received by the Bi-Centennial Committee, Edward C. Knight, chairman, and among the members of which were Col. M. Richards Muckle, T. Morris Perot, and

Charles M. Laing. Mr. Knight spoke a few words of welcome, and the committee and the landing party proceeded to South Broad Street, to take part in the grand procession that was then forming, William Penn occupying a seat in a barouche with Messrs. Knight, Samuel J. Levick, and James Pollock. Penn wore a low-crowned, broad-brimmed black hat, as shown in West's picture of the treaty with the Indians. Beneath his long brown coat he wore a pearl-colored waistcoat, lace frills at the neck and wrist, a blue sash passing around the body, drab knee-breeches, drab stockings, and low buckled shoes.

Passing up Dock Street the line halted at the Blue Anchor Inn, where a stand had been erected, and Governor Hoyt and staff, Clayton McMichael, and other members of the Bi-Centennial Association, greeted Penn. William Penn made an address, which was replied to by Sachem Tamanend. There were more than twenty thousand men in the procession, which moved from Broad Street as soon as William Penn and his party had been brought into line. The chief marshal was Thomas M. Thompson, assisted by a staff consisting of Col. Theodore E. Weidersheim, Gen. Louis Wagner, Col. R. P. Dechert, S. Bonaffon, Jr., Silas W. Pettit, Charles K. Ide, Alexander Krumbhaar, Benjamin K. Jamison, Walter G. Wilson, George S. Graham, and J. G. Ditman. The aids to the chief marshal were Col. W. W. Allen, Maj. Louis J. Ladner, Maj. Wendell P. Bowman, Maj. S. S. Hartranft, Maj. A. L. Wetherill, Charles Laing, Charles S. Keyser, Clarence A. Wray, Clarence A. Hart, Oscar M. Wilson, N. E. Janney, Carl Edelheim, George W. Kendrick, Jr., A. J. Ostheimer, Roberts Stevenson, Lewis Wiener, Harry Blynn, John B. Parsons, Merle Middleton, James F. Wray, Jr., Alexander Kinier, M. O. Raiguel, Charles McCarthy, Caleb B. Fox, William H. Castle, Robert C. Bache, W. B. Cunningham, Henry K. Fox, Edwin J. Howlett, William S. Roose, J. Martin Yardley, H. Harrison Groff, J. C. W. Frishmuth, H. D. C. Brolaskey, James A. Norris, F. Perot Ogden, Henry C. Roberts, William W. Littell, B. Frank Breneman, Harvey K. Reikert, and William S. Schofield, who marched at the heads of respective commands of the different divisions of the parade.

The first division, under the marshalship of James N. Kerns, was composed of a battalion of marines and a battalion of sailors from the fleet, three more companies of marines, another battalion of sailors, Rear-Admiral Cooper and staff, the Fifth Regiment of Artillery, United States army, and employes of the mint, the custom-house, the post-office, the arsenal, the internal revenue office, and the United States marshal's office. A coining-press of the mint was in operation on a wagon, and thousands of medals struck from it were distributed to the crowds.

The second division, of which William B. Smith was marshal, was emblematic of the governments of the city and State. In it marched the police, the fire department, and the members of Councils.

The third division, of which N. E. Janney was marshal, was distinguished as containing the Penn party. Fifty Quakers were personated by members of the Association of the Knights of the Golden Eagle, and twelve men, from the same order, dressed in petticoat pants, sleeveless jackets, and loose shirts, stood for the crew of the "Welcome." The aborigines were done justice to by eighty-five members of the Improved Order of Red Men, costumed in paint and feathers. Penn's carriage was received with applause as quickly as the "Founder" came in sight of the crowd.

The fourth division, Marshal John Haverstick, "Great Mishinewa," was altogether composed of the tribes of the Red Men. There were nearly four thousand of them marching in Indian costume, and having on floats curious and picturesque tableaux of life in the forests prior to the advent of the whites. The fifth division embraced the German societies, Louis J. Ladner marshal, and was largely made up of tableaux on floats. The sixth division was one of the greatest events of the day. It included within its ranks the firemen of the past and the firemen of the present. John D. Ruoff was the marshal. The Philadelphia Association of Volunteer Firemen carried the old "Hope" engine, which is said to be the oldest in America. They had, too, the first steam fire-engine used in Philadelphia. They were scarcely less an object of attraction than the Volunteer Firemen's Association of Baltimore, who marched in black coats and high hats, with Charles T. Holloway at their head. The line showed the evolution of the fire-engine from the bucket and "pump-squitter" to the apparatus of the present time. The seventh division consisted of a thousand butchers, with Frank Bower as their marshal; the eighth division, the total abstinence societies, with Patrick Lynch as marshal; the ninth division, English and Scotch societies, with George W. Kendrick, Jr., as marshal; the tenth and eleventh divisions, various lodges and orders, with Lewis Linde and James A. Douglass as marshals.

The procession occupied nearly four hours and a half in passing a given point. The streets, especially Chestnut and Broad, were one mass of color and decoration. At night the Schuylkill navy passed in review before Commodore Keys, and there was a magnificent display of fireworks in Fairmount Park. An unfortunate accident occurred during the pyrotechnic display; six people were killed, and many others were wounded by the bursting of a bomb.

The next day, the 26th, was a general holiday, without any popular official features beyond the display of the employ  s of the factories, mills, and shops. In this parade the numbers were quite twenty-four thousand, and the mechanical operations that were shown made it remarkably interesting. Walter G. Wilson was the marshal, and the fourteen divisions were commanded by the following marshals: William A. Delaney, John W. Ryan, Albert J. Phillips, C. R.

Crosier, Henry Pollock, G. V. Cresson, B. P. Obodyke, Cyrus Bergner, H. W. Gray, W. T. Cunningham, J. H. Cooper, W. W. Jones, N. Fee  e Lightning, and James H. Larzalere.

At night the mystic pageant (a lesson learned from the New Orleans Mardi Gras and the Baltimore Oriole) occupied the principal streets. B. P. Obodyke captained the display, and had as his chief aid Maj. J. Henry Behan, of New Orleans. The tableaux which attracted the most attention were the representations of colonial scenes, such as Penn's landing, his treaty with the Indians, the battle of Bushy Run, the battle at Chew's house, Germantown, the last delivery of beaver-skins, and Washington at Valley Forge; the remainder of the spectacle being chiefly devoted to Hindoo mythology.

On the third day, Friday, October 27th, the holiday continued, and the streets were packed with spectators. Three thousand Knights Templar, under the command of Right Eminent Sir B. Frank Brene-man, marched from Pine Street to Columbia Avenue, and in the evening participated in a reception at the Academy of Music, where Sir George S. Graham and Sir David MacIver delivered addresses. The exercises of the Welsh choirs were concluded, and the first prize of twelve hundred dollars was awarded to the Plymouth and Nanticoke Choral Society.

The athletic contest in the Centennial grounds, the unveiling of the bronze statue of Morton McMichael, near Girard Avenue bridge, bicycle races, singing festivals, and other diversions contributed to the holiday pleasure. By this time the crowds of strangers filling the streets were so thick that shopkeepers began to protest that the celebration, instead of bringing them trade, had made trade almost impossible by making the streets almost impassable. The three parades had also begun to exhaust the enthusiastic feelings of the population of the city. But the military display on the 27th was, nevertheless, the occasion of drawing out a large proportion of the people. Fifteen thousand men, under the command of Maj.-Gen. John F. Hartranft, were in line. About one-half were militiamen, the others members of the Grand Army of the Republic. While this procession was marching the clouds, which for the first time in the week had begun to lower, poured down rain on the soldiers. The children were not without their part to play in all these varied ceremonies, and in the evening fifteen hundred girls from the public schools gave a vocal concert and listened to addresses by George S. Graham and Edward C. Knight. This celebration, which took place at the Academy of Music, had been suggested by Governor Hoyt, who delivered the principal address. It would not be proper to omit from this narrative the fact that the Bi-Centennial Association was originated and its first meetings were held in the office of *The Keystone*, the Masonic newspaper, at No. 237 Dock Street. J. Thomas Stavelly, one of the proprietors of the paper, was the

treasurer of the Association, and Clifford P. MacCalla, its editor, was the corresponding secretary. The recording secretary was Charles W. Alexander. At the first meeting there were present the late Prof. J. W. Burns, afterwards actuary of the association, Hon. Henry D. Moore, James C. Thompson, Charles W. Alexander, and J. Thomas Staveland.

Two hundred years of history were thus completed. The little collection of huts on the banks of the Delaware had grown into a great and opulent city. In all the elements of civic power it was, at the end of two centuries, sound, prosperous, and progressive. In all that contributes to the substantial comforts and happiness of a population, it has never been surpassed by any other city of which history makes record. Its progress, if it has not shared the more impetuous spirit of other American communities, has been healthful in being gradual. If it has lacked something of that audacity and ingenuity with which wealth is rapidly collected in the feverish movements of modern business, it has gained much in the attention which its people have given to the enlargement of their social and domestic amenities. In its schools, its churches, and above all its homes, it stands proudly pre-eminent among the cities of the world. No worthier title, none that its founder would have cherished for it with more satisfaction, than that of the "City of Homes." The spirit of contentment and thrift which he and his associates infused into the infant settlement has not yet entirely disappeared. How well the people are animated by a patriotic love for their city was shown in the memorable celebration which we have just described. How progressive is their tendency to better forms of existence as a community has been made manifest in every chapter of this volume. The near future of Philadelphia will witness many changes and developments. The destiny which lies before it is very far from being fulfilled; but it will be well if in the years to come its people are as happy, comfortable, and prosperous as they are to-day.

November 7th was the general election. The vote of the city was as follows: For Governor: James A. Beaver (Rep.), 70,875; Robert E. Pattison (Dem.), 67,411; John Stewart (Ind. Rep.), 7992; Thomas A. Armstrong (Greenback-Labor), 672; Prohibitionists, 99. Lieutenant-Governor: William T. Davies (Rep.), 71,998; C. F. Black (Dem.), 65,224; Levi B. Duff (Ind. Dem.), 8893. Secretary of Internal Affairs: J. M. Greer (Rep.), 71,976; J. Simpson Africa (Dem.), 65,343; G. W. Merrick (Ind. Rep.), 8897. Judge of Supreme Court: W. H. Rawle (Rep.), 70,157; Silas M. Clark (Dem.), 65,174; G. Junkin (Ind. Rep.), 9773. Congressman at Large: Marriott Brosius (Rep.), 72,470; M. F. Elliott (Dem.), 63,798; William McMichael (Ind. Rep.), 10,150. Congress, First District: Henry H. Bingham (Rep.), 15,709; J. Cadwalader (Dem.), 11,875; Lucius H. Warren (Ind. Rep.), 637. Second District: Charles O'Neill (Rep.), 14,984; J. M. Dundas (Dem.), 11,440. Third District: William

M. Maull (Rep.), 7303; Samuel J. Randall (Dem.), 11,688. Fourth District: William D. Kelley (Rep.), 21,896; C. M. Swain (Dem.), 13,844; — Eberhart (Greenback-Labor), 50. Fifth District: A. C. Harmer (Rep.), 19,049; T. J. Martin (Ind. Rep. and Dem.), 16,776. Sheriff: George DeB. Keim (Rep.), 70,197; John L. Grim (Dem.), 61,329; William J. Hofmann (Committee of One Hundred), 14,880. Judge of Common Pleas (No. 4): Amos Briggs (Rep.), 69,393; Michael Arnold (Dem. and Committee of One Hundred), 76,520. Register of Wills: James L. Kinsey (Rep.), 72,385; Walter E. Rex (Committee of One Hundred and Dem.), 72,961. City Treasurer: William B. Irvine (Rep.), 73,999; S. Davis Page (Dem.), 72,159.

The trustees of the University of Pennsylvania resolved to organize a separate Collegiate Department for the complete education of women whenever the necessary funds (\$30,000) shall be provided.

The fiftieth anniversary of the building of the first locomotive at the Baldwin works was celebrated on November 23d, by the completion of the six thousand four hundred and seventy-seventh engine turned out of the shops. The first locomotive was "Old Ironsides," which was placed on the Philadelphia and Germantown Railroad, Nov. 23, 1832. M. W. Baldwin drew the plans for this engine from his inspection of parts of an English locomotive.

On January 13th City Controller Pattison sent his report of the financial condition of the city on Jan. 1, 1883, to Councils. The total receipts from all sources in 1882 were \$13,425,404.97; total expenditures, \$13,255,684.53; excess of receipts beyond expenditures, \$169,720.44. General cash balance, \$3,125,685.27; from this is to be deducted outstanding warrants, balances not merging, sinking fund money, etc., leaving the clear surplus cash balance January 1st, \$372,425.22. Funded and floating debt of the city January 1st decreased during the year \$706,511.31. Amount of funded and floating debt January 1st, \$67,922,892.41. Available assets—sinking funds, outstanding taxes, cash, etc.—estimated at \$28,705,016.80.

On January 30th, William M. Taggart, elected by City Councils city controller, endeavored to take possession of the office, and was prevented by an injunction issued by Court of Common Pleas. On the succeeding 19th of February the Supreme Court decided the case of Taggart against the commonwealth, in which he claimed to be legally elected controller by the City Councils. This decision was, that the controller was a county officer, and under this judgment Taggart was ousted and S. Davis Page, appointed controller by Governor Pattison and confirmed by the Senate, was held to be the proper officer.

On February 12th the detailed statement of real and personal property for 1882-83, completed for the Board of Revision of Taxes, was: Real estate, \$562,687,555; taxable at full city rate, \$506,188,483; suburban rate, \$37,447,397; farm rate, \$19,051,765; fur-

niture, \$5,698,280; horses, \$2,304,965; cattle, \$139,250; carriages to hire, \$119,205; carriages (pleasure), \$653,205. Total, \$571,483,255, an increase of \$17,708,026 over the assessment for 1882. Assessment for State tax: Moneys at interest, \$49,571,325; gold watches subject to tax, \$14,645; silver, \$366; other watches, \$19.

On February 20th the municipal election was held for members of Councils, school-directors, ward election-officers, and one magistrate. The result was as follows: Vote for magistrate, John T. Thompson (Rep.), 59,264; Ebenezer Cobb (Dem., recommended by the Committee of One Hundred), 51,167. Total vote for magistrate, 110,531. Of eleven Select Councilmen to be chosen, five were elected who were indorsed by the Citizens' Committee of One Hundred, four were chosen who were opposed by that committee. Of fifty Common Councilmen elected, thirty-four were indorsed by the Committee of One Hundred, and thirteen of their candidates defeated. Twenty-fourth Ward vote for dividing the ward, 582; against dividing, 3213.

On February 28th, the receivers of the Philadelphia and Reading Railroad and Coal and Iron Companies made a formal transfer of the property to the president and managers of these corporations. The Shoe and Leather Trade Association was formed by persons engaged in those lines of business.

The Court of Common Pleas, No. 3, on March 31st, gave judgment in the case of the Commonwealth against David H. Lane, recorder of Philadelphia, and gave judgment of ouster. Lane had been removed by Governor Pattison, but refused to give up the office. On May 23d the long-pending question as to the constitutional right of the Governor to remove Lane was decided by the Supreme Court in favor of the Governor. On May 29th the Legislature passed an act abolishing the office.

On July 4th the monument to the Union soldiers of the civil war, in Market Square, Germantown, was dedicated with an imposing military and civic demonstration, and an oration by Gen. James A. Beaver.

At noon on July 19th, two hundred and forty of the operators employed in Philadelphia by the Western Union Telegraph Company left their work and took part in the general strike for increased pay throughout the United States. Such of them as the company was willing to employ resumed work on August 17th, when the strike was officially declared to have failed and terminated. In this city the strike was under the direction of C. L. Laverty, president of the Philadelphia Assembly of the Brotherhood of Telegraphers.

The Board of Revision of Taxes sent to the city controller on August 15th their annual statement of real and personal property subject to taxation in 1884, as follows: Real estate, city rate, \$516,243,700; suburban rate, \$38,360,415; farm rate, \$19,123,990. Total real estate value, \$573,728,105. Personal prop-

erty, furniture, horses, cattle, and pleasure-carriages, \$9,884,578. Total, \$583,612,683, being an increase of \$12,129,428 over the valuation for 1882. On September 1st the annual statement of the city controller sent to Councils was as follows: estimated expenses for 1883, founded on demands made by the departments, \$17,735,484.88, being \$2,937,448.62 in excess of all appropriations, regular and extra, for the year 1883, and \$4,880,234.87 beyond the limits authorized by the adoption of an \$1.85 tax-rate. The balance in excess (\$1,878,585.08) over the regular appropriations and income was made up from appropriations from the surplus of 1880-82 remaining on hand in the treasury. Rate necessary to raise the money demanded, \$2.75 for \$100 of valuation; rate recommended by the controller (estimates to be cut down accordingly), \$1.80, which, on the figures of the expenses of 1883, would raise all that was necessary, and \$301,044.22 in excess. Estimated receipts from all sources for 1884, \$12,903,938.47; valuation of taxable property, real and personal, by assessors, \$583,612,683; funded debt, Aug. 1, 1883, \$66,779,216.24; amount in sinking-fund, \$24,264,884.41; excess of funded debt over sinking-fund securities, \$42,514,331.83; decrease during the year in funded debt of the city, \$1,069,525.

The commissioners on September 11th reported that the number of voters in Philadelphia County registered in 1883 was two hundred and six thousand six hundred and two, being two thousand two hundred and eighty-one less than in the previous year.

The German Bi-Centennial, or commemoration of the two hundredth anniversary of the settlement of Germantown by the thirteen families who followed Daniel Pastorius from Crefeld, Germany, was opened on Saturday night, October 6th, by a grand vocal and instrumental concert at the Academy of Music. Sixty musicians and about three hundred singers filled the stage. Dr. F. H. Gross, president of the Executive Committee, delivered the opening address, and was followed by Dr. G. Kellner, who reviewed the events of the past two hundred years. Samuel W. Pennypacker was the orator of the evening, and in an eloquent and highly interesting address compared the careers of Penn and Pastorius. The concert programme embraced Von Weber's Jubilee Overture, Mendelssohn's "Oh, Sons of Art," the Tannhauser Overture, Rietz's "Morning Song," Raffael's "United Germany," and other works of the famous German composers. The chorus and orchestra were led by Carl Sentz and S. Behrens.

On Saturday commemorative services were held in the Jewish synagogues. On Sunday, October 7th, the German churches of all denominations were thronged, and the services had special reference to the Bi-Centennial; the congregations joining in the chanting of the *Te Deum* and "Grosser Gott."

Monday, October 8th, was the third and culminating day of the jubilee. Not since the rejoicing consequent upon the victorious close of the war of 1870 echoed

across the Atlantic, had the Germans of Philadelphia had such a festival as that of this memorable day. The great procession formed on North Broad Street in the morning, with Louis J. Ladner as chief marshal, and the following staff: Robert P. Dechert, P. N. Guthrie, George R. Snowden, Thomas E. Wiedersheim, P. Lacey Goddard, G. H. North, William B. Smith, and O. B. Bosbyshell. Among the invited guests were Carl Schurz, Gen. Franz Sigel, and Gen. John F. Hartranft. Tableaux on floats represented Germania, William Penn surrounded by the farmers and artisans, the house of one of the early German settlers, the Freedom of the Press, the Emancipation of the Slaves, and Prosperity. The second division was made up of the military, Grand Army of the Republic, and the carriages in which rode Mayor King and the members of Councils. The third division numbered two thousand members of beneficial, charitable, and singing societies, the Canstatter and Concordia Societies making particularly superb and picturesque displays. The Bavarian Society had a float on which was pictured the Germantown of 1683, with a group representing Pastorius and his little band of pioneers. The fourth division comprised the Camden deputation of trades and societies. The fifth and sixth divisions included the butchers, bakers, cabinet-makers, and barbers. As they marched they baked bread and hammered iron in their wagons, and the butchers made sandwiches, which they distributed among the crowd. The brewers made up the seventh division, and lavished a wealth of taste as well as money on their display, a steady stream of free beer running from the many casks they carried in the line. The eighth and last division was a trades display, in which a large number of manufacturing establishments were represented. There were ten thousand men in the procession, and it took up two hours and a half in passing a given point. Much tasteful and elaborate decoration was to be seen in the principal streets. The celebration terminated on Tuesday, October 9th, with a picnic in the Schuetzen Park, when addresses were delivered by Carl Schurz, H. A. Rollerman, Daniel Ermentrout, Judge Hageman, ex-Governor Hartranft, Charles Wistar, and Col. M. Richards Mucklé. The Philadelphia singers, F. W. Kuenzell director, gave a concert, and the Philadelphia Turn Circuit exhibited gymnastics.

On October 24th, the Bi-Centennial Association formally presented to the Park Commissioners the Letitia House, the cottage of William Penn, which was built in 1682, and recently removed from Letitia Court to Fairmount Park. The first State-House of the province, Letitia House is also the oldest mansion in the city.

November 6th brought around the general election of 1883. In the city the Republican ticket was successful by the following vote: Auditor-General: J. B. Niles (Rep.), 75,569; R. Taggart (Dem.), 54,902; J. R. Fordham (Pro.), 248; T. P. Rynder (Gbk.), 89.

State Treasurer: William Livsey (Rep.), 76,777; J. Powell (Dem.), 54,783; E. Howard (Pro.), 252; A. T. Marsh (Gbk.), 1056. District Attorney: George S. Graham (Rep. and Dem.), 126,225; W. H. Peace (Pro.), 547. Clerk of Quarter Sessions: William E. Littleton (Rep.), 75,466; George R. Snowden (Dem.), 55,061; E. M. Bayne (Pro.), 216. Coroner: Thomas J. Powers (Rep.), 73,843; William H. Hooper (Dem.), 55,466; S. Daggy (Pro.), 215. City Controller: E. H. Jeffries (Rep.), 65,770; S. D. Page (Dem. and Committee of One Hundred), 64,658; H. De Walt (Pro.), 178.

The Protestant Christians of Philadelphia entered with zeal and vigor into the celebration on Saturday, Nov. 10, 1883, of the four hundredth anniversary of the birth of Martin Luther. In the afternoon the Quarter-Centennial Jubilee took place at the Academy of Music. The house was crowded, and on the stage five hundred members of the English, German, and Swedish Lutheran Churches composed a chorus of mixed voices. The German Orchestra led the singing of appropriate hymns, and Rev. Dr. G. F. Krotel, pastor of the Holy Trinity Church of New York City, delivered an address upon the life and work of Luther. The music and singing was under the direction of Charles M. Schmitz. Among the prominent persons present on the occasion were Mayor King and Judges Thayer, Pierce, Arnold, Biddle, and Hanna. On Sunday, the 11th, reference was made in almost every church of the city to Martin Luther, and the Lutheran Churches in particular made great preparations for the celebration of their leader's nativity. At the vesper services of St. Alphonsus Catholic Church, the Rev. Hubert Schick sharply criticised the reformer in a sermon upon "The Life and Teachings of Martin Luther, as gathered from his own writings." Eight lodges of the American Protestant Association proceeded, under the marshalship of Alexander Crozer, to Broad Street Methodist Episcopal Church, when Rev. W. Downey delivered a sermon entitled "Luther, the Hero of Truth and Hated of Rome."

One of the most exciting political contests that has ever agitated Philadelphia culminated in the municipal election on Tuesday, Feb. 19, 1884. Mayor King, who had been elected by the Democrats and Reformers in 1881, was renominated, and was indorsed by the Committee of One Hundred as the reform candidate. The Republicans nominated William B. Smith for mayor, and George G. Pierie for receiver of taxes, but subsequently withdrew the latter and indorsed John Hunter, who was thus on all the regular tickets. A large number of Republicans, however, voted for Pierie. The following shows the official count of the votes: Mayor: Smith (R.), 79,552; King (D.), 70,440; E. G. Palen (Prohibition), 258. Receiver of taxes: Hunter (R. and D.), 110,226; Daniel L. Leeds (Prohibition), 6049; scattering: Pierie (R.), 26,287; William McMullen (D.), 1586. City solicitor:

Charles F. Warwick (R.), 82,247; Furman Sheppard (D.), 68,436; J. M. Washburn (Prohibition), 185. Although party feeling ran very high, the election passed off in comparative quiet, and there were no serious breaches of the peace.

There is no city, however insignificant, whose history is not instructive; there is no history, however feebly written, if it be a faithful record of facts, but is fraught with profitable lessons. And whatever may be the defects of the present work—and there must be some—the mere events that it recites will serve to show what Philadelphia once was, who originally occupied it, and by what means and by whom it has become the second metropolis upon the American continent. The struggles of empires and the convulsions of nations, while they have much of sublimity, have also much of uncertainty and indistinctness. They are too large for the grasp of ordinary minds or too indefinite to act on common sensibilities, while the interests awakened by the details of local history are such as, from the facility of comprehension and the identity of the objects presented, must necessarily come home at once to the feelings of every reader. They place us by the firesides or walk with us among the graves of our fathers, attaching a living story to the thousand inanimate objects with which they were surrounded. Change of location does not always wean the affection away from the old fireside. By the aid of memory we are privileged to call back the early by-gone scenes and appreciate the lessons we received that had so important a bearing on our subsequent life.

The great object of local history is to furnish the first elements of general history,—to record facts rather than deductions from facts. Many facts, minute in themselves, and regarded by many as trivial and unimportant, are really of great service. The details, which it is the appropriate province of the local historian to spread before the public, are not so much history itself as materials for history. It is the work of the general historian, who has before him all the particulars of the great natural and political landscape, to exhibit the connection of the several parts, and to show how they depend one upon another in bringing about the great changes which have been

taking place and affecting the condition of society. To trace the history of our ancestors and transmit a record of their deeds to posterity is a duty we owe to the past and to the future. The work, however, must be done from unselfish motives. It is useless to disguise the fact that the labor of collecting the materials and preparing the same for publication, brief and imperfect as they may be, is one of magnitude. No one, until he has tried the experiment, can fully appreciate the labor and patience which are requisite in connecting isolated facts, and the perplexity which is caused in reconciling apparent contradictions and removing doubts. Such labor is never remunerative; but the consciousness of having redeemed from undeserved neglect the history of our homes and of our forefathers, and rescuing from oblivion many facts which would otherwise have been lost, will be a source of gratification, if no other reward is received.

No people in the world can have so great an interest in the history of their city as those of Philadelphia, for there are none who enjoy an equally great share in their country's historical acts and who have been blessed with more prosperity. The original town-plat was a parallelogram two miles long, from the Delaware to the Schuylkill, and one mile wide, containing nine streets east and west and twenty-one north and south. Philadelphia outgrew all the original boundaries many years ago, and now covers a greater area than any other city in America. It has a full million of population, over 170,000 buildings, and 156,000 dwellings, of which 110,000 are owned by occupants, and it is properly denominated "the city of homes." It has 1607 miles of streets, roads, and alleys, 507 miles of which are paved, and these avenues are drained by 214 miles of sewers; over 772 miles of water mains and 742 miles of gas mains furnish water and light. The city has an area of 129 square miles, guarded by a police force of 1427 men, and is protected from fire by 29 steam fire-engines. The street railways cover about 352 miles, and carry about 104,648,000 passengers annually. The city is educated by over 450 public schools, which are attended by 90,000 pupils. Such a record surely constitutes a truly "great city" in size and in population, while the manufacturing and commercial wealth of the city has reached gigantic proportions.
